On p. 62 in Eq. (5), the first t_D should read t_0; the correct equation is:

$$t_g i = 1/bi\{[bi \cdot (S+1) \cdot (t_0 \cdot k'(0) - t_D) + a^{S+1}]^{1/(S+1)} - a\} + t_0 + t_D \tag{5}$$

On p. 62 in Eq. (8), the plus sign before ''$(S$'' should be a multiplication sign; the correct equation is:

$$k'(0) = \{[a + b1(t_g 1 - t_0 - t_D)]^{1(S+1)}/[b1 \cdot (S+1)] + t_D\}/t_0 \tag{8}$$
