

ELSEVIER

Journal of Chromatography A, 852 (1999) 613–622

JOURNAL OF
CHROMATOGRAPHY A

Subject Index Vol. 852

Adsorbents

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Adsorbers

Large-scale membrane adsorbers 852(1999)73

Adsorption isotherms

Characterisation by immobilised metal ion affinity chromatographic procedures of the binding behaviour of several synthetic peptides designed to have high affinity for Cu(II) ions 852(1999)261

Affinity chromatography

Affinity purification of *Schistosoma japonicum* glutathione-S-transferase and its site-directed mutants with glutathione affinity chromatography and immobilized metal affinity chromatography 852(1999)151

Affinity chromatography of human estrogen receptor- α expressed in *Saccharomyces cerevisiae*. Combination of heparin- and 17 β -estradiol-affinity chromatography 852(1999)161

Purification and partial characterization of the pancreatic proteolytic enzymes trypsin, chymotrypsin and elastase from the chicken 852(1999)217

Experimental studies on affinity chromatography in an electric field 852(1999)319

Affinity sorbents

New ligand, *N*-(2-pyridylmethyl)aminoacetate, for use in the immobilised metal ion affinity chromatographic separation of proteins 852(1999)105

Air analysis

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Albumin

Experimental studies on affinity chromatography in an electric field 852(1999)319

Alkaloids

Optimization study for the reversed-phase ion-pair liquid chromatographic determination of nicotine in commercial tobacco products 852(1999)451

Alkanes

Revision of a theoretical expression for gas-liquid chromatographic retention 852(1999)583

Alkyl nitrates

Alkyl nitrates as achiral and chiral solute probes in gas chromatography. Novel properties of a β -cyclodextrin derivative and characterization of its enantioselective forces 852(1999)525

Amberlite XAD-7 resin

Removal of detergent and solvent from solvent-detergent-treated immunoglobulins 852(1999)87

Amino acids

pH effects on micelle-water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Amphetamines

Generalised *H*-point standard addition method for the isolation of the analyte signal from the sample signal when coelution of unknown compounds occurs in liquid chromatography 852(1999)361

Angiotensin

New polymer-based prepacked column for the reversed-phase liquid chromatographic separation of peptides over the pH range 2–12 852(1999)255

Anilines

pH effects on micelle-water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Antibodies

Sandwich-type immunoassay with an affinity column coupled to anti-peptide antibodies 852(1999)97

Quantitative fast fractionation of a pool of polyclonal antibodies by immunoaffinity membrane chromatography 852(1999)129

Oriented immobilization of chymotrypsin by use of suitable antibodies coupled to a nonporous solid support 852(1999)141

Antigens

Retention behavior of very large biomolecules in ion-exchange chromatography 852(1999)25

Argininealkyamides

Qualitative and quantitative analysis of new alkyl amide arginine surfactants by high-performance liquid chromatography and capillary electrophoresis 852(1999)499

Bacillus spp

Isolation and characterization of cyclic α -(1 \rightarrow 4)-glucans having degrees of polymerization 9–31 and their quantitative analysis by high-performance anion-exchange chromatography with pulsed amperometric detection 852(1999)407

Benzoic acids

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Binding studies

Retention behavior of very large biomolecules in ion-exchange chromatography 852(1999)25

β -Blockers

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Buffer composition

Separation of proteins and peptides by capillary electrophoresis in acid buffers containing high concentrations of surfactants 852(1999)325

Carbohydrates

Isolation and characterization of cyclic α -(1 \rightarrow 4)-glucans having degrees of polymerization 9–31 and their quantitative analysis by high-performance anion-exchange chromatography with pulsed amperometric detection 852(1999)407

Carbon dioxide

Empirical relationship between chiral selectivity and mobile phase modifier properties 852(1999)383

Carbon monoxide

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

Catalysts

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

Centrifugation

Biomembrane-affinity centrifugal analyses of solute interactions with membrane proteins 852(1999)93

Chemiluminescence detection

Chemiluminescence detection of heme proteins separated by capillary isoelectric focusing 852(1999)597

