## CUMULATIVE SUBJECT INDEX

### J. CHROMATOGR. A VOLS. 802–850

# A

#### **Absorbance detection**

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

Superporous agarose beads as a hydrophobic interaction chromatography support 830(1999)275

#### **Absorption**

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

#### **Accelerated Solvent Extraction**

see Pressurized liquid extraction 814(1998)187

#### **Acid–base equilibria**

Role of chemical equilibria in the capillary electrophoresis of inorganic substances 834(1999)3

#### **$\alpha_1$ -Acid glycoprotein**

Sparteine as mobile phase modifier in the chiral separation of hydrophobic basic drugs on an  $\alpha_1$ -acid glycoprotein column 818(1998)43

#### **Acoustic effects**

Acoustic effects in chromatography 850(1999)9

#### ***Actinomycetes***

Identification of alkaloids and polyketides in an *Actinomycete* by high-performance liquid chromatography with mass spectrometric and UV–visible detection 818(1998)187

#### **Activity coefficients**

Association between cobalt(III) coordination compounds and anions measured by capillary electrophoresis 836(1999)93

#### **Adsorbents**

see also Affinity adsorbents, Sorbents and Stationary phases

Development and application of a thermal desorption method for the analysis of polar volatile organic compounds in workplace air 809(1998)47

Evaluation of a new graphitized carbon black employed in sampling volatile organic compounds 810(1998)131

Measurement of volatile organic compounds by the US Environmental Protection Agency Compendium Method TO-17. Evaluation of performance criteria 813(1998)101

Recent developments of magnetic beads for use in nucleic acid purification 816(1998)107

Frontal chromatography of proteins: The effect on column performance of the restricted diffusion of molecules in porous chromatographic adsorbents 828(1998)345

Evaluation of natural crab shell as an adsorbent for preconcentrating airborne volatile organic compounds collected in a canister 829(1998)215

Study of nitrophenols preconcentration using quinolin-8-ol immobilized on controlled-pore glass in the presence of iron(III). Chromatographic determination of dinoseb in lemon juice 839(1999)227

- Novel family of multi-layer cartridges filled with a new carbon adsorbent for the quantitative determination of volatile organic compounds in the atmosphere 845(1999)317
- Gas chromatographic characterization of the adsorption properties of the natural adsorbent CACMM2 845(1999)373
- Effect of the chelate ring size of diamine–Co(III) complexes on their  $hR_F$  values obtained under salting-out thin-layer chromatography conditions 847(1999)291
- Thin-layer chromatography of *facial* and *meridional* isomers of Co(III) and Cr(III) complexes on polyacrylonitrile sorbent 847(1999)297
- Molecularly imprinted adsorbents for positional isomer separation 849(1999)319
- Adsorption**  
Salt-promoted adsorption of proteins onto amphiphilic agarose-based adsorbents. II. Effects of salt and salt concentration 803(1998)83
- Electrochromatographic contributions in capillary electrophoresis of biomolecules 809(1998)173
- Visualising intraparticle protein transport in porous adsorbents by confocal microscopy 813(1998)387
- Determination of heats of adsorption of hydrocarbons on a synthetic clay by gas–solid chromatography using a wall coated open tubular column approach 844(1999)191
- Study of the sorption of carbon monoxide, oxygen and carbon dioxide on platinum–rhodium alloy catalysts by a new gas chromatographic methodology 845(1999)67
- Adsorption chromatography**  
(Normal-phase) capillary chromatography using acrylic polymer-based continuous beds 837(1999)25
- Adsorption energy**  
Measurement of adsorption energies on heterogeneous surfaces by inverse gas chromatography 845(1999)103
- Adsorption energy distributions**  
Estimation of the adsorption energy distributions for the Jovanovic–Freundlich isotherm model with Jovanovic local behavior 849(1999)45
- Adsorption isotherms**  
Optimal operation of simulated moving-bed units for non-linear chromatographic separations. II. Bi-Langmuir isotherm 805(1998)37
- Gas chromatographic determination of binary adsorption isotherms 806(1998)293
- Study of the thermodynamics and mass transfer kinetics of two enantiomers on a polymeric imprinted stationary phase 810(1998)1
- Detailed study of the mass transfer kinetics of Tröger's base on cellulose triacetate 813(1998)1
- Continuous enantiomer separation of the volatile inhalation anesthetic enflurane with a gas chromatographic simulated moving bed unit 813(1998)333
- Thin-layer ion-exchange chromatography of proteins 816(1998)97
- Characterization of hematite and its interaction with humic material using flow field-flow fractionation 816(1998)145
- Langmuirian parameters for Tenax GC adsorption of airborne hydrocarbons and oxygenated compounds 816(1998)195
- Langmuirian parameters for Tenax GC adsorption of airborne organohalogen compounds 823(1998)171
- Design of the simulated moving bed process based on adsorption isotherm measurements using a perturbation method 827(1998)175
- Overall mass-transfer coefficients in non-linear chromatography 827(1998)235
- Application of the two-film theory to the determination of mass transfer coefficients for bovine serum albumin on anion-exchange columns 827(1998)259
- Comparison of protein adsorption isotherms and uptake rates in preparative cation-exchange materials 827(1998)281
- Fitting competitive adsorption isotherms to the distribution data in normal phase systems with binary mobile phases 831(1999)131
- Influence of solvent uptake and swelling by poly(styrene–divinylbenzene) column packings on sample sorption rate and band broadening in reversed-phase liquid chromatography 835(1999)3
- Boronate affinity adsorption of RNA: possible role of conformational changes 840(1999)205
- Gas chromatographic characterization of the adsorption properties of the natural adsorbent CACMM2 845(1999)373
- Estimation of the adsorption energy distributions for the Jovanovic–Freundlich isotherm model with Jovanovic local behavior 849(1999)45
- Adsorption model**  
Retention in reversed-phase chromatography: partition or adsorption? 829(1998)1

**Aerosols**

Determination of polar terpene oxidation products in aerosols by liquid chromatography–ion trap mass spectrometry 833(1999)121

**Affinity absorbents**

see also Immunoabsorbents

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

Use of compact, porous units with immobilized ligands with high molecular masses in affinity chromatography and enzymatic conversion of substrates with high and low molecular masses 803(1998)61

Hybrid affinity chromatography of  $\alpha$ -galactosidase from *Verbascum thapsus* L. 808(1998)133

Improved fluorometric and chromatographic methods for the quantification of fumonisins B<sub>1</sub>, B<sub>2</sub> and B<sub>3</sub> 815(1998)41

Expanded bed chromatography for one-step purification of mannose binding lectin from tulip bulbs using mannose immobilized on DEAE Streamline 822(1998)19

Selective adsorption of poly-His tagged glutaryl acylase on tailor-made metal chelate supports 848(1999)61

Salt-induced immobilization of affinity ligands onto epoxide-activated supports 849(1999)1

Comparative studies on chemically and enzymatically coupled DNA–Sephacrose columns for purification of a lac repressor chimeric fusion protein 849(1999)403

**Affinity capillary electrophoresis**

Effect on the partition equilibrium of various drugs by the formation of mixed bile salt/phosphatidylcholine/fatty acid micelles. A characterization by micellar affinity capillary electrophoresis. Part IV 809(1998)219

Motif 2 in adenosine kinase homologous ginseng polypeptide showed affinity to D-ribose by capillary zone electrophoresis and surface plasmon resonance 817(1998)173

Determination of the minor whey protein bovine lactoferrin in cheese whey concentrates with capillary electrophoresis 817(1998)187

Analysis and characterisation of cyclodextrins and their inclusion complexes by affinity capillary electrophoresis 836(1999)3

Development of capillary electrophoresis methods for the analysis of fluoroquinolones and application to the study of the influence of humic substances on their photodegradation in aqueous phase 837(1999)253

Use of a partial-filling technique in affinity capillary electrophoresis for determining binding constants of ligands to receptors 840(1999)261

**Affinity chromatography**

see also Immobilized metal affinity chromatography and Immunoaffinity chromatography

Biphasic thermodynamic characterization of interactions by quantitative affinity chromatography and biosensor technology 803(1998)291

**Affinity electrokinetic chromatography**

Semisynthetic chondroitins as chiral buffer additives in capillary electrophoresis 845(1999)247

**Affinity macroligand**

Affinity precipitation – an alternative to fluidized bed adsorption? 827(1998)269

**Affinity partitioning**

Aqueous two-phase affinity partitioning of biotinylated liposomes using neutral avidin as affinity ligand 815(1998)189

**Affinity precipitation**

Affinity precipitation – an alternative to fluidized bed adsorption? 827(1998)269

**Agar plates**

Is the direct quantitation of antibiotics in agar by high-performance liquid chromatography useful? 812(1998)111

**Agarose-based adsorbents**

Salt-promoted adsorption of proteins onto amphiphilic agarose-based adsorbents. II. Effects of salt and salt concentration 803(1998)83

**Agarose beads**

Recent developments of magnetic beads for use in nucleic acid purification 816(1998)107

**Agarose gel electrophoresis**

Ultra-thin-layer agarose gel electrophoresis. I. Effect of the gel concentration and temperature on the separation of DNA fragments 830(1999)465

**Agarose, superporous**

Superporous agarose beads as a hydrophobic interaction chromatography support 830(1999)275

Faster isolation of recombinant factor VIII SQ, with a superporous agarose matrix 840(1999)39

**Agglomerates**

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

**Aggregation**

Separation of enantiomers on a chiral stationary phase based on ovoglycoprotein. III. Effect of aggregation of ovoglycoprotein on chiral resolution 830(1999)81

**Air analysis**

Evaluation of natural crab shell as an adsorbent for preconcentrating airborne volatile organic compounds collected in a canister 829(1998)215

Evaluation of a small prototype passive sampler for airborne volatile organic compounds 802(1998)307

Application of ion chromatography to the semiconductor industry. I. Measurement of acidic airborne contaminants in cleanrooms 804(1998)273

Two-stage microtrap as an injection device for continuous on-line gas chromatographic monitoring 805(1998)169

Development and application of a thermal desorption method for the analysis of polar volatile organic compounds in workplace air 809(1998)47

Determination of airborne, volatile amines from polyurethane foams by sorption onto a high-capacity cation-exchange resin based on poly(succinic acid) 809(1998)121

Separation of mixed halocarbons of environmental interest on a new type of silica-based porous-layer open tubular capillary gas chromatographic column 810(1998)119

Measurement of volatile organic compounds by the US Environmental Protection Agency Compendium Method TO-17. Evaluation of performance criteria 813(1998)101

Langmuirian parameters for Tenax GC adsorption of airborne hydrocarbons and oxygenated compounds 816(1998)195

Continuous determination of volatile organic compounds in the atmosphere by an automated gas chromatographic system 819(1998)177

Determination of chlorpyrifos in air, leaves and soil from a greenhouse by gas-chromatography with nitrogen–phosphorus detection, high-performance liquid chromatography and capillary electrophoresis 823(1998)91

Langmuirian parameters for Tenax GC adsorption of airborne organohalogen compounds 823(1998)171

Determination of polycyclic aromatic sulfur heterocyclic compounds in airborne particulate by gas chromatography with atomic emission and mass spectrometric detection 826(1998)57

Determination of benzene, toluene, ethylbenzene and xylenes in indoor air at environmental levels using diffusive samplers in combination with headspace solid-phase microextraction and high-resolution gas chromatography–flame ionization detection 826(1998)191

Levels of metamidophos in air and vegetables after greenhouse applications by gas chromatography 829(1998)251

Determination of gaseous sulphur dioxide by capillary isotachopheresis 836(1999)107

New derivatization method for carboxylic acids in aqueous solution for analysis by capillary electrophoresis and laser-induced fluorescence detection 836(1999)325

Air analysis by gas chromatography 843(1999)129

Anthropogenic volatile organic compounds in ambient air and natural waters: a review on recent developments of analytical methodology, performance and interpretation of field measurements 843(1999)163

Construction and evaluation of automated gas chromatography for the measurement of anthropogenic halocarbons in the atmosphere 844(1999)259

Trace analysis of carbonyl compounds by liquid chromatography–mass spectrometry after collection as 2,4-dinitrophenylhydrazine derivatives 844(1999)403

Novel family of multi-layer cartridges filled with a new carbon adsorbent for the quantitative determination of volatile organic compounds in the atmosphere 845(1999)317

Distribution of *n*-alkanes, polynuclear aromatic hydrocarbons and nitrated polynuclear aromatic hydrocarbons between the fine and coarse fractions of inhalable atmospheric particulates 846(1999)255

Carbon-coated annular denuders and ion chromatographic measurements for the determination of nitrogen-containing species (NO<sub>2</sub> and NO<sub>y</sub>) in remote atmospheres 846(1999)265

Use of ion chromatography for monitoring atmospheric pollution in background networks 846(1999)269

Determination of toxic nitrophenols in the atmosphere by high-performance liquid chromatography 846(1999)277

Analysis of volatile organic compounds in the ambient air of Algiers by gas chromatography with a β-cyclodextrin capillary column 846(1999)287

Gas chromatographic determination of synthetic musk compounds in Norwegian air samples 846(1999)295

Diffusion technique for the production of gas standards for atmospheric measurements 848(1999)239

Analysis of brominated compounds in background air by gas chromatography–high-resolution mass spectrometry 848(1999)261

Evaluation of solid-phase microextraction for sampling of volatile organic sulfur compounds in air for subsequent gas chromatographic analysis with atomic emission detection 848(1999)305

Detection of the chemical warfare agents bis-(2-chloroethyl)ethylamine (HN-1) and tris-(2-chloroethyl)amine (HN-3) in air 849(1999)529

Applications of ion chromatography in the semiconductor industry. II. Determination of basic airborne contaminants in a cleanroom 850(1999)283

Development of an analytical method for beryllium in airborne dust by micellar electrokinetic chromatography 850(1999)363

#### **Alkane stationary phases**

Wetting transition in alkane liquids on silanised diatomaceous gas chromatographic supports 829(1998)201

#### **Alkylglutathione ligands**

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

#### **Allomers**

Liquid chromatographic separation and mass spectrometric identification of chlorophyll *b* allomers 837(1999)107

#### **Aluminium-modified silica**

Non-suppressed ion chromatography of cations on silica gel modified with aluminium 804(1998)171

#### **Ammonium sulfobetaine stationary phases**

Electrostatic ion chromatography of polarizable anions in saline waters with *N*-{2-[acetyl(3-sulfopropyl)amino]ethyl}-*N,N*-dimethyldodecanaminium hydroxide (ammonium sulfobetaine-1) as the stationary phase and a dilute electrolytic solution as the mobile phase 850(1999)161

#### **Amperometric detection**

see also Electrochemical detection

Applications of a copper-modified gold electrode for amperometric detection of polar aliphatic compounds by anion-exchange chromatography 814(1998)63

Determination of iron in complex matrices by ion chromatography with UV–Vis, thermal lens and amperometric detection using post-column reagents 829(1998)167

Determination of aspartame by ion chromatography with electrochemical integrated amperometric detection 850(1999)277

#### **Amylose tris(3,5-dimethylphenylcarbamate) stationary phases**

Chiral resolution of enantiomeric steroids by high-performance liquid chromatography on amylose tris(3,5-dimethylphenylcarbamate) under reversed-phase conditions 825(1998)107

#### **Analysis of variance**

Methodology for transfer of liquid chromatography methods based on statistical considerations 815(1998)173

#### **Analyte focusing, on-column**

Semi-micro ion chromatography of iodide in seawater 830(1999)211

#### ***Angelica sinensis***

Liquid chromatographic–electrospray mass spectrometric study of the phthalides of *Angelica sinensis* and chemical changes of *Z*-ligustilide 810(1998)71

#### **Anion exchangers**

see also Ion exchangers

Permanent coated capillaries with reversed electroosmotic flow for anion analysis 822(1998)101

#### **Anthracene oil**

Monitoring the synthesis of new pitches from coal tar and its fractions by chromatography and related techniques 849(1999)507

#### ***Aplysia californica***

Characterization of peptides from *Aplysia* using microbore liquid chromatography with matrix-assisted laser desorption/ionization time-of-flight mass spectrometry guided purification 830(1999)105

#### **Apoptosis**

Separation of oligonucleosomal DNA fragments from apoptotic animal cells using a triad of Sephacryl columns 806(1998)61

#### **Apparent polydispersity**

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

#### **Apple juice**

Natural occurrence of alternariol and alternariol methyl ether in Spanish apple juice concentrates 815(1998)93

Incidence of patulin in apple juice concentrates produced in Turkey 815(1998)99

#### **Apples**

Multiresidue determination of pesticides in apples and pears by gas chromatography–mass spectrometry 805(1998)319

High-performance liquid chromatography with diode-array detection for the determination of phenolic compounds in peel and pulp from different apple varieties 823(1998)331

Fast separation of (poly)phenolic compounds from apples and pears by high-performance liquid chromatography with diode-array detection 830(1999)301

Temperature, eluent flow-rate and column effects on the retention and quantitation properties of phenylthiocarbonyl derivatives of amino acids in reversed-phase high-performance liquid chromatography 832(1999)109

Determination of daminozide in apples and apple leaves by liquid chromatography–mass spectrometry 833(1999)53

#### **Apricots**

Simultaneous determination of sugars, sugar alcohols, acids and amino acids in apricots by gas chromatography–mass spectrometry 847(1999)91

#### **Aquaculture feed**

Assay of L-ascorbic 2-monophosphate in aquaculture feeds by high-performance anion-exchange chromatography with conductivity detection 803(1998)141

#### **Aqueous two-phase systems**

Aqueous two-phase systems containing self-associating block copolymers. Partitioning of hydrophilic and hydrophobic biomolecules 839(1999)71

#### **Archeology**

New chromatographic, mass spectrometric and stable isotope approaches to the classification of degraded animal fats preserved in archaeological pottery 833(1999)209

#### **Argentation chromatography**

Silver-phase high-performance liquid chromatography–electrospray mass spectrometry of triacylglycerols 810(1998)53

Positional and configurational separation of fatty acid isomers by micro reversed-phase liquid chromatography with an  $\text{Ag}^+$ -containing mobile phase 848(1999)83

#### **Aroma compounds**

Quantitative determination of trace and ultratrace flavour active compounds in red wines through gas chromatographic–ion trap mass spectrometric analysis of microextracts 806(1998)349

#### **Aromatic adsorption**

(Normal-phase) capillary chromatography using acrylic polymer-based continuous beds 837(1999)25

#### **Art analysis**

Analysis of fresh triterpenoid resins and aged triterpenoid varnishes by high-performance liquid chromatography–atmospheric pressure chemical ionisation (tandem) mass spectrometry 809(1998)21

Two procedures for suppressing interference from inorganic pigments in the analysis by gas chromatography–mass spectrometry of proteinaceous binders in paintings 846(1999)101

Characterisation of proteinaceous binders and drying oils in wall painting samples by gas chromatography–mass spectrometry 846(1999)113

#### **Artifacts**

Artifacts in trimethylsilyl derivatization reactions and ways to avoid them 844(1999)1

#### **Artificial intelligence**

Towards an expert system in ion-exclusion chromatography by means of multiple classification ripple-down rules 804(1998)29

#### **Association constants**

Characterization of interaction between cephalosporins and charged surfactants using capillary zone electrophoresis 802(1998)89

Association between cobalt(III) coordination compounds and anions measured by capillary electrophoresis 836(1999)93

Simultaneous determination of the association constants of oligosaccharides to a lectin by capillary electrophoresis 837(1999)221

Capillary electrophoretic determination of the association constant of a protein and a neutral carbohydrate by introducing mercaptoethanesulfonate tags to the carbohydrate 839(1999)157

#### **Atractylodes rhizome**

Determination of atractylon in Atractylodes rhizome using supercritical fluid chromatography on-line coupled with supercritical fluid extraction by the direct induction method 810(1998)252

#### **Atropisomers**

Recent developments in the high-resolution gas chromatography of polychlorinated biphenyls 843(1999)323

#### **Automation**

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

Use of a presolvent to include volatile organic analytes in the application range of on-line solid-phase extraction–gas chromatography–mass spectrometry 811(1998)117

Continuous determination of volatile organic compounds in the atmosphere by an automated gas chromatographic system 819(1998)177

Automated solid-phase extraction on-line coupled to gas chromatography 822(1998)75

Automated sample preparation for the determination of budesonide in plasma samples by liquid chromatography and tandem mass spectrometry 823(1998)401

Analytical supercritical fluid chromatography using fully automated column and modifier selection valves for the rapid development of chiral separations 826(1998)217

Automated one-step supercritical fluid extraction and clean-up system for the analysis of pesticide residues in fatty matrices 840(1999)93

Optimization of large-volume on-column injection conditions in gas chromatography by monitoring the actual carrier gas flow 841(1999)75

Construction and evaluation of automated gas chromatography for the measurement of anthropogenic halocarbons in the atmosphere 844(1999)259

#### **Auto-resolution**

Enantiomeric enrichment of non-racemic antihistamines by achiral high-performance liquid chromatography 813(1998)79

#### **Avidin–dextran ligands**

Aqueous two-phase affinity partitioning of biotinylated liposomes using neutral avidin as affinity ligand 815(1998)189

#### **Axial compression**

see also Dynamic axial compression

Consolidation and column performance of several packing materials for liquid chromatography in a dynamic axial compression column 813(1998)223

#### **Axial dispersion**

see also Dispersion

Detailed study of the mass transfer kinetics of Tröger's base on cellulose triacetate 813(1998)1

## **B**

#### **Background electrolyte composition**

see also Buffer composition

Separation of uranium(VI) and lanthanides by capillary electrophoresis using on-capillary complexation with arsenazo III 803(1998)279

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities, acidity constants and separation selectivity of substituted aromatic acids. II. Ethanol 811(1998)201

Coelectroosmotic separations of anions in non-aqueous capillary electrophoresis 811(1998)211

Capillary electrophoresis with wide-bore capillaries and non-aqueous media 813(1998)179

Use of quasi-equimolar, closely-spaced, poly-co-ion background electrolytes in capillary electrophoresis for the reduction of electromigration dispersion over a wide mobility range 814(1998)199

Nonaqueous capillary electrophoretic separation of enantiomers using the single-isomer heptakis(2,3-diacetyl-6-sulfato)- $\beta$ -cyclodextrin as chiral resolving agent 816(1998)233

Characterization of poly(dimethylacrylamide) and the combination of poly(vinyl alcohol) and cetyltrimethylammonium bromide as dynamic electroosmotic flow suppression agents in capillary electrophoresis 817(1998)15

Systematic approach to methods development for the capillary electrophoretic analysis of a minor enantiomer using a single-isomer sulfated cyclodextrin. A case study of L-carbidopa analysis 817(1998)105

Capillary zone electrophoresis study of aggregation of humic substances 817(1998)313

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities and acidity constants of substituted aromatic acids. III. 1-Propanol 818(1998)209

Study of cytokinin separation using capillary electrophoresis with cyclodextrin additives 818(1998)231

Non-aqueous capillary zone electrophoresis using polyethylene glycol as a matrix agent 822(1998)107

Determination of low-molecular-mass anionic compounds in beverage samples using capillary zone electrophoresis with simultaneous indirect ultraviolet and conductivity detection 822(1998)117

Selection and optimization of background electrolytes for simultaneous detection of small cations and organic acids by capillary electrophoresis with indirect photometry 822(1998)125

Capillary electrophoretic separation of enantiomers using the single isomer heptakis-(2,3-dimethyl-6-sulfato)- $\beta$ -cyclodextrin as chiral resolving agent in methanol–water background electrolytes 827(1998)121

Multivariate evaluation of organic modifier effects on the separation performance of peptides in micellar electrokinetic chromatography 831(1999)293

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities and acidity constants of substituted aromatic acids. IV. Acetonitrile 833(1999)245

Simultaneous determination of inorganic anions, organic acids and metal cations by capillary electrophoresis 834(1999)65

Design of background electrolytes for indirect photometric detections based on a model of sample zone absorption in capillary electrophoresis 835(1999)169

Simultaneous determination of inorganic anions, organic acids, amino acids and carbohydrates by capillary electrophoresis 837(1999)231

Polyethylene glycol as a separation medium for capillary zone electrophoretic analysis of pyridine derivatives 838(1999)89

Simultaneous determination of nitrate and nitrite ions in seawater by capillary zone electrophoresis using artificial seawater as the carrier solution 838(1999)303

Separation of anilines by capillary electrophoresis with small ionic compounds as buffer additives 840(1999)269

Transfer ratio in indirect UV detection in capillary zone electrophoresis. A mathematical approach 844(1999)321

Chemometric approach to the treatment of benzodiazepine separation and peak broadening in capillary electrophoresis 849(1999)563

Optimization of conductivity detection of low-molecular-mass anions in capillary zone electrophoresis 850(1999)355

#### ***Bacopa monniera***

Application of high-performance liquid chromatography coupled to nuclear magnetic resonance spectrometry, mass spectrometry and bioassay for the determination of active saponins from *Bacopa monniera* Wettst. 847(1999)109

#### **Bacteria**

Carbohydrate profiling of bacteria by gas chromatography–mass spectrometry and their trace detection in complex matrices by gas chromatography–tandem mass spectrometry 843(1999)287

#### **Bananas**

Application of ion-exchange cartridge clean-up in food analysis. I. Simultaneous determination of thiabendazole and imazalil in citrus fruit and banana using high-performance liquid chromatography with ultraviolet detection 810(1998)81

#### **Band broadening**

see also Band profiles and Peak shape

Numerical simulation of band-broadening during hydrodynamic relaxation in frit-inlet field-flow fractionation channels 805(1998)149

Effect of interdetector peak broadening and volume in size-exclusion chromatography with dual viscometric–concentration detection 809(1998)1

Chemometric evaluation of the band broadening in micellar electrokinetic chromatography of peptides 809(1998)191

Influence of solvent uptake and swelling by poly(styrene–divinylbenzene) column packings on sample sorption rate and band broadening in reversed-phase liquid chromatography 835(1999)3

#### **Bandpass filter function**

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

#### **Band profiles**

see also Band broadening and Peak shape

Asymmetry of protein peaks in capillary zone electrophoresis: effect of starting zone length and presence of polymer 817(1998)253

Theoretical analysis of the behavior of an heterogeneously packed chromatographic column 827(1998)241

Theoretical analysis of the behavior of a centrally injected band in a homogeneous chromatographic column 828(1998)19

Repeatability and reproducibility of retention data and band profiles on reversed-phase liquid chromatography columns. I. Experimental protocol 830(1999)41

Repeatability and reproducibility of retention data and band profiles on reversed-phase liquid chromatographic columns. II. Results obtained with Symmetry C<sub>18</sub> columns 830(1999)55

Band dispersion in chromatography – a new view of A-term dispersion 831(1999)3

#### **Baseline noise**

Routine check of baseline noise in ion chromatography 833(1999)97

#### **Basidiomycetes**

Identification of illudins in *Omphalotus nidiformis* and *Omphalotus olivascens* var. *indigo* by column liquid chromatography–atmospheric pressure chemical ionization tandem mass spectrometry 832(1999)247

#### **Beer**

Determination of underivatized amino acids in beverage samples by capillary electrophoresis 804(1998)349

Determination of low-molecular-mass anionic compounds in beverage samples using capillary zone electrophoresis with simultaneous indirect ultraviolet and conductivity detection 822(1998)117

Determination of riboflavin, flavin mononucleotide and flavin–adenine dinucleotide in wine and other beverages by high-performance liquid chromatography with fluorescence detection 823(1998)355

Quantitative analysis of xanthohumol and related prenylflavonoids in hops and beer by liquid chromatography–tandem mass spectrometry 832(1999)97

#### **Beverages**

see also Beer, Soft drinks, Tea and Wine

Simultaneous analysis of tyrosol, tryptophol and ferulic acid in commercial sake samples by micellar electrokinetic chromatography 825(1998)102

Determination of inorganic ions in food and beverages by capillary electrophoresis 834(1999)401

#### **Binding constants**

Use of a partial-filling technique in affinity capillary electrophoresis for determining binding constants of ligands to receptors 840(1999)261

#### **Binding media**

Characterisation of proteinaceous binders and drying oils in wall painting samples by gas chromatography–mass spectrometry 846(1999)113

#### **Bio-Gel P2**

Size exclusion chromatography of polypeptides on Bio-Gel P2 in the dynamic axial compression mode 840(1999)281

#### **Biosensors**

Biphasic thermodynamic characterization of interactions by quantitative affinity chromatography and biosensor technology 803(1998)291

Reassessment of the calibration constant for the IAsys biosensor 844(1999)395

#### **Bis(β-diketonato)–copper stationary phases**

Separation properties of bis(β-diketonato)–copper(II) complexes in capillary gas chromatography 809(1998)65

#### **Bitumen**

Development of an on-line coupling of liquid–liquid extraction, normal-phase liquid chromatography and high-resolution gas chromatography producing an analytical marker for the prediction of mutagenicity and carcinogenicity of bitumen and bitumen fumes 849(1999)483

#### **Bituminous waste**

Gas chromatographic study for the evaluation of the suitability of bituminous waste material as an additive for coke production 823(1998)527

#### **Blackcurrant**

Combination of chromatographic techniques for the preparative isolation of anthocyanins — applied on blackcurrant (*Ribes nigrum*) fruits 825(1998)89

#### **Boiling points**

Thermodynamic significance of boiling point correlations for alkylbenzenes in gas chromatography. Extension of Trouton's rule 845(1999)13

#### **Book Reviews**

Basic gas chromatography (by H.M. McNair and J.M. Miller) 816(1998)293

Practical HPLC method development, 2nd edition (by L.R. Snyder, J.J. Kirkland and J.L. Glajch) 816(1998)295

Solid-phase microextraction – Theory and practice (by J. Pawliszyn) 824(1998)247

Handbook of capillary electrophoresis, 2nd edition (edited by J.P. Landers) 825(1998)205

Handbook of HPLC (edited by E. Katz, R. Eksteen, P. Schoenmakers and N. Miller) 835(1999)249

#### **Breakthrough volumes**

Evaluation of a new graphitized carbon black employed in sampling volatile organic compounds 810(1998)131

Langmuirian parameters for Tenax GC adsorption of airborne hydrocarbons and oxygenated compounds 816(1998)195

Langmuirian parameters for Tenax GC adsorption of airborne organohalogen compounds 823(1998)171

#### **Brine**

Determination of magnesium and calcium in 30% sodium chloride by ion chromatography with on-line matrix elimination 816(1998)282

#### **Buffer composition**

Novel applications for organic polymer capillaries 802(1998)17

Non-aqueous capillary electrophoresis with electrochemical detection 802(1998)349

- Simple technique for joining of capillaries in capillary separation methods 802(1998)381
- Separation of weak organic acids and bases by capillary zone electrophoresis in a sulfonated-polymer wall-modified open tubular fused-silica capillary 804(1998)337
- Measurement and prediction of dead times and column diameter in capillary gas chromatography by using air, methane and some solvents 811(1998)85
- Electrophoretic separation of inorganic anions with an anion complexone-modified capillary column 815(1998)251
- Capillary preconditioning for analysis of anions using indirect UV detection in capillary zone electrophoresis. Systematic investigation of alkaline and acid rinsing techniques by designed experiments 816(1998)261
- Spliced capillaries for use in capillary electrophoresis with conductivity detection 817(1998)31
- Deactivation of frits for use in capillary high-performance liquid chromatography and capillary electrochromatography with characterization by imaging with laser-induced fluorescence 818(1998)257
- Polarity changes during capillary gas chromatographic and gas chromatographic–mass spectrometric analysis using serially coupled columns of different natures and temperature programming. Application to the identification of constituents of essential oils 819(1998)61
- Separation of carotenoids by subcritical fluid chromatography with coated, packed capillary columns and neat carbon dioxide 823(1998)313
- Treatments of fused-silica capillaries and their influence on the electrophoretic characteristics of these columns before and after coating 823(1998)561
- Capillary electrophoresis using diol-bonded fused-silica capillaries 830(1999)415
- Preparation of linear polyacrylamide-coated capillaries. Study of the polymerization process and its effect on capillary electrophoresis performance 830(1999)423
- Separation of hydrohalocarbons and chlorofluorocarbons using a cyclodextrin gas solid chromatography capillary column 832(1999)253
- Attempt to define the role of the length of the packed section in capillary electrochromatography 836(1999)25
- Strategies for speed optimisation in gas chromatography: an overview 842(1999)3
- Influence of temperature and *n*-alkane pair on the methylene increments to the thermodynamic functions of solution on SE-30 and Carbowax-20M capillary columns 844(1999)201
- Open tubular capillary electrochromatography in etched, chemically modified 20  $\mu\text{m}$  I.D. capillaries 845(1999)237
- Influence of capillary column efficiency on the reliability of the identification of complex mixtures by gas chromatography 845(1999)3
- Deactivation of metal capillaries for gas chromatography 845(1999)33
- Gas chromatography in space exploration. Capillary and micropacked columns for in situ analysis of Titan's atmosphere 846(1999)307
- Evaluation of volatile eluents and electrolytes for high-performance liquid chromatography–electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry of proteins. II. Capillary electrophoresis 849(1999)175
- Electrophoretic separation of linear and supercoiled DNA in uncoated capillaries 849(1999)267
- Capillary electrochromatography**  
Effect of electric field on liquid chromatographic separation of peptide digests. Combining capillary separation techniques 832(1999)149
- Monolithic columns containing sol–gel bonded octadecylsilica for capillary electrochromatography 837(1999)35
- Capillary electrophoresis**  
see also Affinity capillary electrophoresis, Electrokinetic chromatography, Electrophoresis, Isoelectric focusing, Isotachopheresis, Micellar electrokinetic chromatography, Non-aqueous capillary electrophoresis and Special Issue Index
- Comparison of the reproducibility in migration times between a constant-current and a constant-voltage mode of operation in capillary zone electrophoresis 802(1998)391
- What are the unanswered (and unasked) questions in ion analysis? 804(1998)3

Electrokinetic injection in capillary electrophoresis and its application to the analysis of inorganic compounds 834(1999)21

Indirect photometric detection of anions in capillary electrophoresis 834(1999)189

Separation of inorganic phosphorus-containing anions by capillary electrophoresis 834(1999)233

Analysis of inorganic cations as their complexes by capillary electrophoresis 834(1999)277

Determination of nitrate and nitrite in Hanford defense waste by reverse-polarity capillary zone electrophoresis 844(1999)387

### Capillary electrophoresis–mass spectrometry

see also Mass spectrometry

Separation of acidic enantiomers by capillary electrophoresis–mass spectrometry employing a partial filling technique 802(1998)83

Application of capillary zone electrophoresis–inductively coupled plasma mass spectrometry and capillary isoelectric focusing–inductively coupled plasma mass spectrometry for selenium speciation 807(1998)71

Strategy for selecting separation solutions in capillary electrophoresis–mass spectrometry 817(1998)49

Analysis of metal species by using electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry 819(1998)231

Interface for the coupling of capillary electrophoresis and inductively coupled plasma mass spectrometry 826(1998)87

General considerations for optimizing a capillary electrophoresis–electrospray ionization time-of-flight mass spectrometry system 829(1998)279

Determination of chlorinated acid herbicides and related compounds in water by capillary electrophoresis–electrospray negative ion mass spectrometry 829(1998)327

Evaluation of volatile eluents and electrolytes for high-performance liquid chromatography–electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry of proteins. II. Capillary electrophoresis 849(1999)175

### Capillary zone electrophoresis

Capillary zone electrophoresis and ion chromatography in the low  $\mu\text{g}/\text{l}$  range applied to the determination of anions in hydrogen peroxide 829(1998)351

Separation of inorganic phosphorus-containing anions by capillary electrophoresis 834(1999)233

Application of capillary isotachopheresis and capillary zone electrophoresis to the determination of inorganic ions in food and feed samples 834(1999)419

Isotachopheresis in zone electrophoresis 838(1999)55

### Caramel

Qualitative and quantitative evaluation of mono- and disaccharides in D-fructose, D-glucose and sucrose caramels by gas–liquid chromatography–mass spectrometry. Di-D-fructose dianhydrides as tracers of caramel authenticity 844(1999)283

### Carbohydrate–protein interactions

Simultaneous determination of the association constants of oligosaccharides to a lectin by capillary electrophoresis 837(1999)221

### Carbon isotope ratio analysis

Oil spill identification 843(1999)369

### Carrier gas

Dynamic modification of the stationary phase in capillary gas chromatography. II. Continuous introduction of water vapour 845(1999)43

### Carrier gas flow

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

### Catalysis

Original use of the liquid nature of the stationary phase in counter-current chromatography. II. A liquid–liquid reactor for catalytic reactions 828(1998)523

### Catalysts

Study of the sorption of carbon monoxide, oxygen and carbon dioxide on platinum–rhodium alloy catalysts by a new gas chromatographic methodology 845(1999)67

### Catfish

Microwave mediated distillation with solid-phase microextraction: determination of off-flavors, geosmin and methylisoborneol, in catfish tissue 833(1999)223

### Catharanthus roseus

Isolation of indole alkaloids from *Catharanthus roseus* by centrifugal partition chromatography in the pH-zone refining mode 849(1999)421

### Cation-exchange displacers

Structural characteristics of low-molecular-mass displacers for cation-exchange chromatography 814(1998)83

### Cattle bone powder

Properties of cattle bone powder-coated composite particles as high-performance and open column liquid chromatographic column packings 813(1998)21

***Caulerpa prolifera***

Separation and identification of chlorophylls and carotenoids from *Caulerpa prolifera*, *Jania rubens* and *Padina pavonica* by reversed-phase high-performance liquid chromatography 829(1998)153

**Cells**

Study of single cells by using capillary electrophoresis and native fluorescence detection 830(1999)243

**Cellulose packings**

Preparative fractionation of polysaccharides by columns packed with regenerated cellulose gels 816(1998)131

**Cellulose triacetate stationary phase**

Detailed study of the mass transfer kinetics of Tröger's base on cellulose triacetate 813(1998)1

**Central composite design**

Supercritical-carbon-dioxide extraction of lipids from a contaminated soil 845(1999)365

**Centrifugal partition chromatography**

Capillary electrophoretic separation of cationic porphyrins 802(1998)367

Counter-current chromatography: instrumentation, solvent selection and some recent applications to natural product purification 808(1998)3

Isolation of indole alkaloids from *Catharanthus roseus* by centrifugal partition chromatography in the pH-zone refining mode 849(1999)421

**Ceramics**

New chromatographic, mass spectrometric and stable isotope approaches to the classification of degraded animal fats preserved in archaeological pottery 833(1999)209

**Cereals**

Selective identification by matrix-assisted laser desorption/ionization time-of-flight mass spectrometry of different types of gluten in foods made with cereal mixtures 823(1998)299

Liquid chromatographic method for determining added folic acid in fortified cereal products 826(1998)235

**Cerebrospinal fluid**

Sodium dodecyl sulfate–capillary gel electrophoretic analysis of molecular mass microheterogeneity of  $\beta$ -trace protein in cerebrospinal fluid from patients with central nervous system diseases 802(1998)143

**Charge coupled device detection**

Dynamic analysis of capillary electrophoresis data using real-time neural networks 833(1999)231

**Charge transfer interaction**

Determination of inorganic anions on porous graphitic carbon using evaporative light scattering detection. Use of carboxylic acids as electronic competitors 829(1998)193

**Cheese**

Determination of cows' milk in goats' milk and cheese by capillary electrophoresis of the whey protein fractions 846(1999)135

Flavour characterisation and classification of cheeses by gas chromatographic–mass spectrometric profiling 847(1999)203

Gas chromatographic flow method for the preconcentration and simultaneous determination of antioxidant and preservative additives in fatty foods 848(1999)529

**Chemical reaction interface mass spectrometry**

Analysis of biopolymers by size-exclusion chromatography–mass spectrometry 828(1998)509

**Chemiluminescence**

Detection by ozone-induced chemiluminescence in chromatography 842(1999)267

**Chemiluminescence detection**

On-column chemiluminescence detection of rare earth ions with capillary electrophoresis 813(1998)361

Liquid chromatography of aromatic amines with photochemical derivatization and tris(bipyridine)ruthenium(III) chemiluminescence detection 828(1998)421

Compact detection cell using optical fiber for sensitization and simplification of capillary electrophoresis–chemiluminescence detection 832(1999)191

On-line chemiluminescence detection for capillary electrophoresis based on the reaction of barium peroxide with luminescence reagents 844(1999)341

Continuous solid-phase extraction and dansylation of low-molecular-mass amines coupled on-line with liquid chromatography and peroxyoxalate chemiluminescence-based detection 848(1999)105

**Chemometrics**

Role of chemical equilibria in the capillary electrophoresis of inorganic substances 834(1999)3

#### **Computer-assisted chromatography**

On-line coupling of liquid chromatography with thin-layer chromatography 819(1998)35

Critical comparison of retention models for optimisation of the separation of anions in ion chromatography. III. Anion chromatography using hydroxide eluents on a Dionex AS11 stationary phase 837(1999)65

#### **Computer-assisted selection of mobile phases**

New approach to the computer-assisted selection of mobile phases for high-performance liquid chromatography on the basis of the Snyder theory 848(1999)1

#### **Computer modelling**

Artificial neural networks for computer-aided modelling and optimisation in micellar electrokinetic chromatography 850(1999)345

#### **Computer simulation**

Numerical simulation for capillary electrophoresis. I.

