Subject Index Vol. 921

Adenovirus

Polypeptide composition of an adenovirus type 5 used in cancer gene therapy 921(2001)39

Adsorption

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Affinity adsorbents

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Affinity electrochromatography

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Affinity sorbents

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Functional polymer affinity matrix for purifying hexahistidine-tagged recombinant protein 921(2001)197

Albumin

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Alkali metals

Ion chromatography on chelating stationary phases: separation of alkali metals 921(2001)217

Alkenes

On-line, inlet-based trimethylsilyl derivatization for gas chromatography of mono- and dicarboxylic acids 921(2001)265

Amino acids

Abnormal elution behavior of ornitine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Annular chromatography

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Asparagus fly

On the pheromone of the Asparagus fly, *Platyparea poeciloptera* 921(2001)341

Bacteria

Analysis of intact bacteriohopanepolyols from methanotrophic bacteria by reversed-phase high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 921(2001)175

Bacteriohopanepolyols

Analysis of intact bacteriohopanepolyols from methanotrophic bacteria by reversed-phase high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 921(2001)175

Biogenic amines

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Biosensors

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Buffer composition

Electrophoretic behavior of peptides in capillary electrophoresis. Influence of ionic strength and pH in aqueous–organic media 921(2001)69

Carbamates

Stability studies of carbamate pesticides and analysis by gas chromatography with flame ionization and nitrogen–phosphorus detection 921(2001)287

Carboxylic acids

On-line, inlet-based trimethylsilyl derivatization for gas chromatography of mono- and dicarboxylic acids 921(2001)265

Catechins

Separation of radioactive metabolites in cultured tea cells fed with [¹⁴C]phenylalanine using high-speed counter-current chromatography 921(2001)331

Chelating stationary phases

Ion chromatography on chelating stationary phases: separation of alkali metals 921(2001)217

Chip technology

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Chiral recognition

Determination of enantiomer separation factors by nuclear magnetic resonance spectroscopy and by chiral liquid chromatography 921(2001)161

Chiral stationary phase, LC

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Chiral stationary phases, SFC

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Collagens

Evaluation of peptide electropherograms by multivariate mathematical-statistical methods. I. Principal component analysis 921(2001)81

Complexation

Ion chromatography on chelating stationary phases: separation of alkali metals 921(2001)217

Confocal scanning laser microscopy

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Continuous annular chromatography

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Counter-current chromatography

Separation of radioactive metabolites in cultured tea cells fed with [¹⁴C]phenylalanine using high-speed counter-current chromatography 921(2001)331

Cyclodextrins

Determination of the UV filters worldwide authorised in sunscreens by high-performance liquid chromatography. Use of cyclodextrins as mobile phase modifier 921(2001)207

Derivatization, GC

On-line, inlet-based trimethylsilyl derivatization for gas chromatography of mono- and dicarboxylic acids 921(2001)265

Derivatization, LC

Abnormal elution behavior of ornitine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Desalting

High-throughput biopolymer desalting by solid-phase extraction prior to mass spectrometric analysis 921(2001)3

Detection, GC

Mass spectrometry and mass-selective detection in chromatography 921(2001)227

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Stability studies of carbamate pesticides and analysis by gas chromatography with flame ionization and nitrogen-phosphorus detection 921(2001)287

Detection, LC

Mass spectrometry and mass-selective detection in chromatography 921(2001)227

Diastereomeric complexes

Determination of enantiomer separation factors by nuclear magnetic resonance spectroscopy and by chiral liquid chromatography 921(2001)161

Diffusional mass transfer

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Dioxolanes

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Dissociation constants

Electrophoretic behavior of peptides in capillary electrophoresis. Influence of ionic strength and pH in aqueous–organic media 921(2001)69

Electrical double layer

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Electrochromatography

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Open-tubular electrochromatography of organic phosphates on a saphyrin-modified capillary 921(2001)99

Electroosmosis

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Electrophoretic mass transfer

