SECOND SYMPOSIUM ON CHROMATOGRAPHY

Brussels, September 14th and 15th, 1962

The Belgian Society of Pharmaceutical Sciences is organizing a second symposium on chromatography, which will be held on Friday 14th and Saturday 15th of September 1962. At this symposium the theoretical aspects as well as the most diversified practical applications of chromatography will be considered.

All persons who are interested in chromatography are invited to participate at this symposium. Registrations will be accepted until August 1st, 1962. Participants who wish to give a lecture are invited to register before July 1st, 1962.

The official languages at the symposium will be French, Dutch, English and German.

The registration fee has been fixed at 200 Belgian francs, and may be paid to the Postal Account 1090.00 of the "Banque de Bruxelles", to the name of "Mme HANS-Melle RENOZ-Symposium de Chromatographie", No. A 52/33173.

A scientific exhibition will be held during the two symposium days.

Registration forms can be obtained from the Secretary's office of the Belgian Society of Pharmaceutical Sciences, 11, rue Archimède, Brussels 4.

BOOK REVIEW

Gas Chromatography, by E. BAYER, an Elsevier Monograph, Elsevier Publishing Co., Amsterdam, 1961, xii + 240 pages, price Dfl. 13.00, 26 s.

The original German edition of this book, which was reviewed some time ago in this journal (Vol. 3 (1960) 380) has now been revised and translated into English. Although there are already numerous books on gas chromatography in the English language it will be welcome as an introduction to the topic. An appendix lists a large number of retention volumes (30 tables) and there is a reference list (420 references) and a subject index. The price has been reduced to about one third of the price of the German edition.