Development of a simulation program with high numerical stability 802(1998)49

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. I. Application to 14 different samples using computer simulation 803(1998)1

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. II. The use of further changes in conditions 803(1998)33

Use of quasi-equimolar, closely-spaced, poly-co-ion background electrolytes in capillary electrophoresis for the reduction of electromigration dispersion over a wide mobility range 814(1998)199

Separation of enantiomers of a chiral epoxide by simulated moving bed chromatography 827(1998)215

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

Computer simulation of particle separation based on non-equilibrium swelling 831(1999)51

Dynamic computer simulations of the influence of injection conditions on capillary zone electrophoretic stacking of preparative free-flow zone electrophoresis fractions of peptides 836(1999)129

Numerical simulation for capillary electrophoresis. II. Relaxation effect of potential gradient in capillary zone electrophoresis 838(1999)19

Application of statistical-overlap theory to gas chromatograms simulated on nonpolar stationary phases with commercial software 842(1999)65

Computer simulation of electroinjection analysis and electrophoretically mediated microanalysis. Commensurable concentrations of sample and reagent 845(1999)227

Simulation of chromatographic processes applied to separation of proteins 846(1999)1

Automatic prediction of retention times in programmed-pressure isothermal gas chromatography 848(1999)229

Use of artificial neural networks in capillary zone electrophoresis 848(1999)365

#### **Concentration distribution**

Moving chemical reaction boundary and isoelectric focusing. I. Conditional equations for Svensson–Tiselius' differential equation of solute concentration distribution in idealized isoelectric focusing at steady state 813(1998)153

#### **Concentration waves, thermo-induced**

Ion exchange on resins with temperature-responsive selectivity. II. Thermo-induced concentration waves in ion-exchange column 802(1998)251

#### **Condensation nucleation light scattering detection**

Condensation nucleation light scattering detection for biogenic amines separated by ion-exchange chromatography 844(1999)111

Sensitive, universal detection for capillary electrochromatography using condensation nucleation light scattering detection 849(1999)587

#### **Conductivity detection**

Determination of low-molecular-mass ionic compounds in electrodeposition coatings by capillary electrophoresis with conductivity detection 804(1998)357

Electrochemical detection in the capillary electrophoresis analysis of inorganic compounds 834(1999)103

Single electrode conductivity detection for electrophoretic separation systems 836(1999)59

Contactless conductivity detection in capillary zone electrophoresis 844(1999)349

Optimization of conductivity detection of low-molecular-mass anions in capillary zone electrophoresis 850(1999)355

#### **Conductivity gradients**

Use of micellar partition in capillary isotachophoretic focusing 832(1999)265

Isotachophoretic focusing of strong and weak electrolytes in combined pH and conductivity gradients 838(1999)71

#### **Conductometric detection**

Enhancement of conductometric detection of weak acids in ion chromatography 850(1999)85

#### **Configuration, absolute**

Determination of the absolute configuration of  $\alpha$ -hydroxyglycine derivatives by enzymatic conversion and chiral high-performance liquid chromatography 828(1998)191

#### **Configurational isomers**

Positional and configurational separation of fatty acid isomers by micro reversed-phase liquid chromatography with an  $\text{Ag}^+$ -containing mobile phase 848(1999)83

#### **Confocal scanning microscopy**

Visualising intraparticle protein transport in porous adsorbents by confocal microscopy 813(1998)387

Direct visualisation of plasmid DNA in individual chromatography adsorbent particles by confocal scanning laser microscopy 844(1999)129

#### **Congeneric lipophilicity chart**

Determination of lipophilicity of some non-steroidal anti-inflammatory agents and their relationships by using principal component analysis based on thin-layer chromatographic retention data 822(1998)263

#### **Constant flow**

Evaluation of column performance in constant pressure and constant flow capillary gas chromatography 842(1999)15

#### **Constant pressure**

Evaluation of column performance in constant pressure and constant flow capillary gas chromatography 842(1999)15

#### **Continuous beds**

Biochemical separations by continuous-bed chromatography 816(1998)3

(Normal-phase) capillary chromatography using acrylic polymer-based continuous beds 837(1999)25

#### **Continuous monitoring**

Development of pulse introduction membrane extraction for analysis of volatile organic compounds in individual aqueous samples, and for continuous on-line monitoring 826(1998)39

#### **Continuous reactor**

Original use of the liquid nature of the stationary phase in counter-current chromatography. II. A liquid–liquid reactor for catalytic reactions 828(1998)523

**Convection**

Computer simulation of electroinjection analysis and electrophoretically mediated microanalysis. Commensurable concentrations of sample and reagent 845(1999)227

**Coordination compounds**

Association between cobalt(III) coordination compounds and anions measured by capillary electrophoresis 836(1999)93

**Copolymer composition**

Quantitative analysis of poly(methyl methacrylate–butyl acrylate) copolymer composition by liquid chromatography–particle beam mass spectrometry 824(1998)181

**Copper-modified gold electrodes**

Applications of a copper-modified gold electrode for amperometric detection of polar aliphatic compounds by anion-exchange chromatography 814(1998)63

***Coptis chinensis* Franch**

Application of analytical and preparative high-speed counter-current chromatography for separation of alkaloids from *Coptis chinensis* Franch 829(1998)137

**Correlation chromatography**

Reduction of the detection limits of anions in polar ice core analysis using correlation ion chromatography with detector signal processing 844(1999)419

**Correlation optimised warping**

Aligning of single and multiple wavelength chromatographic profiles for chemometric data analysis using correlation optimised warping 805(1998)17

**Corrosion**

Applications of capillary electrophoresis in corrosion science and engineering 834(1999)433

Chemical conditions inside occluded regions on corroding aircraft aluminum alloys 850(1999)375

Using capillary electrophoresis to study the chemical conditions within cracks in aluminum alloys 850(1999)381

***Corylus avellana***

Fatty acid, tocopherol and sterol content of some hazelnut varieties (*Corylus avellana* L.) harvested in Oregon (USA) 805(1998)259

**Cosmetics**

Single-run analysis of retinal isomers, retinol and photooxidation products by high-performance liquid chromatography 810(1998)237

Detection of clobetasol propionate as an undeclared steroid in zinc pyrithione formulations by high-performance liquid chromatography with rapid-scanning ultraviolet spectroscopy and mass spectrometry 828(1998)239

Identification of UV filters in sunscreen products by high-performance liquid chromatography–diode-array detection 828(1998)311

Erratum to “Temperature dependence of the retention index for perfumery compounds on a SE-30 glass capillary column. I. Linear equations” [J. Chromatogr. A, 779 (1997) 287–297] 830(1999)497

Capillary electrophoresis of inorganic anions 834(1999)133

Separation of benzenediamines, benzenediols and aminophenols in oxidative hair dyes by micellar electrokinetic chromatography using cationic surfactants 837(1999)241

Determination of some insect repellents in cosmetic products by high-performance thin-layer chromatography 847(1999)365

Temperature dependence of the retention index for perfumery compounds on a SE-30 glass capillary column. II. The hyperbolic equation 848(1999)215

**Counter-current chromatography**

Polarity changes during capillary gas chromatographic and gas chromatographic–mass spectrometric analysis using serially coupled columns of different natures and temperature programming. Application to the identification of constituents of essential oils 819(1998)61

Optimization of tandem columns for the isomer and enantiomer selective separation of toxaphenes 837(1999)201

#### **Coupling, LC–GC**

Evaluation of a transfer technique for direct coupling of reversed-phase liquid chromatography with gas chromatography 818(1998)77

#### **Crack chemistry**

Using capillary electrophoresis to study the chemical conditions within cracks in aluminum alloys 850(1999)381

#### ***Crataegus***

Quantitative reversed-phase high-performance liquid chromatography of procyanidins in *Crataegus* leaves and flowers 835(1999)59

#### ***Crocus sativus***

Simultaneous quantification of five major biologically active ingredients of saffron by high-performance liquid chromatography 849(1999)349

#### **Cryogenic separation**

Separation of noble gas mixtures from petroleum and their isotopic analysis by mass spectrometry 824(1998)109

#### **Cryogenic trapping**

Headspace sampling with capillary columns 842(1999)163

#### ***Curcuma longa***

Use of persistent trace gas chromatography artifacts for the calculation of pseudo-Sadtlner retention indices 811(1998)241

Liquid chromatography–electrospray mass spectrometric analysis of curcuminoids and sesquiterpenoids in turmeric (*Curcuma longa*) 818(1998)127

#### **Cyanine labelling**

Determination of cyanine-labeled amino acid enantiomers by cyclodextrin-modified capillary gel electrophoresis combined with diode laser fluorescence detection 805(1998)295

#### **Cyanobacteria**

Electrochemical detection of microcystins, cyanobacterial peptide hepatotoxins, following high-performance liquid chromatography 810(1998)226

#### **Cyclic voltammetry**

Experimental factors in pulsed electrochemical detection in capillary electrophoresis 811(1998)181

Capillary electrophoresis of some tetracycline antibiotics coupled with reductive fast cyclic voltammetric detection 839(1999)193

#### **Cyclodextrin-based stationary phases**

Preparation and enantiomer separation behavior of selectively methylated  $\gamma$ -cyclodextrin-bonded stationary phases for high-performance liquid chromatography 845(1999)455

#### **Cyclophane-bonded stationary phases**

Preparation of a cyclophane-bonded stationary phase and its application to separation of naphthalene derivatives 803(1998)95

#### **Cytosol**

Quantifying biosynthetic human growth hormone in *Escherichia coli* with capillary electrophoresis under hydrophobic conditions 817(1998)205

## **D**

#### **Dammar**

Analysis of fresh triterpenoid resins and aged triterpenoid varnishes by high-performance liquid chromatography–atmospheric pressure chemical ionisation (tandem) mass spectrometry 809(1998)21

**Danggui**

Liquid chromatographic–electrospray mass spectrometric study of the phthalides of *Angelica sinensis* and chemical changes of Z-ligustilide 810(1998)71

**Darcy's law**

Validity of Darcy's law at low flow-rates in liquid chromatography 849(1999)35

**Data processing**

Peak distortion, data sampling errors and the integrator in the measurement of very narrow chromatographic peaks 842(1999)321

Windowed mass selection method: a new data processing algorithm for liquid chromatography–mass spectrometry data 849(1999)71

**Data sampling error**

Peak distortion, data sampling errors and the integrator in the measurement of very narrow chromatographic peaks 842(1999)321

**Deactivation**

Deactivation of metal capillaries for gas chromatography 845(1999)33

**Deans' switching**

Practical and theoretical aspects of designing a flame-ionization detector/mass spectrometer Deans' switch. Pressure–flow relations in gas chromatograph–detector interfaces using vacuum-outlet conditions 831(1999)257

**Defection**

On-line coupling of partial-filling micellar electrokinetic chromatography with mass spectrometry 802(1998)3

**Degenerate four-wave mixing detection**

Absorbance detection of amino acids by laser wave mixing in microbore liquid chromatography 805(1998)63

**Delipidation methods**

Fast C<sub>18</sub> solid-phase desalting/delipidation of the human serum apolipoproteins for matrix-assisted laser desorption ionization and electrospray ionization mass spectrometric analysis 840(1999)183

**Densitometry**

Determination of some insect repellents in cosmetic products by high-performance thin-layer chromatography 847(1999)365

**Denuders**

Carbon-coated annular denuders and ion chromatographic measurements for the determination of nitrogen-containing species (NO<sub>2</sub> and NO<sub>x</sub>) in remote atmospheres 846(1999)265

**Derivatization**

see also Complexation

**Derivatization, electrophoresis**

Novel applications for organic polymer capillaries 802(1998)17

Derivatization of amino acids in a moving zone of *o*-phthalaldehyde in the middle of a capillary for amino acid analysis by capillary electrophoresis 802(1998)243

Determination of cyanine-labeled amino acid enantiomers by cyclodextrin-modified capillary gel electrophoresis combined with diode laser fluorescence detection 805(1998)295

Derivatization in capillary electrophoresis (Review) 807(1998)3

Nanomolar derivatizations with 5-carboxyfluorescein succinimidyl ester for fluorescence detection in capillary electrophoresis 809(1998)203

Phosphate-specific fluorescence labeling with BO-IMI: reaction details 809(1998)211

Postcolumn derivatization of peptides with fluorescamine in capillary electrophoresis 814(1998)213

Postcolumn derivatisation for selective laser-induced fluorescence detection in micellar electrokinetic chromatography of fatty acid hydroperoxides 814(1998)261

Simultaneous multiple analyte detection using fluorescent peptides and capillary isoelectric focusing 817(1998)41

Characteristic features of the throughout-capillary technique of in-capillary derivatization in capillary electrophoresis 822(1998)271

Preparation of an IMI dye (imidazole functional group) containing a 4-(*N,N*-dimethylaminosulfonyl)-2,1,3-benzoxadiazole fluorophore for labeling of phosphomonoesters 831(1999)325

Selective fluorescence derivatization and capillary electrophoretic separation of amidated amino acids 832(1999)211

Analysis of inorganic cations as their complexes by capillary electrophoresis (Review) 834(1999)277

Micellar electrokinetic capillary chromatography of thiocarbamoyl derivatives produced in reactions between isothiocyanates and amino acids 836(1999)115

New derivatization method for carboxylic acids in aqueous solution for analysis by capillary electrophoresis and laser-induced fluorescence detection 836(1999)325

Simultaneous determination of the association constants of oligosaccharides to a lectin by capillary electrophoresis 837(1999)221

- Detection of bovine whey proteins by on-column derivatization capillary electrophoresis with laser-induced fluorescence monitoring 841(1999)105
- Size separation of colloidal nanoparticles using a miniscale isoelectric focusing technique 848(1999)485
- Derivatization of resin acids with a fluorescent label for cyclodextrin-modified electrophoretic separation 849(1999)255
- Enantiomeric separation of D- and L-carnitine by integrating on-line derivatization with capillary zone electrophoresis 849(1999)609
- Derivatization, GC**
- Optical resolution of racemic carboxylic acids by gas chromatography 803(1998)307
- Application of pentafluorophenyl dimethylsilyl derivatization for gas chromatography–electron-capture detection of supercritically extracted sterols 809(1998)109
- Gas chromatographic determination of aromatic amines in water samples after solid-phase extraction and derivatization with iodine. I. Derivatization 810(1998)161
- New blocking method for the hydroxyl group on carbohydrate. Determination of the O-acylated position of the modified glycolipid 813(1998)325
- Development and optimisation of a new derivatisation procedure for gas chromatography–mass spectrometric analysis of dihydrostreptomycin. Comparison of multivariate and step-by-step optimisation procedures 840(1999)81
- Development of chromatographic methods to monitor the synthesis of (tributylstannyl)methanol through unstable lithiated intermediates 840(1999)215
- Recent advances in non-silylation derivatization techniques for gas chromatography 843(1999)1
- Solid-phase analytical derivatization: enhancement of sensitivity and selectivity of analysis 843(1999)19
- Pheromone analysis using capillary gas chromatographic techniques 843(1999)199
- Profiling of organic acids by capillary gas chromatography–mass spectrometry after direct methylation in urine using trimethylxonium tetrafluoroborate 843(1999)237
- Polymer analysis by pyrolysis gas chromatography 843(1999)413
- Artifacts in trimethylsilyl derivatization reactions and ways to avoid them 844(1999)1
- Alkene determination by bromination and gas chromatography with element-selective atomic plasma spectroscopic detection 844(1999)249
- Quantitation of *N*<sup>ε</sup>-(dichloroacetyl)-L-lysine in proteins after perchloroethene exposure by gas chromatography–mass spectrometry using chemical ionization and negative ion detection following immunoaffinity chromatography 847(1999)25
- Gas chromatographic determination of galactose in milk. Example of a switching valve used for the protection of the capillary column 847(1999)47
- Determination of fatty acid amides as trimethylsilyl derivatives by gas chromatography with mass spectrometric detection 849(1999)541
- Derivatization, GC–MS**
- Derivatives of cytokinins for negative ion mass spectrometry 811(1998)246
- Derivatization, LC**
- Development of guanine analyzer to measure activity of guanylate cyclase 806(1998)231
- Improved method for preparation and use of 9-anthryldiazomethane for derivatization of hydroxycarboxylic acids. Application to diarrhetic shellfish poisoning toxins 807(1998)229
- Rapid microwave-assisted dansylation of biogenic amines. Analysis by high-performance liquid chromatography 808(1998)87
- (*S*)-(+)-1-Methyl-2-(6,7-dimethoxy-2,3-naphthalimido)ethyl trifluoromethanesulfonate as a fluorescence chiral derivatizing reagent for carboxylic acid enantiomers in high-performance liquid chromatography 810(1998)221
- Characterization of carbohydrates using a combination of derivatization, high-performance liquid chromatography and mass spectrometry 811(1998)47
- High-performance liquid chromatographic analysis of aminoglycoside antibiotics (Review) 812(1998)141
- Determination of piperacillin and mezlocillin in human serum and urine by high-performance liquid chromatography after derivatisation with 1,2,4-triazole 812(1998)213
- Post-column oxidation of purpald–aldehyde adducts at nickel electrodes 813(1998)213
- Separation, detection, and quantification of imine-linked opines by high-performance liquid chromatography 813(1998)247
- Micromachined heated chemical reactor for pre-column derivatisation 815(1998)265

- 4-(5,6-Dimethoxy-2-phthalimidinyl)phenylsulfonyl semipiperazine as a fluorescent labelling reagent for determination of carboxylic acids in precolumn high-performance liquid chromatography 816(1998)137
- Determination of the chirality of cysteines in somatostatin analogs 816(1998)59
- High-performance liquid chromatography of polyethylene glycols as their  $\alpha,\omega$ -bis(1-naphthylurethane) derivatives and signal monitoring by fluorescence detection 822(1998)189
- High-performance liquid chromatography with postcolumn derivatization for simultaneous determination of organic peroxides and hydrogen peroxide 822(1998)207
- Total resolution of 17 DL-amino acids labelled with a fluorescent chiral reagent, *R*(-)-4-(3-isothiocyanatopyrrolidin-1-yl)-7-(*N,N*-dimethylaminosulfonyl)-2,1,3-benzoxadiazole, by high-performance liquid chromatography 822(1998)215
- Derivatization approaches for a fermentation derived, cyclic peptide analog 824(1998)25
- Separation of enantiomers of  $\alpha$ -hydroxy acids by reversed-phase liquid chromatography after derivatization with 1-(9-fluorenyl)ethyl chloroformate 827(1998)31
- Analysis of trace atrazine and simazine in environmental samples by liquid chromatography–fluorescence detection with pre-column derivatization reaction 827(1998)57
- Determination of plasma and serum homocysteine by high-performance liquid chromatography with fluorescence detection 828(1998)401
- Liquid chromatography of aromatic amines with photochemical derivatization and tris(bipyridine)ruthenium(III) chemiluminescence detection 828(1998)421
- Characterization of metallothionein isoforms by reversed-phase high-performance liquid chromatography with on-line post-column acidification and electrospray mass spectrometric detection 829(1998)127
- Determination of a non-ionic surfactant by solid-phase microextraction coupled with high-performance liquid chromatography and on-line derivatization 829(1998)401
- Determination of enantiomeric amino acids with high-performance liquid chromatography and pre-column derivatization with *o*-phthalaldehyde and *N*-isobutyrylcysteine in seawater and fossil samples (mollusks) 832(1999)123
- In-situ derivatization of degradation products of chemical warfare agents in water by solid-phase microextraction and gas chromatographic–mass spectrometric analysis 832(1999)173
- On-line solid-phase extraction liquid chromatography–continuous flow frit fast atom bombardment mass spectrometric and tandem mass spectrometric determination of hydrolysis products of nerve agents alkyl methylphosphonic acids by *p*-bromophenacyl derivatization 833(1999)169
- Sensitive determination of melatonin by precolumn derivatization and reversed-phase high-performance liquid chromatography 835(1999)67
- Stability and characteristics of the *o*-phthalaldehyde/3-mercaptopropionic acid and *o*-phthalaldehyde/*N*-acetyl-L-cysteine reagents and their amino acid derivatives measured by high-performance liquid chromatography 835(1999)73
- Development of chromatographic methods to monitor the synthesis of (tributylstannyl)methanol through unstable lithiated intermediates 840(1999)215
- Column chromatography and verification of phytosiderophores by phenylisothiocyanate derivatization and UV detection 841(1999)155
- Trace analysis of carbonyl compounds by liquid chromatography–mass spectrometry after collection as 2,4-dinitrophenylhydrazine derivatives 844(1999)403
- Ion chromatographic determination of bromate in drinking water by post-column reaction with fuchsin 847(1999)271
- Continuous solid-phase extraction and dansylation of low-molecular-mass amines coupled on-line with liquid chromatography and peroxyoxalate chemiluminescence-based detection 848(1999)105
- Fluorescence properties of carbazole-*N*-(2-methyl)acetyl chloride and determination of amino compounds via high-performance liquid chromatography with pre-column fluorescence derivatization 848(1999)117
- Analysis of 500-ng/l levels of bromate in drinking water by direct-injection suppressed ion chromatography coupled with a single, pneumatically delivered post-column reagent 850(1999)119
- Anion-exchange separation and determination of bisphosphonates and related analytes by post-column indirect fluorescence detection 850(1999)143
- Derivatization, SFE**  
Combined modifier/in situ derivatization effects on supercritical fluid extraction of polycyclic aromatic hydrocarbons from soil 811(1998)151
- Desalting method**  
Fast C<sub>18</sub> solid-phase desalting/delipidation of the human serum apolipoproteins for matrix-assisted laser desorption ionization and electrospray ionization mass spectrometric analysis 840(1999)183

**Desulfurization**

Evaluation of desulfurization procedures for the elimination of sulfur interferences in the organotin analysis of sediments 810(1998)245

**Detection**

High resolution free chromatin/DNA fiber fluorescent in situ hybridization 806(1998)219

Silicon microtechnology and microstructures in separation science 819(1998)3

**Detection, electrophoresis**

Novel applications for organic polymer capillaries 802(1998)17

Non-aqueous capillary electrophoresis with electrochemical detection 802(1998)349

Capillary isotachopheresis with fiber-optic Raman spectroscopic detection. Performance and application to ribonucleotides 805(1998)269

Generation of 275.4-nm UV output from a large-frame argon-ion laser for fluorescence detection in capillary electrophoresis 806(1998)355

Fiber-optic-based UV–visible absorbance detector for capillary electrophoresis, utilizing focusing optical elements 809(1998)181

Experimental factors in pulsed electrochemical detection in capillary electrophoresis 811(1998)181

Improved photometric detection of metal ions by capillary zone electrophoresis after precapillary complexation 811(1998)233

Electrically floating conductivity detection system for capillary electrophoresis 813(1998)205

On-column chemiluminescence detection of rare earth ions with capillary electrophoresis 813(1998)361

Optimizing separation conditions for proteins and peptides using imaged capillary isoelectric focusing 817(1998)163

Fiber optic modified thermal lens detector system for the determination of amino acids 817(1998)223

Determination of low-molecular-mass anionic compounds in beverage samples using capillary zone electrophoresis with simultaneous indirect ultraviolet and conductivity detection 822(1998)117

Identification of phosphonic acids by capillary electrophoresis–ionspray mass spectrometry 825(1998)71

Fluorescence detection of proteins and amino acids in capillary electrophoresis using a post-column sheath flow reactor 829(1998)309

Indirect detection of amino-substituted polycyclic aromatic hydrocarbons in cyclodextrin-modified micellar electrokinetic chromatography combined with diode laser-induced fluorimetry 831(1999)285

Preparation of an IMI dye (imidazole functional group) containing a 4-(*N,N*-dimethylaminosulfonyl)-2,1,3-benzoxadiazole fluorophore for labeling of phosphomonoesters 831(1999)325

Compact detection cell using optical fiber for sensitization and simplification of capillary electrophoresis–chemiluminescence detection 832(1999)191

Dynamic analysis of capillary electrophoresis data using real-time neural networks 833(1999)231

Electrochemical detection methods in capillary electrophoresis and applications to inorganic species 834(1999)89

Electrochemical detection in the capillary electrophoresis analysis of inorganic compounds 834(1999)103

Prospects for detection and sensitivity enhancement of inorganic ions in capillary electrophoresis 834(1999)117

Design of background electrolytes for indirect photometric detections based on a model of sample zone absorption in capillary electrophoresis 835(1999)169

Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15

Single electrode conductivity detection for electrophoretic separation systems 836(1999)59

Multicomponent analysis by off-line combination of synchronous fluorescence spectroscopy and capillary electrophoresis of collagen glycation adducts 836(1999)161

Capillary electrophoresis of some tetracycline antibiotics coupled with reductive fast cyclic voltammetric detection 839(1999)193

Effects of gel material on fluorescence lifetime detection of dyes and dye-labeled DNA primers in capillary electrophoresis 841(1999)95

On-line chemiluminescence detection for capillary electrophoresis based on the reaction of barium peroxide with luminescence reagents 844(1999)341

Contactless conductivity detection in capillary zone electrophoresis 844(1999)349

Post-capillary laser-induced fluorescence detection without sheath-flow 844(1999)433

Sensitive, universal detection for capillary electrochromatography using condensation nucleation light scattering detection 849(1999)587

Optimization of conductivity detection of low-molecular-mass anions in capillary zone electrophoresis 850(1999)355

#### Detection, GC

Gas-phase reagents for carbon–carbon double bond location: new applications. II. Use of vinyl methyl ether chemical ionization mass spectrometry to characterize C<sub>23</sub> to C<sub>33</sub> insect cuticular alkenes 803(1998)203

Pulsed flame photometric detector – a step forward towards universal heteroatom selective detection 805(1998)177

Photometric response of a very small, stoichiometric hydrogen–air flame to compounds of the iron group 806(1998)305

Analysis and characterization of naphthenic acids by gas chromatography–electron impact mass spectrometry of *tert.*-butyldimethylsilyl derivatives 807(1998)241

Simultaneous pulsed flame photometric and mass spectrometric detection for enhanced pesticide analysis capabilities 814(1998)133

Compound retention dependence of the response in a gas chromatography–atomic emission detection system 819(1998)85

Application of gas chromatography–Fourier transform infrared spectrometry to the analysis of amphetamine analogues 819(1998)155

Platinum-selective capillary gas chromatographic determination with microwave-induced plasma atomic emission detection 824(1998)223

Prediction of flame ionization detector response factors using an artificial neural network 825(1998)161

Modified kinetic model of the electron-capture detector. Molecular electron affinities and electron collection modes 827(1998)91

Thermal conductivity detection relative molar response factors for halogenated compounds 841(1999)187

Aspects of the mechanism of the flame ionization detector 842(1999)221

Non-radioactive electron-capture detector 842(1999)229

Detection by ozone-induced chemiluminescence in chromatography 842(1999)267

Gas chromatography with Fourier transform infrared and mass spectral detection 842(1999)341

Applied gas chromatography coupled to isotope ratio mass spectrometry 842(1999)351

Pheromone analysis using capillary gas chromatographic techniques 843(1999)199

Alkene determination by bromination and gas chromatography with element-selective atomic plasma spectroscopic detection 844(1999)249

Sources of uncertainty in gas chromatography and high-performance liquid chromatography 849(1999)13

Response factors of organochlorine compounds in the electrolytic conductivity detector 849(1999)285

#### Detection, LC

Parallel factor analysis of partially resolved chromatographic data. Determination of polycyclic aromatic hydrocarbons in water samples 802(1998)263

Determination of sulfur anions at the ppb level by ion chromatography utilizing their catalytic effects on the postcolumn reaction of iodine with azide 804(1998)143

Selective determination of D-sorbitol and D-mannitol in foodstuffs by ion chromatography with polarized photometric detection 804(1998)305

Modified laser light-scattering detector for use in high temperature micro liquid chromatography 814(1998)55

Absorbance detection of amino acids by laser wave mixing in microbore liquid chromatography 805(1998)63

Hydrophobic interaction chromatography coupled with dynamic surface tension detection for the determination of surface active species in protein formulations 806(1998)239

Electrochemical detection of microcystins, cyanobacterial peptide hepatotoxins, following high-performance liquid chromatography 810(1998)226

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

Post-column oxidation of purpald–aldehyde adducts at nickel electrodes 813(1998)213

Applications of a copper-modified gold electrode for amperometric detection of polar aliphatic compounds by anion-exchange chromatography 814(1998)63

- 4-(5,6-Dimethoxy-2-phthalimidinyl)phenylsulfonylesemipiperazine as a fluorescent labelling reagent for determination of carboxylic acids in precolumn high-performance liquid chromatography 816(1998)137
- Indirect photometric detection of aliphatic acids separated by ion-exclusion chromatography using aromatic acidic eluents 818(1998)61
- Optimization of post-column photolysis and electrochemical detection for the liquid chromatographic determination of 3-nitro-L-tyrosine 818(1998)69
- Analysis of amikacin by liquid chromatography with pulsed electrochemical detection 819(1998)93
- Detection of carbohydrates by electrospray ionization–ion mobility spectrometry following microbore high-performance liquid chromatography 822(1998)1
- Detector cell based on plastic liquid-core waveguides suitable for aqueous solutions: one-to-two decades improved detection limits in conventional-size column liquid chromatography with absorption detection 824(1998)1
- High-performance liquid chromatography with real-time Fourier-transform infrared detection for the determination of carbohydrates, alcohols and organic acids in wines 824(1998)159
- Visualization of solute migration in liquid chromatography columns 826(1998)1
- Conjunction of thermal lens spectrometry and high-performance liquid chromatography. Approach to data treatment 827(1998)13
- Using an electrochemical detector with a carbon interdigitated-array microelectrode for capillary-column liquid chromatography 828(1998)113
- Liquid chromatography of aromatic amines with photochemical derivatization and tris(bipyridine)ruthenium(III) chemiluminescence detection 828(1998)421
- Capillary electrochromatography of biomolecules with on-line electrospray ionization and time-of-flight mass spectrometry 828(1998)469
- Analysis of biopolymers by size-exclusion chromatography–mass spectrometry 828(1998)509
- Liquid chromatography with electrocatalytic detection of oxalic acid by a palladium-based glassy carbon electrode 833(1999)75
- High-throughput flow injection analysis–mass spectrometry with networked delivery of colour rendered results: the characterisation of liquid chromatography fractions 835(1999)29
- Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15
- Nickel content dependence of electrochemical behavior of carbohydrates on a titanium–nickel alloy electrode and its application to a liquid chromatography detector 837(1999)17
- Indirect fluorescence detection of aliphatic biogenic polyamines and diamines following chromatographic separation 841(1999)9
- Non-radioactive electron-capture detector 842(1999)229
- Condensation nucleation light scattering detection for biogenic amines separated by ion-exchange chromatography 844(1999)111
- Reassessment of the calibration constant for the IAsys biosensor 844(1999)395
- Comparison of the responses of triacylglycerols with an evaporative visible light scattering detector used in conventional, micro and capillary liquid chromatography 848(1999)95
- Continuous solid-phase extraction and dansylation of low-molecular-mass amines coupled on-line with liquid chromatography and peroxyoxalate chemiluminescence-based detection 848(1999)105
- Sources of uncertainty in gas chromatography and high-performance liquid chromatography 849(1999)13
- Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433
- Sensitive, universal detection for capillary electrochromatography using condensation nucleation light scattering detection 849(1999)587
- Enhancement of conductometric detection of weak acids in ion chromatography 850(1999)85
- Anion-exchange separation and determination of bisphosphonates and related analytes by post-column indirect fluorescence detection 850(1999)143
- Ion chromatography of nitrite at the ppb level with photometric measurement of iodine formed by post-column reaction of nitrite with iodide 850(1999)153
- Determination of aspartame by ion chromatography with electrochemical integrated amperometric detection 850(1999)277

**Detection limit**

Low-level calibration study for a new ion chromatographic column to determine borate in deionized water 850(1999)107

**Detection, SFC**

Pressure-regulating fluid interface and phase behavior considerations in the coupling of packed-column supercritical fluid chromatography with low-pressure detectors 807(1998)265

**Detection, TLC**

Iodine–azide reagent for the detection of biologically oriented thiophosphoryl compounds in thin-layer chromatography systems 813(1998)135

Analysis of impurities by high-performance thin-layer chromatography with Fourier transform infrared spectroscopy and UV absorbance detection in situ measurement: chlordiazepoxide in bulk powder and in tablets 813(1998)145

Unusual induction in the iodine–azide induced reaction exhibited by organophosphorus compounds on thin-layer chromatography plates 831(1999)321

Effect of the preparation conditions on the surface-enhanced Raman-spectrometric identification of thin-layer-chromatographic spots 845(1999)197

**Dialysis**

see also Microdialysis

Preconcentration of quinolones by dialysis on-line coupled to high-performance liquid chromatography 840(1999)11

**Diastereomer separation**

Determination of chiral catabolites from *S*-[2-carboxy-1-(1*H*-imidazol-4-yl)ethyl]glutathione, a proposed metabolite of *L*-histidine, by capillary electrophoresis 802(1998)73

Optical resolution of racemic carboxylic acids by gas chromatography 803(1998)307

Capillary zone electrophoretic separation of epimeric *N*-oxides of morphinane alkaloids 818(1998)251

Electrophoretic stereoisomer separation of aspartyl dipeptides and tripeptides in untreated fused-silica and polyacrylamide-coated capillaries using charged cyclodextrins 822(1998)137

Total resolution of 17 DL-amino acids labelled with a fluorescent chiral reagent, *R*(–)-4-(3-isothiocyantopyrrolidin-1-yl)-7-(*N,N*-dimethylaminosulfonyl)-2,1,3-benzoxadiazole, by high-performance liquid chromatography 822(1998)215

**Diesel fuel**

Statistical determination of the proper sample size in multicomponent separations 839(1999)129

Instrumentation and applications of fast high-resolution capillary gas chromatography 842(1999)309

Analysis of alkane, alkene, aromatic and oxygenated groups in petrochemical mixtures by supercritical fluid chromatography on silica gel 847(1999)309

**Diesel soot**

Determination of 1-nitropyrene with enzyme-linked immunosorbent assay versus high-performance column switching technique 807(1998)209

**Diffusion**

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

Computer simulation of electroinjection analysis and electrophoretically mediated microanalysis. Commensurable concentrations of sample and reagent 845(1999)227

**Diffusion coefficients**

Comparison of protein adsorption isotherms and uptake rates in preparative cation-exchange materials 827(1998)281

Application of inverse gas chromatography to the measurement of diffusion and phase equilibria in polyacrylate–solvent systems 845(1999)93

**Diffusion–convection matrices**

Comparison of diffusion and diffusion–convection matrices for use in ion-exchange separations of proteins 807(1998)185

**Diffusion denuders**

Carbon-coated annular denuders and ion chromatographic measurements for the determination of nitrogen-containing species (NO<sub>2</sub> and NO<sub>y</sub>) in remote atmospheres 846(1999)265

Use of ion chromatography for monitoring atmospheric pollution in background networks 846(1999)269

**Diffusion matrices**

Comparison of diffusion and diffusion–convection matrices for use in ion-exchange separations of proteins 807(1998)185

***Digitalis lanata***

Effect of *Digitalis lanata* matrix composition on the lanatoside C partition coefficient and its consequence on rotation locular counter-current chromatography efficiency 822(1998)37

***Dinophysis***

Liquid chromatographic methods for the isolation and identification of new pectenotoxin-2 analogues from marine phytoplankton and shellfish 844(1999)53

***Dinophysis fortii***

Determination of pectenotoxin-2 after solid-phase extraction from seawater and from the dinoflagellate *Dinophysis fortii* by liquid chromatography with electrospray mass spectrometry and ultraviolet detection. Evidence of oxidation of pectenotoxin-2 to pectenotoxin-6 in scallops 815(1998)155

***Dioncophyllum thollonii***

Acetogenic isoquinoline alkaloids. CXXI. Use of on-line high-performance liquid chromatography–nuclear magnetic resonance spectrometry coupling in phytochemical screening studies: rapid identification of metabolites in *Dioncophyllum thollonii* 837(1999)267

**Disinfection**

Determination of chlorate at low  $\mu\text{g}/\text{l}$  levels by ion-chromatography with postcolumn reaction 849(1999)209

**Disks**

Use of compact, porous units with immobilized ligands with high molecular masses in affinity chromatography and enzymatic conversion of substrates with high and low molecular masses 803(1998)61

**Dispersion**

see also Axial dispersion, Electromigration dispersion and Matrix solid-phase dispersion

Band dispersion in chromatography – a new view of A-term dispersion 831(1999)3

Peak dispersion due to geometration motion in the gel electrophoresis of macromolecules 838(1999)45

**Displacement**

Protein separation by hydrophobic interaction chromatography using methacrylic block copolymers as displacers 824(1998)35

**Displacement chromatography**

Structural characteristics of low-molecular-mass displacers for cation-exchange chromatography 814(1998)83

Displacement chromatography of proteins using a self-sharpening pH front formed by adsorbed buffering species as the displacer 825(1998)115

Displacement chromatography of chemotactic peptides 830(1999)91

Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433

**Displacement techniques**

Application of sample displacement techniques to the purification of synthetic oligonucleotides and nucleic acids: a mini-review with experimental results 806(1998)77

**Displacers**

Structural characteristics of low-molecular-mass displacers for cation-exchange chromatography 814(1998)83

Structural characteristics of low-molecular-mass displacers for cation-exchange chromatography. II. Role of the stationary phase 827(1998)295

**Dissociation constants**

Determination of dissociation constants of cephalosporins by capillary zone electrophoresis 803(1998)273

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities, acidity constants and separation selectivity of substituted aromatic acids. I. Methanol 806(1998)325

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities, acidity constants and separation selectivity of substituted aromatic acids. II. Ethanol 811(1998)201

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities and acidity constants of substituted aromatic acids. III. 1-Propanol 818(1998)209

Secondary chemical equilibria in high-performance liquid chromatography: influence of ionic strength and pH on retention of peptides 823(1998)497

Retention of ionizable compounds on high-performance liquid chromatography. III. Variation of pK values of acids and pH values of buffers in acetonitrile–water mobile phases 824(1998)137

Determination of dissociation constants of  $^{99\text{m}}\text{Tc}$  radiopharmaceuticals by capillary electrophoresis 833(1999)83

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities and acidity constants of substituted aromatic acids. IV. Acetonitrile 833(1999)245

Electrophoretic behaviour of quinolones in capillary electrophoresis. Effect of pH and evaluation of ionization constants 839(1999)183

**Distillation device**

Microwave mediated distillation with solid-phase microextraction: determination of off-flavors, geosmin and methylisoborneol, in catfish tissue 833(1999)223

**Distribution constants**

Relationship between liquid–liquid distribution and liquid–micelle distribution systems 807(1998)307

Reply to “Relationship between liquid–liquid distribution and liquid–micelle distribution systems”: the solvation environment in micelles evaluated by the linear solvation energy relationship method 807(1998)311

Chromatographic models for the sorption of neutral organic compounds by soil from water and air 845(1999)381

**Disulfide linkage analysis**

Rapid verification of disulfide linkages in recombinant human growth hormone by tandem column tryptic mapping 808(1998)121

**DNA reorientation time**

Kinetic properties of DNA migration under clamped homogeneous electric field conditions. DNA size, migration velocities and reorientation time determined in a single clamped homogeneous electric field run 806(1998)123

Comparison of DNA migrations in two clamped homogeneous electric field chambers of different sizes. Relation between sample thickness and electrophoresis time 806(1998)187

**Doehlert design**

Use of a Doehlert design in optimizing the analysis of selected tropane alkaloids by micellar electrokinetic capillary chromatography 829(1998)317

Optimization of solid-phase microextraction conditions using a response surface methodology to determine organochlorine pesticides in water by gas chromatography and electron-capture detection 844(1999)425

**Doping control**

Introduction to the application of capillary gas chromatography to the analysis of performance-enhancing drugs in doping control 843(1999)275

**Double bond location**

Gas-phase reagents for carbon–carbon double bond location: new applications. II. Use of vinyl methyl ether chemical ionization mass spectrometry to characterize C<sub>23</sub> to C<sub>33</sub> insect cuticular alkenes 803(1998)203

**Doublet peaks**

Prediction of numbers of singlets, doublets, and triplets in poorly resolved separations by statistical-overlap theory 831(1999)37

**Drug–protein binding**

Study by means of high-performance liquid chromatography of solutes that decrease theophylline/protein binding in the serum of uremic patients 847(1999)141

**Drug targeting**

Determination of naproxen in liver and kidney tissues by electrokinetic capillary chromatography with laser-induced fluorescence detection 802(1998)115

**Dual detection**

Effect of interdetector peak broadening and volume in size-exclusion chromatography with dual viscometric–concentration detection 809(1998)1

**Dust**

Gas chromatographic analysis of free fatty acids and fatty acid salts extracted with neutral and acidified dichloromethane from office floor dust 814(1998)161

**Dye ligands**

Separation of G structures formed by a 27-mer guanosine-rich oligodeoxyribonucleotide by dye–ligand affinity chromatography 840(1999)51

**Dynamic adsorption**

Lasalocid adsorbed on porous graphitic carbon as a chiral selector, in capillary liquid chromatography 828(1998)149

**Dynamic axial compression**

see also Axial compression

Size exclusion chromatography of polypeptides on Bio-Gel P2 in the dynamic axial compression mode 840(1999)281

**Dynamic axial compression column packing**

Unique dynamic axial compression packing system 827(1998)193

**Dynamic flow**

Dynamic control for ultra-fast separations of organic acids in capillary zone electrophoresis. A new direction to improve resolution 817(1998)129

**Dynamic high-pressure solvent extraction**

Comparison of pressurised liquid extraction with Soxhlet extraction for the analysis of polychlorinated dibenzo-*p*-dioxins and dibenzofurans from fly ash and environmental matrices 815(1998)231

**Dynamic light scattering**

Effects of electrokinetic chromatography conditions on the structure and properties of polyallylamine-supported pseudo-stationary phase. A study by dynamic light scattering 836(1999)295

**Dynamics**

Frameworks of separation theories from two separate worlds: dynamics and thermodynamics 828(1998)3

**Dynamic surface tension detection**

Hydrophobic interaction chromatography coupled with dynamic surface tension detection for the determination of surface active species in protein formulations 806(1998)239

# E

**ECF**

Characterization of organic deposits produced in the kraft pulping of *Eucalyptus globulus* wood 823(1998)457

***Echinacea* spp**

Analysis of alkalimides in roots and achenes of *Echinacea purpurea* by liquid chromatography–electrospray mass spectrometry 815(1998)205

**Efficiency**

Capillary zone electrophoresis at subzero temperatures. III. Operating conditions and separation efficiency 825(1998)55

Integral optimizing functional of separation efficiency 841(1999)133

Influence of capillary column efficiency on the reliability of the identification of complex mixtures by gas chromatography 845(1999)3

Influence of viscous heat dissipation on efficiency in high-speed high-performance liquid chromatography 845(1999)155

**Eggs**

Iso- and epi-iso-chlortetracycline are the principal metabolites of chlortetracycline in the hen's egg 812(1998)327

**Electrically driven chromatography**

Evaporation-induced solvent migration in electrically-driven thin layer chromatography 841(1999)127

**Electric charge**

Electropherograms in capillary zone electrophoresis plotted as a function of the quantity of electric charge 810(1998)183

**Electric double layer theory**

Interpretation of chromatographic behavior of ions based on the electric double-layer theory 850(1999)3

**Electric field**

Effect of electric field on liquid chromatographic separation of peptide digests. Combining capillary separation techniques 832(1999)149

**Electric field strength gradients**

Enhanced separation of DNA sequencing products by capillary electrophoresis using a stepwise gradient of electric field strength 802(1998)179

**Electroantennography**

Pheromone analysis using capillary gas chromatographic techniques 843(1999)199

**Electrochemical detection**

Some aspects of chromatographic behavior in capillary electrochromatography 802(1998)59

Sintered octadecylsilica as monolithic column packing in capillary electrochromatography and micro high-performance liquid chromatography 806(1998)251

Capillary electrochromatography with 1.8- $\mu\text{m}$  ODS-modified porous silica particles 808(1998)71

Electrochromatographic contributions in capillary electrophoresis of biomolecules 809(1998)173

- Enantiomer separation by pressure-supported electrochromatography using capillaries packed with a permethyl- $\beta$ -cyclodextrin stationary phase 815(1998)183
- Capillary electrochromatographic separation of basic compounds with bare silica as stationary phase 817(1998)65
- Gradient elution electrochromatography with a flow-injection analysis interface 828(1998)105
- High-efficiency chiral separations of *N*-derivatized amino acids by packed-capillary electrochromatography with a quinine-based chiral anion-exchange type stationary phase 829(1998)115
- Comparison of the electroosmotic flow profiles and selectivity of stationary phases used in capillary electrochromatography 832(1999)41
- Application of capillary electrochromatography to the separation of phenylthiohydantoin-amino acids 832(1999)133
- Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15
- Attempt to define the role of the length of the packed section in capillary electrochromatography 836(1999)25
- Influence of the electrical double-layer on electroosmotic flow in capillary electrochromatography 836(1999)35
- Separation of nucleosides using capillary electrochromatography 836(1999)315
- Pore flow effects in electrically driven size-exclusion chromatography 837(1999)3
- Enantioseparations in normal- and reversed-phase nano-high-performance liquid chromatography and capillary electrochromatography using polyacrylamide and polysaccharide derivatives as chiral stationary phases 837(1999)51
- High-efficiency enantioseparations of *N*-derivatized amino acids by packed capillary electrochromatography using ODS silica and a quinine-derived chiral selector as ion-pair agent 839(1999)167
- Evaporation-induced solvent migration in electrically-driven thin layer chromatography 841(1999)127
- Peak distortion, data sampling errors and the integrator in the measurement of very narrow chromatographic peaks 842(1999)321
- Electroosmotically driven thin-layer electrochromatography on silica media 844(1999)333
- Influence of ionic strength and organic modifier on performance in capillary electrochromatography on phenyl silica stationary phase 845(1999)203
- Open tubular capillary electrochromatography in etched, chemically modified 20  $\mu\text{m}$  I.D. capillaries 845(1999)237
- Enantiomeric separations by capillary electrochromatography using a macrocyclic antibiotic chiral stationary phase 848(1999)375
- Electrochromatography–mass spectrometry**  
Capillary electrochromatography of biomolecules with on-line electrospray ionization and time-of-flight mass spectrometry 828(1998)469