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Enantiomer separation

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Endosulfan

Determination of residues of endosulfan and five pyrethroid insecticides in virgin olive oil using gas chromatography with electron-capture detection 921(2001)297

Enzymes

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Extraction methods

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Factor IX

Characterization of clotting factor IX in plasma-derived preparations by electrophoretic techniques 921(2001)57

Factor VIII

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Fatty acids

Gas chromatographic characterization of vegetable oil deodorization distillate 921(2001)277

FLAG peptide

Affinity of the monoclonal antibody M1 directed against the FLAG peptide 921(2001)25

Fluorodinitrophenylleucinamide

Abnormal elution behavior of ornitine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Food analysis

Comparison of analytical techniques to quantify malondialdehyde in milk powders 921(2001)237

Stability studies of carbamate pesticides and analysis by gas chromatography with flame ionization and nitrogen–phosphorus detection 921(2001)287

Determination of residues of endosulfan and five pyrethroid insecticides in virgin olive oil using gas chromatography with electron-capture detection 921(2001)297

Ginsenosides

Liquid chromatographic determination of less polar ginsenosides in processed ginseng 921(2001)335

Glycidyl methacrylate

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Grapes

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Height equivalent to a theoretical plate

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Hopanoids

Analysis of intact bacteriohopanepolyols from methanotrophic bacteria by reversed-phase high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 921(2001)175

Humic acids

Solid-phase extraction of polycyclic aromatic hydrocarbons in surface water. Negative effect of humic acid 921(2001)255

1-(Hydroxyethyl) cyclopropyl ketone

On the pheromone of the Asparagus fly, *Platyparea poeciloptera* 921(2001)341

Immobilized dyes

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Immobilized enzyme reactor

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Immunoglobulins

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Inner radial humps

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Ketoconazole

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Kinetic analysis

Affinity of the monoclonal antibody M1 directed against the FLAG peptide 921(2001)25

Kinetic studies

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Laser-enhanced ionization detection

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Laser-induced atomic fluorescence detection

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Limit of detection

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Limit of quantitation

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Linearity

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Lipid peroxidation

Comparison of analytical techniques to quantify malondialdehyde in milk powders 921(2001)237

Lysozyme

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Magnetic sorbents

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Malondialdehyde

Comparison of analytical techniques to quantify malondialdehyde in milk powders 921(2001)237

Marfey's method, advanced

Abnormal elution behavior of ornithine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Mass spectrometry

Mass spectrometry and mass-selective detection in chromatography 921(2001)227

Metal chelates

Functional polymer affinity matrix for purifying hexahistidine-tagged recombinant protein 921(2001)197

Methyl methacrylate

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Micellar electrokinetic chromatography

Micellar electrokinetic chromatography of polyamines and monoacetylpolyamines 921(2001)323

Migration prediction

Electrophoretic behavior of peptides in capillary electrophoresis. Influence of ionic strength and pH in aqueous-organic media 921(2001)69

Milk

Resolution of structural isomers of sialylated oligosaccharides by capillary electrophoresis 921(2001)315

Mobile phase composition

Determination of the UV filters worldwide authorised in sunscreens by high-performance liquid chromatography. Use of cyclodextrins as mobile phase modifier 921(2001)207

Monoacetylpolyamines

Micellar electrokinetic chromatography of polyamines and monoacetylpolyamines 921(2001)323

Monoclonal antibodies

Affinity of the monoclonal antibody M1 directed against the FLAG peptide 921(2001)25

Nuclear magnetic resonance spectroscopy

Determination of enantiomer separation factors by nuclear magnetic resonance spectroscopy and by chiral liquid chromatography 921(2001)161

Nucleoside phosphates

Open-tubular electrochromatography of organic phosphates on a sapphyrin-modified capillary 921(2001)99

Oligonucleotides

High-throughput biopolymer desalting by solid-phase extraction prior to mass spectrometric analysis 921(2001)3