Chiral recognition

Alkyl nitrates as achiral and chiral solute probes in gas chromatography. Novel properties of a β -cyclodextrin derivative and characterization of its enantioselective forces 852(1999)525

Chiral selectivity

Empirical relationship between chiral selectivity and mobile phase modifier properties 852(1999)383

Chiral stationary phases, LC

Empirical relationship between chiral selectivity and mobile phase modifier properties 852(1999)383

Chymotrypsin

Purification and partial characterization of the pancreatic proteolytic enzymes trypsin, chymotrypsin and elastase from the chicken 852(1999)217

Cisplatin

Capillary electrophoretic study of cisplatin interaction with nucleoside monophosphates, di- and trinucleotides 852(1999)337

Collagen

Binding of lead to collagen type I and V and α_2 (I) CNBr (3,5) fragment by a modified Hummel–Dreyer method 852(1999)245

Separation of proteins and peptides by capillary electrophoresis in acid buffers containing high concentrations of surfactants 852(1999)325

Columns

On the need to retain unregulated choice of high-performance liquid chromatography columns 852(1999)603

Crude oils

Automated on-line membrane extraction liquid chromatographic determination of phenols in crude oils, gasolines and diesel fuels 852(1999)395

Cyclodextrin

Alkyl nitrates as achiral and chiral solute probes in gas chromatography. Novel properties of a β -cyclodextrin derivative and characterization of its enantioselective forces 852(1999)525

Decanophenone

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)599

Detection, electrophoresis

Chemiluminescence detection of heme proteins separated by capillary isoelectric focusing 852(1999)597

Detection, GC

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Detection, LC

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Generalised *H*-point standard addition method for the isolation of the analyte signal from the sample signal when coelution of unknown compounds occurs in liquid chromatography 852(1999)361

Diffusion

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Diuretics

Generalised *H*-point standard addition method for the isolation of the analyte signal from the sample signal when coelution of unknown compounds occurs in liquid chromatography 852(1999)361

Elastase

Purification and partial characterization of the pancreatic proteolytic enzymes trypsin, chymotrypsin and elastase from the chicken 852(1999)217

Electron-capture detection

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Enantiomer separation

Alkyl nitrates as achiral and chiral solute probes in gas chromatography. Novel properties of a β -cyclodextrin derivative and characterization of its enantioselective forces 852(1999)525

End-capping

Equation for calculating surface coverage from end-capping of chromatographic bonded phases 852(1999)375

Endorphin

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

Environmental analysis

Quantification of phenylurea herbicides and their free and humic acid-associated metabolites in natural waters 852(1999)465

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Escherichia coli

High-yield purification of biosynthetic human growth hormone secreted in *Escherichia coli* periplasmic space 852(1999)441

Enzyme inhibitors

Purification of two low-molecular-mass serine proteinase inhibitors from chicken liver 852(1999)207

Enzymes

Affinity purification of *Schistosoma japonicum* glutathione-S-transferase and its site-directed mutants with glutathione affinity chromatography and immobilized metal affinity chromatography 852(1999)151

Purification and partial characterization of the pancreatic proteolytic enzymes trypsin, chymotrypsin and elastase from the chicken 852(1999)217

Partial primary structure of a fibrinogenase from the venom of the snake *Lachesis stenophrys* 852(1999)237

Isolation and characterization of cyclic α -(1 \rightarrow 4)-glucans having degrees of polymerization 9–31 and their quantitative analysis by high-performance anion-exchange chromatography with pulsed amperometric detection 852(1999)407

Epoxides

Non-volatile products of triolein produced at frying temperatures characterized using liquid chromatography with online mass spectrometric detection 852(1999)417

Ethoxylates

Separation and characterization of octylphenol ethoxylate surfactants used by reversed-phase high-performance liquid chromatography on branched fluorinated silica gel columns 852(1999)475

Factor VIII

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Use of high-resolution techniques for the characterization of clotting factor VIII 852(1999)175

Fibrinogenases

Partial primary structure of a fibrinogenase from the venom of the snake *Lachesis stenophrys* 852(1999)237

Fluorinated silica gel columns

Separation and characterization of octylphenol ethoxylate surfactants used by reversed-phase high-performance liquid chromatography on branched fluorinated silica gel columns 852(1999)475