- Amino acid sequence and D/L-configuration determination of peptides utilizing liberated N-terminus phenylthiohydantoin amino acids 813(1998)267
- Continuous enantiomer separation of the volatile inhalation anesthetic enflurane with a gas chromatographic simulated moving bed unit 813(1998)333
- Simultaneous separation of *o*-, *m*-, *p*-fluoro-DL-phenylalanine and *o*-, *m*-, *p*-DL-tyrosine by ligand-exchange micellar electrokinetic capillary chromatography 813(1998)369
- Dermatan sulfate as useful chiral selector in capillary electrophoresis 814(1998)205
- Chiral separation of 2,4-dinitrophenyl amino acids using 3-*O*-methyl- $\beta$ -cyclodextrin-bonded stationary phase in reversed-phase liquid chromatography 814(1998)247
- Enantiomer separation by pressure-supported electrochromatography using capillaries packed with a permethyl- $\beta$ -cyclodextrin stationary phase 815(1998)183
- Determination of the chirality of cysteines in somatostatin analogs 816(1998)59
- Molecularly imprinted uniform-sized polymer-based stationary phase for naproxen. Comparison of molecular recognition ability of the molecularly imprinted polymers prepared by thermal and redox polymerization techniques 816(1998)113
- High-performance liquid chromatographic separation of enantiomers of cyclic 1,3-amino alcohol derivatives 816(1998)123
- Nonaqueous capillary electrophoretic separation of enantiomers using the single-isomer heptakis(2,3-diacetyl-6-sulfato)- $\beta$ -cyclodextrin as chiral resolving agent 816(1998)233
- Stereoselective separation and detection of phenoxy acid herbicide enantiomers by cyclodextrin-modified capillary zone electrophoresis–electrospray ionization mass spectrometry 817(1998)75
- Determination of trace enantiomeric impurities in chiral compounds by capillary electrophoresis with uncoated, cationic, anionic and neutral surface modified capillaries 817(1998)83
- Chiral separations by capillary zone electrophoresis with the use of cyanoethylated- $\beta$ -cyclodextrin as chiral selector 817(1998)91

- Systematic approach to methods development for the capillary electrophoretic analysis of a minor enantiomer using a single-isomer sulfated cyclodextrin. A case study of L-carbidopa analysis 817(1998)105
- Enantioseparation of uncharged compounds by capillary electrophoresis using mixtures of anionic and neutral  $\beta$ -cyclodextrin derivatives 817(1998)113
- Nonaqueous capillary electrophoresis chiral separations with quaternary ammonium  $\beta$ -cyclodextrin 817(1998)121
- Sparteine as mobile phase modifier in the chiral separation of hydrophobic basic drugs on an  $\alpha_1$ -acid glycoprotein column 818(1998)43
- Stereoselective analysis of benazepril and its stereoisomers by reversed-phase high-performance liquid chromatography on a chiral AGP column 818(1998)53
- Effect of various cyclodextrin derivatives on the resolution of fencamfamine isomers with capillary electrophoresis and nuclear magnetic resonance 818(1998)239
- Simultaneous determination of methylphenobarbital enantiomers and phenobarbital in human plasma by on-line coupling of an achiral precolumn to a chiral liquid chromatographic column 819(1998)143
- Direct optical resolution of *trans*-dihydrodiol enantiomers of fjord-region polycyclic aromatic hydrocarbons by high-performance liquid chromatography on a modified cellulose phase 822(1998)29
- Chiral separation of DL-tryptophan using porous membranes containing multilayered bovine serum albumin crosslinked with glutaraldehyde 822(1998)53
- Electrophoretic stereoisomer separation of aspartyl dipeptides and tripeptides in untreated fused-silica and polyacrylamide-coated capillaries using charged cyclodextrins 822(1998)137
- Liquid chromatographic resolution of racemic amino acids and their derivatives on a new chiral stationary phase based on crown ether 822(1998)155
- Dynamic ligand-exchange chiral stationary phases derived from N-substituted (*S*)-phenylglycinol selectors 824(1998)7
- Chiral resolution of the enantiomers of tetrahydronaphthalenic derivatives, new agonist and antagonist ligands for melatonin receptors, using high-performance liquid chromatography on cellulose chiral stationary phases 824(1998)15
- Evaluation of the enantioselective possibilities of sulfated cyclodextrins for the separation of aspartyl di- and tripeptides in capillary electrophoresis 824(1998)91
- Fast chiral separation of amino acid derivatives and acidic drugs by co-electroosmotic flow capillary electrophoresis with vancomycin as chiral selector 825(1998)81
- Chiral resolution of enantiomeric steroids by high-performance liquid chromatography on amylose tris(3,5-dimethylphenylcarbamate) under reversed-phase conditions 825(1998)107
- Analytical supercritical fluid chromatography using fully automated column and modifier selection valves for the rapid development of chiral separations 826(1998)217
- Separation of enantiomers of  $\alpha$ -hydroxy acids by reversed-phase liquid chromatography after derivatization with 1-(9-fluorenyl)ethyl chloroformate 827(1998)31
- Capillary electrophoretic separation of enantiomers using the single isomer heptakis-(2,3-dimethyl-6-sulfato)- $\beta$ -cyclodextrin as chiral resolving agent in methanol–water background electrolytes 827(1998)121
- Design of the simulated moving bed process based on adsorption isotherm measurements using a perturbation method 827(1998)175
- Separation of enantiomers of a chiral epoxide by simulated moving bed chromatography 827(1998)215
- Separation of a racemic pharmaceutical intermediate using closed-loop steady state recycling 827(1998)359
- Lasalocid adsorbed on porous graphitic carbon as a chiral selector, in capillary liquid chromatography 828(1998)149
- Enantiomeric separations of benzodiazepines by electrochemically modulated liquid chromatography 828(1998)157
- Improved enantioselective method for the determination of the enantiomers of reboxetine in plasma by solid-phase extraction, chiral derivatization, and column-switching high-performance liquid chromatography with fluorescence detection 828(1998)167
- Effect of temperature on retention of enantiomers of  $\beta$ -methyl amino acids on a teicoplanin chiral stationary phase 828(1998)177
- Determination of the absolute configuration of  $\alpha$ -hydroxyglycine derivatives by enzymatic conversion and chiral high-performance liquid chromatography 828(1998)191
- Validated high-performance liquid chromatographic methods for quantitation of a novel nonsteroidal antiestrogen 828(1998)247
- Investigation of stereoselective metabolism of amphetamine in rat liver microsomes by microdialysis and liquid chromatography with precolumn chiral derivatization 828(1998)95

- Highly sensitive method for the separation of enantiomeric and regioisomeric diacylglycerols as 2-anthrylurethanes by chiral-phase high-performance liquid chromatography with fluorescence detection 829(1998)81
- Chiral discrimination of Dns- and unmodified D,L-amino acids by copper(II) complexes of terdentate ligands in high-performance liquid chromatography 829(1998)101
- High-efficiency chiral separations of *N*-derivatized amino acids by packed-capillary electrochromatography with a quinine-based chiral anion-exchange type stationary phase 829(1998)115
- Effect of additives on chiral selectivities by  $\beta$ -cyclodextrin in capillary electrophoresis based on the phenomenon of solvatochromism 829(1998)301
- Comparison of native, alkylated and charged cyclodextrins for the chiral separation of labetalol stereoisomers by capillary electrophoresis 829(1998)341
- Separation of enantiomers on a chiral stationary phase based on ovoglycoprotein. III. Effect of aggregation of ovoglycoprotein on chiral resolution 830(1999)81
- Enantioselective high-performance liquid chromatography of chiral intermediates in the total synthesis of 4-demethoxydaunomycinone 830(1999)191
- Enantiomer separation of hydrophobic amino compounds by high-performance liquid chromatography using crown ether dynamically coated chiral stationary phase 830(1999)311
- Carbamate chiral surfactants for capillary electrophoresis 831(1999)311
- Chiral separation of a pharmaceutical intermediate by a simulated moving bed process 832(1999)55
- Determination of enantiomeric amino acids with high-performance liquid chromatography and pre-column derivatisation with *o*-phthalaldehyde and *N*-isobutyrylcysteine in seawater and fossil samples (mollusks) 832(1999)123
- Analytical separation of the four stereoisomers of isopropyl 2,3-epoxybutanoate by gas chromatography 832(1999)259
- pH-Dependent reversal of the chiral recognition of tripeptide enantiomers by carboxymethyl- $\beta$ -cyclodextrin 833(1999)261
- Chiral separation of aromatic amino acids by capillary electrophoresis 836(1999)137
- Enantioseparations in normal- and reversed-phase nano-high-performance liquid chromatography and capillary electrochromatography using polyacrylamide and polysaccharide derivatives as chiral stationary phases 837(1999)51
- Liquid chromatographic resolution of racemic amines and amino alcohols on a chiral stationary phase derived from crown ether 837(1999)75
- Optimization of tandem columns for the isomer and enantiomer selective separation of toxaphenes 837(1999)201
- Capillary zone electrophoresis separations of enantiomers present in complex ionic matrices with on-line isotachopheretic sample pretreatment 838(1999)31
- Comparison of enantioselective separation of *N*-*tert*-butyloxycarbonyl amino acids and their non-blocked analogues on teicoplanin-based chiral stationary phase 838(1999)121
- Use of MDL 63 246 (Hepta-Tyr) antibiotic in capillary zone electrophoresis. II. Chiral resolution of  $\alpha$ -hydroxy acids 838(1999)223
- Characterization of the stereoselective metabolism of thiopental and its metabolite pentobarbital via analysis of their enantiomers in human plasma by capillary electrophoresis 838(1999)237
- Chitosan derivatives as chiral selectors bonded on allyl silica gel: preparation, characterisation and study of the resulting high-performance liquid chromatography chiral stationary phases 839(1999)15
- Direct high-performance liquid chromatographic separations of metoprolol analogues on a Chiralcel OD column using chemometrics 839(1999)23
- High-efficiency enantioseparations of *N*-derivatized amino acids by packed capillary electrochromatography using ODS silica and a quinine-derived chiral selector as ion-pair agent 839(1999)167
- Enantiomer separation of amino acid derivatives on a new polymeric chiral resorc[4]arene stationary phase by capillary gas chromatography 840(1999)145
- Structural optimization of a chiral selector for use in preparative enantioselective chromatography 840(1999)151
- Joint use of cyclodextrin additives in chiral discrimination by reversed-phase high-performance liquid chromatography: temperature effects 840(1999)159
- Separation of enantiomers on a chiral stationary phase based on ovoglycoprotein. V. Influence of immobilization method on chiral resolution 840(1999)171
- Miniaturised on-line solid-phase extraction for enhancement of concentration sensitivity in capillary electrophoresis 841(1999)249
- Recent advances in non-silylation derivatization techniques for gas chromatography 843(1999)1

- Cyclodextrin derivatives as chiral selectors for direct gas chromatographic separation of enantiomers in the essential oil, aroma and flavour fields 843(1999)99
- Comparison of two methods for the gas chromatographic determination of thermodynamic parameters of enantioselectivity 843(1999)123
- Pheromone analysis using capillary gas chromatographic techniques 843(1999)199
- Analytical study of penicillamine in pharmaceuticals by capillary zone electrophoresis 844(1999)361
- Semisynthetic chondroitins as chiral buffer additives in capillary electrophoresis 845(1999)247
- Enantiomeric resolution of derivatives of  $\alpha$ -aminophosphonic and  $\alpha$ -aminophosphinic acids by high-performance liquid chromatography and capillary electrophoresis 845(1999)273
- Preparation and enantiomer separation behavior of selectively methylated  $\gamma$ -cyclodextrin-bonded stationary phases for high-performance liquid chromatography 845(1999)455
- High-performance liquid chromatographic separation of novel atropic  $\alpha,\alpha$ -disubstituted- $\beta$ -amino acids, either on different  $\beta$ -cyclodextrin-bonded phases or as their 1-fluoro-2,4-dinitrophenyl-5-L-alanine amide derivatives 846(1999)83
- Enantioseparation of  $\alpha$ -amino acids and dipeptides by ligand-exchange capillary electrophoresis of various L-4-hydroxyproline derivatives 846(1999)157
- Simultaneous stereoselective analysis by capillary electrophoresis of tramadol enantiomers and their main phase I metabolites in urine 846(1999)227
- Trace analysis of haloperidol and its chiral metabolite in plasma by capillary electrophoresis 846(1999)239
- Separation of phenoxy acid herbicides and their enantiomers in the presence of selectively methylated cyclodextrin derivatives by capillary zone electrophoresis 846(1999)359
- Use of 6-*O*-*tert*-butyldimethylsilylated  $\beta$ -cyclodextrins for the enantioseparation of chiral organochlorine compounds 846(1999)375
- Chromatographic resolution of peptide-like conjugates of jasmonic acid and of cucurbitic acid isomers 847(1999)103
- Chromatographic separation of  $\alpha$ -pinene isomerization products 848(1999)297
- Thermodynamic study and separation mechanism of diltiazem optical isomers in packed-column supercritical fluid chromatography 848(1999)337
- Enantiomeric separations by capillary electrochromatography using a macrocyclic antibiotic chiral stationary phase 848(1999)375
- Enantiomeric separation of atropine in *Scopolia* extract and *Scopolia Rhizome* by capillary electrophoresis using cyclodextrins as chiral selectors 848(1999)465
- Chromatographic resolution of the enantiomers of a pharmaceutical intermediate from the milligram to the kilogram scale 849(1999)309
- Uniform-sized molecularly imprinted polymer for (*S*)-naproxen selectively modified with hydrophilic external layer 849(1999)331
- Kinetic study of the mass transfer of *S*-Tröger's base in the system cellulose triacetate and ethanol 849(1999)445
- Enantiomeric separation of D- and L-carnitine by integrating on-line derivatization with capillary zone electrophoresis 849(1999)609
- Enantioselectivity**  
Chiral analysis by capillary electrophoresis using antibiotics as chiral selector (Review) 807(1998)37
- Comparison of two methods for the gas chromatographic determination of thermodynamic parameters of enantioselectivity 843(1999)123
- End-capping**  
Characteristics of octadecylsilylated silica gels end-capped by high-temperature silylation 813(1998)239
- Environmental analysis**

Continuous solid-phase extraction and dansylation of low-molecular-mass amines coupled on-line with liquid chromatography and peroxyoxalate chemiluminescence-based detection 848(1999)105

Diffusion technique for the production of gas standards for atmospheric measurements 848(1999)239

Analysis of brominated compounds in background air by gas chromatography–high-resolution mass spectrometry 848(1999)261

Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279

Evaluation of dynamic headspace and purge-and-trap techniques for the high-resolution gas chromatography analysis of nitrous oxide in seawater 848(1999)327

Determination of iron(II) in natural waters by capillary zone electrophoresis using on-capillary complexation with 2,4,6-tri(2'-pyridyl)-1,3,5-triazine 848(1999)491

Quantitative determination of sulfur-containing anions in complex matrices with capillary electrophoresis and conductivity detection 848(1999)503

Capillary electrophoretic determination of inorganic anions in the drainage and surface water samples 848(1999)545

Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433

Simultaneous determination of anions and cations by ion-exclusion chromatography–cation-exchange chromatography with tartaric acid/18-crown-6 as eluent 850(1999)79

Determination of trace level perchlorate in drinking water and ground water by ion chromatography 850(1999)131

Ion chromatography of nitrite at the ppb level with photometric measurement of iodine formed by post-column reaction of nitrite with iodide 850(1999)153

Simultaneous separation of common mono- and divalent cations on silica gel modified with aluminium by non-suppressed ion chromatography with conductimetric detection and nitric acid–15-crown-5 as eluent 850(1999)229

Determination of glyphosate by ion chromatography 850(1999)297

Analysis of wastewater for anionic and cationic nutrients by ion chromatography in a single run with sequential flow injection analysis 850(1999)303

Acid-rain monitoring in East Asia with a portable-type ion-exclusion–cation-exchange chromatographic analyzer 850(1999)311

Development of an analytical method for beryllium in airborne dust by micellar electrokinetic chromatography 850(1999)363

#### **Environment-assisted cracking**

Using capillary electrophoresis to study the chemical conditions within cracks in aluminum alloys 850(1999)381

#### **EPA method 8330**

Improvement of EPA method 8330: complete separation using a two-phase approach 849(1999)381

#### **Epoxy-activated stationary phases**

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

Salt-induced immobilization of affinity ligands onto epoxide-activated supports 849(1999)1

#### **Equilibrium–dispersive model**

Theoretical analysis of the behavior of a centrally injected band in a homogeneous chromatographic column 828(1998)19

#### **Equilibrium partitioning in closed systems**

Determination of Henry's law coefficients by combination of the equilibrium partitioning in closed systems and solid-phase microextraction techniques 830(1999)353

#### ***Escherichia coli***

Quantifying biosynthetic human growth hormone in *Escherichia coli* with capillary electrophoresis under hydrophobic conditions 817(1998)205

#### **Essential oils**

see also Oils

Polarity changes during capillary gas chromatographic and gas chromatographic–mass spectrometric analysis using serially coupled columns of different natures and temperature programming. Application to the identification of constituents of essential oils 819(1998)61

Cyclodextrin derivatives as chiral selectors for direct gas chromatographic separation of enantiomers in the essential oil, aroma and flavour fields 843(1999)99

**Etchants**

Ion-chromatographic study of interactions in HF–H<sub>3</sub>PO<sub>4</sub>–HNO<sub>3</sub> semiconductor etchants. Systematic use of statistically designed mixture experiments 804(1998)161

**Ethanol precipitation**

Fractionation of maltodextrins by ethanol 803(1998)103

***Eucalyptus globulus***

Characterization of organic deposits produced in the kraft pulping of *Eucalyptus globulus* wood 823(1998)457

Analysis of impurities occurring in a totally chlorine free-bleached Kraft pulp 830(1999)227

**Evaporation**

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

**Evaporation loss**

Concentration of small volumes of nonpolar solutions containing trace volatile compounds 824(1998)195

**Evaporation rate**

Optimization of large-volume on-column injection conditions in gas chromatography by monitoring the actual carrier gas flow 841(1999)75

**Evaporative light scattering detection**

Comparison of the responses of triacylglycerols with an evaporative visible light scattering detector used in conventional, micro and capillary liquid chromatography 848(1999)95

**Evolved gas analysis**

Thermochromatography for evolved gas analysis of apatite materials 819(1998)75

**Expanded bed adsorption**

Immobilised metal ion affinity chromatography purification of alcohol dehydrogenase from baker's yeast using an expanded bed adsorption system 840(1999)195

**Expanded bed chromatography**

Expanded bed chromatography for one-step purification of mannose binding lectin from tulip bulbs using mannose immobilized on DEAE Streamline 822(1998)19

**Experimental design**

Ion-chromatographic study of interactions in HF–H<sub>3</sub>PO<sub>4</sub>–HNO<sub>3</sub> semiconductor etchants. Systematic use of statistically designed mixture experiments 804(1998)161

Separation of barbiturates with micellar liquid chromatography and optimization by a second order mathematical design 805(1998)45

Development of a gas chromatography–mass spectrometry method for the analysis of aminoglycoside antibiotics using experimental design for the optimisation of the derivatisation reactions 818(1998)95

Experimental design approach for the optimization of supercritical fluid extraction of chlorophenols from polluted soils 823(1998)249

Optimization of solid-phase microextraction for the speciation of butyl- and phenyltins using experimental designs 826(1998)57

Use of a Doehlert design in optimizing the analysis of selected tropane alkaloids by micellar electrokinetic capillary chromatography 829(1998)317

Development and optimisation of a new derivatisation procedure for gas chromatographic–mass spectrometric analysis of dihydrostreptomycin. Comparison of multivariate and step-by-step optimisation procedures 840(1999)81

Systematic optimization of peak capacity for pesticide separation in micellar electrokinetic chromatography 848(1999)347

Use of artificial neural networks in capillary zone electrophoresis 848(1999)365

Artificial neural networks for computer-aided modelling and optimisation in micellar electrokinetic chromatography 850(1999)345

**Expert systems**

Towards an expert system in ion-exclusion chromatography by means of multiple classification ripple-down rules 804(1998)29

**Extraction methods**

- Supercritical fluid extraction for the determination of petroleum hydrocarbons in soil 845(1999)357
- Supercritical-carbon-dioxide extraction of lipids from a contaminated soil 845(1999)365
- Selective on-line immunoextraction coupled to liquid chromatography for the trace determination of benzidine, congeners and related azo dyes in surface water and industrial effluents 846(1999)317
- Multiresidue screening methods for the determination of pesticides in plant materials 846(1999)341
- Quantitative determination of Closantel residues in milk by high-performance liquid chromatography with fluorescence detection 846(1999)383
- Poly(7-oxanorborn-2-ene-5,6-dicarboxylate)-coated silica prepared by ring-opening metathesis polymerization for the selective enrichment of radioactive lanthanides 848(1999)193
- Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279
- Evaluation of solid-phase microextraction for sampling of volatile organic sulfur compounds in air for subsequent gas chromatographic analysis with atomic emission detection 848(1999)305
- Simultaneous analysis of thiols, sulphides and disulphides in wine aroma by headspace solid-phase microextraction–gas chromatography 849(1999)293

True moving bed chromatography: solid–liquid multi-stage counter-current extraction 849(1999)61

## F

### Factor analysis

Parallel factor analysis of partially resolved chromatographic data. Determination of polycyclic aromatic hydrocarbons in water samples 802(1998)263

### Factorial design

Determination of some aromatic amines in finger-paints for children's use by supercritical fluid extraction combined with gas chromatography 819(1998)259

Determination of phenol in polymeric materials by supercritical fluid extraction combined with gas chromatography–mass spectrometry 819(1998)289

### Fast atom bombardment

Liquid chromatographic separation and mass spectrometric identification of chlorophyll *b* allomers 837(1999)107

### Fast chromatography

Peak distortion, data sampling errors and the integrator in the measurement of very narrow chromatographic peaks 842(1999)321

### Fats

Rapid determination of skatole and indole in pig back fat by normal-phase liquid chromatography 809(1998)246

Analysis of human milk triacylglycerols by high-performance liquid chromatography with light-scattering detection 823(1998)475

New chromatographic, mass spectrometric and stable isotope approaches to the classification of degraded animal fats preserved in archaeological pottery 833(1999)209

Automated one-step supercritical fluid extraction and clean-up system for the analysis of pesticide residues in fatty matrices 840(1999)93

Effort to improve the quantitative determination of oxidation and hydrolysis compound classes in edible vegetable oils 844(1999)77

Identification of steroidal hydrocarbons in refined confectionery fats by gas chromatography–mass spectrometry 847(1999)179

Positional and configurational separation of fatty acid isomers by micro reversed-phase liquid chromatography with an  $\text{Ag}^+$ -containing mobile phase 848(1999)83

### Feed additives

Identification of main corticosteroids as illegal feed additives in milk replacers by liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 807(1998)219

### Feeds

Simultaneous determination of fat-soluble vitamins A, D and E and pro-vitamin  $\text{D}_2$  in animal feeds by one-step extraction and high-performance liquid chromatography analysis 825(1998)127

### Fertilizers

Determination of total chromium in phosphate rocks by ion chromatography 850(1999)137

### Fiber-optic-based UV–visible absorbance detection

Fiber-optic-based UV–visible absorbance detector for capillary electrophoresis, utilizing focusing optical elements 809(1998)181

### Fiber optics thermal lens detection

Fiber optic modified thermal lens detector system for the determination of amino acids 817(1998)223

### Field-amplified sample injection

Characterisation of buserelin acetate by capillary electrophoresis 817(1998)239

### Field enhanced sample injection

Sample stacking of fast-moving anions in capillary zone electrophoresis with pH-suppressed electroosmotic flow 850(1999)339

### Field-flow fractionation

Numerical simulation of band-broadening during hydrodynamic relaxation in frit-inlet field-flow fractionation channels 805(1998)149

Size characterization of liposomes by flow field-flow fractionation and photon correlation spectroscopy. Effect of ionic strength and pH of carrier solutions 813(1998)91

Magnetic split-flow thin fractionation: new technique for separation of magnetically susceptible particles 813(1998)313

Characterization of hematite and its interaction with humic material using flow field-flow fractionation 816(1998)145

Computer simulation of particle separation based on non-equilibrium swelling 831(1999)51

Deviations to classical retention theory of field-flow fractionation 831(1999)73

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

Different elution modes and field programming in gravitational field-flow fractionation. I. A theoretical approach 845(1999)285

Study of hydroxyapatite aggregation in the presence of potassium phosphate by centrifugal sedimentation field-flow fractionation 845(1999)293

Continuous split flow-thin cell fractionation of starch particles 845(1999)303

#### **Filter paper pieces-based DEAE-cellulose**

Direct fractionation of proteins in particle-containing feedstocks by a filter paper pieces-based DEAE-cellulose column chromatography. Rapid, robust and low-cost capturing procedure for protein 811(1998)69

#### **Finite bath adsorption**

Visualising intraparticle protein transport in porous adsorbents by confocal microscopy 813(1998)387

#### **Fish**

Histamine and histidine determination in tuna fish samples using high-performance liquid chromatography. Derivatization with *o*-phthalaldehyde and fluorescence detection or UV detection of “free” species 809(1998)241

Evaluation of musk contamination of freshwater fish in Italy by accelerated solvent extraction and gas chromatography with mass spectrometric detection 814(1998)187

Assessment of the sample handling procedures in a labor-saving method for the analysis of organochlorine compounds in a large number of fish samples 823(1998)373

Condensation nucleation light scattering detection for biogenic amines separated by ion-exchange chromatography 844(1999)111

#### **Fixed size moving window evolving factor analysis approach**

Purity assessment and resolution of tetracycline hydrochloride samples analysed using high-performance liquid chromatography with diode array detection 832(1999)67

#### **Flame ionization detection**

Prediction of flame ionization detector response factors using an artificial neural network 825(1998)161

Aspects of the mechanism of the flame ionization detector 842(1999)221

#### **Flame photometric detection**

Pulsed flame photometric detector – a step forward towards universal heteroatom selective detection 805(1998)177

Photometric response of a very small, stoichiometric hydrogen–air flame to compounds of the iron group 806(1998)305

#### **Flame photometric detection, sulfur mode**

Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433

#### **Flash chromatography**

Purification of closely eluting hydrophobic microcystins (peptide cyanotoxins) by normal-phase and reversed-phase flash chromatography 848(1999)515

#### **Flavor enhancers**

Preparative separation of value-added peptides from rice bran proteins by high-performance liquid chromatography 827(1998)319

#### **Flow distribution**

Flow distribution in chromatographic columns 831(1999)149

#### **Flow field-flow fractionation**

Size characterization of liposomes by flow field-flow fractionation and photon correlation spectroscopy. Effect of ionic strength and pH of carrier solutions 813(1998)91

Characterization of hematite and its interaction with humic material using flow field-flow fractionation 816(1998)145

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

#### **Flow-gradient chromatography**

Simultaneous separation of anions and cations by flow-gradient ion chromatography 845(1999)165

#### **Flow injection analysis**

Calibration principles for flow injection analysis–capillary electrophoresis systems with electrokinetic injection 808(1998)219

Gradient elution electrochromatography with a flow-injection analysis interface 828(1998)105

High-throughput flow injection analysis–mass spectrometry with networked delivery of colour rendered results: the characterisation of liquid chromatography fractions 835(1999)29

#### **Flow injection–capillary electrophoresis coupling**

Determination of anti-carcinogenic polyphenols present in green tea using capillary electrophoresis coupled to a flow injection system 827(1998)113

**Flow pores**

Superporous agarose beads as a hydrophobic interaction chromatography support 830(1999)275

**Flow-rate**

Optimisation and routine use of generic ultra-high flow-rate liquid chromatography with mass spectrometric detection for the direct on-line analysis of pharmaceuticals in plasma 828(1998)199

Relationship between the flow-rate of the mobile phase and retention of the stationary phase in counter-current chromatography 835(1999)231

Validity of Darcy's law at low flow-rates in liquid chromatography 849(1999)35

**Fluorenyl alkyl silanes**

*n*-Alkyl fluorenyl phases in chromatography. I. Synthesis and characterization 805(1998)71

**Fluorescence detection**

- High-performance liquid chromatographic determination of ochratoxin A in artificially contaminated cocoa beans using automated sample clean-up 810(1998)89
- Loading capacity and chromatographic behavior of a porous graphitic carbon column for polychlorinated biphenyls 811(1998)135
- Direct chiral resolution of pantothenic acid using 2-hydroxypropyl- $\beta$ -cyclodextrin in capillary electrophoresis 811(1998)269
- Simultaneous determination of  $\beta$ -lactam antibiotics in milk by ion-pair liquid chromatography 812(1998)205
- Multiresidue determination of  $\beta$ -lactam antibiotics in milk and tissues with the aid of high-performance liquid chromatographic fractionation for clean up 812(1998)237
- Simultaneous determination of five macrolide antibiotics in meat by high-performance liquid chromatography 812(1998)295
- Mass spectrometric analysis of tetracycline antibiotics in foods (Review) 812(1998)309
- Improved method for the on-line metal chelate affinity chromatography–high-performance liquid chromatographic determination of tetracycline antibiotics in animal products 812(1998)321
- Iso- and epi-iso-chlortetracycline are the principal metabolites of chlortetracycline in the hen’s egg 812(1998)327
- Chromatographic methods of analysis of antibiotics in milk (Review) 812(1998)99
- Separation of lac dye components by high-speed counter-current chromatography 813(1998)71
- High-performance capillary electrophoresis of cereal proteins 814(1998)25
- Simultaneous pulsed flame photometric and mass spectrometric detection for enhanced pesticide analysis capabilities 814(1998)133
- Evaluation of musk contamination of freshwater fish in Italy by accelerated solvent extraction and gas chromatography with mass spectrometric detection 814(1998)187
- Instrumental methods for determination of nonmacrocyclic trichothecenes in cereals, foodstuffs and cultures 815(1998)103
- Determination of eight trichothecenes by gas chromatography–mass spectrometry after sample clean-up by a two-stage solid-phase extraction 815(1998)123
- Determination of zearalenone in corn by means of immunoaffinity clean-up and high-performance liquid chromatography with fluorescence detection 815(1998)133
- Determination of seven biogenic amines in foods by micellar electrokinetic capillary chromatography 815(1998)243
- Gas chromatography determination of polychlorinated biphenyls in powdered and liquid soybean milks 815(1998)272
- Capillary column gas–liquid chromatographic separation of  $\Delta^5$ -unsaturated and saturated phytosterols 816(1998)177
- Analysis of organic anions in tea infusions using capillary electrophoresis 817(1998)139

- Cationic and anionic polymeric additives for wall deactivation and selectivity control in the capillary electrophoretic separation of proteins in food samples 817(1998)227
- Separation of high-molecular-mass carrageenan polysaccharides by capillary electrophoresis with laser-induced fluorescence detection 817(1998)353
- Supercritical fluid extraction and off-line clean-up for the analysis of organochlorine pesticide residues in garlic 818(1998)138
- Tentative analysis of virgin olive oil aroma by supercritical fluid extraction–high-resolution gas chromatography–mass spectrometry 819(1998)267
- High-performance liquid chromatography–atmospheric-pressure chemical ionization mass spectrometry as a new tool for the determination of the mycotoxin zearalenone in food and feed 819(1998)277
- Ion-exclusion chromatographic determination of organic acids in vinegars 822(1998)45
- Determination of low-molecular-mass anionic compounds in beverage samples using capillary zone electrophoresis with simultaneous indirect ultraviolet and conductivity detection 822(1998)117
- Selection and optimization of background electrolytes for simultaneous detection of small cations and organic acids by capillary electrophoresis with indirect photometry 822(1998)125
- Multiresidue determination of pesticides in plants by high-performance liquid chromatography following gel permeation chromatographic clean-up 823(1998)11
- Validation of an immunoassay method for the determination of traces of carbaryl in vegetable and fruit extracts by liquid chromatography with photodiode array and mass spectrometric detection 823(1998)109
- Selective identification by matrix-assisted laser desorption/ionization time-of-flight mass spectrometry of different types of gluten in foods made with cereal mixtures 823(1998)299
- Anti-nutritional constituents of six underutilized legumes grown in Nigeria 823(1998)307
- Simultaneous gas chromatographic determination of food preservatives following solid-phase extraction 823(1998)321
- High-performance liquid chromatography with diode-array detection for the determination of phenolic compounds in peel and pulp from different apple varieties 823(1998)331
- Improved size-exclusion high-performance liquid chromatographic method for the simple analysis of grape juice and wine polysaccharides 823(1998)339
- Determination of acids and volatile compounds in red Txakoli wine by high-performance liquid chromatography and gas chromatography 823(1998)349
- Determination of riboflavin, flavin mononucleotide and flavin–adenine dinucleotide in wine and other beverages by high-performance liquid chromatography with fluorescence detection 823(1998)355
- Determination of polychlorinated biphenyls in soybean infant formulas by gas chromatography 823(1998)365
- Assessment of the sample handling procedures in a labor-saving method for the analysis of organochlorine compounds in a large number of fish samples 823(1998)373
- Gas chromatography with electron-capture and nitrogen–phosphorus detection in the analysis of pesticides in honey after elution from a Florisil column. Influence of the honey matrix on the quantitative results 823(1998)381
- Evaluation by high-performance liquid chromatography of the hydrolysis of human milk triacylglycerides during storage at low temperatures 823(1998)467
- Analysis of human milk triacylglycerols by high-performance liquid chromatography with light-scattering detection 823(1998)475
- Analysis of carbendazim, benomyl, thiophanate methyl and 2,4-dichlorophenoxyacetic acid in fruits and vegetables after supercritical fluid extraction 825(1998)45
- Simultaneous analysis of tyrosol, tryptophol and ferulic acid in commercial sake samples by micellar electrokinetic chromatography 825(1998)102
- Column liquid chromatography determination of vitamins A and E in powdered milk and local flour: a validation procedure 826(1998)183
- Determination of eight synthetic food colorants in drinks by high-performance ion chromatography 827(1998)73
- Determination of anti-carcinogenic polyphenols present in green tea using capillary electrophoresis coupled to a flow injection system 827(1998)113
- High-performance liquid chromatography with electrospray ionization mass spectrometry and diode array ultraviolet detection in the identification of flavonol aglycones and glycosides in berries 829(1998)91
- Levels of metamidophos in air and vegetables after greenhouse applications by gas chromatography 829(1998)251
- Comparison of two clean-up principles for determination of trichothecenes in grain extract 829(1998)259

- Solid-phase microextraction applied to the analysis of pesticide residues in honey using gas chromatography with electron-capture detection 829(1998)269
- Study on volatile components in salami by reverse carrier gas headspace gas chromatography–mass spectrometry 830(1999)175
- On-line coupling of immunoaffinity-based solid-phase extraction and gas chromatography for the determination of *s*-triazines in aqueous samples 830(1999)377
- Erratum to “Ion-exclusion chromatographic determination of organic acids in vinegars”. [J. Chromatogr. A 822 (1998) 45–51] 831(1999)331
- Quantitative analysis of xanthohumol and related prenylflavonoids in hops and beer by liquid chromatography–tandem mass spectrometry 832(1999)97
- Temperature, eluent flow-rate and column effects on the retention and quantitation properties of phenylthiocarbonyl derivatives of amino acids in reversed-phase high-performance liquid chromatography 832(1999)109
- Validation of capillary electrophoresis in the analysis of ewe’s milk casein 832(1999)239
- Determination of carbaryl, carbofuran and methiocarb in cucumbers and strawberries by monoclonal enzyme immunoassays and high-performance liquid chromatography with fluorescence detection. An analytical comparison 833(1999)3
- Determination of abamectin residues in fruits and vegetables by high-performance liquid chromatography 833(1999)13
- Validation of a solid-phase microextraction method for the determination of organophosphorus pesticides in fruits and fruit juice 833(1999)35
- Determination of chlorpyrifos, penconazole, fenarimol, vinclozolin and metalaxyl in grapes, must and wine by on-line microextraction and gas chromatography 833(1999)43
- Determination of daminozide in apples and apple leaves by liquid chromatography–mass spectrometry 833(1999)53
- Selective clean-up applicable to aqueous acetone extracts for the determination of carbendazim and thiabendazole in fruits and vegetables by high-performance liquid chromatography with UV detection 833(1999)61
- Rapid determination of glyphosate in cereal samples by means of pre-column derivatisation with 9-fluorenylmethyl chloroformate and coupled-column liquid chromatography with fluorescence detection 833(1999)67
- Capillary electrophoresis of inorganic anions 834(1999)133
- Determination of inorganic ions in food and beverages by capillary electrophoresis 834(1999)401
- Application of capillary isotachopheresis and capillary zone electrophoresis to the determination of inorganic ions in food and feed samples 834(1999)419
- High-performance liquid chromatographic determination of benzoylurea insecticides residues in grapes and wine using liquid and solid-phase extraction 835(1999)113
- Headspace solid-phase microextraction of sulphides and disulphides using Carboxen–polydimethylsiloxane fibers in the analysis of wine aroma 835(1999)137
- Detection of the presence of soya protein in milk powder by sodium dodecyl sulfate capillary electrophoresis 836(1999)153
- Determination of biogenic amines by capillary electrophoresis 836(1999)305
- Isotachopheretic determination of 3-methylhistidine 838(1999)191
- Determination of capsaicin and dihydrocapsaicin by micellar electrokinetic capillary chromatography and its application to various species of *Capsicum*, Solanaceae 838(1999)293
- Determination of  $\alpha$ -tocopherol and  $\alpha$ -tocopheryl acetate in diets of experimental animals Study of stability in the diets 839(1999)93
- Automated one-step supercritical fluid extraction and clean-up system for the analysis of pesticide residues in fatty matrices 840(1999)93
- Development of a simple sample preparation technique for gas chromatographic–mass spectrometric determination of nicotine in edible nightshades (Solanaceae) 840(1999)249
- Quantitative determination of 2-methoxy-3-isobutylpyrazine in red wines and grapes of Bordeaux using a stable isotope dilution assay 841(1999)229
- Applied gas chromatography coupled to isotope ratio mass spectrometry 842(1999)351
- Cyclodextrin derivatives as chiral selectors for direct gas chromatographic separation of enantiomers in the essential oil, aroma and flavour fields 843(1999)99
- Trace analysis of pesticides by gas chromatography 843(1999)301
- Effort to improve the quantitative determination of oxidation and hydrolysis compound classes in edible vegetable oils 844(1999)77

- Condensation nucleation light scattering detection for biogenic amines separated by ion-exchange chromatography 844(1999)111
- Determination of the geographical origin of valencia orange juice using carotenoid liquid chromatographic profiles 844(1999)149
- Qualitative and quantitative evaluation of mono- and disaccharides in D-fructose, D-glucose and sucrose caramels by gas-liquid chromatography-mass spectrometry. Di-D-fructose dianhydrides as tracers of caramel authenticity 844(1999)283
- Trace-level determination of polar flavour compounds in butter by solid-phase extraction and gas chromatography-mass spectrometry 844(1999)295
- Determination of cows' milk in goats' milk and cheese by capillary electrophoresis of the whey protein fractions 846(1999)135
- Quantitative determination of Closantel residues in milk by high-performance liquid chromatography with fluorescence detection 846(1999)383
- Gas chromatographic determination of galactose in milk. Example of a switching valve used for the protection of the capillary column 847(1999)47
- Simultaneous determination of 5-hydroxymethylfurfural and patulin in apple juice by reversed-phase liquid chromatography 847(1999)69
- Various applications of liquid chromatography-mass spectrometry to the analysis of phenolic compounds 847(1999)75
- Identification of anthocyanin derivatives in grape skin extracts and red wines by liquid chromatography with diode array and mass spectrometric detection 847(1999)83
- Simultaneous determination of sugars, sugar alcohols, acids and amino acids in apricots by gas chromatography-mass spectrometry 847(1999)91
- Determination of sorbic acid in urine by gas chromatography-mass spectrometry 847(1999)127
- Study of volatiles in grapes by dynamic headspace analysis. Application to the differentiation of some *Vitis vinifera* varieties 847(1999)155
- Determination of menthol and menthone in food and pharmaceutical products by solid-phase microextraction-gas chromatography 847(1999)161
- Identification of steroidal hydrocarbons in refined confectionery fats by gas chromatography-mass spectrometry 847(1999)179
- Flavour characterisation and classification of cheeses by gas chromatographic-mass spectrometric profiling 847(1999)203
- Capillary electrophoresis with diode array detection as an alternative analytical method for paralytic and amnesic shellfish toxins 847(1999)223
- Simultaneous determination of antioxidants, preservatives and sweeteners permitted as additives in food by mixed micellar electrokinetic chromatography 847(1999)369
- Determination of the mycotoxin moniliformin in cultures of *Fusarium subglutinans* and in naturally contaminated maize by high-performance liquid chromatography-atmospheric pressure chemical ionization mass spectrometry 848(1999)185
- Quantitative determination of  $\beta$ -ionone in red wines and grapes of Bordeaux using a stable isotope dilution assay 848(1999)317
- Macrocyclic polyamine as a selective modifier in a bonded-phase capillary column for the electrophoretic separation of aromatic acids 848(1999)401
- Rapid analysis of methylated xanthenes in teas by an improved high-performance liquid chromatographic method using a polyvinylpyrrolidone pre-column 848(1999)523
- Gas chromatographic flow method for the preconcentration and simultaneous determination of antioxidant and preservative additives in fatty foods 848(1999)529
- Semiautomatic method for the screening and determination of 23 organochlorine pesticides in horticultural samples by gas chromatography with electron-capture detection 849(1999)235
- Quantitative determination of free and hydrolytically liberated  $\beta$ -damascenone in red grapes and wines using a stable isotope dilution assay 849(1999)245
- Simultaneous analysis of thiols, sulphides and disulphides in wine aroma by headspace solid-phase microextraction-gas chromatography 849(1999)293
- Capacity gradient anion chromatography with a borate complex as eluent 850(1999)73
- Determination of aspartame by ion chromatography with electrochemical integrated amperometric detection 850(1999)277
- Forward-scattering degenerate four-wave mixing**  
Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35
- Fourier analysis**  
Statistical determination of the proper sample size in multicomponent separations 839(1999)129

**Fourier-transform infrared spectrometry**

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

High-performance liquid chromatography with real-time Fourier-transform infrared detection for the determination of carbohydrates, alcohols and organic acids in wines 824(1998)159