Oligosaccharides

Resolution of structural isomers of sialylated oligosaccharides by capillary electrophoresis 921(2001)315

Olive oil

Determination of residues of endosulfan and five pyrethroid insecticides in virgin olive oil using gas chromatography with electron-capture detection 921(2001)297

On-line hydrolysis

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Organotin compounds

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Ornithine

Abnormal elution behavior of ornithine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Panax ginseng

Liquid chromatographic determination of less polar ginsenosides in processed ginseng 921(2001)335

Penicillin G acylase

Immobilized penicillin G acylase as reactor and chiral selector in liquid chromatography 921(2001)147

Peptides

High-throughput biopolymer desalting by solid-phase extraction prior to mass spectrometric analysis 921(2001)3

Affinity of the monoclonal antibody M1 directed against the FLAG peptide 921(2001)25

Polypeptide composition of an adenovirus type 5 used in cancer gene therapy 921(2001)39

Electrophoretic behavior of peptides in capillary electrophoresis. Influence of ionic strength and pH in aqueous-organic media 921(2001)69

Evaluation of peptide electropherograms by multivariate mathematical-statistical methods. I. Principal component analysis 921(2001)81

Abnormal elution behavior of ornithine derivatized with 1-fluoro-2,4-dinitrophenyl-5-leucinamide in advanced Marfey's method 921(2001)187

Pesticides

Stability studies of carbamate pesticides and analysis by gas chromatography with flame ionization and nitrogen-phosphorus detection 921(2001)287

Determination of residues of endosulfan and five pyrethroid insecticides in virgin olive oil using gas chromatography with electron-capture detection 921(2001)297

Performance characteristics

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Pharmaceutical analysis

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Phenolic compounds

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Pheromones

On the pheromone of the Asparagus fly, *Platyparea poeciloptera* 921(2001)341

Platyparea poeciloptera

On the pheromone of the Asparagus fly, *Platyparea poeciloptera* 921(2001)341

Phosphates

Open-tubular electrochromatography of organic phosphates on a sapphyrin-modified capillary 921(2001)99

Phosphatidylethanolamine

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Phosphatidylserine

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Phospholipids

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Polyamines

Micellar electrokinetic chromatography of polyamines and monoacetyl polyamines 921(2001)323

Polynuclear aromatic hydrocarbons

Solid-phase extraction of polycyclic aromatic hydrocarbons in surface water. Negative effect of humic acid 921(2001)255

Polypeptides

Polypeptide composition of an adenovirus type 5 used in cancer gene therapy 921(2001)39

Polyphenols

Separation of radioactive metabolites in cultured tea cells fed with [¹⁴C]phenylalanine using high-speed counter-current chromatography 921(2001)331

Poly(vinyl alcohol) sorbent

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Polyacrylic acid sorbents

Functional polymer affinity matrix for purifying hexahistidine-tagged recombinant protein 921(2001)197

Porous adsorbent particles

Modeling and analysis of the dynamic behavior of mechanisms that result in the development of inner radial humps in the concentration of a single adsorbate in the adsorbed phase of porous adsorbent particles observed in confocal scanning laser microscopy experiments: diffusional mass transfer and adsorption in the presence of an electrical double layer 921(2001)135

Preparative chromatography

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Pressurized liquid extraction

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Principal component analysis

Evaluation of peptide electropherograms by multivariate mathematical-statistical methods. I. Principal component analysis 921(2001)81

Proteins

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Characterization of clotting factor IX in plasma-derived preparations by electrophoretic techniques 921(2001)57

Oscillatory electroosmosis-enhanced intra/inter-particle liquid transport and its primary applications in the preparative electrochromatography of proteins 921(2001)93

Protein adsorption equilibria and kinetics to a poly(vinyl alcohol)-based magnetic affinity support 921(2001)109

Functional polymer affinity matrix for purifying hexahistidine-tagged recombinant protein 921(2001)197

Pyrethroids

Determination of residues of endosulfan and five pyrethroid insecticides in virgin olive oil using gas chromatography with electron-capture detection 921(2001)297