Fuels

Automated on-line membrane extraction liquid chromatographic determination of phenols in crude oils, gasolines and diesel fuels 852(1999)395

Generalised *H*-point standard addition method

Generalised *H*-point standard addition method for the isolation of the analyte signal from the sample signal when coelution of unknown compounds occurs in liquid chromatography 852(1999)361

Glutathione-S-transferase

Affinity purification of *Schistosoma japonicum* glutathione-S-transferase and its site-directed mutants with glutathione affinity chromatography and immobilized metal affinity chromatography 852(1999)151

Glucagon

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

Glucagon-like peptide-1

Proteolytic cleavage of glucagon-like peptide-1 by pancreatic β cells and by fetal calf serum analyzed by mass spectrometry 852(1999)285

Glucans

Isolation and characterization of cyclic α -(1 \rightarrow 4)-glucans having degrees of polymerization 9–31 and their quantitative analysis by high-performance anion-exchange chromatography with pulsed amperometric detection 852(1999)407

Glut1

Biomembrane-affinity centrifugal analyses of solute interactions with membrane proteins 852(1999)93

Glycoproteins

Use of high-resolution techniques for the characterization of clotting factor VIII 852(1999)175

Gradient elution

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments* 852(1999)43

Prediction of protein retention at gradient elution conditions in ion-exchange chromatography 852(1999)351

Growth factors

Strategy for identifying circulating fragments of insulin-like growth factor binding proteins in a hemofiltrate peptide bank 852(1999)197

Growth hormones

High-yield purification of biosynthetic human growth hormone secreted in *Escherichia coli* periplasmic space 852(1999)441

Hepatitis B virus

Retention behavior of very large biomolecules in ion-exchange chromatography 852(1999)25

Hepatitis C virus

Introduction of the gene amplification technique to decrease the risk of hepatitis C virus transmission by plasma products 852(1999)305

Histidine

Histidines in affinity tags and surface clusters for immobilized metal-ion affinity chromatography of trimeric tumor necrosis factor α 852(1999)117

Characterisation by immobilised metal ion affinity chromatographic procedures of the binding behaviour of several synthetic peptides designed to have high affinity for Cu(II) ions 852(1999)261

Hummel–Dreyer method

Binding of lead to collagen type I and V and α_2 (I) CNBr (3,5) fragment by a modified Hummel–Dreyer method 852(1999)245

Hyaluronic acid

Molecular weight determination of hyaluronic acid by gel filtration chromatography coupled to matrix-assisted laser desorption ionization mass spectrometry 852(1999)573

Hydroperoxides

Non-volatile products of triolein produced at frying temperatures characterized using liquid chromatography with online mass spectrometric detection 852(1999)417

17-Hydroxy-16-hydroxymethyl-3-methoxyestra-1,3,5(10)-triene

High-performance liquid chromatographic methods for monitoring of isomers of 17-hydroxy-16-hydroxymethyl-3-methoxyestra-1,3,5(10)-triene 852(1999)433

Immobilised metal affinity chromatography

New ligand, *N*-(2-pyridylmethyl)aminoacetate, for use in the immobilised metal ion affinity chromatographic separation of proteins 852(1999)105

Characterisation by immobilised metal ion affinity chromatographic procedures of the binding behaviour of several synthetic peptides designed to have high affinity for Cu(II) ions 852(1999)261

Immobilization

Biomembrane-affinity centrifugal analyses of solute interactions with membrane proteins 852(1999)93

Immobilized biomembranes

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Immobilized chymotrypsin

Oriented immobilization of chymotrypsin by use of suitable antibodies coupled to a nonporous solid support 852(1999)141

High concentrations of sodium chloride facilitate the use of immobilized chymotrypsin for separating virgin forms of specific trypsin inhibitors 852(1999)227

Immobilized metal affinity chromatography

Histidines in affinity tags and surface clusters for immobilized metal-ion affinity chromatography of trimeric tumor necrosis factor α 852(1999)117

Affinity purification of *Schistosoma japonicum* glutathione-S-transferase and its site-directed mutants with glutathione affinity chromatography and immobilized metal affinity chromatography 852(1999)151