**Four-wave mixing**

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

**Free solution capillary electrophoresis**

Free-solution electrophoresis of DNA 806(1998)113

**Free radicals**

Liquid chromatographic separation and mass spectrometric identification of chlorophyll *b* allomers 837(1999)107

**Friction**

Measurement of the degree of internal friction of two native silica packing materials 818(1998)155

**Frit-inlet technique**

Numerical simulation of band-broadening during hydrodynamic relaxation in frit-inlet field-flow fractionation channels 805(1998)149

**Frits**

Deactivation of frits for use in capillary high-performance liquid chromatography and capillary electrochromatography with characterization by imaging with laser-induced fluorescence 818(1998)257

**Frontal chromatography**

Immobilized metal affinity chromatography. Self-sharpening of protein–modulator interfaces in frontal chromatography 818(1998)31

Frontal chromatography of proteins: The effect on column performance of the restricted diffusion of molecules in porous chromatographic adsorbents 828(1998)345

**Fruit juices**

Determination of underivatized amino acids in beverage samples by capillary electrophoresis 804(1998)349

Natural occurrence of alternariol and alternariol methyl ether in Spanish apple juice concentrates 815(1998)93

Incidence of patulin in apple juice concentrates produced in Turkey 815(1998)99

Selection and optimization of background electrolytes for simultaneous detection of small cations and organic acids by capillary electrophoresis with indirect photometry 822(1998)125

Improved size-exclusion high-performance liquid chromatographic method for the simple analysis of grape juice and wine polysaccharides 823(1998)339

Determination of riboflavin, flavin mononucleotide and flavin–adenine dinucleotide in wine and other beverages by high-performance liquid chromatography with fluorescence detection 823(1998)355

Synthesis of labelled [<sup>2</sup>H<sub>4</sub>]β-damascenone, [<sup>2</sup>H<sub>4</sub>]2-methoxy-3-isobutylpyrazine, [<sup>2</sup>H<sub>3</sub>]α-ionone, and [<sup>2</sup>H<sub>3</sub>]β-ionone, for quantification in grapes, juices and wines 824(1998)71

Determination of eight synthetic food colorants in drinks by high-performance ion chromatography 827(1998)73

On-line coupling of immunoaffinity-based solid-phase extraction and gas chromatography for the determination of *s*-triazines in aqueous samples 830(1999)377

Validation of a solid-phase microextraction method for the determination of organophosphorus pesticides in fruits and fruit juice 833(1999)35

Determination of the geographical origin of valencia orange juice using carotenoid liquid chromatographic profiles 844(1999)149

Simultaneous determination of 5-hydroxymethylfurfural and patulin in apple juice by reversed-phase liquid chromatography 847(1999)69

**Fruits**

see also Grapes

Multiresidue determination of pesticides in apples and pears by gas chromatography–mass spectrometry 805(1998)319

Application of ion-exchange cartridge clean-up in food analysis. I. Simultaneous determination of thiabendazole and imazalil in citrus fruit and banana using high-performance liquid chromatography with ultraviolet detection 810(1998)81

Direct fractionation of proteins in particle-containing feedstocks by a filter paper pieces-based DEAE-cellulose column chromatography. Rapid, robust and low-cost capturing procedure for protein 811(1998)69

Multiresidue determination of pesticides in plants by high-performance liquid chromatography following gel permeation chromatographic clean-up 823(1998)11

Validation of an immunoassay method for the determination of traces of carbaryl in vegetable and fruit extracts by liquid chromatography with photodiode array and mass spectrometric detection 823(1998)109

High-performance liquid chromatography with diode-array detection for the determination of phenolic compounds in peel and pulp from different apple varieties 823(1998)331

- Analysis of carbendazim, benomyl, thiophanate methyl and 2,4-dichlorophenoxyacetic acid in fruits and vegetables after supercritical fluid extraction 825(1998)45
- Extraction and purification of perillyl alcohol from Korean orange peel by reversed-phase high-performance liquid chromatography 828(1998)445
- Fast separation of (poly)phenolic compounds from apples and pears by high-performance liquid chromatography with diode-array detection 830(1999)301
- Determination of phenolic compounds in olives by reversed-phase chromatography and mass spectrometry 832(1999)87
- Temperature, eluent flow-rate and column effects on the retention and quantitation properties of phenylthiocarbonyl derivatives of amino acids in reversed-phase high-performance liquid chromatography 832(1999)109
- Determination of carbaryl, carbofuran and methiocarb in cucumbers and strawberries by monoclonal enzyme immunoassays and high-performance liquid chromatography with fluorescence detection. An analytical comparison 833(1999)3
- Determination of abamectin residues in fruits and vegetables by high-performance liquid chromatography 833(1999)13
- Validation of a solid-phase microextraction method for the determination of organophosphorus pesticides in fruits and fruit juice 833(1999)35
- Determination of daminozide in apples and apple leaves by liquid chromatography–mass spectrometry 833(1999)53
- Selective clean-up applicable to aqueous acetone extracts for the determination of carbendazim and thiabendazole in fruits and vegetables by high-performance liquid chromatography with UV detection 833(1999)61
- Determination of capsaicin and dihydrocapsaicin by micellar electrokinetic capillary chromatography and its application to various species of *Capsicum*, Solanaceae 838(1999)293
- Matrix solid-phase dispersion microextraction and determination by high-performance liquid chromatography with UV detection of pesticide residues in citrus fruit 839(1999)101
- Development of a simple sample preparation technique for gas chromatographic–mass spectrometric determination of nicotine in edible nightshades (Solanaceae) 840(1999)249
- Quantitative determination of  $\beta$ -ionone in red wines and grapes of Bordeaux using a stable isotope dilution assay 848(1999)317
- Quantitative determination of 2-methoxy-3-isobutylpyrazine in red wines and grapes of Bordeaux using a stable isotope dilution assay 841(1999)229
- Identification of anthocyanin derivatives in grape skin extracts and red wines by liquid chromatography with diode array and mass spectrometric detection 847(1999)83
- Simultaneous determination of sugars, sugar alcohols, acids and amino acids in apricots by gas chromatography–mass spectrometry 847(1999)91
- Study of volatiles in grapes by dynamic headspace analysis. Application to the differentiation of some *Vitis vinifera* varieties 847(1999)155
- Quantitative determination of free and hydrolytically liberated  $\beta$ -damascenone in red grapes and wines using a stable isotope dilution assay 849(1999)245
- Fullerene stationary phases**  
Retention behaviour of polychlorinated biphenyls on polysiloxane-anchored  $C_{60}$  in gas chromatography 809(1998)252
- Fungi**  
Identification of illudins in *Omphalotus nidiformis* and *Omphalotus olivascens* var. *indigo* by column liquid chromatography–atmospheric pressure chemical ionization tandem mass spectrometry 832(1999)247
- Fusarium**  
Chromatographic determination of the fumonisin mycotoxins 815(1998)31
- Performance of modern sample preparation techniques in the analysis of *Fusarium* mycotoxins in cereals 815(1998)49
- Direct analysis of several *Fusarium* mycotoxins in cereals by capillary gas chromatography–mass spectrometry 815(1998)59
- Instrumental methods for determination of nonmacrocyclic trichothecenes in cereals, foodstuffs and cultures 815(1998)103
- Determination of zearalenone in corn by means of immunoaffinity clean-up and high-performance liquid chromatography with fluorescence detection 815(1998)133
- Comparison of two clean-up principles for determination of trichothecenes in grain extract 829(1998)259
- Fusarium subglutinans**  
Determination of the mycotoxin moniliformin in cultures of *Fusarium subglutinans* and in naturally contaminated maize by high-performance liquid chromatography–atmospheric pressure chemical ionization mass spectrometry 848(1999)185

# G

## *Galanthus nivalis*

Expanded bed chromatography for one-step purification of mannose binding lectin from tulip bulbs using mannose immobilized on DEAE Streamline 822(1998)19

## *Garcinia cambogia*

Determination of organic acids in *Garcinia cambogia* (Desr.) by high-performance liquid chromatography 806(1998)337

## *Gardenia jasminoides*

Simultaneous quantification of five major biologically active ingredients of saffron by high-performance liquid chromatography 849(1999)349

## Gas analysis

Simultaneous determination of sulphur oxides, nitrogen oxides and hydrogen chloride in flue gas by means of an automated ion chromatographic system 804(1998)151

## Gas chromatography

Reversed-phase retention characteristics of tocotrienol antioxidants 844(1999)67

Thin-layer chromatography of *facial* and *meridional* isomers of Co(III) and Cr(III) complexes on polyacrylonitrile sorbent 847(1999)297

Determination of the geometrical isomers of ethyl 2,4-decadienoate 847(1999)359

Accurate and sensitive high-performance liquid chromatographic method for geometrical and structural photoisomers of bilirubin IX $\alpha$  using the relative molar absorptivity values 848(1999)169

***Ginkgo biloba***

Multidimensional counter-current chromatographic system and its application 803(1998)298

**Glass fibers**

Influence of time and temperature of hydrothermal treatment on glass fibers surface 829(1998)367

**Glycation**

Analytical strategy for the assessment of the protein glycation status in uremic patients by high-performance liquid chromatography 846(1999)65

**Glycidyl methacrylate–ethylenedimethacrylate monoliths**

Isocratic separations on thin glycidyl methacrylate–ethylenedimethacrylate monoliths 848(1999)51

**Glycosylation**

Characterization of the isoforms of PIXY321, a granulocyte-macrophage-colony stimulating factor–interleukin-3 fusion protein, separated by preparative isoelectric focusing on immobilized pH gradients 846(1999)143

**Gradient elution**

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. I. Application to 14 different samples using computer simulation 803(1998)1

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. II. The use of further changes in conditions 803(1998)33

Quasi-linear pH gradients for chromatofocusing using simple buffer mixtures: local equilibrium theory and experimental verification 814(1998)43

Gradient elution electrochromatography with a flow-injection analysis interface 828(1998)105

Optimum solvent selectivity and gradient mode for deoxyribonucleosides in reversed-phase high-performance liquid chromatography 828(1998)337

Capillary electrochromatography of biomolecules with on-line electrospray ionization and time-of-flight mass spectrometry 828(1998)469

Gradient elution reversed-phase high-performance liquid chromatography for fractionation of complex mixtures of organic micropollutants according to hydrophobicity using isocratic retention parameters 835(1999)19

Prediction of peptide retention times in normal-phase liquid chromatography with only a single gradient run 841(1999)19

Simultaneous optimisation of gradient time, gradient shape and initial composition of the mobile phase in the high-performance liquid chromatography of homologous and oligomeric series 845(1999)133

Simultaneous separation of anions and cations by flow-gradient ion chromatography 845(1999)165

Separation of phenylthiohydantoin–amino acids by temperature-controlled reversed-phase high-performance liquid chromatography 846(1999)73

**Grapes**

see also Fruits

Determination of chlorpyrifos, penconazole, fenarimol, vinclozolin and metalaxyl in grapes, must and wine by on-line microextraction and gas chromatography 833(1999)43

High-performance liquid chromatographic determination of benzoylurea insecticides residues in grapes and wine using liquid and solid-phase extraction 835(1999)113

Quantitative determination of 2-methoxy-3-isobutylpyrazine in red wines and grapes of Bordeaux using a stable isotope dilution assay 841(1999)229

Study of volatiles in grapes by dynamic headspace analysis. Application to the differentiation of some *Vitis vinifera* varieties 847(1999)155

Quantitative determination of  $\beta$ -ionone in red wines and grapes of Bordeaux using a stable isotope dilution assay 848(1999)317

Quantitative determination of free and hydrolytically liberated  $\beta$ -damascenone in red grapes and wines using a stable isotope dilution assay 849(1999)245

#### **Grape seed**

Isolation and purification of dimeric and trimeric procyanidins from grape seeds 841(1999)115

Extraction of polyphenolic compounds from grape seeds with near critical carbon dioxide 849(1999)117

#### **Graphitized carbon black**

see also Porous graphitized carbon

Evaluation of a new graphitized carbon black employed in sampling volatile organic compounds 810(1998)131

Novel family of multi-layer cartridges filled with a new carbon adsorbent for the quantitative determination of volatile organic compounds in the atmosphere 845(1999)317

#### **Group retention factors**

Comments on predictive strategies for determining retention indexes 808(1998)277

Reply to “Comments on predictive strategies for determining retention indices” 808(1998)279

#### **Growth factors**

Real-time control of purified product collection during chromatography of recombinant human insulin-like growth factor-I using an on-line assay 827(1998)37

Non-flammable preparative reversed-phase liquid chromatography of recombinant human insulin-like growth factor-I 830(1999)127

#### **Guanine analyzer**

Development of guanine analyzer to measure activity of guanylate cyclase 806(1998)231

## **H**

#### ***Haemophilus influenzae***

Enrichment and purification of proteins of *Haemophilus influenzae* by chromatofocusing 806(1998)279

Development of an on-line preconcentration method for the analysis of pathogenic lipopolysaccharides using capillary electrophoresis–electrospray mass spectrometry. Application to small colony isolates 817(1998)325

Enrichment of low-copy-number gene products by hydrophobic interaction chromatography 833(1999)157

#### **Hair**

Determination of 1,4-benzodiazepines and their metabolites by capillary electrophoresis and high-performance liquid chromatography using ultraviolet and electrospray ionisation mass spectrometry 838(1999)273

#### **Hanford tank waste**

Analysis and quantification of organic acids in simulated Hanford tank waste and Hanford tank waste 805(1998)101

#### **Hanford waste**

Determination of nitrate and nitrite in Hanford defense waste by reverse-polarity capillary zone electrophoresis 844(1999)387

#### **Hazelnut**

Fatty acid, tocopherol and sterol content of some hazelnut varieties (*Corylus avellana* L.) harvested in Oregon (USA) 805(1998)259

#### **Headspace analysis**

Determination of very volatile organic compounds in environmental water by injection of a large amount of headspace gas into a gas chromatograph 810(1998)141

Strategies for the analysis of chlorobenzenes in soils using solid-phase microextraction coupled with gas chromatography–ion trap mass spectrometry 819(1998)197

Headspace solid-phase microextraction for the determination of volatile and semi-volatile pollutants in water and air 824(1998)53

Study on volatile components in salami by reverse carrier gas headspace gas chromatography–mass spectrometry 830(1999)175

Comparative study of lactic acid and polylactides using static headspace, gas chromatography and high-performance liquid chromatography 833(1999)195

Solid-phase microextraction for the determination of iodinated trihalomethanes in drinking water 841(1999)197

Headspace sampling with capillary columns 842(1999)163

Chemosensory system for rapid automated quality control 845(1999)85

Influence of extraction parameters and medium on efficiency of solid-phase microextraction sampling in analysis of aliphatic aldehydes 845(1999)337

Static headspace analysis of aliphatic amines in aqueous samples 846(1999)331

Analysis of volatile organic compounds in human urine by headspace gas chromatography–mass spectrometry with a multipurpose sampler 847(1999)117

Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279

Evaluation of dynamic headspace and purge-and-trap techniques for the high-resolution gas chromatography analysis of nitrous oxide in seawater 848(1999)327

Simultaneous analysis of thiols, sulphides and disulphides in wine aroma by headspace solid-phase microextraction–gas chromatography 849(1999)293

Elimination of matrix effects for static headspace analysis of ethanol 849(1999)629

#### Headspace solid-phase microextraction

Headspace solid-phase microextraction analysis of volatile sulphides and disulphides in wine aroma 808(1998)211

Determination of benzene, toluene, ethylbenzene and xylenes in indoor air at environmental levels using diffusive samplers in combination with headspace solid-phase microextraction and high-resolution gas chromatography–flame ionization detection 826(1998)191

#### Heat dissipation

Influence of viscous heat dissipation on efficiency in high-speed high-performance liquid chromatography 845(1999)155

#### Heating

Evaporation-induced solvent migration in electrically-driven thin layer chromatography 841(1999)127

#### Heats of adsorption

Effect of temperature on retention of alkali and alkaline-earth metal ions on some aminocarboxylic acid functionalised silica based ion exchangers 826(1998)15

Determination of heats of adsorption of hydrocarbons on a synthetic clay by gas–solid chromatography using a wall coated open tubular column approach 844(1999)191

#### Henry's law coefficients

Determination of Henry's law coefficients by combination of the equilibrium partitioning in closed systems and solid-phase microextraction techniques 830(1999)353

#### Hepatitis B surface antigen

Physico-chemical characterization of recombinant hepatitis B surface antigen by a multidimensional approach 845(1999)171

#### Heptakis (6-*O*-*tert*-butyldimethylsilyl-2,3-di-*O*-methyl)- $\beta$ -cyclodextrin stationary phases

Use of 6-*O*-*tert*-butyldimethylsilylated  $\beta$ -cyclodextrins for the enantioseparation of chiral organochlorine compounds 846(1999)375

#### Heteroatom-selective detection

Pulsed flame photometric detector – a step forward towards universal heteroatom selective detection 805(1998)177

#### High-performance liquid chromatography–thin-layer chromatography coupling

On-line coupling of liquid chromatography with thin-layer chromatography 819(1998)35

#### High-performance thin-layer chromatography

Confirmation of residues of thyrostatic drugs in thyroid glands by multiple mass spectrometry after thin-layer chromatographic screening 819(1998)99

#### High-temperature liquid chromatography

Modified laser light-scattering detector for use in high temperature micro liquid chromatography 814(1998)55

Packed capillary high-temperature liquid chromatography coupled to inductively coupled plasma mass spectrometry 835(1999)105

#### High-temperature silylation

Characteristics of octadecylsilylated silica gels end-capped by high-temperature silylation 813(1998)239

#### *Hippophae rhamnoides*

Multidimensional counter-current chromatographic system and its application 803(1998)298

#### Histidine-poly(ethylene–vinyl alcohol) membranes

Separation of low-molecular-mass acetylated glucuronans on L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes 826(1998)157

#### Hold-up times

The hold-up time in gas chromatography. III. Linearity of the plot of  $\ln t'_R$  of the *n*-alkanes vs. carbon number questioned 803(1998)197

Measurement and prediction of dead times and column diameter in capillary gas chromatography by using air, methane and some solvents 811(1998)85

Consistency of gas hold-up determinations 832(1999)165

#### Hollow-fiber membranes

Selective affinity of L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes for various oligoglucuronans. Influence of the degree of polymerization and the degree of substitution by acetate 841(1999)1

Ionic crosslinking of SO<sub>3</sub>H-group-containing graft chains helps to capture lysozyme in a permeation mode 848(1999)161

**Homochiral**

On the meaning and use of *homochiral* 829(1998)417

**Honey**

Gas chromatography with electron-capture and nitrogen–phosphorus detection in the analysis of pesticides in honey after elution from a Florisil column. Influence of the honey matrix on the quantitative results 823(1998)381

Solid-phase microextraction applied to the analysis of pesticide residues in honey using gas chromatography with electron-capture detection 829(1998)269

**Hop extract**

On-line trace enrichment in hyphenated liquid chromatography–nuclear magnetic resonance spectroscopy 813(1998)55

**Horizontal polymerization**

Role of surface-adsorbed water in the horizontal polymerization of trichlorosilanes 830(1999)285

**Host–guest complexation**

Separations of inorganic anions based on their complexations with  $\alpha$ -cyclodextrin by capillary zone electrophoresis with contactless conductivity detection 834(1999)179

**Hotelling's  $T^2$  value**

Statistical quality control applied to ion chromatography calibrations 804(1998)37

**Hybrid affinity chromatography**

Hybrid affinity chromatography of  $\alpha$ -galactosidase from *Verbascum thapsus* L. 808(1998)133

**Hydrodynamic injection**

Electrokinetic injection in capillary electrophoresis and its application to the analysis of inorganic compounds 834(1999)21

**Hydrodynamic radius**

Erratum to "Salt effects in capillary electrophoresis. I. Dependence of electrophoretic mobilities upon the hydrodynamic radius". [J. Chromatogr. A, 786 (1997) 171–180] 806(1998)365

**Hydrodynamic relaxation**

Numerical simulation of band-broadening during hydrodynamic relaxation in frit-inlet field-flow fractionation channels 805(1998)149

**Hydrogen–air flame**

Photometric response of a very small, stoichiometric hydrogen–air flame to compounds of the iron group 806(1998)305

**Hydrogenation**

Liquid chromatographic separation of intermediates of the catalytic hydrogenation of 2,4-dinitrotoluene 818(1998)123

**Hydrolysis**

Hydrolysis and amino acid composition analysis of proteins 826(1998)109

**Hydrophilic interaction chromatography**

Hydrophilic interaction/cation-exchange chromatography for separation of amphipathic  $\alpha$ -helical peptides 816(1998)65

Hydrophilic interaction/cation-exchange chromatography for separation of cyclic peptides 816(1998)79

**Hydrophilic polymer gel packings**

Liquid chromatography and differential scanning calorimetry studies on the states of water in hydrophilic polymer gel packings in relation to retention selectivity 832(1999)17

**Hydrophobic charge induction chromatography**

Hydrophobic charge induction chromatography: salt independent protein adsorption and facile elution with aqueous buffers 814(1998)71

**Hydrophobic effect**

Retention in reversed-phase chromatography: partition or adsorption? 829(1998)1

**Hydrophobic interaction chromatography**

Hydrophobic interaction chromatography coupled with dynamic surface tension detection for the determination of surface active species in protein formulations 806(1998)239

Enrichment of low-copy-number gene products by hydrophobic interaction chromatography 833(1999)157

Hydrophobic interaction chromatography of *Chromobacterium viscosum* lipase on polypropylene glycol immobilised on Sepharose 849(1999)413

**Hydrophobic interaction electrokinetic chromatography**

Separation of fat-soluble vitamins by hydrophobic interaction electrokinetic chromatography with tetracylammonium ions as pseudostationary phase 807(1998)285

**Hydrophobic interaction electrophoresis**

Pluronic copolymer liquid crystals: unique, replaceable media for capillary gel electrophoresis 817(1998)287

**Hydrophobicity**

see also Lipophilicity

Chromatographic quantitation of the hydrophobicity of ionic compounds by the use of micellar mobile phases 823(1998)549

Reversed-phase high-performance liquid chromatography in quantitative structure–activity relationship studies of new fungicides 828(1998)431

Gradient elution reversed-phase high-performance liquid chromatography for fractionation of complex mixtures of organic micropollutants according to hydrophobicity using isocratic retention parameters 835(1999)19

#### **Hydrophobicity indices**

Determination of solute descriptors of tripeptide derivatives based on high-throughput gradient high-performance liquid chromatography retention data 803(1998)51

#### **Hydrophobicity parameters**

Structure and retention of 2,4-dihydroxythiobenzanilides in a reversed-phase system 830(1999)491

#### **Hydrophobic selectivity**

Evaluation and modulation of selectivity in reversed-phase high-performance liquid chromatography 845(1999)113

#### **Hydrosilation**

Synthesis and characterization of bonded phases made via hydrosilation of alkynes on silica hydride surfaces 818(1998)145

#### ***Hypericum perforatum***

Identification by high-performance liquid chromatography–diode array detection–mass spectrometry and quantification by high-performance liquid chromatography–UV absorbance detection of active constituents of *Hypericum perforatum* 825(1998)9

#### **Hyphenated techniques**

see also Special Issue Index

Development of an on-line coupling of liquid–liquid extraction, normal-phase liquid chromatography and high-resolution gas chromatography producing an analytical marker for the prediction of mutagenicity and carcinogenicity of bitumen and bitumen fumes 849(1999)483

# I

#### **IASys calibration**

Reassessment of the calibration constant for the IASys biosensor 844(1999)395

#### **Identification power**

Evaluation of capillary electrophoretic techniques towards systematic toxicological analysis 838(1999)259

#### **Immobilization**

Radiation immobilization of poly(methyloctylsiloxane) on silica for use in HPLC: a uniform layer model 849(1999)299

#### **Immobilization, salt-induced**

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

#### **Immobilized artificial membrane chromatography**

Comparison of the retention behavior of  $\beta$ -blockers using immobilized artificial membrane chromatography and lysophospholipid micellar electrokinetic chromatography 810(1998)95

Noncovalent immobilized artificial membrane chromatography, an improved method for describing peptide–lipid bilayer interactions 849(1999)125

#### **Immobilized enzymes**

Rapid verification of disulfide linkages in recombinant human growth hormone by tandem column tryptic mapping 808(1998)121

#### **Immobilized histidine**

Selective affinity of L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes for various oligoglucuronans. Influence of the degree of polymerization and the degree of substitution by acetate 841(1999)1

#### **Immobilized mannose**

Expanded bed chromatography for one-step purification of mannose binding lectin from tulip bulbs using mannose immobilized on DEAE Streamline 822(1998)19

#### **Immobilized metal affinity chromatography**

Immobilized metal affinity chromatography. Self-sharpening of protein–modulator interfaces in frontal chromatography 818(1998)31

Immobilised metal ion affinity chromatography purification of alcohol dehydrogenase from baker's yeast using an expanded bed adsorption system 840(1999)195

Selective adsorption of poly-His tagged glutaryl acylase on tailor-made metal chelate supports 848(1999)61

#### **Immobilized proteins**

Use of compact, porous units with immobilized ligands with high molecular masses in affinity chromatography and enzymatic conversion of substrates with high and low molecular masses 803(1998)61

Capillary electrophoretic and high-performance liquid chromatographic studies of the enantioselective separation of  $\alpha_1$ -adrenoreceptor antagonists 803(1998)189

Chiral separation of DL-tryptophan using porous membranes containing multilayered bovine serum albumin crosslinked with glutaraldehyde 822(1998)53

Real-time control of antibody loading during protein A affinity chromatography using an on-line assay 849(1999)191

**Immobilized thymine**

Immobilized thymine chromatography–mass spectrometry of oligonucleotides 806(1998)67

**Immunoabsorbents**

see also Affinity adsorbents

On-line coupling of immunosorbent and liquid chromatographic analysis for the selective extraction and determination of polycyclic aromatic hydrocarbons in water samples at the ng l<sup>-1</sup> level 823(1998)197

**Immunoaffinity chromatography**

see also Affinity chromatography

Comparison of oriented and random antibody immobilization in immunoaffinity chromatography of cytokinins 811(1998)77

Determination of zearalenone in corn by means of immunoaffinity clean-up and high-performance liquid chromatography with fluorescence detection 815(1998)133

Faster isolation of recombinant factor VIII SQ, with a superporous agarose matrix 840(1999)39

Quantitation of N<sup>ε</sup>-(dichloroacetyl)-L-lysine in proteins after perchloroethene exposure by gas chromatography–mass spectrometry using chemical ionization and negative ion detection following immunoaffinity chromatography 847(1999)25

**Immunoaffinity precolumns**

On-line coupling of immunoaffinity-based solid-phase extraction and gas chromatography for the determination of *s*-triazines in aqueous samples 830(1999)377

**Immunoassays**

Determination of the minor whey protein bovine lactoferrin in cheese whey concentrates with capillary electrophoresis 817(1998)187

Determination of carbaryl, carbofuran and methiocarb in cucumbers and strawberries by monoclonal enzyme immunoassays and high-performance liquid chromatography with fluorescence detection. An analytical comparison 833(1999)3

Analysis of urinary drugs of abuse by a multianalyte capillary electrophoretic immunoassay 838(1999)197

Noncompetitive immunoassays using protein G affinity capillary chromatography and capillary electrophoresis with laser-induced fluorescence detection 848(1999)139

**Immunosorbents**

Comparison of oriented and random antibody immobilization in immunoaffinity chromatography of cytokinins 811(1998)77

Selective on-line immunoextraction coupled to liquid chromatography for the trace determination of benzidine, congeners and related azo dyes in surface water and industrial effluents 846(1999)317

**Impurities**

Determination of anionic trace impurities in glycerol by capillary isotachopheresis with enlarged sample load 810(1998)201

**In-capillary derivatization**

Derivatization of amino acids in a moving zone of *o*-phthalaldehyde in the middle of a capillary for amino acid analysis by capillary electrophoresis 802(1998)243

Characteristic features of the throughout-capillary technique of in-capillary derivatization in capillary electrophoresis 822(1998)271

**Inclusion complexes**

Simultaneous analysis and retention behavior of the glucuronide, glucoside, and N-acetylglucosaminide conjugates of bile acids in conventional and inclusion high-performance liquid chromatographic methods 803(1998)121

Analysis and characterisation of cyclodextrins and their inclusion complexes by affinity capillary electrophoresis 836(1999)3

**Indirect detection**

Quality control of pentosane polysulfate by capillary zone electrophoresis using indirect detection 817(1998)297

Indirect photometric detection of anions in capillary electrophoresis 834(1999)189

Indirect fluorescence detection of aliphatic biogenic polyamines and diamines following chromatographic separation 841(1999)9

Anion-exchange separation and determination of bisphosphonates and related analytes by post-column indirect fluorescence detection 850(1999)143

**Induction factors**

Iodine–azide reagent for the detection of biologically oriented thiophosphoryl compounds in thin-layer chromatography systems 813(1998)135

**Inductively coupled plasma mass spectrometry**

see also Mass spectrometry

Antimony speciation in environmental samples by interfacing capillary electrophoresis on-line to an inductively coupled plasma mass spectrometer 834(1999)341

Ion chromatographic separation of sulfur-containing inorganic anions with an ICP–MS as element-specific detector 844(1999)161

**Industrial chemicals**

Comparative studies of the leachate of an industrial landfill by gas chromatography–mass spectrometry, liquid chromatography–nuclear magnetic resonance and liquid chromatography–mass spectrometry 831(1999)243

**Industrial effluents**

Determination of chlorobenzidines in industrial effluent by solid-phase extraction and liquid chromatography with electrochemical and mass spectrometric detection 833(1999)181

**Industrial salt**

Chromatographic determination of anions in industrial salt and sodium chloride brines used in chlor-alkali industry 841(1999)55

**Infant formulas**

Detection of counterfeit and relabeled infant formulas by high-pH anion-exchange chromatography–pulsed amperometric detection for the determination of sugar profiles 804(1998)279

Determination of polychlorinated biphenyls in soybean infant formulas by gas chromatography 823(1998)365

**Infrared detection**

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

Application of gas chromatography–Fourier transform infrared spectrometry to the analysis of amphetamine analogues 819(1998)155

Analysis of impurities by high-performance thin-layer chromatography with Fourier transform infrared spectroscopy and UV absorbance detection in situ measurement: chlordiazepoxide in bulk powder and in tablets 813(1998)145

Gas chromatography with Fourier transform infrared and mass spectral detection 842(1999)341

**Injection methods**

see also Large-volume injections

Calibration principles for flow injection analysis–capillary electrophoresis systems with electrokinetic injection 808(1998)219

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

New set-up for capillary isoelectric focusing in uncoated capillaries 813(1998)349

Direct analysis of several *Fusarium* mycotoxins in cereals by capillary gas chromatography–mass spectrometry 815(1998)59

Gas chromatographic–mass spectrometric determination of alachlor and its degradation products by direct aqueous injection 822(1998)253

Comparison of simplified methods for pesticide residue analysis. Use of large-volume injection in capillary gas chromatography 823(1998)25

Identification of plasticizers in medical products by a combined direct thermodesorption–cooled injection system and gas chromatography–mass spectrometry 847(1999)1

Analysis of volatile organic compounds in human urine by headspace gas chromatography–mass spectrometry with a multipurpose sampler 847(1999)117

**Injection parameters**

Theoretical analysis of the behavior of a centrally injected band in a homogeneous chromatographic column 828(1998)19

Sampling techniques for gas chromatographic–mass spectrometric analysis of long-chain free fatty acids from insect exocrine glands 816(1998)169

Characterisation of buserelin acetate by capillary electrophoresis 817(1998)239

Measurement of reduced sulphur compounds contained in aqueous matrices by direct injection into a gas chromatograph with a flame photometric detector 830(1999)485

Electrokinetic injection in capillary electrophoresis and its application to the analysis of inorganic compounds 834(1999)21

Dynamic computer simulations of the influence of injection conditions on capillary zone electrophoretic stacking of preparative free-flow zone electrophoresis fractions of peptides 836(1999)129

Determination of rhodanese enzyme activity by capillary zone electrophoresis 838(1999)139

Reduction of the detection limits of anions in polar ice core analysis using correlation ion chromatography with detector signal processing 844(1999)419

Identification of plasticizers in medical products by a combined direct thermodesorption–cooled injection system and gas chromatography–mass spectrometry 847(1999)1

Sources of uncertainty in gas chromatography and high-performance liquid chromatography 849(1999)13

Sample stacking of fast-moving anions in capillary zone electrophoresis with pH-suppressed electroosmotic flow 850(1999)339

**Insect repellents**

Determination of some insect repellents in cosmetic products by high-performance thin-layer chromatography 847(1999)365

**Insects**

Gas-phase reagents for carbon–carbon double bond location: new applications. II. Use of vinyl methyl ether chemical ionization mass spectrometry to characterize C<sub>23</sub> to C<sub>33</sub> insect cuticular alkenes 803(1998)203

**Instrumentation**

Evaluation of a small prototype passive sampler for airborne volatile organic compounds 802(1998)307

Simple technique for joining of capillaries in capillary separation methods 802(1998)381

Compact, field-portable capillary ion chromatograph 804(1998)45

Capillary isotachopheresis with fiber-optic Raman spectroscopic detection. Performance and application to ribonucleotides 805(1998)269

Fiber-optic-based UV–visible absorbance detector for capillary electrophoresis, utilizing focusing optical elements 809(1998)181

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

Fiber optic modified thermal lens detector system for the determination of amino acids 817(1998)223

Silicon microtechnology and microstructures in separation science 819(1998)3

Separation of noble gas mixtures from petroleum and their isotopic analysis by mass spectrometry 824(1998)109

Interface for the coupling of capillary electrophoresis and inductively coupled plasma mass spectrometry 826(1998)87

Diazomethane preparation for gas chromatographic analysis 827(1998)133

General considerations for optimizing a capillary electrophoresis–electrospray ionization time-of-flight mass spectrometry system 829(1998)279

Practical and theoretical aspects of designing a flame-ionization detector/mass spectrometer Deans' switch. Pressure–flow relations in gas chromatograph–detector interfaces using vacuum-outlet conditions 831(1999)257

Compact detection cell using optical fiber for sensitization and simplification of capillary electrophoresis–chemiluminescence detection 832(1999)191

Thermal degradation of novolac resins by pyrolysis-gas chromatography with a movable reaction zone 833(1999)277

Construction and investigation of a post-capillary reactor for trace metal analysis by capillary electrophoresis 834(1999)309

Single electrode conductivity detection for electrophoretic separation systems 836(1999)59

Instrumentation and applications of fast high-resolution capillary gas chromatography 842(1999)309

Methodology for gas chromatographic–mass spectral analysis of volatile organic compounds emerging from a low-pressure, flow-through reaction cell 844(1999)217

Construction and evaluation of automated gas chromatography for the measurement of anthropogenic halocarbons in the atmosphere 844(1999)259

Post-capillary laser-induced fluorescence detection without sheath-flow 844(1999)433

Diffusion technique for the production of gas standards for atmospheric measurements 848(1999)239

True moving bed chromatography: solid–liquid multi-stage counter-current extraction 849(1999)61

Development of an on-line coupling of liquid–liquid extraction, normal-phase liquid chromatography and high-resolution gas chromatography producing an analytical marker for the prediction of mutagenicity and carcinogenicity of bitumen and bitumen fumes 849(1999)483

Sensitive, universal detection for capillary electrochromatography using condensation nucleation light scattering detection 849(1999)587

Acid-rain monitoring in East Asia with a portable-type ion-exclusion–cation-exchange chromatographic analyzer 850(1999)311

**Integral optimizing functional**

Integral optimizing functional of separation efficiency 841(1999)133

**Interdigitated-array microelectrode**

Using an electrochemical detector with a carbon interdigitated-array microelectrode for capillary-column liquid chromatography 828(1998)113

**Interfaces**

see also Mass spectrometry

**Interfaces, CE–MS**

Analysis of metal species by using electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry 819(1998)231

Interface for the coupling of capillary electrophoresis and inductively coupled plasma mass spectrometry 826(1998)87

**Interfaces, FID–MS**

Practical and theoretical aspects of designing a flame-ionization detector/mass spectrometer Deans' switch. Pressure–flow relations in gas chromatograph–detector interfaces using vacuum-outlet conditions 831(1999)257

**Interfaces, GC–IR**

Solid-phase microextraction–gas chromatography–direct deposition infrared spectrometry as a convenient method for the determination of volatile compounds from living organisms 819(1998)45

**Interfaces, HPLC–TLC**

On-line coupling of liquid chromatography with thin-layer chromatography 819(1998)35

**Interfaces, LC–FT-IR**

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

**Interfaces, LC–GC**

Analysis of pesticides in red wines by on-line coupled reversed-phase liquid chromatography–gas chromatography with vaporiser/precursor solvent split/gas discharge interface 813(1998)113

Direct coupling of reversed-phase liquid chromatography to gas chromatography 819(1998)13

**Interfaces, LC–MS**

Identification of pesticides by liquid chromatography–particle beam mass spectrometry using electron ionization and chemical ionization 805(1998)127

Characterization of carbohydrates using a combination of derivatization, high-performance liquid chromatography and mass spectrometry 811(1998)47

Mass spectrometric analysis of tetracycline antibiotics in foods (Review) 812(1998)309

Quantification of amino acid conjugates of jasmonic acid in rice leaves by high-performance liquid chromatography–turboionspray tandem mass spectrometry 822(1998)310

Quantitative analysis of poly(methyl methacrylate–butyl acrylate) copolymer composition by liquid chromatography–particle beam mass spectrometry 824(1998)181

Ion-pair liquid chromatography–atmospheric pressure ionization mass spectrometry for the determination of quaternary ammonium herbicides 830(1999)145

Direct coupling of ionic high-performance liquid chromatography with electrospray ionization mass spectrometry utilizing a microdialysis junction interface 835(1999)93

Packed capillary high-temperature liquid chromatography coupled to inductively coupled plasma mass spectrometry 835(1999)105

**Interfaces, SFC–GC**

Detailed analysis of hydrocarbon groups in diesel range petroleum fractions with on-line coupled supercritical fluid chromatography–gas chromatography–mass spectrometry 819(1998)249

**Interfaces, TLC–MS**

Mass spectrometric analysis of tetracycline antibiotics in foods (Review) 812(1998)309

**Interferometry**

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

**Inter-laboratory study**

Interlaboratory studies on two high-performance liquid chromatographic assays for tylosin (tartrate) 830(1999)3

Poor reproducibility of in-source collisional atmospheric pressure ionization mass spectra of toxicologically relevant drugs 844(1999)409

**Internal standards**

Deuterated internal standards for gas chromatographic–mass spectrometric analysis of polar organophosphorus pesticides in water samples 822(1998)91

High-performance liquid chromatographic determination of total plasma homocysteine with or without internal standards 828(1998)397

**Interphases**

*n*-Alkyl fluorenyl phases in chromatography. I. Synthesis and characterization 805(1998)71

**Intraparticle convection**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Intraparticle diffusion**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Inverse gas chromatography**

Measurement of adsorption energies on heterogeneous surfaces by inverse gas chromatography 845(1999)103

Inverse gas chromatography: a new approach to the estimation of specific interactions 845(1999)53

Application of inverse gas chromatography to the measurement of diffusion and phase equilibria in polyacrylate–solvent systems 845(1999)93

#### **Iodine–azide reagent**

Iodine–azide reagent for the detection of biologically oriented thiophosphoryl compounds in thin-layer chromatography systems 813(1998)135

#### **Ion chromatography**

see also Special Issue Index

What are the unanswered (and unasked) questions in ion analysis? 804(1998)3

Statistical quality control applied to ion chromatography calibrations 804(1998)37

Compact, field-portable capillary ion chromatograph 804(1998)45

Capillary zone electrophoresis and ion chromatography in the low  $\mu\text{g}/\text{l}$  range applied to the determination of anions in hydrogen peroxide 829(1998)351

#### **Ionene sorbents**

Polyelectrolyte sorbents based on aliphatic ionenes for ion chromatography 850(1999)53

#### **Ion-exchange capacity**

Comparison of loading capacities of various proteins and peptides in culture medium and in pure state 827(1998)311

#### **Ion-exchange chromatography**

Nonaqueous ion-exchange chromatography and electrophoresis. Approaches to nonaqueous solution chemistry and design of novel separation 804(1998)17

Hydrophilic interaction/cation-exchange chromatography for separation of amphipathic  $\alpha$ -helical peptides 816(1998)65

Hydrophilic interaction/cation-exchange chromatography for separation of cyclic peptides 816(1998)79

Characterization of protein mixtures by ion-exchange chromatography coupled on-line to nuclear magnetic resonance spectroscopy 840(1999)131

#### **Ion-exchange dynamics**

Ion exchange on resins with temperature-responsive selectivity. II. Thermo-induced concentration waves in ion-exchange column 802(1998)251

#### **Ion exchangers**

Synthesis and ion-exchange properties of silica chemically modified with aminophosphonic acid 813(1998)47

Protein–protein interactions on weak-cation-exchange sorbent surfaces during chromatographic separations 828(1998)357

Simultaneous separation of inorganic ions and neutral organics on ion-exchange stationary phases 844(1999)1

#### **Ion-exclusion chromatography**

Towards an expert system in ion-exclusion chromatography by means of multiple classification ripple-down rules 804(1998)29

Retention modelling of electrostatic and adsorption effects of aliphatic and aromatic carboxylic acids in ion-exclusion chromatography 850(1999)17

#### **Ionic strength**

Size characterization of liposomes by flow field-flow fractionation and photon correlation spectroscopy. Effect of ionic strength and pH of carrier solutions 813(1998)91

#### **Ionization constants**

Determination of ionization constants of heterocyclic aromatic amines using capillary zone electrophoresis 841(1999)239

#### **Ion mobility, spectrometry**

Analytical determination of nicotine in tobacco by supercritical fluid chromatography–ion mobility detection 811(1998)157

Detection of carbohydrates by electrospray ionization–ion mobility spectrometry following microbore high-performance liquid chromatography 822(1998)1

#### **Ion-pairing reagents**

Distribution of cationic ion-pairing reagents on thin-layers after continuous overpressured layer chromatography 803(1998)235

Simultaneous determination of  $\beta$ -lactam antibiotics in milk by ion-pair liquid chromatography 812(1998)205

The use of heptafluorobutyric acid as a volatile ion-pair reagent in the high-performance liquid chromatographic isolation of SB-223070 828(1998)297

Development of a new direct reversed-phase ion-pair high-performance liquid chromatographic method for the separation and determination of sialic acids 831(1999)179

Ion-pair reversed-phase liquid chromatography for determination of polar underivatized amino acids using perfluorinated carboxylic acids as ion pairing agent 833(1999)147

High-efficiency enantioseparations of *N*-derivatized amino acids by packed capillary electrochromatography using ODS silica and a quinine-derived chiral selector as ion-pair agent 839(1999)167

Separation of *N*-nitrosoamino acids by  $\text{C}_{18}$  reversed-phase ion-pair high-performance liquid chromatography and compatible detection by electrospray ionization mass spectrometry 849(1999)389

**Ionspray ionization**

Quantification of amino acid conjugates of jasmonic acid in rice leaves by high-performance liquid chromatography–turboionspray tandem mass spectrometry 822(1998)310

Identification of phosphonic acids by capillary electrophoresis–ionspray mass spectrometry 825(1998)71