Rate constants

Affinity of the monoclonal antibody M1 directed against the FLAG peptide 921(2001)25

Repeatability

Initial evaluation of quantitative performance of chromatographic methods using replicates at multiple concentrations 921(2001)121

Resolution

Electrophoretic behavior of peptides in capillary electrophoresis. Influence of ionic strength and pH in aqueous-organic media 921(2001)69

Sapphyrin

Open-tubular electrochromatography of organic phosphates on a sapphyrin-modified capillary 921(2001)99

Sample preparation

High-throughput biopolymer desalting by solid-phase extraction prior to mass spectrometric analysis 921(2001)3

Sialylated oligosaccharides

Resolution of structural isomers of sialylated oligosaccharides by capillary electrophoresis 921(2001)315

Size-exclusion chromatography

Improved performance of protein separation by continuous annular chromatography in the size-exclusion mode 921(2001)15

Solid-phase extraction

Solid-phase extraction of polycyclic aromatic hydrocarbons in surface water. Negative effect of humic acid 921(2001)255

Stability studies

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Stability studies of carbamate pesticides and analysis by gas chromatography with flame ionization and nitrogen–phosphorus detection 921(2001)287

Stationary phases, LC

Ion chromatography on chelating stationary phases: separation of alkali metals 921(2001)217

Statistical analysis

Evaluation of peptide electropherograms by multivariate mathematical–statistical methods. I. Principal component analysis 921(2001)81

Sterols

Gas chromatographic characterization of vegetable oil deodorization distillate 921(2001)277

Structural isomer separation

Resolution of structural isomers of sialylated oligosaccharides by capillary electrophoresis 921(2001)315

Styrene

Affinity chromatography of proteins on non-porous copolymerized particles of styrene, methyl methacrylate and glycidyl methacrylate 921(2001)31

Sunscreens

Determination of the UV filters worldwide authorised in sunscreens by high-performance liquid chromatography. Use of cyclodextrins as mobile phase modifier 921(2001)207

Supercritical fluid chromatography

Applications of the Chiralpak AD and Chiralcel OD chiral columns in the enantiomeric separation of several dioxolane compounds by supercritical fluid chromatography 921(2001)305

Superheated solvents

Stability of phenolic compounds during extraction with superheated solvents 921(2001)169

Surface plasmon resonance detection

Comparison of the properties of phospholipid surfaces formed on HPA and L1 biosensor chips for the binding of the coagulation factor VIII 921(2001)49

Tea

Separation of radioactive metabolites in cultured tea cells fed with [¹⁴C]phenylalanine using high-speed counter-current chromatography 921(2001)331

Terpenoids

Analysis of intact bacteriohopanepolyols from methanotrophic bacteria by reversed-phase high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 921(2001)175

Tetraethyltin

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Tetramethyltin

Laser-enhanced ionization and laser-induced atomic fluorescence as element-specific detection methods for gas chromatography. Application to organotin analysis 921(2001)247

Tocopherols

Gas chromatographic characterization of vegetable oil deodorization distillate 921(2001)277

Triterpenoids

Analysis of intact bacteriohopanepolyols from methanotrophic bacteria by reversed-phase high-performance liquid chromatography–atmospheric pressure chemical ionisation mass spectrometry 921(2001)175

UV filters

Determination of the UV filters worldwide authorised in sunscreens by high-performance liquid chromatography. Use of cyclodextrins as mobile phase modifier 921(2001)207

Vegetable oils

Gas chromatographic characterization of vegetable oil deodorization distillate 921(2001)277

Vitamins

Gas chromatographic characterization of vegetable oil deodorization distillate 921(2001)277

Vitronectin

Characterization of clotting factor IX in plasma-derived preparations by electrophoretic techniques 921(2001)57

Water analysis

Solid-phase extraction of polycyclic aromatic hydrocarbons in surface water. Negative effect of humic acid 921(2001)255