Immunoabsorbents

Sandwich-type immunoassay with an affinity column coupled to anti-peptide antibodies 852(1999)97

Immunoaffinity chromatography

Sandwich-type immunoassay with an affinity column coupled to anti-peptide antibodies 852(1999)97
Quantitative fast fractionation of a pool of polyclonal antibodies by immunoaffinity membrane chromatography 852(1999)129

Immunoassays

Strategy for identifying circulating fragments of insulin-like growth factor binding proteins in a hemofiltrate peptide bank 852(1999)197

Immunoglobulins

Ion-exchange chromatography separation of the detergent and the solvent from immunoglobulins after solvent-detergent treatment 852(1999)83

Removal of detergent and solvent from solvent-detergent-treated immunoglobulins 852(1999)87

Immunosorbents

Oriented immobilization of chymotrypsin by use of suitable antibodies coupled to a nonporous solid support 852(1999)141

Inorganic anions

Analysis of anions in aqueous samples by ion chromatography and capillary electrophoresis. A comparative study of peak modeling and validation criteria 852(1999)487

Instrumentation

Large-scale membrane adsorbents 852(1999)73

Insulin

Sandwich-type immunoassay with an affinity column coupled to anti-peptide antibodies 852(1999)97

Proteolytic cleavage of glucagon-like peptide-1 by pancreatic β cells and by fetal calf serum analyzed by mass spectrometry 852(1999)285

Intraparticle convective flow

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Isoelectric focusing

Chemiluminescence detection of heme proteins separated by capillary isoelectric focusing 852(1999)597

Isoelectric points

Ion-exchange chromatography of proteins near the isoelectric points 852(1999)31

Kinetic studies

Capillary electrophoretic study of cisplatin interaction with nucleoside monophosphates, di- and trinucleotides 852(1999)337

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum-rhodium alloy catalysts 852(1999)507

Lachesis stenophrys

Partial primary structure of a fibrinogenase from the venom of the snake *Lachesis stenophrys* 852(1999)237

Lactoglobulins

Ion-exchange chromatography of proteins near the isoelectric points 852(1999)31

Lead

Binding of lead to collagen type I and V and $\alpha_2(I)$ CNBr (3,5) fragment by a modified Hummel-Dreyer method 852(1999)245

Lead-protein interactions

Binding of lead to collagen type I and V and $\alpha_2(I)$ CNBr (3,5) fragment by a modified Hummel-Dreyer method 852(1999)245

Lipophilicity

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Mathematical modeling

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Membrane chromatography

Quantitative fast fractionation of a pool of polyclonal antibodies by immunoaffinity membrane chromatography 852(1999)129

Membrane dryers

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Membrane extraction

Automated on-line membrane extraction liquid chromatographic determination of phenols in crude oils, gasolines and diesel fuels 852(1999)395

Membranes

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Large-scale membrane adsorbents 852(1999)73

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Metalloproteinases

Partial primary structure of a fibrinogenase from the venom of the snake *Lachesis stenophrys* 852(1999)237

Methyl bromide

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Methyl iodide

Enhancement of electron-capture detection of methyl bromide in air by iodination 852(1999)535

Micelles

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Migration inhibitory factors

Solid-phase synthesis, isolation and analysis of a mouse protein, the macrophage migration inhibitory factor 852(1999)189

Mobile phase composition

Characterization of unstable ion-exchange chromatographic separation of proteins 852(1999)37

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

Mobile phase modifier

Empirical relationship between chiral selectivity and mobile phase modifier properties 852(1999)383

Monolith stationary phases

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Monolithic columns

Separation of oligonucleotides on novel monolithic columns with ion-exchange functional surfaces 852(1999)297

Nicotine

Optimization study for the reversed-phase ion-pair liquid chromatographic determination of nicotine in commercial tobacco products 852(1999)451

NoXon-S

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Nucleoside monophosphates

Capillary electrophoretic study of cisplatin interaction with nucleoside monophosphates, di- and trinucleotides 852(1999)337

Nucleotides

Capillary electrophoretic study of cisplatin interaction with nucleoside monophosphates, di- and trinucleotides 852(1999)337