**Ion suppressor, electrochemically regenerated**

On-line sample preparation techniques for ion chromatography 804(1998)55

**Irradiation**

Development of C<sub>8</sub> stationary phases immobilized by  $\gamma$  radiation on zirconized silica for high-performance liquid chromatographic applications 845(1999)423

**Isoelectric focusing**

Capillary isoelectric focusing of the scrapie prion protein 802(1998)135

Application of capillary zone electrophoresis–inductively coupled plasma mass spectrometry and capillary isoelectric focusing–inductively coupled plasma mass spectrometry for selenium speciation 807(1998)71

Thermal stability studies of immunoglobulins using capillary isoelectric focusing and capillary zone electrophoretic methods 807(1998)121

Moving chemical reaction boundary and isoelectric focusing. I. Conditional equations for Svensson–Tiselius' differential equation of solute concentration distribution in idealized isoelectric focusing at steady state 813(1998)153

Moving chemical reaction boundary and isoelectric focusing. II. Existence of quasi/equal fluxes (or transference numbers) of hydrogen and hydroxyl ions in stationary electrolysis and Svensson's isoelectric focusing 813(1998)173

New set-up for capillary isoelectric focusing in uncoated capillaries 813(1998)349

Characterization of the F(ab')<sub>2</sub> fragment of a murine monoclonal antibody using capillary isoelectric focusing and electrospray ionization mass spectrometry 816(1998)49

Simultaneous multiple analyte detection using fluorescent peptides and capillary isoelectric focusing 817(1998)41

Optimizing separation conditions for proteins and peptides using imaged capillary isoelectric focusing 817(1998)163

Capillary isoelectric focusing of erythropoietin glycoforms and its comparison with flat-bed isoelectric focusing and capillary zone electrophoresis 830(1999)453

Size separation of colloidal nanoparticles using a miniscale isoelectric focusing technique 848(1999)485

**ISO guidelines**

Interlaboratory studies on two high-performance liquid chromatographic assays for tylosin (tartrate) 830(1999)3

**Isotachophoresis**

Separation of rare-earth ions by isotachophoresis and capillary zone electrophoresis 802(1998)203

Capillary isotachophoresis with fiber-optic Raman spectroscopic detection. Performance and application to ribonucleotides 805(1998)269

Insulin stacking for capillary electrophoresis 807(1998)129

Determination of anionic trace impurities in glycerol by capillary isotachophoresis with enlarged sample load 810(1998)201

Precise measurement of mobility from the length of isotachophoretic zones 831(1999)277

Use of micellar partition in capillary isotachophoretic focusing 832(1999)265

Role of chemical equilibria in the capillary electrophoresis of inorganic substances 834(1999)3

Capillary electrophoresis of inorganic anions 834(1999)133

Separation of inorganic phosphorus-containing anions by capillary electrophoresis 834(1999)233

Application of capillary isotachophoresis and capillary zone electrophoresis to the determination of inorganic ions in food and feed samples 834(1999)419

Single electrode conductivity detection for electrophoretic separation systems 836(1999)59

Determination of gaseous sulphur dioxide by capillary isotachophoresis 836(1999)107

Isotachophoretic analysis of inorganic ions 836(1999)201

Capillary zone electrophoresis separations of enantiomers present in complex ionic matrices with on-line isotachophoretic sample pretreatment 838(1999)31

Isotachophoretic focusing of strong and weak electrolytes in combined pH and conductivity gradients 838(1999)71

New leading electrolyte for the direct determination of chloride and other anions in analytical isotachophoresis 838(1999)81

Characterization of jeffamines by capillary isotachophoresis and zone electrophoresis 838(1999)149

Isotachophoretic determination of 3-methylhistidine 838(1999)191

Impurities at a level of 0.01% in foscarnet sodium determined by capillary zone electrophoresis with indirect UV detection and sample self-stacking 846(1999)245

#### **Isotachopheresis–capillary zone electrophoresis**

Isotachopheresis in zone electrophoresis 838(1999)55

Analysis of orotic acid in human urine by on-line combination of capillary isotachopheresis and zone electrophoresis 838(1999)213

Utility of isotachopheresis–capillary zone electrophoresis, mass spectrometry and high-performance size-exclusion chromatography for monitoring of interleukin-6 dimer formation 841(1999)63

#### **Isotachopheresis, transient**

Isotachopheresis in zone electrophoresis 838(1999)55

#### **Isotope analysis**

Applied gas chromatography coupled to isotope ratio mass spectrometry 842(1999)351

#### **Isotope effects**

Isotope effects of europium in ligand exchange system and electron exchange system using ion-exchange displacement chromatography 808(1998)185

#### **Isotope exchange**

How does a protein unfold on a reversed-phase liquid chromatography surface? 849(1999)135

#### **Isotope ratio mass spectrometry**

$\delta^{13}\text{C}$  analyses of vegetable oil fatty acid components, determined by gas chromatography–combustion–isotope ratio mass spectrometry, after saponification or regiospecific hydrolysis 805(1998)249

## J

#### ***Jania rubens***

Separation and identification of chlorophylls and carotenoids from *Caulerpa prolifera*, *Jania rubens* and *Padina pavonica* by reversed-phase high-performance liquid chromatography 829(1998)153

#### **Jet fuel**

Determination of organophosphate contaminants in jet fuel 847(1999)331

#### **Joule heating**

Salt effects in capillary zone electrophoresis. II. Mechanisms of electrophoretic mobility modification due to Joule heating at high buffer concentrations 809(1998)159

#### **Jovanovic–Freundlich isotherms**

Estimation of the adsorption energy distributions for the Jovanovic–Freundlich isotherm model with Jovanovic local behavior 849(1999)45

## K

#### **Kava**

Reversed-phase high-performance liquid chromatographic method for quantitative analysis of the six major kavalactones in *Piper methysticum* 825(1998)1

#### **Kerosene**

Continuous membrane extraction coupled with chromatographic analysis for the determination of phenols in fuels 823(1998)537

#### **Kinematic focusing**

Computer simulation of electroinjection analysis and electrophoretically mediated microanalysis. Commensurable concentrations of sample and reagent 845(1999)227

#### **Kinetic coating**

Noncovalent linking of a chiral selector to unmodified silica gel through amine functional groups 822(1998)11

#### **Kinetic studies**

Degradation study of unsaturated anhydrides by reversed-phase high-performance liquid chromatography 805(1998)109

Kinetic properties of DNA migration under clamped homogeneous electric field conditions. DNA size, migration velocities and reorientation time determined in a single clamped homogeneous electric field run 806(1998)123

Study of the thermodynamics and mass transfer kinetics of two enantiomers on a polymeric imprinted stationary phase 810(1998)1

Chromatography as an analytical tool for selected antibiotic classes: a reappraisal addressed to pharmacokinetic applications (Review) 812(1998)17

Detailed study of the mass transfer kinetics of Tröger's base on cellulose triacetate 813(1998)1

Determination of molsidomine and its active metabolite in human plasma using liquid chromatography with tandem mass spectrometric detection 819(1998)113

Photodegradation and stability of chlorothalonil in water studied by solid-phase disk extraction, followed by gas chromatographic techniques 823(1998)81

Modified kinetic model of the electron-capture detector. Molecular electron affinities and electron collection modes 827(1998)91

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

Computer simulation of particle separation based on non-equilibrium swelling 831(1999)51

Study of photodegradation of the pesticide ethiofencarb in aqueous and non-aqueous media, by gas chromatography–mass spectrometry 840(1999)235

#### **Kraft black liquors**

Quantitative determination of fatty and resin acids in Kraft black liquors as their trimethylsilyl derivatives by gas chromatography 829(1998)235

#### **Kraft mill effluents**

Determination of inorganic chlorine species in kraft mill bleach effluents by ion chromatography 804(1998)113

#### **Kraft pulp**

Characterization of organic deposits produced in the kraft pulping of *Eucalyptus globulus* wood 823(1998)457

Analysis of impurities occurring in a totally chlorine free-bleached Kraft pulp 830(1999)227

Measurement of reduced sulphur compounds contained in aqueous matrices by direct injection into a gas chromatograph with a flame photometric detector 830(1999)485

Characterization of totally chlorine-free effluents from Kraft pulp bleaching. II. Analysis of carbohydrate-derived constituents after acid hydrolysis by capillary zone electrophoresis 832(1999)203

## **L**

#### **Lack-of-fit testing**

Lack-of-fit testing of ion chromatographic calibration curves with inexact replicates 850(1999)43

#### **Laponite-RD clay**

Determination of heats of adsorption of hydrocarbons on a synthetic clay by gas–solid chromatography using a wall coated open tubular column approach 844(1999)191

#### **Large-volume injections**

see also Injection methods

Determination of very volatile organic compounds in environmental water by injection of a large amount of headspace gas into a gas chromatograph 810(1998)141

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

Comparison of simplified methods for pesticide residue analysis. Use of large-volume injection in capillary gas chromatography 823(1998)25

On-line coupling of immunoaffinity-based solid-phase extraction and gas chromatography for the determination of *s*-triazines in aqueous samples 830(1999)377

Optimization of large-volume on-column injection conditions in gas chromatography by monitoring the actual carrier gas flow 841(1999)75

Programmed temperature vaporisers-based large volume injection in capillary gas chromatography 842(1999)143

Determination of retinoids by packed-capillary liquid chromatography with large-volume on-column focusing and temperature optimization 847(1999)59

Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433

#### **Large volume transfer**

Evaluation of a transfer technique for direct coupling of reversed-phase liquid chromatography with gas chromatography 818(1998)77

#### **Lasalocid chiral selector**

Lasalocid adsorbed on porous graphitic carbon as a chiral selector, in capillary liquid chromatography 828(1998)149

**Laser-induced fluorescence detection**

Generation of 275.4-nm UV output from a large-frame argon-ion laser for fluorescence detection in capillary electrophoresis 806(1998)355

Dynamic analysis of capillary electrophoresis data using real-time neural networks 833(1999)231

Flavin mononucleotide for indirect laser-induced fluorescence detection of anions separated by capillary electrophoresis 835(1999)159

Post-capillary laser-induced fluorescence detection without sheath-flow 844(1999)433

**Laser light-scattering detector**

Modified laser light-scattering detector for use in high temperature micro liquid chromatography 814(1998)55

**Laser wave mixing detection**

Absorbance detection of amino acids by laser wave mixing in microbore liquid chromatography 805(1998)63

**Leather**

Determination of organochlorine pesticides in skins and leather by gas chromatography 811(1998)256

**Ligand distribution**

Faster isolation of recombinant factor VIII SQ, with a superporous agarose matrix 840(1999)39

**Ligand-exchange capillary electrophoresis**

Enantioseparation of  $\alpha$ -amino acids and dipeptides by ligand-exchange capillary electrophoresis of various L-4-hydroxyproline derivatives 846(1999)157

**Ligand-exchange chromatography**

Chiral discrimination of Dns- and unmodified D,L-amino acids by copper(II) complexes of terdentate ligands in high-performance liquid chromatography 829(1998)101

**Ligand-exchange micellar electrokinetic capillary chromatography**

Simultaneous separation of *o*-, *m*-, *p*-fluoro-DL-phenylalanine and *o*-, *m*-, *p*-DL-tyrosine by ligand-exchange micellar electrokinetic capillary chromatography 813(1998)369

**Ligate depletion**

Reassessment of the calibration constant for the IA<sub>sys</sub> biosensor 844(1999)395

**Limonium**

Improved analytical methods for determination of nitrogenous stress metabolites occurring in *Limonium* species 836(1999)209

**Linear free energy relationships**

Characterization of various reversed-phase columns using the linear free energy relationship. I. Evaluation based on retention factors 818(1998)1

Characterization of various reversed-phase columns using the linear free energy relationship. II. Evaluation of selectivity 818(1998)19

**Linear solvation energy relationships**

Characterization of mixed micellar pseudostationary phases in electrokinetic chromatography using linear solvation energy relationships 802(1998)35

Some aspects of chromatographic behavior in capillary electrochromatography 802(1998)59

Reply to "Relationship between liquid-liquid distribution and liquid-micelle distribution systems": the solvation environment in micelles evaluated by the linear solvation energy relationship method 807(1998)311

Characterization of olefinic gas chromatographic stationary phases by linear solvation energy relationships 836(1999)261

Characterization of amine functionalized stationary phases using linear solvation energy relationships 837(1999)171

Fractionation and characterization of a crude peptide mixture from the synthesis of eledoisin by liquid chromatography-electrospray ionization mass spectrometry 846(1999)25

Global linear solvation energy relationships for retention prediction in reversed-phase liquid chromatography 848(1999)21

**Linear solvent strength theory**

Global linear solvation energy relationships for retention prediction in reversed-phase liquid chromatography 848(1999)21

**Linear velocity**

Peak tailing and mass transfer kinetics in linear chromatography. Dependence on the column length and the linear velocity of the mobile phase 831(1999)17

**Lipophilicity**

see also Hydrophobicity

Characterisation of retention in micellar high-performance liquid chromatography and in micellar electrokinetic chromatography using lipophilicity and polarity indices 807(1998)57

Determination of lipophilicity of some non-steroidal anti-inflammatory agents and their relationships by using principal component analysis based on thin-layer chromatographic retention data 822(1998)263

Chromatographic separation and evaluation of the lipophilicity by reversed-phase high-performance liquid chromatography of fullerene-C<sub>60</sub> derivatives 847(1999)339

**Liposomes**

Size characterization of liposomes by flow field-flow fractionation and photon correlation spectroscopy. Effect of ionic strength and pH of carrier solutions 813(1998)91

Aqueous two-phase affinity partitioning of biotinylated liposomes using neutral avidin as affinity ligand 815(1998)189

**Liquid chromatography**

Sources of uncertainty in gas chromatography and high-performance liquid chromatography 849(1999)13

**Liquid chromatography, electrochemically modulated**

Enantiomeric separations of benzodiazepines by electrochemically modulated liquid chromatography 828(1998)157

**Liquid chromatography–Fourier transform infrared spectrometry**

Coupling of column liquid chromatography and Fourier transform infrared spectrometry 811(1998)1

**Liquid chromatography–gas chromatography**

Analysis of pesticides in red wines by on-line coupled reversed-phase liquid chromatography–gas chromatography with vaporiser/precolumn solvent split/gas discharge interface 813(1998)113

Direct coupling of reversed-phase liquid chromatography to gas chromatography 819(1998)13

Practical and theoretical aspects of designing a flame-ionization detector/mass spectrometer Deans' switch. Pressure–flow relations in gas chromatograph–detector interfaces using vacuum-outlet conditions 831(1999)257

On-line combination of aqueous-sample preparation and capillary gas chromatography 842(1999)391

Development of an on-line coupling of liquid–liquid extraction, normal-phase liquid chromatography and high-resolution gas chromatography producing an analytical marker for the prediction of mutagenicity and carcinogenicity of bitumen and bitumen fumes 849(1999)483

**Liquid chromatography–high resolution gas chromatography**

High-performance liquid chromatography coupled on-line with high resolution gas chromatography State of the art 842(1999)373

**Liquid chromatography–mass spectrometry**

Silicon microtechnology and microstructures in separation science 819(1998)3

#### **Microchromatography**

(Normal-phase) capillary chromatography using acrylic polymer-based continuous beds 837(1999)25

#### **Microdialysis**

Optimal membrane choice for microdialysis sampling of oligosaccharides 806(1998)265

Coupling on-line brain microdialysis, precolumn derivatization and capillary electrophoresis for routine minute sampling of *O*-phosphoethanolamine and excitatory amino acids 817(1998)195

On-line coupling of microdialysis sampling with liquid chromatography for the determination of peptide and non-peptide leukotrienes 823(1998)489

Investigation of stereoselective metabolism of amphetamine in rat liver microsomes by microdialysis and liquid chromatography with precolumn chiral derivatization 828(1998)95

Direct coupling of ionic high-performance liquid chromatography with electrospray ionization mass spectrometry utilizing a microdialysis junction interface 835(1999)93

#### **Microemulsion electrokinetic chromatography**

Microemulsion electrokinetic chromatography of fatty acids as phenacyl esters 807(1998)111

Application of microemulsion electrokinetic chromatography to the analysis of a wide range of pharmaceuticals and excipients 844(1999)371

#### **Microfabrication**

Silicon microtechnology and microstructures in separation science 819(1998)3

#### **Microheterogeneity**

Sodium dodecyl sulfate–capillary gel electrophoretic analysis of molecular mass microheterogeneity of  $\beta$ -trace protein in cerebrospinal fluid from patients with central nervous system diseases 802(1998)143

#### **Microplasma mass spectrometry**

Capillary gas chromatography coupled with microplasma mass spectrometry for organotin speciation 849(1999)553

#### **Microreactor**

Micromachined heated chemical reactor for pre-column derivatisation 815(1998)265

#### **MicroTAS**

Silicon microtechnology and microstructures in separation science 819(1998)3

#### **Micro liquid chromatography**

Forward-scattering degenerate four-wave mixing for sensitive absorption detection in microseparation systems. Coupling to micro-column liquid chromatography 811(1998)35

Lasalocid adsorbed on porous graphitic carbon as a chiral selector, in capillary liquid chromatography 828(1998)149

#### **Micro-tip liquid chromatography**

Examination of micro-tip reversed-phase liquid chromatographic extraction of peptide pools for mass spectrometric analysis 826(1998)167

#### **Micro-total analysis system**

Micromachined heated chemical reactor for pre-column derivatisation 815(1998)265

#### **Microtraps**

Two-stage microtrap as an injection device for continuous on-line gas chromatographic monitoring 805(1998)169

#### **Microwave-assisted dansylation**

Rapid microwave-assisted dansylation of biogenic amines. Analysis by high-performance liquid chromatography 808(1998)87

**Microwave-assisted extraction**

Microwave-assisted solvent extraction — a new method for isolation of polynuclear aromatic hydrocarbons from plants 827(1998)21

Optimisation of the microwave-assisted extraction in open cell of polycyclic aromatic hydrocarbons from soils and sediments. Study of moisture effect 837(1999)187

Microwave-assisted extraction of felodipine tablets 840(1999)59

**Microwave-assisted methods**

Determination of priority phenolic compounds in soil samples by various extraction methods followed by liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 823(1998)231

**Microwave-induced helium plasma atomic emission detection**

Compound retention dependence of the response in a gas chromatography–atomic emission detection system 819(1998)85

**Microwave-induced plasma atomic emission spectrometry**

Platinum-selective capillary gas chromatographic determination with microwave-induced plasma atomic emission detection 824(1998)223

**Migration times**

Control of migration time window and selectivity in electrokinetic chromatography with mixed polymeric pseudostationary phases 802(1998)23

Comparison of the reproducibility in migration times between a constant-current and a constant-voltage mode of operation in capillary zone electrophoresis 802(1998)391

Electropherograms in capillary zone electrophoresis plotted as a function of the quantity of electric charge 810(1998)183

**Migration velocities**

Kinetic properties of DNA migration under clamped homogeneous electric field conditions. DNA size, migration velocities and reorientation time determined in a single clamped homogeneous electric field run 806(1998)123

Comparison of DNA migrations in two clamped homogeneous electric field chambers of different sizes. Relation between sample thickness and electrophoresis time 806(1998)187

**Milk**

Application of capillary zone electrophoresis–inductively coupled plasma mass spectrometry and capillary isoelectric focusing–inductively coupled plasma mass spectrometry for selenium speciation 807(1998)71

Chromatographic methods of analysis of antibiotics in milk (Review) 812(1998)99

Simultaneous determination of  $\beta$ -lactam antibiotics in milk by ion-pair liquid chromatography 812(1998)205

Multiresidue determination of  $\beta$ -lactam antibiotics in milk and tissues with the aid of high-performance liquid chromatographic fractionation for clean up 812(1998)237

New, sensitive high-performance liquid chromatography method for the determination of slaframine in plasma and milk 815(1998)141

Evaluation by high-performance liquid chromatography of the hydrolysis of human milk triacylglycerides during storage at low temperatures 823(1998)467

Analysis of human milk triacylglycerols by high-performance liquid chromatography with light-scattering detection 823(1998)475

Validation of capillary electrophoresis in the analysis of ewe's milk casein 832(1999)239

Influence of capillary column efficiency on the reliability of the identification of complex mixtures by gas chromatography 845(1999)3

Determination of cows' milk in goats' milk and cheese by capillary electrophoresis of the whey protein fractions 846(1999)135

Quantitative determination of Closantel residues in milk by high-performance liquid chromatography with fluorescence detection 846(1999)383

Gas chromatographic determination of galactose in milk. Example of a switching valve used for the protection of the capillary column 847(1999)47

**Milk powder**

Analysis of the Maillard reaction products of  $\beta$ -lactoglobulin and lactose in skimmed milk powder by capillary electrophoresis and electrospray mass spectrometry 822(1998)147

Detection of the presence of soya protein in milk powder by sodium dodecyl sulfate capillary electrophoresis 836(1999)153

**Milk, soybean**

Gas chromatography determination of polychlorinated biphenyls in powdered and liquid soybean milks 815(1998)272

**Mir Space Station**

Analysis of water from the Space Shuttle and Mir Space Station by ion chromatography and capillary electrophoresis 804(1998)295

**Mixed entropy change**

Integral optimizing functional of separation efficiency 841(1999)133

**Mixed-mode chromatography**

Hydrophilic interaction/cation-exchange chromatography for separation of amphipathic  $\alpha$ -helical peptides 816(1998)65

Hydrophilic interaction/cation-exchange chromatography for separation of cyclic peptides 816(1998)79

**Mobile phase composition**

High-performance size-exclusion chromatographic behaviour of substituted benzoylpoly-L-lysines by principal component analysis and molecular dynamics simulation 813(1998)255

**Molecular imprinting**

Study of the thermodynamics and mass transfer kinetics of two enantiomers on a polymeric imprinted stationary phase 810(1998)1

Molecularly imprinted uniform-sized polymer-based stationary phase for naproxen. Comparison of molecular recognition ability of the molecularly imprinted polymers prepared by thermal and redox polymerization techniques 816(1998)113

Molecular imprint-based stationary phases for capillary electrochromatography 817(1998)5

Molecular recognition towards coplanar polychlorinated biphenyls based on the porogen imprinting effects of xylenes 828(1998)91

Molecularly imprinted adsorbents for positional isomer separation 849(1999)319

Uniform-sized molecularly imprinted polymer for (*S*)-naproxen selectively modified with hydrophilic external layer 849(1999)331

Study of the nature of recognition in molecularly imprinted polymers. II. Influence of monomer–template ratio and sample load on retention and selectivity 848(1999)39

**Molecular mass**

Determination of the molecular mass of amylose 828(1998)515

**Molecular mass determination**

Evaluation of size-exclusion chromatography and viscometry for the determination of molecular masses of oxidised cellulose 805(1998)93

Characterization of jeffamines by capillary isotachopheresis and zone electrophoresis 838(1999)149

**Molecular mass distribution**

Effect of interdetector peak broadening and volume in size-exclusion chromatography with dual viscometric–concentration detection 809(1998)1

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

Peak-referenced integral method for size exclusion chromatography and its application to aromatic polyesters 839(1999)1

**Molecular recognition**

Molecular recognition towards coplanar polychlorinated biphenyls based on the porogen imprinting effects of xylenes 828(1998)91

**Molecular shape recognition**

Thermotropic laterally attached liquid crystalline polymers. I. New stationary phases for high-performance liquid chromatography 810(1998)19

**Monitoring, continuous**

Two-stage microtrap as an injection device for continuous on-line gas chromatographic monitoring 805(1998)169

**Monolithic columns**

Comparative study on the column performance of microparticulate 5- $\mu\text{m}$  C<sub>18</sub>-bonded and monolithic C<sub>18</sub>-bonded reversed-phase columns in high-performance liquid chromatography 832(1999)11

Monolithic columns containing sol–gel bonded octadecylsilica for capillary electrochromatography 837(1999)35

**Monoliths**

Isocratic separations on thin glycidyl methacrylate–ethylenedimethacrylate monoliths 848(1999)51

**Monomer–template ratio**

Study of the nature of recognition in molecularly imprinted polymers. II. Influence of monomer–template ratio and sample load on retention and selectivity 848(1999)39

**Moving chemical reaction boundary**

Moving chemical reaction boundary and isoelectric focusing. I. Conditional equations for Svensson–Tiselius' differential equation of solute concentration distribution in idealized isoelectric focusing at steady state 813(1998)153

Moving chemical reaction boundary and isoelectric focusing. II. Existence of quasi/equal fluxes (or transference numbers) of hydrogen and hydroxyl ions in stationary electrolysis and Svensson's isoelectric focusing 813(1998)173

**Mucopolysaccharide-modified ion exchangers**

Ion chromatography on anion exchangers modified with mucopolysaccharides 804(1998)79

**Mueller–Hinton agar plates**

Is the direct quantitation of antibiotics in agar by high-performance liquid chromatography useful? 812(1998)111

**Multi-allele specific amplification**

Simultaneous analysis of various mutations on the 21-hydroxylase gene by multi-allele specific amplification and capillary gel electrophoresis 817(1998)281

**Multi-angle laser light scattering**

Flow field-flow fractionation of high-molecular-mass polyacrylamide 837(1999)139

**Multidimensional separation**

Multidimensional counter-current chromatographic system and its application 803(1998)298

**MultiPacker column packing system**

Unique dynamic axial compression packing system 827(1998)193

**Multiple-stage mass spectrometry**

Rapid drug metabolite profiling using fast liquid chromatography, automated multiple-stage mass spectrometry and receptor-binding 831(1999)227

**Multiresidue analysis**

Multiresidue screening methods for the determination of pesticides in plant materials 846(1999)341

**Multiresidue methods**

Multiresidue determination of  $\beta$ -lactam antibiotics in milk and tissues with the aid of high-performance liquid chromatographic fractionation for clean up 812(1998)237

**Multivariate curve resolution alternating least-squares approach**

Purity assessment and resolution of tetracycline hydrochloride samples analysed using high-performance liquid chromatography with diode array detection 832(1999)67

**Multivariate methods**

Development and optimisation of a new derivatisation procedure for gas chromatographic–mass spectrometric analysis of dihydrostreptomycin. Comparison of multivariate and step-by-step optimisation procedures 840(1999)81

**Must**

Determination of chlorpyrifos, penconazole, fenarimol, vinclozolin and metalaxyl in grapes, must and wine by on-line microextraction and gas chromatography 833(1999)43

**Mycosep 225**

Comparison of two clean-up principles for determination of trichothecenes in grain extract 829(1998)259

**Mytilus edulis**

New approach to the direct detection of known and new diarrhoeic shellfish toxins in mussels and phytoplankton by liquid chromatography–mass spectrometry 847(1999)213

**Mytilus galloprovincialis**

Liquid chromatographic methods for the isolation and identification of new pectenotoxin-2 analogues from marine phytoplankton and shellfish 844(1999)53

**N****Nano-high-performance liquid chromatography**

Enantioseparations in normal- and reversed-phase nano-high-performance liquid chromatography and capillary electrochromatography using polyacrylamide and polysaccharide derivatives as chiral stationary phases 837(1999)51

**Nasal sprays**

Quantitation of active ingredients and excipients in nasal sprays by high-performance liquid chromatography, capillary electrophoresis and UV spectroscopy 823(1998)423

**Natural adsorbents**

Gas chromatographic characterization of the adsorption properties of the natural adsorbent CACMM2 845(1999)373

**Nebulizing interface**

Interface for the coupling of capillary electrophoresis and inductively coupled plasma mass spectrometry 826(1998)87

**Negative-ion chemical ionization**

Simultaneous determination of prostaglandin  $E_1$ , prostaglandin  $E_0$  and 15-keto-prostaglandin  $E_0$  in human plasma by gas chromatography–negative-ion chemical-ionization tandem mass spectrometry 847(1999)187

**Negative-ion mass spectrometry**

Derivatives of cytokinins for negative ion mass spectrometry 811(1998)246

**Network model**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Neural networks**

Dynamic analysis of capillary electrophoresis data using real-time neural networks 833(1999)231

**Neural networks, artificial**

Prediction of flame ionization detector response factors using an artificial neural network 825(1998)161

Artificial neural network classification based on capillary electrophoresis of urinary nucleosides for the clinical diagnosis of tumors 828(1998)489

Use of artificial neural networks in capillary zone electrophoresis 848(1999)365

Artificial neural networks for computer-aided modelling and optimisation in micellar electrokinetic chromatography 850(1999)345

**Neuron**

Detection of gene expression in single neurons by patch-clamp and single-cell reverse transcriptase polymerase chain reaction 806(1998)209

**Nickel–titanium electrode**

Nickel content dependence of electrochemical behavior of carbohydrates on a titanium–nickel alloy electrode and its application to a liquid chromatography detector 837(1999)17

**Nitrilotriacetic acid ligand**

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

**Noise**

Routine check of baseline noise in ion chromatography 833(1999)97

**Noise reduction**

Windowed mass selection method: a new data processing algorithm for liquid chromatography–mass spectrometry data 849(1999)71

**Non-aqueous capillary electrophoresis**

Nonaqueous ion-exchange chromatography and electrophoresis. Approaches to nonaqueous solution chemistry and design of novel separation 804(1998)17

Capillary electrophoresis with wide-bore capillaries and non-aqueous media 813(1998)179

Usefulness of methylated- $\beta$ -cyclodextrin-based buffers for the separation of highly hydrophobic solutes in non-aqueous capillary electrophoresis. Application to the separation of derivatized phytosterols 837(1999)281

Capillary electrophoresis and sample stacking in non-aqueous media for the analysis of priority pollutant phenols 846(1999)401

Factors affecting selectivity of inorganic anions in capillary electrophoresis 850(1999)319

**Non-aqueous ion-exchange chromatography**

Nonaqueous ion-exchange chromatography and electrophoresis. Approaches to nonaqueous solution chemistry and design of novel separation 804(1998)17

**Non-aqueous mobile phases**

Modified laser light-scattering detector for use in high temperature micro liquid chromatography 814(1998)55

**Noncovalent linking**

Noncovalent linking of a chiral selector to unmodified silica gel through amine functional groups 822(1998)11

**Non-equilibrium**

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

**Non-linear chromatography**

Overall mass-transfer coefficients in non-linear chromatography 827(1998)235

**Non-linearity**

System peaks and non-linearity in capillary electrophoresis and high-performance liquid chromatography 831(1999)105

**Normal-phase chromatography**

(Normal-phase) capillary chromatography using acrylic polymer-based continuous beds 837(1999)25

**Novolac resins**

Thermal degradation of novolac resins by pyrolysis-gas chromatography with a movable reaction zone 833(1999)277

**Nuclear magnetic resonance spectrometry**

*n*-Alkyl fluorenyl phases in chromatography. I. Synthesis and characterization 805(1998)71

Nuclear magnetic resonance studies for the chiral recognition of the novel chiral stationary phase derived from 18-crown-6 tetracarboxylic acid 810(1998)33

On-line trace enrichment in hyphenated liquid chromatography–nuclear magnetic resonance spectroscopy 813(1998)55

Investigation of hop and beer bitter acids by coupling of high-performance liquid chromatography to nuclear magnetic resonance spectroscopy 836(1999)245

Lignans from *Torreya jackii* identified by stopped-flow high-performance liquid chromatography–nuclear magnetic resonance spectroscopy 837(1999)83

Acetogenic isoquinoline alkaloids. CXXI. Use of on-line high-performance liquid chromatography–nuclear magnetic resonance spectrometry coupling in phytochemical screening studies: rapid identification of metabolites in *Dioncophyllum thollonii* 837(1999)267

Characterization of protein mixtures by ion-exchange chromatography coupled on-line to nuclear magnetic resonance spectroscopy 840(1999)131

Characterization of stationary phases for gas chromatography by <sup>29</sup>Si NMR spectroscopy 848(1999)251

How does a protein unfold on a reversed-phase liquid chromatography surface? 849(1999)135

## O

### Octadecyl acrylate-modified silica

Retention behaviour of products extracted from oriental medicine formulations in high-performance liquid chromatography on octadecyl acrylate-modified silicas 845(1999)409

### Octadecylsilica

Monolithic columns containing sol–gel bonded octadecylsilica for capillary electrochromatography 837(1999)35

### Octanol–water partition coefficients

see also Partition coefficients

High-performance liquid chromatographic measurement of the 1-octanol–water partition coefficient of *s*-triazine herbicides and some of their degradation products 805(1998)119

### Octyl stationary phases

Characterization of silica-based octyl phases of different bonding density. Part I. Thermal stability studies 828(1998)51

Characterization of silica-based octyl phases of different bonding density. Part II. Studies of surface properties and chromatographic selectivity 828(1998)59

### Off-flavour compounds

Microwave mediated distillation with solid-phase microextraction: determination of off-flavors, geosmin and methylisoborneol, in catfish tissue 833(1999)223

### Oil spill identification

Oil spill identification 843(1999)369

### Oils

see also Essential oils, Olive oil, Petroleum and Vegetable oils

$\delta^{13}\text{C}$  analyses of vegetable oil fatty acid components, determined by gas chromatography–combustion–isotope ratio mass spectrometry, after saponification or regiospecific hydrolysis 805(1998)249

Comparison of oil composition changes due to biodegradation and physical weathering in different oils 809(1998)89

Group identification of essential oils components using partition coefficients in a hexane–acetonitrile system 814(1998)253

Tentative analysis of virgin olive oil aroma by supercritical fluid extraction–high-resolution gas chromatography–mass spectrometry 819(1998)267

New method of stationary phase preparation for silver ion column chromatography: Application to the isolation of steroidal hydrocarbons in vegetable oils 823(1998)291

Bacterial sulfate production by biodesulfurization of aromatic hydrocarbons, determined by ion chromatography 824(1998)45

Separation of noble gas mixtures from petroleum and their isotopic analysis by mass spectrometry 824(1998)109

Determination of  $\alpha$ -tocopherol and  $\alpha$ -tocopheryl acetate in diets of experimental animals Study of stability in the diets 839(1999)93

Isolation of nine petroporphyrin biomarkers by reversed-phase high-performance liquid chromatography with coupled columns 839(1999)239

Instrumentation and applications of fast high-resolution capillary gas chromatography 842(1999)309

Influence of capillary column efficiency on the reliability of the identification of complex mixtures by gas chromatography 845(1999)3

Characterisation of proteinaceous binders and drying oils in wall painting samples by gas chromatography–mass spectrometry 846(1999)113

Multiresidue screening methods for the determination of pesticides in plant materials 846(1999)341

Gas chromatographic flow method for the preconcentration and simultaneous determination of antioxidant and preservative additives in fatty foods 848(1999)529

Monitoring the synthesis of new pitches from coal tar and its fractions by chromatography and related techniques 849(1999)507

**Olefinic stationary phases**

Characterization of olefinic gas chromatographic stationary phases by linear solvation energy relationships 836(1999)261

**Olive oil**

Tentative analysis of virgin olive oil aroma by supercritical fluid extraction–high-resolution gas chromatography–mass spectrometry 819(1998)267

New method of stationary phase preparation for silver ion column chromatography: Application to the isolation of steroidal hydrocarbons in vegetable oils 823(1998)291

**Olives**

Determination of phenolic compounds in olives by reversed-phase chromatography and mass spectrometry 832(1999)87

***Omphalotus***

Identification of illudins in *Omphalotus nidiformis* and *Omphalotus olivascens* var. *indigo* by column liquid chromatography–atmospheric pressure chemical ionization tandem mass spectrometry 832(1999)247

**On-capillary derivatization**

Determination of iron(II) in natural waters by capillary zone electrophoresis using on-capillary complexation with 2,4,6-tri(2'-pyridyl)-1,3,5-triazine 848(1999)491

**On-column focusing**

Determination of retinoids by packed-capillary liquid chromatography with large-volume on-column focusing and temperature optimization 847(1999)59

**On-line reduction**

High-performance liquid chromatography–fluorescence determination of dinitropyrenes in soil after column chromatographic clean-up and on-line reduction 839(1999)41

**Open tubular columns**

Column preparation for reversed-phase high-temperature open tubular column liquid chromatography 813(1998)11

**Optical fibres**

Application of on-line thermal desorption–gas chromatography–Fourier-transform infrared spectroscopy–mass spectrometry for the characterisation of polymers 819(1998)243

Compact detection cell using optical fiber for sensitization and simplification of capillary electrophoresis–chemiluminescence detection 832(1999)191

**Optimization**

see also Simplex optimization

Structure-driven retention model for solvent selection and optimization in reversed-phase thin-layer chromatography 802(1998)335

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. I. Application to 14 different samples using computer simulation 803(1998)1

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. II. The use of further changes in conditions 803(1998)33

Separation of barbiturates with micellar liquid chromatography and optimization by a second order mathematical design 805(1998)45

Toroidal coil counter-current chromatography. Achievement of high resolution by optimizing flow-rate, rotation speed, sample volume and tube length 808(1998)95

Optimization of the capillary electrophoretic separation of bisbenzylisoquinoline alkaloids by an overlapping resolution mapping scheme 814(1998)223

Determination of some aromatic amines in finger-paints for children's use by supercritical fluid extraction combined with gas chromatography 819(1998)259

Selection and optimization of background electrolytes for simultaneous detection of small cations and organic acids by capillary electrophoresis with indirect photometry 822(1998)125

Separation of enantiomers of a chiral epoxide by simulated moving bed chromatography 827(1998)215

Optimum solvent selectivity and gradient mode for deoxyribonucleosides in reversed-phase high-performance liquid chromatography 828(1998)337

General considerations for optimizing a capillary electrophoresis–electrospray ionization time-of-flight mass spectrometry system 829(1998)279

Use of a Doehlert design in optimizing the analysis of selected tropane alkaloids by micellar electrokinetic capillary chromatography 829(1998)317

Use of the steric mass action model in ion-exchange chromatographic process development 832(1999)1

Alternate pooling for optimizing high-performance liquid chromatographic fractionation of complex peptide mixtures 839(1999)57

Development and optimisation of a new derivatisation procedure for gas chromatographic–mass spectrometric analysis of dihydrostreptomycin. Comparison of multivariate and step-by-step optimisation procedures 840(1999)81

Strategies for speed optimisation in gas chromatography: an overview 842(1999)3

Optimization of solid-phase microextraction conditions using a response surface methodology to determine organochlorine pesticides in water by gas chromatography and electron-capture detection 844(1999)425

Simultaneous optimisation of gradient time, gradient shape and initial composition of the mobile phase in the high-performance liquid chromatography of homologous and oligomeric series 845(1999)133

Optimization of the preparative separation of petroleum maltenes by liquid adsorption chromatography 847(1999)323

Systematic optimization of peak capacity for pesticide separation in micellar electrokinetic chromatography 848(1999)347

Use of artificial neural networks in capillary zone electrophoresis 848(1999)365

Chemometric approach to the treatment of benzodiazepine separation and peak broadening in capillary electrophoresis 849(1999)563

Retention modelling of electrostatic and adsorption effects of aliphatic and aromatic carboxylic acids in ion-exclusion chromatography 850(1999)17

Critical comparison of retention models for the optimisation of the separation of anions in ion chromatography. II. Suppressed anion chromatography using carbonate eluents 850(1999)29

Artificial neural networks for computer-aided modelling and optimisation in micellar electrokinetic chromatography 850(1999)345

#### **Organic modifiers**

Reversed-phase high-performance liquid chromatography in quantitative structure–activity relationship studies of new fungicides 828(1998)431

#### **Organic solvents**

Use of detergents and high contents of organic solvents for simultaneous quantitation of ionic and nonionic drugs by electrokinetic chromatography 824(1998)99

#### **Orthogonal projection approach**

Purity assessment and resolution of tetracycline hydrochloride samples analysed using high-performance liquid chromatography with diode array detection 832(1999)67

#### **Outlet response**

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

#### **Overlapping resolution mapping**

Optimization of the capillary electrophoretic separation of bisbenzylisoquinoline alkaloids by an overlapping resolution mapping scheme 814(1998)223

#### **Overpressured layer chromatography**

Distribution of cationic ion-pairing reagents on thin-layers after continuous overpressured layer chromatography 803(1998)235

#### **Oxidation**

Post-column oxidation of purpald–aldehyde adducts at nickel electrodes 813(1998)213

#### **Ozonation**

Application of gas and liquid chromatography–mass spectrometry to the evaluation of pirimiphos methyl degradation products in industrial water under ozone treatment 823(1998)97

## **P**

#### **Packed capillary columns**

Modified laser light-scattering detector for use in high temperature micro liquid chromatography 814(1998)55

#### **Packed columns**

Strategies for speed optimisation in gas chromatography: an overview 842(1999)3

#### **Packed column supercritical fluid chromatography**

Potential of packed column supercritical fluid chromatography for the separation of metoprolol from closely related compounds 839(1999)141

#### **Packed length**

Attempt to define the role of the length of the packed section in capillary electrochromatography 836(1999)25

#### **Packing materials**

Measurement of the degree of internal friction of two native silica packing materials 818(1998)155

Evidence of a wall friction effect in the consolidation of beds of packing materials in chromatographic columns 835(1999)41

#### **Packing uniformity**

Flow distribution in chromatographic columns 831(1999)149

#### ***Padina pavonica***

Separation and identification of chlorophylls and carotenoids from *Caulerpa prolifera*, *Jania rubens* and *Padina pavonica* by reversed-phase high-performance liquid chromatography 829(1998)153

**Palladium support materials**

Gas–solid chromatographic separation of hydrogen isotopes: a comparison between two palladium bearing materials – alumina and kieselguhr 822(1998)326

**Palm oil**

Silver-phase high-performance liquid chromatography–electrospray mass spectrometry of triacylglycerols 810(1998)53

***Panax ginseng***

Motif 2 in adenosine kinase homologous ginseng polypeptide showed affinity to D-ribose by capillary zone electrophoresis and surface plasmon resonance 817(1998)173

**Paper**

Determination of inorganic chlorine species in kraft mill bleach effluents by ion chromatography 804(1998)113

**Papillomavirus**

Reversed-phase high-performance liquid chromatography of virus-like particles 816(1998)21

**Parafilm**

Poly(dimethylsiloxane) films as sorbents for solid-phase microextraction coupled with infrared spectroscopy 829(1998)377

**Partial-filling affinity capillary electrophoresis**

Use of a partial-filling technique in affinity capillary electrophoresis for determining binding constants of ligands to receptors 840(1999)261

**Partial-filling capillary electrophoresis**

Separation of acidic enantiomers by capillary electrophoresis–mass spectrometry employing a partial filling technique 802(1998)83

**Partial-filling micellar electrokinetic chromatography**

On-line coupling of partial-filling micellar electrokinetic chromatography with mass spectrometry 802(1998)3

**Particle beam interface**

Quantitative analysis of poly(methyl methacrylate–butyl acrylate) copolymer composition by liquid chromatography–particle beam mass spectrometry 824(1998)181

**Particle separation**

Computer simulation of particle separation based on non-equilibrium swelling 831(1999)51

**Particle size**

Effects of various binary and ternary supercritical phases on the extraction of polycyclic aromatic hydrocarbons from contaminated soils 816(1998)201

**Particle size distribution**

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

**Particles, submicron-sized**

Capillary zone electrophoresis of rigid submicron-sized particles in polyacrylamide solution. Selectivity, peak spreading and resolution 848(1999)443

**Partition–adsorption systems**

High-performance liquid chromatography of some purine and pyrimidine derivatives on silica in hexane–isopropanol–ethylene glycol mobile phases 836(1999)235

**Partition coefficients**

see also Octanol–water partition coefficients

Group identification of essential oils components using partition coefficients in a hexane–acetonitrile system 814(1998)253

Effect of *Digitalis lanata* matrix composition on the lanatoside C partition coefficient and its consequence on rotation locular counter-current chromatography efficiency 822(1998)37

Universal model for the calculation of all organic solvent–water partition coefficients 827(1998)345

Gradient elution reversed-phase high-performance liquid chromatography for fractionation of complex mixtures of organic micropollutants according to hydrophobicity using isocratic retention parameters 835(1999)19

Application of inverse gas chromatography to the measurement of diffusion and phase equilibria in polyacrylate–solvent systems 845(1999)93

Alkanol gas–liquid partition coefficients in squalane measured with packed columns. A revision of measurement methods 848(1999)203

**Partitioning**

Aqueous two-phase affinity partitioning of biotinylated liposomes using neutral avidin as affinity ligand 815(1998)189

Aqueous two-phase systems containing self-associating block copolymers. Partitioning of hydrophilic and hydrophobic biomolecules 839(1999)71

**Partition mechanism**

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

**Partition model**

Retention in reversed-phase chromatography: partition or adsorption? 829(1998)1

**Passive sampler**

Evaluation of a small prototype passive sampler for airborne volatile organic compounds 802(1998)307

***Pasteurella haemolytica***

High-performance liquid chromatography of *Pasteurella haemolytica* leukotoxin using anion-exchange perfusion columns 808(1998)167

**Peak capacity**

Prediction of comprehensive two-dimensional gas chromatographic separations. A theoretical and practical exercise 822(1998)233

Evaluation of column performance in constant pressure and constant flow capillary gas chromatography 842(1999)15

**Peak compression**

Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433

**Peak overlap**

Prediction of numbers of singlets, doublets, and triplets in poorly resolved separations by statistical-overlap theory 831(1999)37

Application of statistical-overlap theory to gas chromatograms simulated on nonpolar stationary phases with commercial software 842(1999)65

Influence of capillary column efficiency on the reliability of the identification of complex mixtures by gas chromatography 845(1999)3

**Peak-referenced integral method**

Peak-referenced integral method for size exclusion chromatography and its application to aromatic polyesters 839(1999)1

**Peak shape**

see also Band broadening and Band profiles

Peak distortion in reversed-phase liquid chromatography as a consequence of viscosity differences between sample solvent and mobile phase 805(1998)55

Estimation of the column radial heterogeneity from an analysis of the characteristics of tailing peaks in linear chromatography 830(1999)29

Peak tailing and column radial heterogeneity in linear chromatography 830(1999)263

Peak tailing and mass transfer kinetics in linear chromatography. Dependence on the column length and the linear velocity of the mobile phase 831(1999)17

Peak dispersion due to geometration motion in the gel electrophoresis of macromolecules 838(1999)45

Peak distortion, data sampling errors and the integrator in the measurement of very narrow chromatographic peaks 842(1999)321

Use of artificial neural networks in capillary zone electrophoresis 848(1999)365

Chemometric approach to the treatment of benzodiazepine separation and peak broadening in capillary electrophoresis 849(1999)563

**Pears**

Multiresidue determination of pesticides in apples and pears by gas chromatography–mass spectrometry 805(1998)319

Fast separation of (poly)phenolic compounds from apples and pears by high-performance liquid chromatography with diode-array detection 830(1999)301

***Pecten maximus***

Identification and occurrence of a novel *cis*-4,7,10,*trans*-13-docosatetraenoic fatty acid in the scallop *Pecten maximus* (L.) 839(1999)119

**Pentafluorobenzoylation**

Derivatives of cytokinins for negative ion mass spectrometry 811(1998)246

**Percolation threshold**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Perfusion chromatography**

Characterization of large-pore polymeric supports for use in perfusion biochromatography 807(1998)165

High-performance liquid chromatography of *Pasteurella haemolytica* leukotoxin using anion-exchange perfusion columns 808(1998)167

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Permanent magnets**

Magnetic split-flow thin fractionation: new technique for separation of magnetically susceptible particles 813(1998)313

**Persulphate digestion, microwave-assisted**

Use of column-switching ion chromatography for the simultaneous determination of total nitrogen and phosphorus after microwave assisted persulphate digestion 822(1998)162

**Pervaporation**

Synergistic approaches based on nonchromatographic continuous separation techniques (solid-phase extraction and pervaporation) and chromatography couplings 819(1998)25

**Petrochemical analysis**

Analysis of alkane, alkene, aromatic and oxygenated groups in petrochemical mixtures by supercritical fluid chromatography on silica gel 847(1999)309

Determination of organophosphate contaminants in jet fuel 847(1999)331

**Petroleum**

Detailed analysis of sulfur compounds in gasoline range petroleum products with high-resolution gas chromatography–atomic emission detection using group-selective chemical treatment 819(1998)67

Detailed analysis of hydrocarbon groups in diesel range petroleum fractions with on-line coupled supercritical fluid chromatography–gas chromatography–mass spectrometry 819(1998)249

Bacterial sulfate production by biodesulfurization of aromatic hydrocarbons, determined by ion chromatography 824(1998)45

Separation of noble gas mixtures from petroleum and their isotopic analysis by mass spectrometry 824(1998)109

Hydrogen donor and acceptor abilities of pitches from coal and petroleum evaluated by gas chromatography 830(1999)155

Application of statistical-overlap theory to gas chromatograms simulated on nonpolar stationary phases with commercial software 842(1999)65

Oil spill identification 843(1999)369

Supercritical fluid extraction for the determination of petroleum hydrocarbons in soil 845(1999)357

Optimization of the preparative separation of petroleum maltenes by liquid adsorption chromatography 847(1999)323

**Petroleum products**

Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279

**Petroleum residues**

Planar chromatographic separation of petroleum residues and coal-derived liquids 830(1999)397

**Pharmaceutical analysis**

Micellar electrokinetic chromatography of scopolamine-related anticholinergics 802(1998)107

Analysis of *Puerariae radix* and its medicinal preparations by capillary electrophoresis 802(1998)225

Determination of dissociation constants of cephalosporins by capillary zone electrophoresis 803(1998)273

Determination of parishin, parishin B and parishin C in traditional Chinese medicinal formulas by micellar electrokinetic capillary chromatography 805(1998)301

Analysis of parishin, parishin B and parishin C in *Gastrodiae Rhizoma* by micellar electrokinetic capillary chromatography 805(1998)330

Separation of cimetidine and related materials by aqueous and non-aqueous capillary electrophoresis 808(1998)269

Effect on the partition equilibrium of various drugs by the formation of mixed bile salt/phosphatidylcholine/fatty acid micelles. A characterization by micellar affinity capillary electrophoresis. Part IV 809(1998)219

Comparison of the retention behavior of  $\beta$ -blockers using immobilized artificial membrane chromatography and lysophospholipid micellar electrokinetic chromatography 810(1998)95

Analysis of residual solvents by fast gas chromatography 811(1998)145

Analysis of tetrandrine and fangchinoline in traditional Chinese medicines by capillary electrophoresis 811(1998)274

Is the direct quantitation of antibiotics in agar by high-performance liquid chromatography useful? 812(1998)111

Some aspects of the purification of anthraquinone antibiotics by preparative reversed-phase liquid chromatography 812(1998)117

Determination of netilmicin sulfate by liquid chromatography with pulsed electrochemical detection 812(1998)151

Development and validation of amoxicillin determination by micellar electrokinetic capillary chromatography 812(1998)227

Analysis of macrolide antibiotics (Review) 812(1998)255

Liquid chromatography of josamycin propionate on poly(styrene–divinylbenzene) 812(1998)303

Analysis of impurities by high-performance thin-layer chromatography with Fourier transform infrared spectroscopy and UV absorbance detection in situ measurement: chlordiazepoxide in bulk powder and in tablets 813(1998)145

Analysis of recent antimicrobial agents in human biological fluids by high-performance liquid chromatography 815(1998)163

Methodology for transfer of liquid chromatography methods based on statistical considerations 815(1998)173

Determination of trace enantiomeric impurities in chiral compounds by capillary electrophoresis with uncoated, cationic, anionic and neutral surface modified capillaries 817(1998)83

- Development of a gas chromatography–mass spectrometry method for the analysis of aminoglycoside antibiotics using experimental design for the optimisation of the derivatisation reactions 818(1998)95
- Determination of molsidomine and its active metabolite in human plasma using liquid chromatography with tandem mass spectrometric detection 819(1998)113
- Investigation of potential degradation products of a newly synthesised  $\beta$ -lactam antibiotic by multi-stage liquid chromatography–electrospray mass spectrometry 819(1998)133
- Determination of L-lysine *N*-acetylcysteinate and its mono- and dimeric related compounds by liquid chromatography–mass spectrometry 819(1998)161
- High-performance liquid chromatographic determination of amphotericin B in plasma and tissue. Application to pharmacokinetic and tissue distribution studies in rats 819(1998)171
- Quantitation of active ingredients and excipients in nasal sprays by high-performance liquid chromatography, capillary electrophoresis and UV spectroscopy 823(1998)423
- Separation of ibuprofen, codeine phosphate, their degradation products and impurities by capillary electrophoresis. II. Validation 826(1998)95
- Analytical supercritical fluid chromatography using fully automated column and modifier selection valves for the rapid development of chiral separations 826(1998)217
- Separation of a racemic pharmaceutical intermediate using closed-loop steady state recycling 827(1998)359
- Column switching in high-performance liquid chromatography with tandem mass spectrometric detection for high-throughput preclinical pharmacokinetic studies 828(1998)141
- Optimisation and routine use of generic ultra-high flow-rate liquid chromatography with mass spectrometric detection for the direct on-line analysis of pharmaceuticals in plasma 828(1998)199
- Detection of clobetasol propionate as an undeclared steroid in zinc pyrithione formulations by high-performance liquid chromatography with rapid-scanning ultraviolet spectroscopy and mass spectrometry 828(1998)239
- Validated high-performance liquid chromatographic methods for quantitation of a novel nonsteroidal antiestrogen 828(1998)247
- Simultaneous determination of five antibiotics by ion-pair high-performance liquid chromatography 828(1998)287
- Validation of a shielded-hydrophobic-phase high-performance liquid chromatography method for the determination of residual methotrexate in recombinant protein biopharmaceuticals 828(1998)303
- Identification of UV filters in sunscreen products by high-performance liquid chromatography–diode-array detection 828(1998)311
- High-performance liquid chromatography of basic compounds. Problems, possible solutions and tests of reversed-phase columns 828(1998)407
- Rapid method for analysis of nicotine and nicotine-related substances in chewing gum formulations 829(1998)143
- Liquid chromatographic method for separation of lincomycin from its related substances 829(1998)161
- Capillary electrochromatography as an alternative separation technique to high-performance liquid chromatography and capillary zone electrophoresis for the determination of drug related impurities in Lilly compound LY300164 829(1998)175
- Erratum to “Separation of cimetidine and related materials by aqueous and non-aqueous capillary electrophoresis” [J. Chromatogr. A, 808 (1998) 269–275] 829(1998)419
- Chiral separation of a pharmaceutical intermediate by a simulated moving bed process 832(1999)55
- Determination of dissociation constants of  $^{99m}\text{Tc}$  Technetium radiopharmaceuticals by capillary electrophoresis 833(1999)83
- Investigation of crudes of synthesis of carbetocin by liquid chromatography coupled to electrospray ionization mass spectrometry 833(1999)267
- Capillary electrophoresis of inorganic anions 834(1999)133
- Supercritical fluid extraction and clean-up of organochlorine pesticides in Chinese herbal medicine 835(1999)145
- Micellar electrokinetic capillary chromatography method for direct determination of glucuronides of entacapone and its (*Z*)-isomer in human urine 836(1999)173
- Micellar electrokinetic chromatography as a fast screening method for the determination of 1,4-dihydropyridine calcium antagonists 836(1999)189
- Characterization of the stereoselective metabolism of thiopental and its metabolite pentobarbital via analysis of their enantiomers in human plasma by capillary electrophoresis 838(1999)237
- Isotachophoretic determination of phosphate splitting from Amifostine and *p*-nitrophenyl phosphate in serum and neuroblastoma cells 838(1999)251

- Electrophoretic behaviour of quinolones in capillary electrophoresis. Effect of pH and evaluation of ionization constants 839(1999)183
- Capillary electrophoresis of some tetracycline antibiotics coupled with reductive fast cyclic voltammetric detection 839(1999)193
- Microwave-assisted extraction of felodipine tablets 840(1999)59
- Miniaturised on-line solid-phase extraction for enhancement of concentration sensitivity in capillary electrophoresis 841(1999)249
- Analytical study of penicillamine in pharmaceuticals by capillary zone electrophoresis 844(1999)361
- Application of microemulsion electrokinetic chromatography to the analysis of a wide range of pharmaceuticals and excipients 844(1999)371
- Determination of system suitability limits with a robustness test 845(1999)145
- Retention behaviour of products extracted from oriental medicine formulations in high-performance liquid chromatography on octadecyl acrylate-modified silicas 845(1999)409
- Interaction of some steroid drugs with  $\beta$ -cyclodextrin polymer 845(1999)447
- Sensitive method for the determination of baclofen in plasma by means of solid-phase extraction and liquid chromatography–tandem mass spectrometry 846(1999)169
- High-performance thin-layer chromatography for the determination of ranitidine hydrochloride and famotidine in pharmaceuticals 846(1999)193
- Comparison of analytical methods for investigating the photostability of isoxicam 846(1999)207
- Adaptation of capillary electrophoresis to piperacillin drug analysis 846(1999)223
- Impurities at a level of 0.01% in foscarnet sodium determined by capillary zone electrophoresis with indirect UV detection and sample self-stacking 846(1999)245
- Determination of oxidized and reduced glutathione in pharmaceuticals by reversed-phase high-performance liquid chromatography with dual electrochemical detection 846(1999)59
- Macrocyclic polyamine as a selective modifier in a bonded-phase capillary column for the electrophoretic separation of aromatic acids 848(1999)401
- Qualitative and quantitative micellar electrokinetic chromatography of kavalactones from dry extracts of *Piper methysticum* Forst. and commercial drugs 848(1999)457
- Enantiomeric separation of atropine in *Scopolia* extract and *Scopolia Rhizome* by capillary electrophoresis using cyclodextrins as chiral selectors 848(1999)465
- Analysis and confirmation of synthetic anorexics in adulterated traditional Chinese medicines by high-performance capillary electrophoresis 848(1999)537
- Identification and determination of active components in *Gastrodia elata* Bl. by capillary electrophoresis 849(1999)277
- Chromatographic resolution of the enantiomers of a pharmaceutical intermediate from the milligram to the kilogram scale 849(1999)309
- Enantiomeric separation of D- and L-carnitine by integrating on-line derivatization with capillary zone electrophoresis 849(1999)609
- Pharmacokinetics**  
Chromatography as an analytical tool for selected antibiotic classes: a reappraisal addressed to pharmacokinetic applications (Review) 812(1998)17
- pH effects**  
Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. II. The use of further changes in conditions 803(1998)33
- Size characterization of liposomes by flow field-flow fractionation and photon correlation spectroscopy. Effect of ionic strength and pH of carrier solutions 813(1998)91
- Retention behaviour of quinolone derivatives in high-performance liquid chromatography. Effect of pH and evaluation of ionization constants 823(1998)411
- Secondary chemical equilibria in high-performance liquid chromatography: influence of ionic strength and pH on retention of peptides 823(1998)497
- Retention of ionizable compounds on high-performance liquid chromatography. III. Variation of pK values of acids and pH values of buffers in acetonitrile–water mobile phases 824(1998)137
- Comparison of the electroosmotic flow profiles and selectivity of stationary phases used in capillary electrochromatography 832(1999)41
- pH-Dependent reversal of the chiral recognition of tripeptide enantiomers by carboxymethyl- $\beta$ -cyclodextrin 833(1999)261

**Phenol–formaldehyde resins**

Thermal degradation of novolac resins by pyrolysis-gas chromatography with a movable reaction zone 833(1999)277

**Phenomenological model**

Application of the phenomenological model to retention in reversed-phase high-performance liquid chromatography 829(1998)41

**Phenyl-bonded silica**

Influence of ionic strength and organic modifier on performance in capillary electrochromatography on phenyl silica stationary phase 845(1999)203

**Phenyl column**

Improved liquid chromatography of salicylic acid and some related compounds on a phenyl column 828(1998)267

**pH gradients**

Quasi-linear pH gradients for chromatofocusing using simple buffer mixtures: local equilibrium theory and experimental verification 814(1998)43

Use of micellar partition in capillary isotachophoretic focusing 832(1999)265

Isotachophoretic focusing of strong and weak electrolytes in combined pH and conductivity gradients 838(1999)71

**Phosphate rocks**

Determination of total chromium in phosphate rocks by ion chromatography 850(1999)137

**Photodegradation**

Photodegradation and stability of chlorothalonil in water studied by solid-phase disk extraction, followed by gas chromatographic techniques 823(1998)81

Development of capillary electrophoresis methods for the analysis of fluoroquinolones and application to the study of the influence of humic substances on their photodegradation in aqueous phase 837(1999)253

Study of photodegradation of the pesticide ethiofencarb in aqueous and non-aqueous media, by gas chromatography–mass spectrometry 840(1999)235

Comparison of analytical methods for investigating the photostability of isoxicam 846(1999)207

**Photolysis**

Optimization of post-column photolysis and electrochemical detection for the liquid chromatographic determination of 3-nitro-L-tyrosine 818(1998)69

**Photometric detection**

Design of background electrolytes for indirect photometric detections based on a model of sample zone absorption in capillary electrophoresis 835(1999)169

**Physical mapping**

High resolution free chromatin/DNA fiber fluorescent in situ hybridization 806(1998)219

**pH-Zone-refining counter-current chromatography**

Isolation of indole alkaloids from *Catharanthus roseus* by centrifugal partition chromatography in the pH-zone refining mode 849(1999)421

**Pineal gland**

Sensitive determination of melatonin by precolumn derivatization and reversed-phase high-performance liquid chromatography 835(1999)67

***Piper methysticum***

Reversed-phase high-performance liquid chromatographic method for quantitative analysis of the six major kavalactones in *Piper methysticum* 825(1998)1

Qualitative and quantitative micellar electrokinetic chromatography of kavalactones from dry extracts of *Piper methysticum* Forst. and commercial drugs 848(1999)457

***Piper mullesua***

Reversed-phase liquid chromatography of 1,3-benzodioxanes in *Piper mullesua* 841(1999)123

 **$\pi$ – $\pi$  Interactions**

*n*-Alkyl fluorenyl phases in chromatography. I. Synthesis and characterization 805(1998)71

Selective separation of fullerenes on hydroxyphenyl-triphenylporphyrin–silica stationary phases 824(1998)147

Characterisation of  $\pi$ – $\pi$  interactions which determine retention of aromatic compounds in reversed-phase liquid chromatography 841(1999)147

***Pistacia lentiscus* L. var. *Chia***

Corrigendum to “Gas chromatographic-mass spectroscopic analysis of the acidic triterpenic fraction of mastic gum” [J. Chromatogr. A, 769 (1997) 263–273] 831(1999)333

**Pitch**

Characterization of organic deposits produced in the kraft pulping of *Eucalyptus globulus* wood 823(1998)457

**Plant materials**

Ion chromatographic analysis of nutrients in seed exudate for microbial colonisation 804(1998)311

High-performance liquid chromatographic method for the determination of juglone in fresh walnut leaves 805(1998)315

Qualitative determination of indole alkaloids, triterpenoids and steroids of *Tabernaemontana hiliariana* 808(1998)264

Determination of inorganic cations and anions in single plant cells by capillary zone electrophoresis 809(1998)231

Separation of the branch chain hexose, hamamelose, by high-performance liquid chromatography, and amperometric detection of hamamelose and related compounds 814(1998)105

Analysis of solutes and metabolites in single plant cell vacuoles by capillary electrophoresis 817(1998)337

Quantification of amino acid conjugates of jasmonic acid in rice leaves by high-performance liquid chromatography–turboionspray tandem mass spectrometry 822(1998)310

Determination of chlorpyrifos in air, leaves and soil from a greenhouse by gas-chromatography with nitrogen–phosphorus detection, high-performance liquid chromatography and capillary electrophoresis 823(1998)91

Pressurized liquid extraction of medicinal plants 837(1999)211

High-performance liquid chromatography–diode array detection–tandem mass spectrometry analyses of the alkaloid extracts of Amazon *Psychotria* species 841(1999)165

Multiresidue screening methods for the determination of pesticides in plant materials 846(1999)341

Qualitative and quantitative micellar electrokinetic chromatography of kavalactones from dry extracts of *Piper methysticum* Forst. and commercial drugs 848(1999)457

Identification and determination of active components in *Gastrodia elata* Bl. by capillary electrophoresis 849(1999)277

#### **Platinum–rhodium catalysts**

Study of the sorption of carbon monoxide, oxygen and carbon dioxide on platinum–rhodium alloy catalysts by a new gas chromatographic methodology 845(1999)67

#### ***Platyparea poeciloptera***

Solid-phase microextraction–gas chromatography–direct deposition infrared spectrometry as a convenient method for the determination of volatile compounds from living organisms 819(1998)45

#### **Pluronic F127**

Pluronic copolymer liquid crystals: unique, replaceable media for capillary gel electrophoresis 817(1998)287

Optimizing capillary gel electrophoretic separations of oligonucleotides in liquid crystalline Pluronic F127 817(1998)367

#### **Polar ice core**

Reduction of the detection limits of anions in polar ice core analysis using correlation ion chromatography with detector signal processing 844(1999)419

#### **Polarity**

Characterisation of retention in micellar high-performance liquid chromatography and in micellar electrokinetic chromatography using lipophilicity and polarity indices 807(1998)57

Influence of temperature on the polarity of porous polymer beads stationary phases for gas chromatography 837(1999)153

#### **Polarized photometric detection**

Selective determination of D-sorbitol and D-mannitol in foodstuffs by ion chromatography with polarized photometric detection 804(1998)305

#### **Polar selectivity**

Evaluation and modulation of selectivity in reversed-phase high-performance liquid chromatography 845(1999)113

#### **Pollen**

Microwave-assisted solvent extraction — a new method for isolation of polynuclear aromatic hydrocarbons from plants 827(1998)21

#### **Polyacrylonitrile sorbents**

Thin-layer chromatography of mixed tris- $\beta$ -diketonato metal complexes on polyacrylonitrile sorbent 847(1999)303

#### **Polyallylamine pseudo-stationary phases**

Effects of electrokinetic chromatography conditions on the structure and properties of polyallylamine-supported pseudo-stationary phase. A study by dynamic light scattering 836(1999)295

#### **Polyamine-bound fused-silica columns**

Electrophoretic separation of inorganic anions with an anion complexone-modified capillary column 815(1998)251

#### **Poly(dimethylsiloxane) film**

Poly(dimethylsiloxane) films as sorbents for solid-phase microextraction coupled with infrared spectroscopy 829(1998)377

#### **Polydispersity**

Advances in the theory of particle size distributions by field-flow fractionation. Outlet and apparent polydispersity at constant field 831(1999)89

#### **Polyelectrolyte sorbents**

Polyelectrolyte sorbents based on aliphatic ionenes for ion chromatography 850(1999)53

#### **Polyether ether ketone capillaries**

Novel applications for organic polymer capillaries 802(1998)17

#### **Poly(ethylene oxide)–poly(propylene oxide)–poly(ethylene oxide) sieving media**

Optimizing capillary gel electrophoretic separations of oligonucleotides in liquid crystalline Pluronic F127 817(1998)367

#### **Poly(ethylene–vinyl alcohol) membranes**

Separation of low-molecular-mass acetylated glucuronans on L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes 826(1998)157

Selective affinity of L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes for various oligoglucuronans. Influence of the degree of polymerization and the degree of substitution by acetate 841(1999)1

#### **Polymerase chain reaction**

Contamination-free and automated composition of a reaction mixture for nucleic acid amplification using a capillary electrophoresis apparatus 806(1998)141

Comparison of slab gel electrophoresis and capillary electrophoresis for the detection of the fluorescently labeled polymerase chain reaction products of short tandem repeat fragments 806(1998)159

Real-time detection of allele-specific polymerase chain reaction products by automated ultra-thin-layer agarose gel electrophoresis 828(1998)481

#### **Polymer capillaries**

Novel applications for organic polymer capillaries 802(1998)17

#### **Polymer coatings**

Synthesis and characterization of a polymer-coated C<sub>18</sub> stationary phase with high carbon content for liquid chromatography 828(1998)75

#### **Polymer phases**

New chemically modified polymeric resin for solid-phase extraction of pesticides and phenolic compounds from water 803(1998)147

Influence of temperature on the polarity of porous polymer beads stationary phases for gas chromatography 837(1999)153

#### **Poly(methyl methacrylate) capillaries**

Novel applications for organic polymer capillaries 802(1998)17

#### **Poly(methyloctylsiloxane) stationary phases**

Chromatographic evaluation of radiation-immobilized poly(methyloctylsiloxane) on titanium-grafted silica 845(1999)417

#### **Poly(methylsiloxane) stationary phases**

Synthesis and gas chromatographic evaluation of a high-temperature hydrogen-bond acid stationary phase 805(1998)217

#### **Polysiloxane stationary phases**

Terminally carboxyl oligo(ethylene oxide) monomethyl ethers-substituted side chain liquid crystalline polysiloxane polymer as stationary phase in capillary gas chromatography for the separation of polynuclear aromatic hydrocarbons 808(1998)201

Preparation and study of two polysiloxanes with pendant hand-basket type calixarene stationary phases for capillary gas chromatography 840(1999)225

Characterization of stationary phases for gas chromatography by <sup>29</sup>Si NMR spectroscopy 848(1999)251

#### **Polystyrene coating**

Evaluation of volatile eluents and electrolytes for high-performance liquid chromatography–electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry of proteins. II. Capillary electrophoresis 849(1999)175

#### **Poly(styrene–divinylbenzene) stationary phases**

Sulfoacylated polystyrene–divinylbenzene copolymers as resins for cation chromatography. Influence of capacity on resin selectivity 804(1998)63

Comparison of XAD resins for the isolation of humic substances from seawater 845(1999)329

Evaluation of volatile eluents and electrolytes for high-performance liquid chromatography–electrospray ionization mass spectrometry and capillary electrophoresis–electrospray ionization mass spectrometry of proteins. I. Liquid chromatography 849(1999)161

#### **Poly(succinic acid)-based sorbents**

Determination of airborne, volatile amines from polyurethane foams by sorption onto a high-capacity cation-exchange resin based on poly(succinic acid) 809(1998)121

#### **Polyvinylpyrrolidone columns**

Rapid analysis of methylated xanthines in teas by an improved high-performance liquid chromatographic method using a polyvinylpyrrolidone pre-column 848(1999)523

#### **Pore connectivity**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

#### **Pore diffusion**

Frontal chromatography of proteins: The effect on column performance of the restricted diffusion of molecules in porous chromatographic adsorbents 828(1998)345

#### **Pore flow effects**

Pore flow effects in electrically driven size-exclusion chromatography 837(1999)3

#### **Pore size distribution**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

#### **Pore structure**

Comparison of protein adsorption isotherms and uptake rates in preparative cation-exchange materials 827(1998)281

***Poria cocos***

Investigation of molecular masses and aggregation of  $\beta$ -D-glucan from *Poria cocos* sclerotium by size-exclusion chromatography 839(1999)49

**Porous graphitized carbon**

see also Graphitized carbon black

Selective ion chromatography of metals on porous graphitic carbon 804(1998)187

Loading capacity and chromatographic behavior of a porous graphitic carbon column for polychlorinated biphenyls 811(1998)135

Lasalocid adsorbed on porous graphitic carbon as a chiral selector, in capillary liquid chromatography 828(1998)149

Enantiomeric separations of benzodiazepines by electrochemically modulated liquid chromatography 828(1998)157

Determination of inorganic anions on porous graphitic carbon using evaporative light scattering detection. Use of carboxylic acids as electronic competitors 829(1998)193

Liquid chromatography analysis of phosphonic acids on porous graphitic carbon stationary phase with evaporative light-scattering and mass spectrometry detection 849(1999)197

**Porous layer open-tubular columns**

Porous layer open-tubular capillary columns: preparations, applications and future directions 842(1999)115

**Porous particles**

Network modeling of the intraparticle convection and diffusion of molecules in porous particles packed in a chromatographic column 827(1998)197

**Positional isomers**

Mixed-mode capillary electrokinetic separation of positional explosive isomers using sodium dodecyl sulfate and negative- $\beta$ -cyclodextrin derivatives 811(1998)225

Simultaneous separation of *o*-, *m*-, *p*-fluoro-DL-phenylalanine and *o*-, *m*-, *p*-DL-tyrosine by ligand-exchange micellar electrokinetic capillary chromatography 813(1998)369

Retention behavior of positional isomers of disubstituted cyclomalto-oligosaccharide (cyclodextrin) derivatives on an ODS column 825(1998)195

Discrimination of structural isomers of chlorinated phenols in waters using gas chromatography–mass spectrometry in the negative chemical ionization mode 830(1999)165

Positional and configurational separation of fatty acid isomers by micro reversed-phase liquid chromatography with an  $\text{Ag}^+$ -containing mobile phase 848(1999)83

Molecularly imprinted adsorbents for positional isomer separation 849(1999)319

**Post-capillary reactor**

Construction and investigation of a post-capillary reactor for trace metal analysis by capillary electrophoresis 834(1999)309

**Potential gradients**

Numerical simulation for capillary electrophoresis. II. Relaxation effect of potential gradient in capillary zone electrophoresis 838(1999)19

**Precision**

Statistical quality control applied to ion chromatography calibrations 804(1998)37

**Preconcentration**

see also Clean-up methods, Extraction methods, Sample handling and Sample preparation

Determination of phenylurea herbicides in water samples using on-line sorptive preconcentration and high-performance liquid chromatography with UV or electrospray mass spectrometric detection 802(1998)285

On-line preconcentration and determination of chromium(VI) in waters by high-performance liquid chromatography using pre-column complexation with 1,5-diphenylcarbazide 808(1998)193

Preconcentration of quinolones by dialysis on-line coupled to high-performance liquid chromatography 840(1999)11

Miniaturised on-line solid-phase extraction for enhancement of concentration sensitivity in capillary electrophoresis 841(1999)249

- Combination of chromatographic techniques for the preparative isolation of anthocyanins — applied on blackcurrant (*Ribes nigrum*) fruits 825(1998)89
- Displacement chromatography of proteins using a self-sharpening pH front formed by adsorbed buffering species as the displacer 825(1998)115
- Real-time control of purified product collection during chromatography of recombinant human insulin-like growth factor-I using an on-line assay 827(1998)37
- Simulated moving bed processing: escape from the high-cost box 827(1998)143
- Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions 827(1998)161
- Unique dynamic axial compression packing system 827(1998)193
- Separation of enantiomers of a chiral epoxide by simulated moving bed chromatography 827(1998)215
- Theoretical analysis of the behavior of an heterogeneously packed chromatographic column 827(1998)241
- Comparison of protein adsorption isotherms and uptake rates in preparative cation-exchange materials 827(1998)281
- Preparative separation of value-added peptides from rice bran proteins by high-performance liquid chromatography 827(1998)319
- Purification of monoclonal antibodies from ascitic fluid using preparative electrophoresis 827(1998)329
- Separation of a racemic pharmaceutical intermediate using closed-loop steady state recycling 827(1998)359
- Preparative high-performance liquid chromatography of echinocandins 827(1998)373
- Theoretical analysis of the behavior of a centrally injected band in a homogeneous chromatographic column 828(1998)19
- Displacement chromatography of chemotactic peptides 830(1999)91
- Preparative purification of antibiotics for comparing hydrostatic and hydrodynamic mode counter-current chromatography and preparative high-performance liquid chromatography 831(1999)203
- Chiral separation of a pharmaceutical intermediate by a simulated moving bed process 832(1999)55
- Erratum to “Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions” [J. Chromatogr. A 827 (1998) 161–173] 835(1999)247
- Investigation of molecular masses and aggregation of  $\beta$ -D-glucan from *Poria cocos* sclerotium by size-exclusion chromatography 839(1999)49
- Structural optimization of a chiral selector for use in preparative enantioselective chromatography 840(1999)151
- Optimization of the preparative separation of petroleum maltenes by liquid adsorption chromatography 847(1999)323
- P450 monooxygenase in biotechnology. I. Single-step, large-scale purification method for cytochrome P450 BM-3 by anion-exchange chromatography 848(1999)149
- Real-time control of antibody loading during protein A affinity chromatography using an on-line assay 849(1999)191
- Chromatographic resolution of the enantiomers of a pharmaceutical intermediate from the milligram to the kilogram scale 849(1999)309
- True moving bed chromatography: solid–liquid multi-stage counter-current extraction 849(1999)61
- Preparative electrophoresis**  
Capillary electrophoresis with wide-bore capillaries and non-aqueous media 813(1998)179
- Characterization of the isoforms of PIXY321, a granulocyte-macrophage-colony stimulating factor–interleukin-3 fusion protein, separated by preparative isoelectric focusing on immobilized pH gradients 846(1999)143

**Presolvents**

Use of a presolvent to include volatile organic analytes in the application range of on-line solid-phase extraction–gas chromatography–mass spectrometry 811(1998)117

**Pressure–flow relationships**

Practical and theoretical aspects of designing a flame-ionization detector/mass spectrometer Deans' switch. Pressure–flow relations in gas chromatograph–detector interfaces using vacuum-outlet conditions 831(1999)257

**Pressure program**

Retention simulation in gas chromatography 840(1999)137

**Pressure-regulating fluid interface**

Pressure-regulating fluid interface and phase behavior considerations in the coupling of packed-column supercritical fluid chromatography with low-pressure detectors 807(1998)265

**Pressurized liquid extraction**

Evaluation of musk contamination of freshwater fish in Italy by accelerated solvent extraction and gas chromatography with mass spectrometric detection 814(1998)187

Comparison of pressurised liquid extraction with Soxhlet extraction for the analysis of polychlorinated dibenzo-*p*-dioxins and dibenzofurans from fly ash and environmental matrices 815(1998)231

Pressurized fluid extraction of polychlorinated biphenyls in solid environmental samples 836(1999)285

Pressurized liquid extraction of medicinal plants 837(1999)211

Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279

**Principal component analysis**

Salt-promoted adsorption of proteins onto amphiphilic agarose-based adsorbents. II. Effects of salt and salt concentration 803(1998)83

Statistical quality control applied to ion chromatography calibrations 804(1998)37

High-performance size-exclusion chromatographic behaviour of substituted benzoylpoly-L-lysines by principal component analysis and molecular dynamics simulation 813(1998)255

Characterization of various reversed-phase columns using the linear free energy relationship. I. Evaluation based on retention factors 818(1998)1

Determination of lipophilicity of some non-steroidal anti-inflammatory agents and their relationships by using principal component analysis based on thin-layer chromatographic retention data 822(1998)263

High-performance liquid chromatography of basic compounds. Problems, possible solutions and tests of reversed-phase columns 828(1998)407

Artificial neural network classification based on capillary electrophoresis of urinary nucleosides for the clinical diagnosis of tumors 828(1998)489

Multivariate evaluation of organic modifier effects on the separation performance of peptides in micellar electrokinetic chromatography 831(1999)293

Principal component analysis of Kováts indices for carbonyl compounds in capillary gas chromatography 845(1999)21

Influence of extraction parameters and medium on efficiency of solid-phase microextraction sampling in analysis of aliphatic aldehydes 845(1999)337

Interaction of some steroid drugs with  $\beta$ -cyclodextrin polymer 845(1999)447

Two procedures for suppressing interference from inorganic pigments in the analysis by gas chromatography–mass spectrometry of proteinaceous binders in paintings 846(1999)101

Flavour characterisation and classification of cheeses by gas chromatographic–mass spectrometric profiling 847(1999)203

**Probes**

Indirect photometric detection of anions in capillary electrophoresis 834(1999)189

**Process chromatography**

Simulated moving bed processing: escape from the high-cost box 827(1998)143

**Process control**

Determination of anionic trace impurities in glycerol by capillary isotachopheresis with enlarged sample load 810(1998)201

Real-time control of antibody loading during protein A affinity chromatography using an on-line assay 849(1999)191

**Process monitoring**

High-performance capillary electrophoresis for in-process control in the production of antithrombin III and human clotting factor IX 802(1998)355

Monitoring the cyanidation of gold–copper ores with ion–interaction chromatography. Determination of the  $CN^-:Cu(I)$  molar ratio 804(1998)249

Monitoring of the concentration of  $\beta$ -lactam antibiotics and their precursors in complex cultivation media by high-performance liquid chromatography (Review) 812(1998)179

On-line gas chromatography–mass spectrometry for process monitoring using solvent-free sample preparation 819(1998)51

Real-time control of purified product collection during chromatography of recombinant human insulin-like growth factor-I using an on-line assay 827(1998)37

Quantitative determination of fatty and resin acids in Kraft black liquors as their trimethylsilyl derivatives by gas chromatography 829(1998)235

$\beta$ -Hydroxynaphthoic acid synthesis monitoring by capillary zone electrophoresis and high-performance liquid chromatography. Determination of polynaphthyl derivatives 836(1999)67

#### **Programmed-pressure gas chromatography**

Automatic prediction of retention times in programmed-pressure isothermal gas chromatography 848(1999)229

#### **Programmed temperature vaporiser**

Programmed temperature vaporisers-based large volume injection in capillary gas chromatography 842(1999)143

#### **Protein adsorption**

Treatments of fused-silica capillaries and their influence on the electrophoretic characteristics of these columns before and after coating 823(1998)561

#### **Protein diffusion**

Visualising intraparticle protein transport in porous adsorbents by confocal microscopy 813(1998)387

#### **Protein folding**

Protein folding observed by capillary electrophoresis in isoelectric buffers 838(1999)131

How does a protein unfold on a reversed-phase liquid chromatography surface? 849(1999)135

Protein structure perturbations on chromatographic surfaces 849(1999)149

#### **Protein–ligand interactions**

Biphasic thermodynamic characterization of interactions by quantitative affinity chromatography and biosensor technology 803(1998)291

#### **Protein–modulator interface**

Immobilized metal affinity chromatography. Self-sharpening of protein–modulator interfaces in frontal chromatography 818(1998)31

#### **Protein–protein interactions**

Protein–protein interactions on weak-cation-exchange sorbent surfaces during chromatographic separations 828(1998)357

#### **Protein sequencing**

Optical resolution of phenylthiohydantoin-amino acids and identification of phenylthiohydantoin-D-amino acid residue of [D-Ala<sup>2</sup>]-methionine enkephalin by capillary electrophoresis 802(1998)129

#### ***Pseudomonas aeruginosa***

Simultaneous determination of *Pseudomonas aeruginosa* elastase, human leukocyte elastase and cathepsin G activities by micellar electrokinetic chromatography 846(1999)125

#### **Pseudo-stationary phases**

Control of migration time window and selectivity in electrokinetic chromatography with mixed polymeric pseudostationary phases 802(1998)23

Characterization of mixed micellar pseudostationary phases in electrokinetic chromatography using linear solvation energy relationships 802(1998)35

Separation of fat-soluble vitamins by hydrophobic interaction electrokinetic chromatography with tetradecylammonium ions as pseudostationary phase 807(1998)285

Novel sulfonic acid-modified Starburst dendrimer used as a pseudostationary phase in electrokinetic chromatography 824(1998)119

Comparative effects of sodium dodecyl sulfate and sulfobutyl ether- $\beta$ -cyclodextrin as pseudostationary phases in the electrokinetic chromatographic separation of hydrophobic compounds 836(1999)53

Effects of electrokinetic chromatography conditions on the structure and properties of polyallylamine-supported pseudo-stationary phase. A study by dynamic light scattering 836(1999)295

Sample concentration by sample stacking and sweeping using a microemulsion and a single-isomer sulfated  $\beta$ -cyclodextrin as pseudostationary phases in electrokinetic chromatography 838(1999)3

Solute–solvent interactions in micellar electrokinetic chromatography. Characterization of sodium dodecyl sulfate–Brij 35 micellar systems for quantitative structure–activity relationship modelling 845(1999)217

#### ***Psychotria***

High-performance liquid chromatography–diode array detection–tandem mass spectrometry analyses of the alkaloid extracts of Amazon *Psychotria* species 841(1999)165

#### ***Puerariae radix***

Analysis of *Puerariae radix* and its medicinal preparations by capillary electrophoresis 802(1998)225

#### **Pulsed electrochemical detection**

Analysis of amikacin by liquid chromatography with pulsed electrochemical detection 819(1998)93

**Pulsed flame photometric detection**

Pulsed flame photometric detector – a step forward towards universal heteroatom selective detection 805(1998)177

**Pulse introduction membrane extraction**

Development of pulse introduction membrane extraction for analysis of volatile organic compounds in individual aqueous samples, and for continuous on-line monitoring 826(1998)39

**Pulse parameters**

Comparison of DNA migrations in two clamped homogeneous electric field chambers of different sizes. Relation between sample thickness and electrophoresis time 806(1998)187

**Purge-and-trap methods**

In situ ethylation–purge and programmed-temperature-vaporizer cold trapping–gas chromatography–mass spectrometry as an automated technique for the determination of methyl- and butyltin compounds in aqueous samples 809(1998)151

Development of pulse introduction membrane extraction for analysis of volatile organic compounds in individual aqueous samples, and for continuous on-line monitoring 826(1998)39

Experimental study on solvent-less sample preparation methods. Membrane extraction with a sorbent interface, thermal membrane desorption application and purge-and-trap 830(1999)365

Evaluation of dynamic headspace and purge-and-trap techniques for the high-resolution gas chromatography analysis of nitrous oxide in seawater 848(1999)327

MultiSimplex optimisation of purge-and-trap extraction of phenols in soil samples 849(1999)225

**Purity assessment**

Purity assessment and resolution of tetracycline hydrochloride samples analysed using high-performance liquid chromatography with diode array detection 832(1999)67

**Pyrolysis**

Pyrolysis–gas chromatography of chloroorganic compounds in precipitation 826(1998)201

The development of pyrolysis–fast gas chromatography for analysis of synthetic polymers 833(1999)111

Thermal degradation of novolac resins by pyrolysis-gas chromatography with a movable reaction zone 833(1999)277

Study of some pyrolysis–gas chromatography indexes for the differentiation among oxidation states of polyaniline 837(1999)273

Introduction to pyrolysis–capillary gas chromatography 842(1999)207

Polymer analysis by pyrolysis gas chromatography 843(1999)413

Deactivation of metal capillaries for gas chromatography 845(1999)33

**Pyrolysis–gas chromatography**

Pyrolysis gas chromatography of synthetic polymers – a bibliography 825(1998)171

**Q****Quality control**

Statistical quality control applied to ion chromatography calibrations 804(1998)37

Quality control of pentosane polysulfate by capillary zone electrophoresis using indirect detection 817(1998)297

**Quantitation**

Low-level calibration study for a new ion chromatographic column to determine borate in deionized water 850(1999)107

**Quantitative structure–activity relationships**

Solute–solvent interactions in micellar electrokinetic chromatography. Characterization of sodium dodecyl sulfate–Brij 35 micellar systems for quantitative structure–activity relationship modelling 845(1999)217