Octylphenol ethoxylates

Separation and characterization of octylphenol ethoxylate surfactants used by reversed-phase high-performance liquid chromatography on branched fluorinated silica gel columns 852(1999)475

Oligonucleotides

Separation of oligonucleotides on novel monolithic columns with ion-exchange functional surfaces 852(1999)297

Organochlorine compounds

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Oxidation

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

Ozone scrubbing material

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Partitioning

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Peak shape

Analysis of anions in aqueous samples by ion chromatography and capillary electrophoresis. A comparative study of peak modeling and validation criteria 852(1999)487

Peptides

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

New polymer-based prepacked column for the reversed-phase liquid chromatographic separation of peptides over the pH range 2–12 852(1999)255

Characterisation by immobilised metal ion affinity chromatographic procedures of the binding behaviour of several synthetic peptides designed to have high affinity for Cu(II) ions 852(1999)261

Application of a peptide bank from porcine brain in isolation of regulatory peptides 852(1999)273

Proteolytic cleavage of glucagon-like peptide-1 by pancreatic β cells and by fetal calf serum analyzed by mass spectrometry 852(1999)285

Separation of proteins and peptides by capillary electrophoresis in acid buffers containing high concentrations of surfactants 852(1999)325

Pesticides

Quantification of phenylurea herbicides and their free and humic acid-associated metabolites in natural waters 852(1999)465

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

pH effects

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Pharmaceutical analysis

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Capillary electrophoretic study of cisplatin interaction with nucleoside monophosphates, di- and trinucleotides 852(1999)337

Phenols

Generalised *H*-point standard addition method for the isolation of the analyte signal from the sample signal when coelution of unknown compounds occurs in liquid chromatography 852(1999)361

Automated on-line membrane extraction liquid chromatographic determination of phenols in crude oils, gasolines and diesel fuels 852(1999)395

pH effects on micelle–water partitioning determined by micellar electrokinetic chromatography 852(1999)559

Phenothiazines

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Phenylureas

Quantification of phenylurea herbicides and their free and humic acid-associated metabolites in natural waters 852(1999)465

Phospholipids

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Immobilized biomembrane chromatography of highly lipophilic drugs 852(1999)313

Platinum–rhodium catalysts

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

Polychlorinated biphenyls

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Polynuclear aromatic hydrocarbons

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Polyphenylene sulfide

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Polysaccharides

Molecular weight determination of hyaluronic acid by gel filtration chromatography coupled to matrix-assisted laser desorption ionization mass spectrometry 852(1999)573

Pore connectivity

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Pore network model

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Pore size distribution

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Porous particles

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Protein synthesis

Solid-phase synthesis, isolation and analysis of a mouse protein, the macrophage migration inhibitory factor 852(1999)189

Protein–lead interactions

Binding of lead to collagen type I and V and $\alpha_2(I)$ CNBr (3,5) fragment by a modified Hummel–Dreyer method 852(1999)245

Proteins

Retention behavior of very large biomolecules in ion-exchange chromatography 852(1999)25

Ion-exchange chromatography of proteins near the isoelectric points 852(1999)31

Characterization of unstable ion-exchange chromatographic separation of proteins 852(1999)37

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Large-scale membrane adsorbers 852(1999)73

Biomembrane-affinity centrifugal analyses of solute interactions with membrane proteins 852(1999)93

Sandwich-type immunoassay with an affinity column coupled to anti-peptide antibodies 852(1999)97

New ligand, *N*-(2-pyridylmethyl)aminoacetate, for use in the immobilised metal ion affinity chromatographic separation of proteins 852(1999)105

Histidines in affinity tags and surface clusters for immobilized metal-ion affinity chromatography of trimeric tumor necrosis factor α 852(1999)117

Affinity chromatography of human estrogen receptor- α expressed in *Saccharomyces cerevisiae*. Combination of heparin- and 17β -estradiol-affinity chromatography 852(1999)161

Use of high-resolution techniques for the characterization of clotting factor VIII 852(1999)175

Solid-phase synthesis, isolation and analysis of a mouse protein, the macrophage migration inhibitory factor 852(1999)189