**Quantitative structure–retention relationships**

Capillary isotachopheresis with fiber-optic Raman spectroscopic detection. Performance and application to ribonucleotides 805(1998)269

Adsorption studies of azo dyes as resonance Raman spectroscopic probes at solid–liquid interfaces 828(1998)121

Effect of the preparation conditions on the surface-enhanced Raman-spectrometric identification of thin-layer-chromatographic spots 845(1999)197

Protein structure perturbations on chromatographic surfaces 849(1999)149

**Rapid metabolite profiling**

Rapid drug metabolite profiling using fast liquid chromatography, automated multiple-stage mass spectrometry and receptor-binding 831(1999)227

**Rate constants**

Stochastic simulation of the partition mechanism under diffusion-limited conditions in chromatography and electrochromatography 828(1998)37

**Regioisomer separation**

Chromatographic separation and evaluation of the lipophilicity by reversed-phase high-performance liquid chromatography of fullerene-C<sub>60</sub> derivatives 847(1999)339

**Regio-specific isomers**

Silver-phase high-performance liquid chromatography–electrospray mass spectrometry of triacylglycerols 810(1998)53

**Regression analysis**

Elimination of matrix effects for static headspace analysis of ethanol 849(1999)629

**Regression models**

Prediction of flame ionization detector response factors using an artificial neural network 825(1998)161

**Relative molar response factors**

Thermal conductivity detection relative molar response factors for halogenated compounds 841(1999)187

**Relative retention times**

Prediction of relative retention times of triacylglycerols in non-aqueous reversed-phase high-performance liquid chromatography 808(1998)43

**Relative velocity**

Deviations to classical retention theory of field-flow fractionation 831(1999)73

**Reproducibility**

Comparison of the reproducibility in migration times between a constant-current and a constant-voltage mode of operation in capillary zone electrophoresis 802(1998)391

Electropherograms in capillary zone electrophoresis plotted as a function of the quantity of electric charge 810(1998)183

**Resedaceae**

Chiral separation of aromatic amino acids by capillary electrophoresis 836(1999)137

**Resin acids**

Quantitative determination of fatty and resin acids in Kraft black liquors as their trimethylsilyl derivatives by gas chromatography 829(1998)235

**Resolution**

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. I. Application to 14 different samples using computer simulation 803(1998)1

Salt effects in capillary zone electrophoresis. IV. Resolution versus time and the effect of potassium phosphate and its concentration in the high ionic strength separation of sulphonamides 849(1999)575

**Response factors**

Prediction of flame ionization detector response factors using an artificial neural network 825(1998)161

**Response surface modelling**

Chemometric evaluation of the band broadening in micellar electrokinetic chromatography of peptides 809(1998)191

Multivariate evaluation of organic modifier effects on the separation performance of peptides in micellar electrokinetic chromatography 831(1999)293

Systematic optimization of peak capacity for pesticide separation in micellar electrokinetic chromatography 848(1999)347

#### Response surfaces

Use of a Doehlert design in optimizing the analysis of selected tropane alkaloids by micellar electrokinetic capillary chromatography 829(1998)317

#### Restricted-access media

Miniaturised on-line solid-phase extraction for enhancement of concentration sensitivity in capillary electrophoresis 841(1999)249

#### Retention

Comparison of solute descriptors for predicting retention of ionic compounds (phenols) in reversed-phase liquid chromatography using the solvation parameter model 829(1998)29

#### Retention behaviour

Some aspects of chromatographic behavior in capillary electrochromatography 802(1998)59

Retention behavior of D,L-dansyl-amino acids on a human serum albumin chiral stationary phase: effect of a mobile phase modifier 808(1998)113

Investigation of chromatographic behaviour of ethoxylated alcohol surfactants in normal-phase and reversed-phase systems using high-performance liquid chromatography–mass spectrometry 813(1998)299

Comparison of the retention behaviour of uranium and thorium on high-efficiency resin substrates impregnated or dynamically coated with metal chelating compounds 816(1998)286

Characterization of various reversed-phase columns using the linear free energy relationship. I. Evaluation based on retention factors 818(1998)1

Retention behaviour of quinolone derivatives in high-performance liquid chromatography. Effect of pH and evaluation of ionization constants 823(1998)411

Gas chromatographic retention behavior of polycyclic aromatic sulfur heterocyclic compounds, (dibenzothiophene, naphtho[*b*]thiophenes, benzo[*b*]naphthothiophenes and alkyl-substituted derivatives) on stationary phases of different selectivity 841(1999)207

Retention behaviour of metal ions on tri-*n*-butyl phosphate- and tri-*n*-butyl amine-impregnated silica gel-G layers in oxalic acid–oxalate mobile phases 841(1999)263

Study of the nature of recognition in molecularly imprinted polymers. II. Influence of monomer–template ratio and sample load on retention and selectivity 848(1999)39

Effect of eluent composition on retention behavior of anions in ion chromatography on anion-exchangers modified with heparin 850(1999)65

#### Retention coefficients

Calculation of peptide retention coefficients in normal-phase liquid chromatography 808(1998)105

#### Retention data

Repeatability and reproducibility of retention data and band profiles on reversed-phase liquid chromatography columns. I. Experimental protocol 830(1999)41

Repeatability and reproducibility of retention data and band profiles on reversed-phase liquid chromatographic columns. II. Results obtained with Symmetry C<sub>18</sub> columns 830(1999)55

#### Retention–detection response relationships

Compound retention dependence of the response in a gas chromatography–atomic emission detection system 819(1998)85

#### Retention factors

Prediction of the gas chromatographic retention values of chlorobenzenes on different stationary phases by using structure–retention correlations 803(1998)211

Characterization of various reversed-phase columns using the linear free energy relationship. I. Evaluation based on retention factors 818(1998)1

Cholesteryl-silica stationary phase for liquid chromatography. Comparative study of retention behavior and selectivity 845(1999)433

#### Retention indices

Prediction of the gas chromatographic retention values of chlorobenzenes on different stationary phases by using structure–retention correlations 803(1998)211

Hold-up time in gas chromatography. IV. Improved determination of Kováts' retention indices 805(1998)161

Comments on predictive strategies for determining retention indexes 808(1998)277

Reply to “Comments on predictive strategies for determining retention indices” 808(1998)279

Determination of system suitability limits with a robustness test 845(1999)145
- Royal jelly**  
Determination of *trans*-10-hydroxy-2-decenoic acid content in pure royal jelly and royal jelly products by column liquid chromatography 839(1999)265
- Rubia tinctorum* L**  
High-performance liquid chromatographic method for the analysis of anthraquinone glycosides and aglycones in madder root (*Rubia tinctorum* L.) 816(1998)277
- Ruggedness**  
Determination of system suitability limits with a robustness test 845(1999)145
- Sources of uncertainty in gas chromatography and high-performance liquid chromatography 849(1999)13
- Rye**  
Separation of ergot alkaloids and their epimers and determination in sclerotia by capillary electrophoresis 808(1998)247

# S

## Saffron

Quantitative high-performance liquid chromatographic method to analyse commercial saffron (*Crocus sativus* L.) products 830(1999)477

Simultaneous quantification of five major biologically active ingredients of saffron by high-performance liquid chromatography 849(1999)349

## Salt effects

Erratum to "Salt effects in capillary electrophoresis. I. Dependence of electrophoretic mobilities upon the hydrodynamic radius". [J. Chromatogr. A, 786 (1997) 171–180] 806(1998)365

Salt effects in capillary zone electrophoresis. II. Mechanisms of electrophoretic mobility modification due to Joule heating at high buffer concentrations 809(1998)159

Salt effects in capillary zone electrophoresis. III. Systematic and selective factors in the high ionic strength separation of sulphonamides in sodium phosphate buffers 818(1998)217

Salt-induced immobilization of affinity ligands onto epoxide-activated supports 849(1999)1

Salt effects in capillary zone electrophoresis. IV. Resolution versus time and the effect of potassium phosphate and its concentration in the high ionic strength separation of sulphonamides 849(1999)575

## Salt-promoted adsorption

Salt-promoted adsorption of proteins onto amphiphilic agarose-based adsorbents. II. Effects of salt and salt concentration 803(1998)83

## Sample displacement techniques

Application of sample displacement techniques to the purification of synthetic oligonucleotides and nucleic acids: a mini-review with experimental results 806(1998)77

## Sample handling

see also Clean-up methods, Extraction methods, Preconcentration, Sample preparation and Special Issue Index

In situ ethylation–purge and programmed-temperature-vaporizer cold trapping–gas chromatography–mass spectrometry as an automated technique for the determination of methyl- and butyltin compounds in aqueous samples 809(1998)151

Improved fluorometric and chromatographic methods for the quantification of fumonisins B<sub>1</sub>, B<sub>2</sub> and B<sub>3</sub> 815(1998)41

Determination of eight trichothecenes by gas chromatography–mass spectrometry after sample clean-up by a two-stage solid-phase extraction 815(1998)123

Supercritical fluid extraction and off-line clean-up for the analysis of organochlorine pesticide residues in garlic 818(1998)138

Synergistic approaches based on nonchromatographic continuous separation techniques (solid-phase extraction and pervaporation) and chromatography couplings 819(1998)25

Strategies for the analysis of chlorobenzenes in soils using solid-phase microextraction coupled with gas chromatography–ion trap mass spectrometry 819(1998)197

Multiresidue determination of pesticides in plants by high-performance liquid chromatography following gel permeation chromatographic clean-up 823(1998)11

Comparison of various sample handling and analytical procedures for the monitoring of pesticides and metabolites in ground waters 823(1998)35

Automated determination of phenylcarbamate herbicides in environmental waters by on-line trace enrichment and reversed-phase liquid chromatography–diode array detection 823(1998)121

Langmuirian parameters for Tenax GC adsorption of airborne organohalogen compounds 823(1998)171

Assessment of the sample handling procedures in a labor-saving method for the analysis of organochlorine compounds in a large number of fish samples 823(1998)373

On-line coupling of microdialysis sampling with liquid chromatography for the determination of peptide and non-peptide leukotrienes 823(1998)489

Concentration of small volumes of nonpolar solutions containing trace volatile compounds 824(1998)195

Effect of cation-exchange pretreatment of aqueous soil extracts on the gas chromatographic–mass spectrometric determination of nerve agent hydrolysis products after *tert.*-butyldimethylsilylation 824(1998)211

Determination of benzene, toluene, ethylbenzene and xylenes in indoor air at environmental levels using diffusive samplers in combination with headspace solid-phase microextraction and high-resolution gas chromatography–flame ionization detection 826(1998)191

Derivatisation/solid-phase microextraction followed by gas chromatography–mass spectrometry for the analysis of phenoxy acid herbicides in aqueous samples 826(1998)211

- Evaluation of natural crab shell as an adsorbent for preconcentrating airborne volatile organic compounds collected in a canister 829(1998)215

- Sample size**  
Statistical determination of the proper sample size in multicomponent separations 839(1999)129

**Sample stacking**

Therapeutic drug monitoring by capillary electrophoresis (Review) 807(1998)27

Insulin stacking for capillary electrophoresis 807(1998)129

Antimony speciation in environmental samples by interfacing capillary electrophoresis on-line to an inductively coupled plasma mass spectrometer 834(1999)341

Determination of trace level anions in snow samples by capillary electrophoresis with sample stacking 834(1999)387

Sample concentration by sample stacking and sweeping using a microemulsion and a single-isomer sulfated  $\beta$ -cyclodextrin as pseudostationary phases in electrokinetic chromatography 838(1999)3

Determination of 1,4-benzodiazepines and their metabolites by capillary electrophoresis and high-performance liquid chromatography using ultraviolet and electrospray ionisation mass spectrometry 838(1999)273

Impurities at a level of 0.01% in foscarnet sodium determined by capillary zone electrophoresis with indirect UV detection and sample self-stacking 846(1999)245

Capillary electrophoresis and sample stacking in non-aqueous media for the analysis of priority pollutant phenols 846(1999)401

Sample stacking of fast-moving anions in capillary zone electrophoresis with pH-suppressed electroosmotic flow 850(1999)339

**Sample thickness**

Comparison of DNA migrations in two clamped homogeneous electric field chambers of different sizes. Relation between sample thickness and electrophoresis time 806(1998)187

**Sandwich injection**

New set-up for capillary isoelectric focusing in uncoated capillaries 813(1998)349

**Saponification**

Semi-quantification of carotenoids by high-performance liquid chromatography: saponification-induced losses in fatty foods 829(1998)393

**Scallops**

Identification and occurrence of a novel *cis*-4,7,10,*trans*-13-docosatetraenoic fatty acid in the scallop *Pecten maximus* (L.) 839(1999)119

**Scutellaria baicalensis**

Supercritical fluid extraction of flavonoids from *Scutellariae Radix* 830(1999)387

**Seaweed**

Separation and identification of chlorophylls and carotenoids from *Caulerpa prolifera*, *Jania rubens* and *Padina pavonica* by reversed-phase high-performance liquid chromatography 829(1998)153

**Second order design**

Separation of barbiturates with micellar liquid chromatography and optimization by a second order mathematical design 805(1998)45

**Sediments**

see also Marine sediments

Simple method for estimating polychlorinated biphenyl concentrations on soils and sediments using subcritical water extraction coupled with solid-phase microextraction 814(1998)151

Application of surfactants to the supercritical fluid extraction of nitroaromatic compounds from sediments 816(1998)221

Speciation of volatile forms of selenium and inorganic selenium in sediments by gas chromatography–mass spectrometry 823(1998)259

Analysis of inorganic species in environmental samples by capillary electrophoresis 834(1999)363

Optimisation of the microwave-assisted extraction in open cell of polycyclic aromatic hydrocarbons from soils and sediments. Study of moisture effect 837(1999)187

Analysis of priority pollutants in environmental samples by on-line supercritical fluid chromatography cleanup–cryo-trap–gas chromatography–mass spectrometry 846(1999)387

Determination of tributyltin and triphenyltin in sediments by liquid chromatography with fluorimetric detection. Assessment of spiking procedures 846(1999)413

**Seepage water**

Analysis of aromatic sulfonates in water by solid-phase extraction and capillary electrophoresis 822(1998)291

**Selective adsorbents**

Molecularly imprinted adsorbents for positional isomer separation 849(1999)319

**Selectivity**

Control of migration time window and selectivity in electrokinetic chromatography with mixed polymeric pseudostationary phases 802(1998)23

Characterization of mixed micellar pseudostationary phases in electrokinetic chromatography using linear solvation energy relationships 802(1998)35

Enhancement of selectivity in capillary electrophoretic separations of metals and ligands through complex formation (Review) 805(1998)1

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities, acidity constants and separation selectivity of substituted aromatic acids. I. Methanol 806(1998)325

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities, acidity constants and separation selectivity of substituted aromatic acids. II. Ethanol 811(1998)201

Characterization of various reversed-phase columns using the linear free energy relationship. II. Evaluation of selectivity 818(1998)19

Capillary zone electrophoresis in mixed aqueous–organic media: effect of organic solvents on actual ionic mobilities and acidity constants of substituted aromatic acids. III. 1-Propanol 818(1998)209

Ion-exchange chromatography of proteins: modulation of selectivity by addition of organic solvents to mobile phase. Application to single-step purification of a proteinase inhibitor from corn and study of the mechanism of selectivity modulation 825(1998)17

Characterization of silica-based octyl phases of different bonding density. Part II. Studies of surface properties and chromatographic selectivity 828(1998)59

Comparison of the electroosmotic flow profiles and selectivity of stationary phases used in capillary electrochromatography 832(1999)41

Control of separation selectivity in capillary zone electrophoresis of inorganic anions 834(1999)213

Solid-phase analytical derivatization: enhancement of sensitivity and selectivity of analysis 843(1999)19

Evaluation and modulation of selectivity in reversed-phase high-performance liquid chromatography 845(1999)113

Cholesteryl-silica stationary phase for liquid chromatography. Comparative study of retention behavior and selectivity 845(1999)433

Study of the nature of recognition in molecularly imprinted polymers. II. Influence of monomer–template ratio and sample load on retention and selectivity 848(1999)39

Separation selectivity of some ethylenediaminetetraacetic acid and cyclohexane-1,2-diaminetetraacetic acid complexes in column and ion electrokinetic chromatography 850(1999)269

Factors affecting selectivity of inorganic anions in capillary electrophoresis 850(1999)319

### **Selectivity modifiers**

Use of calixarene compounds as selectivity modifiers in capillary electrophoresis separations 816(1998)243

### **Self-elution**

Ion chromatographic separation of sulfur-containing inorganic anions with an ICP–MS as element-specific detector 844(1999)161

### **Self-sharpening protein–modulator interface**

Immobilized metal affinity chromatography. Self-sharpening of protein–modulator interfaces in frontal chromatography 818(1998)31

### **Semiconductors**

Application of ion chromatography to the semiconductor industry. I. Measurement of acidic airborne contaminants in cleanrooms 804(1998)273

Applications of ion chromatography in the semiconductor industry. II. Determination of basic airborne contaminants in a cleanroom 850(1999)283

### **Sensitivity**

Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15

### **Sensitivity enhancement**

Solid-phase analytical derivatization: enhancement of sensitivity and selectivity of analysis 843(1999)19

### **Separation theory**

Frameworks of separation theories from two separate worlds: dynamics and thermodynamics 828(1998)3

### **Sequencing methods**

Amino acid sequence and D/L-configuration determination of peptides utilizing liberated N-terminus phenylthiohydantoin amino acids 813(1998)267

### **Sewage effluent**

Analysis of nonylphenol polyethoxylates and their degradation products in river water and sewage effluent by gas chromatography–ion trap (tandem) mass spectrometry with electron impact and chemical ionization 824(1998)79

### **Sewage sludge**

Matrix effects and selectivity of the detector in the determination of butyl- and phenyltins by gas chromatography–flame photometric detection 819(1998)221

Optimization and validation of solvent and supercritical-fluid extractions for the trace-determination of polycyclic aromatic hydrocarbons in sewage sludges by liquid chromatography coupled to diode-array and fluorescence detection 823(1998)219

Antimony speciation in environmental samples by interfacing capillary electrophoresis on-line to an inductively coupled plasma mass spectrometer 834(1999)341

Efficiency of supercritical fluid extraction for determining 4-nonylphenol in municipal sewage sludge 840(1999)71

Comparison of the efficiency of extraction methods for polychlorinated biphenyls from environmental wastes 845(1999)349

#### **Shellfish poisoning**

Improved method for preparation and use of 9-anthryldiazomethane for derivatization of hydroxycarboxylic acids. Application to diarrhetic shellfish poisoning toxins 807(1998)229

Determination of pectenotoxin-2 after solid-phase extraction from seawater and from the dinoflagellate *Dinophysis fortii* by liquid chromatography with electrospray mass spectrometry and ultraviolet detection. Evidence of oxidation of pectenotoxin-2 to pectenotoxin-6 in scallops 815(1998)155

Liquid chromatographic methods for the isolation and identification of new pectenotoxin-2 analogues from marine phytoplankton and shellfish 844(1999)53

New approach to the direct detection of known and new diarrhetic shellfish toxins in mussels and phytoplankton by liquid chromatography–mass spectrometry 847(1999)213

Capillary electrophoresis with diode array detection as an alternative analytical method for paralytic and amnesic shellfish toxins 847(1999)223

#### **Shielded-hydrophobic-phase high-performance liquid chromatography**

Validation of a shielded-hydrophobic-phase high-performance liquid chromatography method for the determination of residual methotrexate in recombinant protein biopharmaceuticals 828(1998)303

#### **Short tandem repeat fragments**

Comparison of slab gel electrophoresis and capillary electrophoresis for the detection of the fluorescently labeled polymerase chain reaction products of short tandem repeat fragments 806(1998)159

#### **Siderophores**

Separation of siderophores by capillary electrophoresis 830(1999)183

#### **Signal enhancement**

Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15

#### **Signal processing**

Dynamic analysis of capillary electrophoresis data using real-time neural networks 833(1999)231

#### **Signal suppression**

Ion chromatographic separation of sulfur-containing inorganic anions with an ICP–MS as element-specific detector 844(1999)161

#### **Silanization**

Synthesis and characterization of bonded phases made via hydrosilylation of alkynes on silica hydride surfaces 818(1998)145

#### **Silica**

Non-suppressed ion chromatography of cations on silica gel modified with aluminium 804(1998)171

Synthesis and ion-exchange properties of silica chemically modified with aminophosphonic acid 813(1998)47

Consolidation and column performance of several packing materials for liquid chromatography in a dynamic axial compression column 813(1998)223

Capillary electrochromatographic separation of basic compounds with bare silica as stationary phase 817(1998)65

Measurement of the degree of internal friction of two native silica packing materials 818(1998)155

Selective separation of fullerenes on hydroxyphenyl-triphenylporphyrin–silica stationary phases 824(1998)147

Characterization of silica-based octyl phases of different bonding density. Part I. Thermal stability studies 828(1998)51

Characterization of silica-based octyl phases of different bonding density. Part II. Studies of surface properties and chromatographic selectivity 828(1998)59

Universal procedure for the assessment of the reproducibility and the classification of silica-based reversed-phase packings. I. Assessment of the reproducibility of reversed-phase packings 849(1999)87

Universal procedure for the assessment of the reproducibility and the classification of silica-based reversed-phase packings. II. Classification of reversed-phase packings 849(1999)101

#### **Silica, aluminium-modified**

Ion-exclusion chromatography of carboxylic acids on silica gel modified with aluminium 850(1999)177

#### **Silica, bonded**

Gas chromatography study of retention of organic compounds on silica with an attached layer of hydrophobic groups 844(1999)225

Retention behaviour of products extracted from oriental medicine formulations in high-performance liquid chromatography on octadecyl acrylate-modified silicas 845(1999)409

**Silica, coating**

Poly(7-oxanorborn-2-ene-5,6-dicarboxylate)-coated silica prepared by ring-opening metathesis polymerization for the selective enrichment of radioactive lanthanides 848(1999)193

**Silica, titanium-grafted**

Chromatographic evaluation of radiation-immobilized poly(methyloctylsiloxane) on titanium-grafted silica 845(1999)417

**Silica, zirconized**

Development of C<sub>8</sub> stationary phases immobilized by  $\gamma$  radiation on zirconized silica for high-performance liquid chromatographic applications 845(1999)423

**Silica frits**

Deactivation of frits for use in capillary high-performance liquid chromatography and capillary electrochromatography with characterization by imaging with laser-induced fluorescence 818(1998)257

**Silica gel, octadecylsilylated**

Characteristics of octadecylsilylated silica gels end-capped by high-temperature silylation 813(1998)239

**Silica gel, silver nitrate loaded**

New method of stationary phase preparation for silver ion column chromatography: Application to the isolation of steroidal hydrocarbons in vegetable oils 823(1998)291

**Silica hydride**

Synthesis and characterization of bonded phases made via hydrosilylation of alkynes on silica hydride surfaces 818(1998)145

**Silica–iminodiacetic acid**

Isocratic separation of lanthanides and yttrium by high-performance chelation ion chromatography on iminodiacetic acid bonded to silica 804(1998)223

**Silica rod column**

Performance of an octadecylsilylated continuous porous silica column in polypeptide separations 828(1998)83

**Silicon**

Silicon microtechnology and microstructures in separation science 819(1998)3

**Silicon microtechnology**

Silicon microtechnology and microstructures in separation science 819(1998)3

**Silver ion complexation**

Positional and configurational separation of fatty acid isomers by micro reversed-phase liquid chromatography with an Ag<sup>+</sup>-containing mobile phase 848(1999)83

**Silver ion liquid chromatography**

New method of stationary phase preparation for silver ion column chromatography: Application to the isolation of steroidal hydrocarbons in vegetable oils 823(1998)291

**Silylation**

Characteristics of octadecylsilylated silica gels end-capped by high-temperature silylation 813(1998)239

**Simplex optimization**

see also Optimization

MultiSimplex optimisation of purge-and-trap extraction of phenols in soil samples 849(1999)225

**Simulant waste material**

Analysis and quantification of organic acids in simulated Hanford tank waste and Hanford tank waste 805(1998)101

Determination of nitrate and nitrite in Hanford defense waste by reverse-polarity capillary zone electrophoresis 844(1999)387

**Simulated moving bed chromatography**

Optimal operation of simulated moving-bed units for non-linear chromatographic separations. II. Bi-Langmuir isotherm 805(1998)37

Continuous enantiomer separation of the volatile inhalation anesthetic enflurane with a gas chromatographic simulated moving bed unit 813(1998)333

Simulated moving bed processing: escape from the high-cost box 827(1998)143

Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions 827(1998)161

Design of the simulated moving bed process based on adsorption isotherm measurements using a perturbation method 827(1998)175

Separation of enantiomers of a chiral epoxide by simulated moving bed chromatography 827(1998)215

Chiral separation of a pharmaceutical intermediate by a simulated moving bed process 832(1999)55

Erratum to "Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions" [J. Chromatogr. A 827 (1998) 161–173] 835(1999)247

Chromatographic resolution of the enantiomers of a pharmaceutical intermediate from the milligram to the kilogram scale 849(1999)309

**Single cell**

Capillary electrophoretic study of individual exocytotic events in single mast cells 817(1998)377

**Single-cell recording**

Pheromone analysis using capillary gas chromatographic techniques 843(1999)199

**Singlet peaks**

Prediction of numbers of singlets, doublets, and triplets in poorly resolved separations by statistical-overlap theory 831(1999)37

***Sinorhizobium meliloti***

Selective affinity of L-histidine immobilized onto poly(ethylene–vinyl alcohol) hollow-fiber membranes for various oligoglucuronans. Influence of the degree of polymerization and the degree of substitution by acetate 841(1999)1

**Sintered octadecylsilica**

Sintered octadecylsilica as monolithic column packing in capillary electrochromatography and micro high-performance liquid chromatography 806(1998)251

**Size-exclusion chromatography**

Microcolumn size-exclusion chromatography coupled with electrospray ionization mass spectrometry 835(1999)121

Peak-referenced integral method for size exclusion chromatography and its application to aromatic polyesters 839(1999)1

**Size-exclusion chromatography, electrically driven**

Pore flow effects in electrically driven size-exclusion chromatography 837(1999)3

**Skins**

Determination of organochlorine pesticides in skins and leather by gas chromatography 811(1998)256

**Sludge analysis**

Determination of total fatty acids (C<sub>8</sub>–C<sub>22</sub>) in sludges by gas chromatography–mass spectrometry 826(1998)49

**Snow**

Determination of trace level anions in snow samples by capillary electrophoresis with sample stacking 834(1999)387

**Snyder theory**

New approach to the computer-assisted selection of mobile phases for high-performance liquid chromatography on the basis of the Snyder theory 848(1999)1

**Soapstock**

Gas chromatographic characterization of soapstocks from vegetable oil refining 816(1998)185

**Sodium chloride brine**

Chromatographic determination of anions in industrial salt and sodium chloride brines used in chlor–alkali industry 841(1999)55

**Soft drinks**

Direct chiral resolution of pantothenic acid using 2-hydroxypropyl-β-cyclodextrin in capillary electrophoresis 811(1998)269

Selection and optimization of background electrolytes for simultaneous detection of small cations and organic acids by capillary electrophoresis with indirect photometry 822(1998)125

Determination of diazepam in cold drinks by high-performance thin-layer chromatography 822(1998)332

Determination of eight synthetic food colorants in drinks by high-performance ion chromatography 827(1998)73

**Soil**

Determination of iodide in ground water and soil by ion chromatography 804(1998)131

Solid-phase microextraction and gas chromatography–mass spectrometry for determining chlorophenols from landfill leaches and soil 806(1998)317

Capillary electrophoresis in the analysis of humic substances. Facts and artifacts 807(1998)101

Determination of organoarsenicals in the environment by solid-phase microextraction–gas chromatography–mass spectrometry 807(1998)253

Ultrafiltration–capillary zone electrophoresis for the determination of humic acid fractions 807(1998)275

Detection of alkyl methylphosphonic acids in complex matrices by gas chromatography–tandem mass spectrometry 809(1998)141

Combined modifier/in situ derivatization effects on supercritical fluid extraction of polycyclic aromatic hydrocarbons from soil 811(1998)151

Simple method for estimating polychlorinated biphenyl concentrations on soils and sediments using subcritical water extraction coupled with solid-phase microextraction 814(1998)151

Comparison of pressurised liquid extraction with Soxhlet extraction for the analysis of polychlorinated dibenzo-*p*-dioxins and dibenzofurans from fly ash and environmental matrices 815(1998)231

Effects of various binary and ternary supercritical phases on the extraction of polycyclic aromatic hydrocarbons from contaminated soils 816(1998)201

- Strategies for the analysis of chlorobenzenes in soils using solid-phase microextraction coupled with gas chromatography–ion trap mass spectrometry 819(1998)197
- Ultrasonic solvent extraction of pesticides from soil 823(1998)3
- Multiresidue herbicide analysis in soil samples by means of extraction in small columns and gas chromatography with nitrogen–phosphorus and mass spectrometric detection 823(1998)17
- Determination of chlorpyrifos in air, leaves and soil from a greenhouse by gas-chromatography with nitrogen–phosphorus detection, high-performance liquid chromatography and capillary electrophoresis 823(1998)91
- Solving coelution problems on a smectic-liquid crystalline polysiloxane capillary column for the determination of priority polycyclic aromatic hydrocarbons in environmental samples 823(1998)179
- Determination of priority phenolic compounds in soil samples by various extraction methods followed by liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 823(1998)231
- Liquid chromatography–atmospheric pressure chemical ionization mass spectrometry for chlorinated phenolic compounds. Application to the analysis of polluted soils 823(1998)241
- Experimental design approach for the optimization of supercritical fluid extraction of chlorophenols from polluted soils 823(1998)249
- Analysis of cations in drainage water and soil solution by single-column ion chromatography 823(1998)279
- Analysis of inorganic anions in drainage water and soil solution by single-column ion chromatography 823(1998)285
- Effect of cation-exchange pretreatment of aqueous soil extracts on the gas chromatographic–mass spectrometric determination of nerve agent hydrolysis products after *tert.*-butyldimethylsilylation 824(1998)211
- Analysis of trace atrazine and simazine in environmental samples by liquid chromatography–fluorescence detection with pre-column derivatization reaction 827(1998)57
- Capillary electrophoresis of inorganic anions 834(1999)133
- Analysis of inorganic species in environmental samples by capillary electrophoresis 834(1999)363
- Optimisation of the microwave-assisted extraction in open cell of polycyclic aromatic hydrocarbons from soils and sediments. Study of moisture effect 837(1999)187
- Determination of explosives in soil and ground water by liquid chromatography–amperometric detection 844(1999)97
- Supercritical fluid extraction for the determination of petroleum hydrocarbons in soil 845(1999)357
- Supercritical-carbon-dioxide extraction of lipids from a contaminated soil 845(1999)365
- Chromatographic models for the sorption of neutral organic compounds by soil from water and air 845(1999)381
- Chemical characterization and screening of hydrocarbon pollution in industrial soils by headspace solid-phase microextraction 848(1999)279
- Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433
- Sol–gel**  
Monolithic columns containing sol–gel bonded octadecylsilica for capillary electrochromatography 837(1999)35
- Solid–liquid interfaces**  
Adsorption studies of azo dyes as resonance Raman spectroscopic probes at solid–liquid interfaces 828(1998)121
- Solid-matrix dispersion partition**  
Determination of pyrethroid pesticide residues in fatty materials by solid-matrix dispersion partition, followed by mini-column size-exclusion chromatography 833(1999)19
- Solid-phase analytical derivatization**  
Solid-phase analytical derivatization: enhancement of sensitivity and selectivity of analysis 843(1999)19
- Solid-phase extraction**

- Solid-phase peptide synthesis**  
Fractionation and characterization of a crude peptide mixture from the synthesis of eldoisin by liquid chromatography–electrospray ionization mass spectrometry 846(1999)25
- Solid-state NMR spectroscopy**  
*n*-Alkyl fluorenyl phases in chromatography. I. Synthesis and characterization 805(1998)71
- Solubility parameters**  
Some aspects of the purification of anthraquinone antibiotics by preparative reversed-phase liquid chromatography 812(1998)117

**Solubilization in micelles**

Reply to "Relationship between liquid–liquid distribution and liquid–micelle distribution systems": the solvation environment in micelles evaluated by the linear solvation energy relationship method 807(1998)311

**Solute descriptors**

Classification of stationary phases and other materials by gas chromatography 842(1999)79

Solute–solvent interactions in micellar electrokinetic chromatography. Characterization of sodium dodecyl sulfate–Brij 35 micellar systems for quantitative structure–activity relationship modelling 845(1999)217

Chromatographic models for the sorption of neutral organic compounds by soil from water and air 845(1999)381

**Solute migration**

Visualization of solute migration in liquid chromatography columns 826(1998)1

**Solute transfer**

Thermodynamic properties for the solute transfer from the mobile to the stationary phase in reversed phase liquid chromatography obtained by squalane-impregnated C<sub>18</sub> bonded phase 848(1999)9

**Solvating gas chromatography**

Solvating gas chromatography using ammonia as mobile phase 806(1998)345

Packed capillary column solvating gas chromatography of aldehydes 818(1998)265

**Solvation parameter model**

Structure-driven retention model for solvent selection and optimization in reversed-phase thin-layer chromatography 802(1998)335

Relationship between liquid–liquid distribution and liquid–micelle distribution systems 807(1998)307

Universal model for the calculation of all organic solvent–water partition coefficients 827(1998)345

Comparison of solute descriptors for predicting retention of ionic compounds (phenols) in reversed-phase liquid chromatography using the solvation parameter model 829(1998)29

Classification of stationary phases and other materials by gas chromatography 842(1999)79

Solute–solvent interactions in micellar electrokinetic chromatography. Characterization of sodium dodecyl sulfate–Brij 35 micellar systems for quantitative structure–activity relationship modelling 845(1999)217

Chromatographic models for the sorption of neutral organic compounds by soil from water and air 845(1999)381

**Solvatochromism**

Effect of additives on chiral selectivities by  $\beta$ -cyclodextrin in capillary electrophoresis based on the phenomenon of solvatochromism 829(1998)301

**Solvent selectivity**

Optimum solvent selectivity and gradient mode for deoxyribonucleosides in reversed-phase high-performance liquid chromatography 828(1998)337

**Solvents, residual**

Analysis of residual solvents by fast gas chromatography 811(1998)145

**Solvent systems**

Counter-current chromatography: instrumentation, solvent selection and some recent applications to natural product purification 808(1998)3

Separation of antibiotics by counter-current chromatography (Review) 812(1998)35

**Solvent uptake**

Influence of solvent uptake and swelling by poly(styrene–divinylbenzene) column packings on sample sorption rate and band broadening in reversed-phase liquid chromatography 835(1999)3

**Solvent vapour exit**

Optimization of large-volume on-column injection conditions in gas chromatography by monitoring the actual carrier gas flow 841(1999)75

**Solvent vapour exit closure**

Monitoring the actual carrier gas flow during large-volume on-column injections in gas chromatography as a means to automate closure of the solvent vapour exit 811(1998)105

**Solvophobic theory**

Retention in reversed-phase chromatography: partition or adsorption? 829(1998)1

***Sophora flavescens***

Preparative separation of alkaloids from the root of *Sophora flavescens* Ait by pH-zone-refining counter-current chromatography 822(1998)316

**Sorbents**

see also Adsorbents

Determination of airborne, volatile amines from polyurethane foams by sorption onto a high-capacity cation-exchange resin based on poly(succinic acid) 809(1998)121

Comparison of different sorbents for on-line liquid–solid extraction followed by high-performance liquid chromatographic determination of nitrogen-containing pesticides 822(1998)67

Trace analysis of polar organic pollutants in aqueous samples. Tools for the rapid prediction and optimisation of the solid-phase extraction parameters 823(1998)147

#### **Sorption rate**

Influence of solvent uptake and swelling by poly(styrene–divinylbenzene) column packings on sample sorption rate and band broadening in reversed-phase liquid chromatography 835(1999)3

#### **Sorptive extraction**

Retention model for sorptive extraction–thermal desorption of aqueous samples: application to the automated analysis of pesticides and polyaromatic hydrocarbons in water samples 805(1998)237

#### **Soya oil**

Determination of pyrethroid pesticide residues in fatty materials by solid-matrix dispersion partition, followed by mini-column size-exclusion chromatography 833(1999)19

#### **Soybean**

Gas chromatography determination of polychlorinated biphenyls in powdered and liquid soybean milks 815(1998)272

Determination of polychlorinated biphenyls in soybean infant formulas by gas chromatography 823(1998)365

#### **Space research**

Gas chromatography in space 843(1999)147

#### **Space Shuttle**

Analysis of water from the Space Shuttle and Mir Space Station by ion chromatography and capillary electrophoresis 804(1998)295

#### **Speciation**

Speciation of dimethylarsinic acid and monomethylarsonic acid by gas chromatography–mass spectrometry 832(1999)183

Antimony speciation in environmental samples by interfacing capillary electrophoresis on-line to an inductively coupled plasma mass spectrometer 834(1999)341

Chemical modification of analytes in speciation analysis by capillary electrophoresis, liquid chromatography and gas chromatography 834(1999)45

Liquid chromatography: a tool for the analysis of metal species 850(1999)213

#### **Split-flow thin-cell fractionation**

Continuous split flow-thin cell fractionation of starch particles 845(1999)303

#### **Split-flow thin fractionation**

Magnetic split-flow thin fractionation: new technique for separation of magnetically susceptible particles 813(1998)313

#### **Spruce needles**

Microwave-assisted solvent extraction — a new method for isolation of polynuclear aromatic hydrocarbons from plants 827(1998)21

#### **Stability constants**

Chiral discrimination of Dns- and unmodified D,L-amino acids by copper(II) complexes of terdentate ligands in high-performance liquid chromatography 829(1998)101

Role of chemical equilibria in the capillary electrophoresis of inorganic substances 834(1999)3

Electromigration behavior of metal ions in the presence of complexing polymer 838(1999)101

#### **Stability studies**

Degradation study of unsaturated anhydrides by reversed-phase high-performance liquid chromatography 805(1998)109

Thermal stability studies of immunoglobulins using capillary isoelectric focusing and capillary zone electrophoretic methods 807(1998)121

Photodegradation and stability of chlorothalonil in water studied by solid-phase disk extraction, followed by gas chromatographic techniques 823(1998)81

Analysis and degradation study of glyphosate and of aminomethylphosphonic acid in natural waters by means of polymeric and ion-exchange solid-phase extraction columns followed by ion chromatography–post-column derivatization with fluorescence detection 823(1998)129

Stability studies of tetracycline in methanol solution 827(1998)45

Measuring conformational stability of proteins using an optimized temperature-controlled capillary electrophoresis approach 838(1999)157

Comparison of analytical methods for investigating the photostability of isoxicam 846(1999)207

#### **Stable isotope dilution**

Synthesis of labelled [ $^2\text{H}_4$ ]β-damascenone, [ $^2\text{H}_4$ ]2-methoxy-3-isobutylpyrazine, [ $^2\text{H}_3$ ]α-ionone, and [ $^2\text{H}_3$ ]β-ionone, for quantification in grapes, juices and wines 824(1998)71

#### **Stacking**

Stacking of weakly cationic compounds by acetonitrile for capillary electrophoresis 817(1998)25

Dynamic computer simulations of the influence of injection conditions on capillary zone electrophoretic stacking of preparative free-flow zone electrophoresis fractions of peptides 836(1999)129

Isotachophoretic focusing of strong and weak electrolytes in combined pH and conductivity gradients 838(1999)71

**Stacking effects**

Isotachopheresis in zone electrophoresis 838(1999)55

**Stationary phases**

see also Chiral stationary phases and Ion exchangers

A new approach to dealing with high-to-low concentration ratios of sodium and ammonium ions in ion chromatography 804(1998)201

Original use of the liquid nature of the stationary phase in counter-current chromatography. II. A liquid-liquid reactor for catalytic reactions 828(1998)523

**Stationary phases, GC**

Synthesis and gas chromatographic evaluation of a high-temperature hydrogen-bond acid stationary phase 805(1998)217

Terminally carboxyl oligo(ethylene oxide) monomethyl ethers-substituted side chain liquid crystalline polysiloxane polymer as stationary phase in capillary gas chromatography for the separation of polynuclear aromatic hydrocarbons 808(1998)201

Retention behaviour of polychlorinated biphenyls on polysiloxane-anchored C<sub>60</sub> in gas chromatography 809(1998)252

Separation properties of bis(β-diketonato)-copper(II) complexes in capillary gas chromatography 809(1998)65

New naphthalene containing side-chain liquid crystalline polysiloxane stationary phases for high-resolution gas chromatography 811(1998)97

Gas-solid chromatographic separation of hydrogen isotopes: a comparison between two palladium bearing materials – alumina and kieselguhr 822(1998)326

Solving coelution problems on a smectic-liquid crystalline polysiloxane capillary column for the determination of priority polycyclic aromatic hydrocarbons in environmental samples 823(1998)179

Wetting transition in alkane liquids on silanised diatomaceous gas chromatographic supports 829(1998)201

Characterization of olefinic gas chromatographic stationary phases by linear solvation energy relationships 836(1999)261

Gas chromatographic separation of semivolatile organohalogen compounds on the new stationary phase Optima δ-3 836(1999)271

Influence of temperature on the polarity of porous polymer beads stationary phases for gas chromatography 837(1999)153

Characterization of amine functionalized stationary phases using linear solvation energy relationships 837(1999)171

Preparation and study of two polysiloxanes with pendant hand-basket type calixarene stationary phases for capillary gas chromatography 840(1999)225

Gas chromatographic retention behavior of polycyclic aromatic sulfur heterocyclic compounds, (dibenzothiophene, naphtho[*b*]thiophenes, benzo[*b*]naphthothiophenes and alkyl-substituted derivatives) on stationary phases of different selectivity 841(1999)207

Porous layer open-tubular capillary columns: preparations, applications and future directions 842(1999)115

Classification of stationary phases and other materials by gas chromatography 842(1999)79

Gas chromatography study of retention of organic compounds on silica with an attached layer of hydrophobic groups 844(1999)225

Chemically bonded chelates as selective complexing sorbents for gas chromatography. VII. *N*-[3-(Trimethoxysilyl)propyl]-diethylenetriamine complexes with CuCl<sub>2</sub> and CrCl<sub>3</sub> 844(1999)239

Principal component analysis of Kováts indices for carbonyl compounds in capillary gas chromatography 845(1999)21

Dynamic modification of the stationary phase in capillary gas chromatography. II. Continuous introduction of water vapour 845(1999)43

Inverse gas chromatography: a new approach to the estimation of specific interactions 845(1999)53

Gas chromatographic characterization of the adsorption properties of the natural adsorbent CACMM2 845(1999)373

Gas chromatography in space exploration. Capillary and micropacked columns for in situ analysis of Titan's atmosphere 846(1999)307

Characterization of stationary phases for gas chromatography by <sup>29</sup>Si NMR spectroscopy 848(1999)251

**Stationary phases, LC**

Salt-induced immobilization of small affinity ligands on an epoxide-activated affinity support 803(1998)73

Salt-promoted adsorption of proteins onto amphiphilic agarose-based adsorbents. II. Effects of salt and salt concentration 803(1998)83

Preparation of a cyclophane-bonded stationary phase and its application to separation of naphthalene derivatives 803(1998)95

Separation of a fructo-oligosaccharide mixture by hydrophilic interaction chromatography using silica-based micropellicular sorbents 803(1998)302

Rapid, direct determination of polyphenols in tea by reversed-phase column liquid chromatography 849(1999)637

**Teicoplanin stationary phases**

Comparison of enantioselective separation of *N-tert*-butyloxycarbonyl amino acids and their non-blocked analogues on teicoplanin-based chiral stationary phase 838(1999)121

**Temperature effects**

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. I. Application to 14 different samples using computer simulation 803(1998)1

Simultaneous variation of temperature and gradient steepness for reversed-phase high-performance liquid chromatography method development. II. The use of further changes in conditions 803(1998)33

Thermal stability studies of immunoglobulins using capillary isoelectric focusing and capillary zone electrophoretic methods 807(1998)121

Temperature effects in high-performance anion-exchange chromatography of oligosaccharides 814(1998)97

Capillary zone electrophoresis at subzero temperatures. III. Operating conditions and separation efficiency 825(1998)55

Effect of temperature on retention of alkali and alkaline-earth metal ions on some aminocarboxylic acid functionalised silica based ion exchangers 826(1998)15

Effect of temperature on retention of enantiomers of  $\beta$ -methyl amino acids on a teicoplanin chiral stationary phase 828(1998)177

Multivariate evaluation of organic modifier effects on the separation performance of peptides in micellar electrokinetic chromatography 831(1999)293

Influence of temperature on the polarity of porous polymer beads stationary phases for gas chromatography 837(1999)153

Aqueous two-phase systems containing self-associating block copolymers. Partitioning of hydrophilic and hydrophobic biomolecules 839(1999)71

Joint use of cyclodextrin additives in chiral discrimination by reversed-phase high-performance liquid chromatography: temperature effects 840(1999)159

Influence of viscous heat dissipation on efficiency in high-speed high-performance liquid chromatography 845(1999)155

Acoustic effects in chromatography 850(1999)9

#### **Temperature gradients**

Detecting single base substitutions, mismatches and bulges in DNA by temperature gradient gel electrophoresis and related methods 806(1998)169

#### **Temperature programming**

Retention simulation in gas chromatography 840(1999)137

Evaluation of column performance in constant pressure and constant flow capillary gas chromatography 842(1999)15

Retention index in temperature-programmed gas chromatography 842(1999)29

#### **Terdentate ligands**

Chiral discrimination of Dns- and unmodified D,L-amino acids by copper(II) complexes of terdentate ligands in high-performance liquid chromatography 829(1998)101

#### **Therapeutic drug monitoring**

Therapeutic drug monitoring by capillary electrophoresis (Review) 807(1998)27

#### **Thermal conductivity detection**

Thermal conductivity detection relative molar response factors for halogenated compounds 841(1999)187

#### **Thermal degradation**

Quantitative analysis of poly(methyl methacrylate–butyl acrylate) copolymer composition by liquid chromatography–particle beam mass spectrometry 824(1998)181

#### **Thermal desorption**

Retention model for sorptive extraction–thermal desorption of aqueous samples: application to the automated analysis of pesticides and polyaromatic hydrocarbons in water samples 805(1998)237

Development and application of a thermal desorption method for the analysis of polar volatile organic compounds in workplace air 809(1998)47

Evaluation of a new graphitized carbon black employed in sampling volatile organic compounds 810(1998)131

#### **Thermal effects**

Evaporation-induced solvent migration in electrically-driven thin layer chromatography 841(1999)127

#### **Thermal lens detection**

Fiber optic modified thermal lens detector system for the determination of amino acids 817(1998)223

#### **Thermal lens spectrometry**

Conjunction of thermal lens spectrometry and high-performance liquid chromatography. Approach to data treatment 827(1998)13

Determination of iron in complex matrices by ion chromatography with UV–Vis, thermal lens and amperometric detection using post-column reagents 829(1998)167

#### **Thermal membrane desorption**

On-line gas chromatography–mass spectrometry for process monitoring using solvent-free sample preparation 819(1998)51

#### **Thermal membrane desorption application**

Experimental study on solvent-less sample preparation methods. Membrane extraction with a sorbent interface, thermal membrane desorption application and purge-and-trap 830(1999)365

#### **Thermal redistribution**

Characterization of stationary phases for gas chromatography by <sup>29</sup>Si NMR spectroscopy 848(1999)251

#### **Thermal stability**

Thermal stability studies of immunoglobulins using capillary isoelectric focusing and capillary zone electrophoretic methods 807(1998)121

Characterization of silica-based octyl phases of different bonding density. Part I. Thermal stability studies 828(1998)51

#### **Thermochemolysis**

Structural characterization of bio- and geo-macromolecules by off-line thermochemolysis with tetramethylammonium hydroxide 823(1998)433

#### **Thermochromatography**

Thermochromatography for evolved gas analysis of apatite materials 819(1998)75

#### **Thermodesorption**

Identification of plasticizers in medical products by a combined direct thermodesorption–cooled injection system and gas chromatography–mass spectrometry 847(1999)1

**Thermodynamic parameters**

Biphasic thermodynamic characterization of interactions by quantitative affinity chromatography and biosensor technology 803(1998)291

Study of the thermodynamics and mass transfer kinetics of two enantiomers on a polymeric imprinted stationary phase 810(1998)1

Considerations on the dependence of gas–liquid chromatographic retention of *n*-alkanes with the carbon number 810(1998)105

Interaction between cyclodextrins and aflatoxins Q<sub>1</sub>, M<sub>1</sub> and P<sub>1</sub>. Fluorescence and chromatographic studies 815(1998)21

Effect of temperature on retention of alkali and alkaline-earth metal ions on some aminocarboxylic acid functionalised silica based ion exchangers 826(1998)15

Overall mass-transfer coefficients in non-linear chromatography 827(1998)235

Effect of temperature on retention of enantiomers of β-methyl amino acids on a teicoplanin chiral stationary phase 828(1998)177

Determination of Henry's law coefficients by combination of the equilibrium partitioning in closed systems and solid-phase microextraction techniques 830(1999)353

Consistency of gas hold-up determinations 832(1999)165

Measuring conformational stability of proteins using an optimized temperature-controlled capillary electrophoresis approach 838(1999)157

Retention simulation in gas chromatography 840(1999)137

Retention index in temperature-programmed gas chromatography 842(1999)29

Comparison of two methods for the gas chromatographic determination of thermodynamic parameters of enantioselectivity 843(1999)123

Determination of heats of adsorption of hydrocarbons on a synthetic clay by gas–solid chromatography using a wall coated open tubular column approach 844(1999)191

Influence of temperature and *n*-alkane pair on the methylene increments to the thermodynamic functions of solution on SE-30 and Carbowax-20M capillary columns 844(1999)201

Gas chromatography study of retention of organic compounds on silica with an attached layer of hydrophobic groups 844(1999)225

Thermodynamic significance of boiling point correlations for alkylbenzenes in gas chromatography. Extension of Trouton's rule 845(1999)13

Gas chromatographic characterization of the adsorption properties of the natural adsorbent CACMM2 845(1999)373

Inverse gas chromatography: a new approach to the estimation of specific interactions 845(1999)53

Application of inverse gas chromatography to the measurement of diffusion and phase equilibria in polyacrylate–solvent systems 845(1999)93

Thermodynamic properties for the solute transfer from the mobile to the stationary phase in reversed phase liquid chromatography obtained by squalane-impregnated C<sub>18</sub> bonded phase 848(1999)9

Temperature dependence of the retention index for perfumery compounds on a SE-30 glass capillary column. II. The hyperbolic equation 848(1999)215

Thermodynamic study and separation mechanism of diltiazem optical isomers in packed-column supercritical fluid chromatography 848(1999)337

Estimation of the adsorption energy distributions for the Jovanovic–Freundlich isotherm model with Jovanovic local behavior 849(1999)45

**Thermodynamics**

Frameworks of separation theories from two separate worlds: dynamics and thermodynamics 828(1998)3

**Thermostated thin-layer chromatography**

Interactions between native cyclodextrins and *n*-alcohols studied using thermostated thin-layer chromatography 839(1999)149

**Thermostripping**

Ion exchange on resins with temperature-responsive selectivity. II. Thermo-induced concentration waves in ion-exchange column 802(1998)251

***Thermus aquaticus***

Purification of TaqI endonuclease from *Thermus aquaticus* 828(1998)373

**Thin-layer conditioning**

Distribution of cationic ion-pairing reagents on thin-layers after continuous overpressured layer chromatography 803(1998)235

**Thyrestatic drugs**

Confirmation of residues of thyrestatic drugs in thyroid glands by multiple mass spectrometry after thin-layer chromatographic screening 819(1998)99

**Time-resolved fluorescence spectroscopy**

Ion-exchange chromatography of proteins: modulation of selectivity by addition of organic solvents to mobile phase. Application to single-step purification of a proteinase inhibitor from corn and study of the mechanism of selectivity modulation 825(1998)17

**Titanium–nickel electrode**

Nickel content dependence of electrochemical behavior of carbohydrates on a titanium–nickel alloy electrode and its application to a liquid chromatography detector 837(1999)17

**Titan's atmosphere**

Gas chromatography in space exploration. Capillary and micropacked columns for in situ analysis of Titan's atmosphere 846(1999)307

**Tobacco**

Separation of alcohol-soluble proteins from tobacco seeds by capillary zone electrophoresis 803(1998)321

Analytical determination of nicotine in tobacco by supercritical fluid chromatography–ion mobility detection 811(1998)157

Sample purification for the analysis of caffeine in tobacco by gas chromatography–mass spectrometry 814(1998)171

Application of a digital signal enhancement processor to investigate improvements in sensitivity for capillary electrophoresis and capillary electrochromatography applications 836(1999)15

**Topological indices**

Semi-empirical topological method for the prediction of the chromatographic retention of *cis*- and *trans*-alkene isomers and alkanes 849(1999)495

**Toroidal coil centrifuge**

Toroidal coil counter-current chromatography. Achievement of high resolution by optimizing flow-rate, rotation speed, sample volume and tube length 808(1998)95

***Torreya jackii***

Lignans from *Torreya jackii* identified by stopped-flow high-performance liquid chromatography–nuclear magnetic resonance spectroscopy 837(1999)83

**Toxicological analysis**

Evaluation of capillary electrophoretic techniques towards systematic toxicological analysis 838(1999)259

**Trace analysis**

Trace analysis by combined use of off-line solid-phase extraction, on-column sample focusing and U-shape flow cell in capillary liquid chromatography 808(1998)79

Determination of trace metal ions by ion-pair chromatography after enrichment using supported liquid membrane 826(1998)103

Determination of trace level bromate in drinking water by direct injection ion chromatography 829(1998)187

Applications of ion chromatography in the semiconductor industry. II. Determination of basic airborne contaminants in a cleanroom 850(1999)283

**Trace enrichment**

On-line trace enrichment in hyphenated liquid chromatography–nuclear magnetic resonance spectroscopy 813(1998)55

**Transfer ratio**

Transfer ratio in indirect UV detection in capillary zone electrophoresis. A mathematical approach 844(1999)321

**Transfer techniques**

High-performance liquid chromatography coupled on-line with high resolution gas chromatography State of the art 842(1999)373

**Transference numbers**

Moving chemical reaction boundary and isoelectric focusing. II. Existence of quasi/equal fluxes (or transference numbers) of hydrogen and hydroxyl ions in stationary electrolysis and Svensson's isoelectric focusing 813(1998)173

Precise measurement of mobility from the length of isotachophoretic zones 831(1999)277

**Transmethylation**

Microwave induced rapid transmethylation of fatty acids for analysis of food oil 818(1998)133

**Triacylglycerides**

Evaluation by high-performance liquid chromatography of the hydrolysis of human milk triacylglycerides during storage at low temperatures 823(1998)467

**Triangle theory**

Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions 827(1998)161

Erratum to “Continuous chromatographic separation through simulated moving beds under linear and nonlinear conditions” [J. Chromatogr. A 827 (1998) 161–173] 835(1999)247

***Trichoderma reesei***

Ion-exchange chromatographic purification and quantitative analysis of *Trichoderma reesei* cellulases cellobiohydrolase I, II and endoglucanase II by fast protein liquid chromatography 808(1998)153

**Triplet peaks**

Prediction of numbers of singlets, doublets, and triplets in poorly resolved separations by statistical-overlap theory 831(1999)37

**Trouton's rule**

Thermodynamic significance of boiling point correlations for alkylbenzenes in gas chromatography. Extension of Trouton's rule 845(1999)13

**True moving bed chromatography**

True moving bed chromatography: solid–liquid multi-stage counter-current extraction 849(1999)61

**Tryptic mapping**

Rapid verification of disulfide linkages in recombinant human growth hormone by tandem column tryptic mapping 808(1998)121

**Turboionspray ionization**

Quantification of amino acid conjugates of jasmonic acid in rice leaves by high-performance liquid chromatography–turboionspray tandem mass spectrometry 822(1998)310

**Turmeric**

Liquid chromatography–electrospray mass spectrometric analysis of curcuminoids and sesquiterpenoids in turmeric (*Curcuma longa*) 818(1998)127

**Tutorial**

Interlaboratory studies on two high-performance liquid chromatographic assays for tylosin (tartrate) 830(1999)3

**Two-dimensional gas chromatography**

Prediction of comprehensive two-dimensional gas chromatographic separations. A theoretical and practical exercise 822(1998)233

**Two-film theory**

Overall mass-transfer coefficients in non-linear chromatography 827(1998)235

Column switching in capillary liquid chromatography–tandem mass spectrometry for the quantitation of pg/ml concentrations of the free basic drug tolterodine and its active 5-hydroxymethyl metabolite in microliter volumes of plasma 828(1998)209

**Ultra-high flow-rate liquid chromatography**

Optimisation and routine use of generic ultra-high flow-rate liquid chromatography with mass spectrometric detection for the direct on-line analysis of pharmaceuticals in plasma 828(1998)199

**Ultrasonic solvent extraction**

Ultrasonic solvent extraction of pesticides from soil 823(1998)3

**Ultrasound**

Acoustic effects in chromatography 850(1999)9

**Ultra-thin-layer agarose gel electrophoresis**

Real-time detection of allele-specific polymerase chain reaction products by automated ultra-thin-layer agarose gel electrophoresis 828(1998)481

Ultra-thin-layer agarose gel electrophoresis. I. Effect of the gel concentration and temperature on the separation of DNA fragments 830(1999)465

**Unichiral**

On the meaning and use of *homochiral* 829(1998)417

**Uremic retention solutes**

Study by means of high-performance liquid chromatography of solutes that decrease theophylline/protein binding in the serum of uremic patients 847(1999)141

**UV filters**

Identification of UV filters in sunscreen products by high-performance liquid chromatography–diode-array detection 828(1998)311

**U****Ultrafiltration**

Ultrafiltration–capillary zone electrophoresis for the determination of humic acid fractions 807(1998)275

General approach for the development of high-performance liquid chromatography methods for biosurfactant analysis and purification 825(1998)149

**V****Vaccines**

Determination of the molecular size distribution of *Haemophilus influenzae* type b–tetanus toxoid conjugate vaccines by size-exclusion chromatography 847(1999)209

**Validation**

Kinetic properties of DNA migration under clamped homogeneous electric field conditions. DNA size, migration velocities and reorientation time determined in a single clamped homogeneous electric field run 806(1998)123

Development and validation of amoxicillin determination by micellar electrokinetic capillary chromatography 812(1998)227

Separation of ibuprofen, codeine phosphate, their degradation products and impurities by capillary electrophoresis. II. Validation 826(1998)95

Column liquid chromatography determination of vitamins A and E in powdered milk and local flour: a validation procedure 826(1998)183

Validated high-performance liquid chromatographic methods for quantitation of a novel nonsteroidal antiestrogen 828(1998)247

Validation of a shielded-hydrophobic-phase high-performance liquid chromatography method for the determination of residual methotrexate in recombinant protein biopharmaceuticals 828(1998)303

Micellar electrokinetic capillary chromatography method for direct determination of glucuronides of entacapone and its (Z)-isomer in human urine 836(1999)173

Analysis of urinary drugs of abuse by a multianalyte capillary electrophoretic immunoassay 838(1999)197

Determination of system suitability limits with a robustness test 845(1999)145

High-performance thin-layer chromatography for the determination of ranitidine hydrochloride and famotidine in pharmaceuticals 846(1999)193

Comparison of analytical methods for investigating the photostability of isoxicam 846(1999)207

Determination of bentazon residues in water by high-performance liquid chromatography. Validation of the method 846(1999)369

Detection of the chemical warfare agents bis-(2-chloroethyl)ethylamine (HN-1) and tris-(2-chloroethyl)amine (HN-3) in air 849(1999)529

**Vaporiser interface**

Analysis of pesticides in red wines by on-line coupled reversed-phase liquid chromatography–gas chromatography with vaporiser/precolumn solvent split/gas discharge interface 813(1998)113

**Varnishes**

Analysis of fresh triterpenoid resins and aged triterpenoid varnishes by high-performance liquid chromatography–atmospheric pressure chemical ionisation (tandem) mass spectrometry 809(1998)21

**Vegetable oils**

see also Oils

Gas chromatographic characterization of soapstocks from vegetable oil refining 816(1998)185

Microwave induced rapid transmethylation of fatty acids for analysis of food oil 818(1998)133

New method of stationary phase preparation for silver ion column chromatography: Application to the isolation of steroidal hydrocarbons in vegetable oils 823(1998)291

Effort to improve the quantitative determination of oxidation and hydrolysis compound classes in edible vegetable oils 844(1999)77

Determination of fatty acids in vegetable oil by reversed-phase liquid chromatography with fluorescence detection 849(1999)357

**Vegetables**

Validation of an immunoassay method for the determination of traces of carbaryl in vegetable and fruit extracts by liquid chromatography with photodiode array and mass spectrometric detection 823(1998)109

Anti-nutritional constituents of six underutilized legumes grown in Nigeria 823(1998)307

Analysis of carbendazim, benomyl, thiophanate methyl and 2,4-dichlorophenoxyacetic acid in fruits and vegetables after supercritical fluid extraction 825(1998)45

Levels of metamidophos in air and vegetables after greenhouse applications by gas chromatography 829(1998)251

Determination of carbaryl, carbofuran and methiocarb in cucumbers and strawberries by monoclonal enzyme immunoassays and high-performance liquid chromatography with fluorescence detection. An analytical comparison 833(1999)3

Determination of abamectin residues in fruits and vegetables by high-performance liquid chromatography 833(1999)13

Selective clean-up applicable to aqueous acetone extracts for the determination of carbendazim and thiabendazole in fruits and vegetables by high-performance liquid chromatography with UV detection 833(1999)61

Capillary electrophoresis of inorganic anions 834(1999)133

Semiautomatic method for the screening and determination of 23 organochlorine pesticides in horticultural samples by gas chromatography with electron-capture detection 849(1999)235

#### ***Verbascum thapsus***

Hybrid affinity chromatography of  $\alpha$ -galactosidase from *Verbascum thapsus* L. 808(1998)133

#### **Vinegars**

Ion-exclusion chromatographic determination of organic acids in vinegars 822(1998)45

Erratum to "Ion-exclusion chromatographic determination of organic acids in vinegars". [J. Chromatogr. A 822 (1998) 45–51] 831(1999)331

#### **Virus-like particles**

Reversed-phase high-performance liquid chromatography of virus-like particles 816(1998)21

#### **Viscometry**

Evaluation of size-exclusion chromatography and viscometry for the determination of molecular masses of oxidised cellulose 805(1998)93

#### **Viscosity**

Peak distortion in reversed-phase liquid chromatography as a consequence of viscosity differences between sample solvent and mobile phase 805(1998)55

#### **Viscous fingering**

Visualization of viscous fingering in chromatographic columns 822(1998)173

#### **Viscous heat dissipation**

Influence of viscous heat dissipation on efficiency in high-speed high-performance liquid chromatography 845(1999)155

#### **Visualization of solute migration**

Visualization of solute migration in liquid chromatography columns 826(1998)1

#### ***Vitis vinifera***

Study of volatiles in grapes by dynamic headspace analysis. Application to the differentiation of some *Vitis vinifera* varieties 847(1999)155

#### **Volatile organic compounds**

Analysis of volatile organic compounds in human urine by headspace gas chromatography–mass spectrometry with a multipurpose sampler 847(1999)117

## W

#### **Wall adsorption**

Binding of proline- and hydroxyproline-containing peptides and proteins to the capillary wall 838(1999)167

#### **Wall friction**

Evidence of a wall friction effect in the consolidation of beds of packing materials in chromatographic columns 835(1999)41

#### **Warfare agents**

Determination of organoarsenicals in the environment by solid-phase microextraction–gas chromatography–mass spectrometry 807(1998)253

Analysis of mustard hydrolysis products by packed capillary liquid chromatography–electrospray mass spectrometry 808(1998)177

Characterization of equimolar VX–water reaction product by gas chromatography–mass spectrometry 809(1998)131

Detection of alkyl methylphosphonic acids in complex matrices by gas chromatography–tandem mass spectrometry 809(1998)141

Chromatography and mass spectrometry of chemical warfare agents, toxins and related compounds: state of the art and future prospects 814(1998)1

Effect of cation-exchange pretreatment of aqueous soil extracts on the gas chromatographic–mass spectrometric determination of nerve agent hydrolysis products after *tert*-butyldimethylsilylation 824(1998)211

Identification of phosphonic acids by capillary electrophoresis–ionspray mass spectrometry 825(1998)71

In-situ derivatisation of degradation products of chemical warfare agents in water by solid-phase microextraction and gas chromatographic–mass spectrometric analysis 832(1999)173

On-line solid-phase extraction liquid chromatography–continuous flow frit fast atom bombardment mass spectrometric and tandem mass spectrometric determination of hydrolysis products of nerve agents alkyl methylphosphonic acids by *p*-bromophenacyl derivatization 833(1999)169

Analysis of *O*-ethyl *S*-[2-(diisopropylamino)ethyl] methylphosphonothiolate (VX) and its degradation products by packed capillary liquid chromatography–electrospray mass spectrometry 837(1999)93

- Packed capillary liquid chromatography–electrospray mass spectrometry analysis of organophosphorus chemical warfare agents 840(1999)289
- Determination of the sulfur mustard hydrolysis product thiodiglycol by microcolumn liquid chromatography coupled on-line with sulfur flame photometric detection using large-volume injections and peak compression 849(1999)433
- Detection of the chemical warfare agents bis-(2-chloroethyl)ethylamine (HN-1) and tris-(2-chloroethyl)amine (HN-3) in air 849(1999)529
- Water analysis**
- Determination of bromide ions in seawater by capillary zone electrophoresis using diluted artificial seawater as the buffer solution 802(1998)211
- Parallel factor analysis of partially resolved chromatographic data. Determination of polycyclic aromatic hydrocarbons in water samples 802(1998)263
- Determination of phenylurea herbicides in water samples using on-line sorptive preconcentration and high-performance liquid chromatography with UV or electrospray mass spectrometric detection 802(1998)285
- New chemically modified polymeric resin for solid-phase extraction of pesticides and phenolic compounds from water 803(1998)147
- Determination of chlorobenzenes in water by solid-phase extraction and gas chromatography–mass spectrometry 803(1998)219
- Separation and visible detection of alkaline earth metals on a polymeric reversed-phase column with a mobile phase containing a selective colour-forming chelating ligand 804(1998)95
- Analysis of oxyhalides in water by ion chromatography–ionspray mass spectrometry 804(1998)105
- Determination of iodide in ground water and soil by ion chromatography 804(1998)131
- New, sensitive and selective method for determining sub- $\mu\text{g/l}$  levels of bromate in drinking water 804(1998)137
- Determination of sulfur anions at the ppb level by ion chromatography utilizing their catalytic effects on the postcolumn reaction of iodine with azide 804(1998)143
- Ion-exchange chromatography of mono- and divalent cations in natural waters on a weak-acid anion-exclusion column 804(1998)179
- Determination of alkali and alkaline earth metals in oilfield waters by ion chromatography 804(1998)217
- Electrochemical detection of sulphonated azo dyes and their metal complexes in ion interaction chromatography 804(1998)241
- Improved application of ion chromatographic determination of carboxylic acids in ozonated drinking water 804(1998)265
- Determination by ion chromatography of selected organic and inorganic acids in rainwater at Maracaibo, Venezuela 804(1998)289
- Analysis of water from the Space Shuttle and Mir Space Station by ion chromatography and capillary electrophoresis 804(1998)295
- Identification of pesticides by liquid chromatography–particle beam mass spectrometry using electron ionization and chemical ionization 805(1998)127
- Capillary electrophoresis in the analysis of humic substances. Facts and artifacts 807(1998)101
- Trace chromatographic analysis of dimethyl sulfoxide and related methylated sulfur compounds in natural waters (Review) 807(1998)151
- On-line preconcentration and determination of chromium(VI) in waters by high-performance liquid chromatography using pre-column complexation with 1,5-diphenylcarbazide 808(1998)193
- Capillary zone electrophoresis with indirect UV detection of haloacetic acids in water 808(1998)229
- Solid-phase microextraction for quantitative analysis of organophosphorus pesticides in environmental water samples 808(1998)257
- Determination of carbonyl compounds in water by derivatization–solid-phase microextraction and gas chromatographic analysis 809(1998)75
- Application of pentafluorophenyldimethylsilyl derivatization for gas chromatography–electron-capture detection of supercritically extracted sterols 809(1998)109
- Determination of very volatile organic compounds in environmental water by injection of a large amount of headspace gas into a gas chromatograph 810(1998)141
- Gas chromatographic determination of aromatic amines in water samples after solid-phase extraction and derivatization with iodine. I. Derivatization 810(1998)161
- Gas chromatographic determination of aromatic amines in water samples after solid-phase extraction and derivatization with iodine. II. Enrichment 810(1998)173
- Use of a presolvent to include volatile organic analytes in the application range of on-line solid-phase extraction–gas

- chromatography–mass spectrometry 811(1998)117
- Application of an on-line liquid chromatographic system for the determination of polar herbicides in drinking water within a routine laboratory 813(1998)63
- Determination of antibiotics in different water compartments via liquid chromatography–electrospray tandem mass spectrometry 815(1998)213
- Electrophoretic separation of inorganic anions with an anion complexone-modified capillary column 815(1998)251
- Solid-phase microextraction for determining the binding state of organic pollutants in contaminated water rich in humic organic matter 816(1998)159
- Separation and determination of aromatic acids in natural water with preconcentration by capillary zone electrophoresis 817(1998)145
- Determination of organonitrogen pesticides in large volumes of surface water by liquid–liquid and solid-phase extraction using gas chromatography with nitrogen–phosphorus detection and liquid chromatography with atmospheric pressure chemical ionization mass spectrometry 818(1998)197
- On-line coupling of solid-phase extraction to gas chromatography with mass spectrometric detection to determine pesticides in water 818(1998)85
- Matrix effects and selectivity of the detector in the determination of butyl- and phenyltins by gas chromatography–flame photometric detection 819(1998)221
- Automated solid-phase extraction on-line coupled to gas chromatography 822(1998)75
- Deuterated internal standards for gas chromatographic–mass spectrometric analysis of polar organophosphorus pesticides in water samples 822(1998)91
- Use of column-switching ion chromatography for the simultaneous determination of total nitrogen and phosphorus after microwave assisted persulphate digestion 822(1998)162
- Analysis of aromatic sulfonates in water by solid-phase extraction and capillary electrophoresis 822(1998)291
- Comparison of simplified methods for pesticide residue analysis. Use of large-volume injection in capillary gas chromatography 823(1998)25
- Comparison of various sample handling and analytical procedures for the monitoring of pesticides and metabolites in ground waters 823(1998)35
- Determination of a variety of chemical classes of pesticides in surface and ground waters by off-line solid-phase extraction, gas chromatography with electron-capture and nitrogen–phosphorus detection, and high-performance liquid chromatography with post-column derivatization and fluorescence detection 823(1998)49
- Monitoring of pesticide residues and their metabolites in surface and underground waters of Imathia (N. Greece) by means of solid-phase extraction disks and gas chromatography 823(1998)59
- Application of gas and liquid chromatography–mass spectrometry to the evaluation of pirimiphos methyl degradation products in industrial water under ozone treatment 823(1998)97
- Automated determination of phenylcarbamate herbicides in environmental waters by on-line trace enrichment and reversed-phase liquid chromatography–diode array detection 823(1998)121
- Analysis and degradation study of glyphosate and of aminomethylphosphonic acid in natural waters by means of polymeric and ion-exchange solid-phase extraction columns followed by ion chromatography–post-column derivatization with fluorescence detection 823(1998)129
- Improving the solid-phase extraction of “quat” pesticides from water samples. Removal of interferences 823(1998)137
- Trace analysis of polar organic pollutants in aqueous samples. Tools for the rapid prediction and optimisation of the solid-phase extraction parameters 823(1998)147
- Packed-column supercritical fluid chromatography coupled with solid-phase extraction for the determination of organic microcontaminants in water 823(1998)163
- On-line coupling of immunosorbent and liquid chromatographic analysis for the selective extraction and determination of polycyclic aromatic hydrocarbons in water samples at the  $\text{ng l}^{-1}$  level 823(1998)197
- Solvent-free method for the determination of polynuclear aromatic hydrocarbons in waste water by solid-phase microextraction–high-performance liquid chromatography with photodiode-array detection 823(1998)211
- Analysis of cations in drainage water and soil solution by single-column ion chromatography 823(1998)279
- Analysis of inorganic anions in drainage water and soil solution by single-column ion chromatography 823(1998)285
- Analysis of nonylphenol polyethoxylates and their degradation products in river water and sewage effluent by gas chromatography–ion trap (tandem) mass spectrometry with electron impact and chemical ionization 824(1998)79
- Determination of selected antifouling booster biocides by high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 825(1998)29

- Identification of phosphonic acids by capillary electrophoresis–ionspray mass spectrometry 825(1998)71
- Pyrolysis–gas chromatography of chloroorganic compounds in precipitation 826(1998)201
- Analysis of trace atrazine and simazine in environmental samples by liquid chromatography–fluorescence detection with pre-column derivatization reaction 827(1998)57
- Comparative study of a solid-phase extraction system coupled to capillary electrophoresis in the determination of haloacetic compounds in tap water 827(1998)105
- Solid-phase microextraction with pH adjustment for the determination of aromatic acids and bases in water 829(1998)223
- Determination of chlorinated acid herbicides and related compounds in water by capillary electrophoresis–electrospray negative ion mass spectrometry 829(1998)327
- Simultaneous determination of inorganic anions and cations in waters by capillary electrophoresis 829(1998)359
- Ion-pair liquid chromatography–atmospheric pressure ionization mass spectrometry for the determination of quaternary ammonium herbicides 830(1999)145
- Discrimination of structural isomers of chlorinated phenols in waters using gas chromatography–mass spectrometry in the negative chemical ionization mode 830(1999)165
- Semi-micro ion chromatography of iodide in seawater 830(1999)211
- On-line coupling of immunoaffinity-based solid-phase extraction and gas chromatography for the determination of *s*-triazines in aqueous samples 830(1999)377
- Measurement of reduced sulphur compounds contained in aqueous matrices by direct injection into a gas chromatograph with a flame photometric detector 830(1999)485
- Determination of enantiomeric amino acids with high-performance liquid chromatography and pre-column derivatisation with *o*-phthaldialdehyde and *N*-isobutyrylcysteine in seawater and fossil samples (mollusks) 832(1999)123
- In-situ derivatisation of degradation products of chemical warfare agents in water by solid-phase microextraction and gas chromatographic–mass spectrometric analysis 832(1999)173
- Electrochemical detection in the capillary electrophoresis analysis of inorganic compounds 834(1999)103
- Capillary electrophoresis of inorganic anions 834(1999)133
- Application of capillary electrophoresis to the analysis of inorganic ions in environmental samples 834(1999)349
- Analysis of inorganic species in environmental samples by capillary electrophoresis 834(1999)363
- Improved selectivity of anions with methanol as additive. Determination of  $\text{Cl}^-$ ,  $\text{NO}_3^-$  and  $\text{SO}_4^{2-}$  in river water by capillary electrophoresis 834(1999)393
- Determination of hydroxyaromatic compounds in water by solid-phase microextraction coupled to high-performance liquid chromatography 835(1999)127
- Evaluation of different electrolyte systems and on-line preconcentrations for the analysis of haloacetic acids by capillary zone electrophoresis 835(1999)187
- Simultaneous capillary electrophoretic separation of small anions and cations after complexation with ethylenediaminetetraacetic acid 836(1999)75
- Analysis of polar organic micropollutants in water with ion chromatography–electrospray mass spectrometry 837(1999)117
- Sample concentration by sample stacking and sweeping using a microemulsion and a single-isomer sulfated  $\beta$ -cyclodextrin as pseudostationary phases in electrokinetic chromatography 838(1999)3
- New leading electrolyte for the direct determination of chloride and other anions in analytical isotachopheresis 838(1999)81
- Simultaneous determination of nitrate and nitrite ions in seawater by capillary zone electrophoresis using artificial seawater as the carrier solution 838(1999)303
- Determination of bromide ion in raw and drinking waters by capillary zone electrophoresis 839(1999)217
- On-line solid-phase extraction–short-column liquid chromatography combined with various tandem mass spectrometric scanning strategies for the rapid study of transformation of pesticides in surface water 841(1999)33
- Solid-phase microextraction for the determination of iodinated trihalomethanes in drinking water 841(1999)197
- On-line combination of aqueous-sample preparation and capillary gas chromatography 842(1999)391
- Anthropogenic volatile organic compounds in ambient air and natural waters: a review on recent developments of analytical methodology, performance and interpretation of field measurements 843(1999)163
- Trace analysis of pesticides by gas chromatography 843(1999)301
- Determination of explosives in soil and ground water by liquid chromatography–amperometric detection 844(1999)97

- Optimization of solid-phase microextraction conditions using a response surface methodology to determine organochlorine pesticides in water by gas chromatography and electron-capture detection 844(1999)425
- Comparison of XAD resins for the isolation of humic substances from seawater 845(1999)329
- Selective on-line immunoextraction coupled to liquid chromatography for the trace determination of benzidine, congeners and related azo dyes in surface water and industrial effluents 846(1999)317
- Quantitation of chlorophenoxy acid herbicides by high-performance liquid chromatography with coulometric detection 846(1999)349
- Determination of bentazon residues in water by high-performance liquid chromatography. Validation of the method 846(1999)369
- Analysis of priority pollutants in environmental samples by on-line supercritical fluid chromatography cleanup–cryo-trap–gas chromatography–mass spectrometry 846(1999)387
- Sulphonated azoligand for metal ion determination in ion interaction chromatography 847(1999)233
- Ion chromatographic determination of bromate in drinking water by post-column reaction with fuchsin 847(1999)271
- Matrix effects in the determination of bromate in drinking water by ion chromatography 847(1999)279
- Continuous solid-phase extraction and dansylation of low-molecular-mass amines coupled on-line with liquid chromatography and peroxyoxalate chemiluminescence-based detection 848(1999)105
- On-line trace enrichment for the simultaneous determination of microcystins in aqueous samples using high-performance liquid chromatography with diode-array detection 848(1999)179
- Evaluation of dynamic headspace and purge-and-trap techniques for the high-resolution gas chromatography analysis of nitrous oxide in seawater 848(1999)327
- Determination of iron(II) in natural waters by capillary zone electrophoresis using on-capillary complexation with 2,4,6-tri(2'-pyridyl)-1,3,5-triazine 848(1999)491
- Quantitative determination of sulfur-containing anions in complex matrices with capillary electrophoresis and conductivity detection 848(1999)503
- Capillary electrophoretic determination of inorganic anions in the drainage and surface water samples 848(1999)545
- Determination of chlorate at low  $\mu\text{g}/\text{l}$  levels by ion-chromatography with postcolumn reaction 849(1999)209
- Analysis of odorous compounds in water by isolation by closed-loop stripping with a multichannel silicone rubber trap followed by gas chromatography–mass spectrometry 849(1999)521
- Lack-of-fit testing of ion chromatographic calibration curves with inexact replicates 850(1999)43
- Simultaneous determination of anions and cations by ion-exclusion chromatography–cation-exchange chromatography with tartaric acid/18-crown-6 as eluent 850(1999)79
- Combination of suppressed and non-suppressed ion chromatography with atmospheric pressure ionization mass spectrometry for the determination of anions 850(1999)99
- Low-level calibration study for a new ion chromatographic column to determine borate in deionized water 850(1999)107
- Analysis of 500-ng/l levels of bromate in drinking water by direct-injection suppressed ion chromatography coupled with a single, pneumatically delivered post-column reagent 850(1999)119
- Determination of trace level perchlorate in drinking water and ground water by ion chromatography 850(1999)131
- Ion chromatography of nitrite at the ppb level with photometric measurement of iodine formed by post-column reaction of nitrite with iodide 850(1999)153
- Electrostatic ion chromatography of polarizable anions in saline waters with *N*-{2-[acetyl(3-sulfoxypropyl)amino]ethyl}-*N,N*-dimethyldodecanaminium hydroxide (ammonium sulfobetaine-1) as the stationary phase and a dilute electrolytic solution as the mobile phase 850(1999)161
- Preconcentration and separation of haloacetic acids by ion chromatography 850(1999)197
- Simultaneous separation of common mono- and divalent cations on silica gel modified with aluminium by non-suppressed ion chromatography with conductimetric detection and nitric acid–15-crown-5 as eluent 850(1999)229
- Determination of glyphosate by ion chromatography 850(1999)297
- Analysis of wastewater for anionic and cationic nutrients by ion chromatography in a single run with sequential flow injection analysis 850(1999)303
- Acid-rain monitoring in East Asia with a portable-type ion-exclusion–cation-exchange chromatographic analyzer 850(1999)311

#### **Water leachates**

Comparative studies of the leachate of an industrial landfill by gas chromatography–mass spectrometry, liquid chromatography–nuclear magnetic resonance and liquid chromatography–mass spectrometry 831(1999)243

**Weak acids**

Enhancement of conductometric detection of weak acids in ion chromatography 850(1999)85

**Wetting transition model**

Wetting transition in alkane liquids on silanised diatomaceous gas chromatographic supports 829(1998)201

**Wheat flour**

Analysis of wheat flour proteins related to grain hardness using capillary electrophoresis 836(1999)147

**Whey**

Preparative ion-exchange chromatography of proteins from dairy whey 808(1998)141

Determination of the minor whey protein bovine lactoferrin in cheese whey concentrates with capillary electrophoresis 817(1998)187

Two ion-exchange chromatographic methods for the isolation of antibacterial peptides from lactoferrin. In situ enzymatic hydrolysis on an ion-exchange membrane 831(1999)191

Determination of cows' milk in goats' milk and cheese by capillary electrophoresis of the whey protein fractions 846(1999)135

**Whole-column imaging detection**

Optimizing separation conditions for proteins and peptides using imaged capillary isoelectric focusing 817(1998)163

**Wide-bore capillaries**

Capillary electrophoresis with wide-bore capillaries and non-aqueous media 813(1998)179

**Windowed mass selection method**

Windowed mass selection method: a new data processing algorithm for liquid chromatography–mass spectrometry data 849(1999)71

**Wine**

Direct determination of biogenic amines in wine by integrating continuous flow clean-up and capillary electrophoresis with indirect UV detection 803(1998)249

Quantitative determination of trace and ultratrace flavour active compounds in red wines through gas chromatographic–ion trap mass spectrometric analysis of microextracts 806(1998)349

Headspace solid-phase microextraction analysis of volatile sulphides and disulphides in wine aroma 808(1998)211

Analysis of pesticides in red wines by on-line coupled reversed-phase liquid chromatography–gas chromatography with vaporiser/precursor solvent split/gas discharge interface 813(1998)113

Improved size-exclusion high-performance liquid chromatographic method for the simple analysis of grape juice and wine polysaccharides 823(1998)339

Determination of acids and volatile compounds in red Txakoli wine by high-performance liquid chromatography and gas chromatography 823(1998)349

Determination of riboflavin, flavin mononucleotide and flavin–adenine dinucleotide in wine and other beverages by high-performance liquid chromatography with fluorescence detection 823(1998)355

Synthesis of labelled [ $^2\text{H}_4$ ] $\beta$ -damascenone, [ $^2\text{H}_4$ ]2-methoxy-3-isobutylpyrazine, [ $^2\text{H}_3$ ] $\alpha$ -ionone, and [ $^2\text{H}_3$ ] $\beta$ -ionone, for quantification in grapes, juices and wines 824(1998)71

High-performance liquid chromatography with real-time Fourier-transform infrared detection for the determination of carbohydrates, alcohols and organic acids in wines 824(1998)159

Determination of chlorpyrifos, penconazole, fenarimol, vinclozolin and metalaxyl in grapes, must and wine by on-line microextraction and gas chromatography 833(1999)43

High-performance liquid chromatographic determination of benzoylurea insecticides residues in grapes and wine using liquid and solid-phase extraction 835(1999)113

Headspace solid-phase microextraction of sulphides and disulphides using Carboxen–polydimethylsiloxane fibers in the analysis of wine aroma 835(1999)137

Determination of biogenic amines by capillary electrophoresis 836(1999)305

Quantitative determination of 2-methoxy-3-isobutylpyrazine in red wines and grapes of Bordeaux using a stable isotope dilution assay 841(1999)229

Various applications of liquid chromatography–mass spectrometry to the analysis of phenolic compounds 847(1999)75

Identification of anthocyanin derivatives in grape skin extracts and red wines by liquid chromatography with diode array and mass spectrometric detection 847(1999)83

Quantitative determination of  $\beta$ -ionone in red wines and grapes of Bordeaux using a stable isotope dilution assay 848(1999)317

Quantitative determination of free and hydrolytically liberated  $\beta$ -damascenone in red grapes and wines using a stable isotope dilution assay 849(1999)245

Simultaneous analysis of thiols, sulphides and disulphides in wine aroma by headspace solid-phase microextraction–gas chromatography 849(1999)293

High-performance liquid chromatography coupled with fluorescence detection for the determination of *trans*-astringin in wine 849(1999)617

**Wood**

Analysis of lipophilic extractives from wood and pitch deposits by solid-phase extraction and gas chromatography 823(1998)449

Characterization of organic deposits produced in the kraft pulping of *Eucalyptus globulus* wood 823(1998)457

Gas chromatographic and mass spectrometric analysis of 36 lignin-related methoxyphenols from uncontrolled combustion of wood 824(1998)205

Analysis of impurities occurring in a totally chlorine free-bleached Kraft pulp 830(1999)227

**X****XAD resins**

Comparison of XAD resins for the isolation of humic substances from seawater 845(1999)329

**Xylene stationary phases**

Molecular recognition towards coplanar polychlorinated biphenyls based on the porogen imprinting effects of xylenes 828(1998)91

**Y****Yeast**

Chromatographic determination of flavin derivatives in baker's yeast 822(1998)59

Immobilised metal ion affinity chromatography purification of alcohol dehydrogenase from baker's yeast using an expanded bed adsorption system 840(1999)195

**Z*****Zea mays***

Comparison of oriented and random antibody immobilization in immunoaffinity chromatography of cytokinins 811(1998)77

Analysis of polysaccharides and monosaccharides in the root mucilage of maize (*Zea mays* L.) by gas chromatography 831(1999)267

**Zirconia**

Purification of monoclonal antibodies from cell culture supernatants using a modified zirconia based cation-exchange support 831(1999)63