Strategy for identifying circulating fragments of insulin-like growth factor binding proteins in a hemofiltrate peptide bank 852(1999)197

Purification of two low-molecular-mass serine proteinase inhibitors from chicken liver 852(1999)207

High concentrations of sodium chloride facilitate the use of immobilized chymotrypsin for separating virgin forms of specific trypsin inhibitors 852(1999)227

Binding of lead to collagen type I and V and $\alpha_2(I)$ CNBr (3,5) fragment by a modified Hummel–Dreyer method 852(1999)245

Proteolytic cleavage of glucagon-like peptide-1 by pancreatic β cells and by fetal calf serum analyzed by mass spectrometry 852(1999)285

Experimental studies on affinity chromatography in an electric field 852(1999)319

Separation of proteins and peptides by capillary electrophoresis in acid buffers containing high concentrations of surfactants 852(1999)325

Prediction of protein retention at gradient elution conditions in ion-exchange chromatography 852(1999)351

High-yield purification of biosynthetic human growth hormone secreted in *Escherichia coli* periplasmic space 852(1999)441

Chemiluminescence detection of heme proteins separated by capillary isoelectric focusing 852(1999)597

Pyridylmethylaminoacetate ligands

New ligand, *N*-(2-pyridylmethyl)aminoacetate, for use in the immobilised metal ion affinity chromatographic separation of proteins 852(1999)105

Retention behaviour

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

Retention models

Characterization of unstable ion-exchange chromatographic separation of proteins 852(1999)37

Retention prediction

Prediction of protein retention at gradient elution conditions in ion-exchange chromatography 852(1999)351

Revision of a theoretical expression for gas–liquid chromatographic retention 852(1999)583

Reversed-flow gas chromatography

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

Reviews

Use of high-resolution techniques for the characterization of clotting factor VIII (Review) 852(1999)175

Rhodium–platinum catalysts

Gas chromatographic kinetic study of carbon monoxide oxidation over platinum–rhodium alloy catalysts 852(1999)507

RNA

Introduction of the gene amplification technique to decrease the risk of hepatitis C virus transmission by plasma products 852(1999)305

Saccharomyces cerevisiae

Affinity chromatography of human estrogen receptor- α expressed in *Saccharomyces cerevisiae*. Combination of heparin- and 17 β -estradiol-affinity chromatography 852(1999)161

Schistosoma japonicum

Affinity purification of *Schistosoma japonicum* glutathione-S-transferase and its site-directed mutants with glutathione affinity chromatography and immobilized metal affinity chromatography 852(1999)151

Sewage sludge

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Sodium chloride

High concentrations of sodium chloride facilitate the use of immobilized chymotrypsin for separating virgin forms of specific trypsin inhibitors 852(1999)227

Solid-phase peptide synthesis

Solid-phase synthesis, isolation and analysis of a mouse protein, the macrophage migration inhibitory factor 852(1999)189

Solvent–detergent method

Ion-exchange chromatography separation of the detergent and the solvent from immunoglobulins after solvent–detergent treatment 852(1999)83

Removal of detergent and solvent from solvent–detergent-treated immunoglobulins 852(1999)87

Source 5RPC columns

New polymer-based prepacked column for the reversed-phase liquid chromatographic separation of peptides over the pH range 2–12 852(1999)255

Stationary phases, LC

Retention behavior of very large biomolecules in ion-exchange chromatography 852(1999)25

Oriented immobilization of chymotrypsin by use of suitable antibodies coupled to a nonporous solid support 852(1999)141

New polymer-based prepacked column for the reversed-phase liquid chromatographic separation of peptides over the pH range 2–12 852(1999)255

Separation of oligonucleotides on novel monolithic columns with ion-exchange functional surfaces 852(1999)297

Network modeling of the convective flow and diffusion of molecules adsorbing in monoliths and in porous particles packed in a chromatographic column 852(1999)3

Equation for calculating surface coverage from end-capping of chromatographic bonded phases 852(1999)375

Separation and characterization of octylphenol ethoxylate surfactants used by reversed-phase high-performance liquid chromatography on branched fluorinated silica gel columns 852(1999)475

Steroid hormone receptors

Affinity chromatography of human estrogen receptor- α expressed in *Saccharomyces cerevisiae*. Combination of heparin- and 17 β -estradiol-affinity chromatography 852(1999)161

Steroids

High-performance liquid chromatographic methods for monitoring of isomers of 17-hydroxy-16-hydroxymethyl-3-methoxyestra-1,3,5(10)-triene 852(1999)433

Structure–retention relationships

Revision of a theoretical expression for gas–liquid chromatographic retention 852(1999)583

Sulfur compounds

Investigation of membrane dryers and evaluation of a new ozone scrubbing material for the sampling of organosulphur compounds in air 852(1999)589

Supercritical fluid extraction

Quantitative determination of polycyclic aromatic hydrocarbons, polychlorinated biphenyls and organochlorine pesticides in sewage sludges using supercritical fluid extraction and mass spectrometric detection 852(1999)545

Surface coverage

Equation for calculating surface coverage from end-capping of chromatographic bonded phases 852(1999)375

Surfactants

Separation and characterization of octylphenol ethoxylate surfactants used by reversed-phase high-performance liquid chromatography on branched fluorinated silica gel columns 852(1999)475

Qualitative and quantitative analysis of new alkyl amide arginine surfactants by high-performance liquid chromatography and capillary electrophoresis 852(1999)499

Surface plasmon resonance detection

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Thermodynamic parameters

Comparison between the isocratic and gradient retention behaviour of polypeptides in reversed-phase liquid chromatographic environments 852(1999)43

Revision of a theoretical expression for gas–liquid chromatographic retention 852(1999)583

Tobacco

Optimization study for the reversed-phase ion-pair liquid chromatographic determination of nicotine in commercial tobacco products 852(1999)451

Triacylglycerols

Non-volatile products of triolein produced at frying temperatures characterized using liquid chromatography with online mass spectrometric detection 852(1999)417

Tributyl phosphate

Ion-exchange chromatography separation of the detergent and the solvent from immunoglobulins after solvent–detergent treatment 852(1999)83

Removal of detergent and solvent from solvent–detergent-treated immunoglobulins 852(1999)87

Trimethylsilyl groups

Equation for calculating surface coverage from end-capping of chromatographic bonded phases 852(1999)375

Triolein

Non-volatile products of triolein produced at frying temperatures characterized using liquid chromatography with online mass spectrometric detection 852(1999)417

Triton X-100

Ion-exchange chromatography separation of the detergent and the solvent from immunoglobulins after solvent–detergent treatment 852(1999)83

Removal of detergent and solvent from solvent–detergent-treated immunoglobulins 852(1999)87

Trypsin

Purification and partial characterization of the pancreatic proteolytic enzymes trypsin, chymotrypsin and elastase from the chicken 852(1999)217

Trypsin inhibitors

High concentrations of sodium chloride facilitate the use of immobilized chymotrypsin for separating virgin forms of specific trypsin inhibitors 852(1999)227

Tumor necrosis factor α

Histidines in affinity tags and surface clusters for immobilized metal-ion affinity chromatography of trimeric tumor necrosis factor α 852(1999)117

Validation

Analysis of anions in aqueous samples by ion chromatography and capillary electrophoresis. A comparative study of peak modeling and validation criteria 852(1999)487

Vegetable oils

Non-volatile products of triolein produced at frying temperatures characterized using liquid chromatography with online mass spectrometric detection 852(1999)417

Venoms

Partial primary structure of a fibrinogenase from the venom of the snake *Lachesis stenophrys* 852(1999)237

Viruses

Introduction of the gene amplification technique to decrease the risk of hepatitis C virus transmission by plasma products 852(1999)305

Von Willebrand factor

Use of surface plasmon resonance for studies of protein–protein and protein–phospholipid membrane interactions. Application to the binding of factor VIII to von Willebrand factor and to phosphatidylserine-containing membranes 852(1999)59

Use of high-resolution techniques for the characterization of clotting factor VIII 852(1999)175

Water analysis

Quantification of phenylurea herbicides and their free and humic acid-associated metabolites in natural waters 852(1999)465
