## Subject Index Vol. 942

### Affinity chromatography

DNA–support coupling for transcription factor purification.  
Comparison of aldehyde, cyanogen bromide and  
*N*-hydroxysuccinimide chemistries 942(2001)167

### Aldehyde-silica

DNA–support coupling for transcription factor purification.  
Comparison of aldehyde, cyanogen bromide and  
*N*-hydroxysuccinimide chemistries 942(2001)167

### Alkanes

Considerations on the temperature dependence of the gas–liquid  
chromatographic retention 942(2001)211

### Alkylbenzenes

Determination of linear alkylbenzenes in fish tissue by gel  
permeation chromatography and gas chromatography–mass  
spectrometry 942(2001)223

### Amino acids

Flame ionization detection after splitting the water effluent in  
subcritical water chromatography 942(2001)231

### Amino acids, DNS derivatives

Chemically modified chiral monolithic silica column prepared  
by a sol–gel process for enantiomeric separation by micro high-  
performance liquid chromatography 942(2001)83

### Amino acids, non-protein

Reversed-phase liquid chromatographic determination of  
phytometallophores from Strategy II Fe–uptake species by  
9-fluorenylmethyl chloroformate fluorescence 942(2001)177

### Anaerobic treatment

Quantification of sulfur and sulfur-containing compounds in  
wastewaters by means of a combination of liquid  
chromatographic methods 942(2001)201

### Antitrypsin

Development of a peptide mapping procedure to identify  
and quantify methionine oxidation in recombinant human  
 $\alpha$ 1-antitrypsin 942(2001)133

### Arocy B10

Preferential solvation of a dicyanate ester monomer and  
poly(sulfone) in different organic solvents by size-exclusion  
chromatography 942(2001)53

### Azoles

Analytical and semipreparative enantiomeric separation of azole  
antifungal agents by high-performance liquid chromatography on  
polysaccharide-based chiral stationary phases. Application to *in vitro*  
biological studies 942(2001)107

### Bisphenol A dicyanate

Preferential solvation of a dicyanate ester monomer and  
poly(sulfone) in different organic solvents by size-exclusion  
chromatography 942(2001)53

### Buffer composition

$pK_a$  values of peptides in aqueous and aqueous–organic media.  
Prediction of chromatographic and electrophoretic behaviour  
942(2001)145

### Caffeine

Rapid determination of caffeine in tea leaves 942(2001)271

### Cannabinoids

Determination of cannabinoids in hair using high-pH\* non-  
aqueous electrolytes and electrochemical detection. Some  
aspects of sensitivity and selectivity 942(2001)259

### Capillary electrophoresis–ion chromatography

Use of ionic polymers as stationary and pseudo-stationary  
phases in the separation of ions by capillary electrophoresis and  
capillary electrochromatography (Review) 942(2001)11

### Carbohydrates

Flame ionization detection after splitting the water effluent in  
subcritical water chromatography 942(2001)231

### Carboxylic acids

Flame ionization detection after splitting the water effluent in  
subcritical water chromatography 942(2001)231

Simultaneous determination of inorganic anions, carboxylic and  
aromatic carboxylic acids by capillary zone electrophoresis with  
direct UV detection 942(2001)289

**Chiral stationary phases, LC**

Chemically modified chiral monolithic silica column prepared by a sol-gel process for enantiomeric separation by micro high-performance liquid chromatography 942(2001)83

Analytical and semipreparative enantiomeric separation of azole antifungal agents by high-performance liquid chromatography on polysaccharide-based chiral stationary phases. Application to in vitro biological studies 942(2001)107

**Conductivity detection**

Contactless conductivity detection for capillary electrophoresis. Hardware improvements and optimization of the input-signal amplitude and frequency 942(2001)249

**Cyprodinil**

Solid-phase microextraction-gas chromatographic-mass spectrometric method for the determination of the fungicides cyprodinil and fludioxonil in white wines 942(2001)41

**Derivatisation, LC**

Determination of phosphonic acid breakdown products by high-performance liquid chromatography after derivatization 942(2001)185

**Derivatization, LC**

Reversed-phase liquid chromatographic determination of phytometallophores from Strategy II Fe-uptake species by 9-fluorenylmethyl chloroformate fluorescence 942(2001)177

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

**Detection, electrophoresis**

Contactless conductivity detection for capillary electrophoresis. Hardware improvements and optimization of the input-signal amplitude and frequency 942(2001)249

**Detection, LC**

Temperature-dependent refractive index issues using a UV-visible detector in high-performance liquid chromatography 942(2001)63

Fast-scanning fluorescence spectroscopy as a detection system in liquid chromatography for confirmatory analysis of flumequine and oxolinic acid 942(2001)275

**Detection, subcritical water chromatography**

Flame ionization detection after splitting the water effluent in subcritical water chromatography 942(2001)231

**Dissociation constants**

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**DNA**

DNA-support coupling for transcription factor purification. Comparison of aldehyde, cyanogen bromide and *N*-hydroxysuccinimide chemistries 942(2001)167

**Edible animal tissue**

Fast-scanning fluorescence spectroscopy as a detection system in liquid chromatography for confirmatory analysis of flumequine and oxolinic acid 942(2001)275

**Electrochromatography**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

**Enantiomer separation**

Chemically modified chiral monolithic silica column prepared by a sol-gel process for enantiomeric separation by micro high-performance liquid chromatography 942(2001)83

High-resolution chiral separation using microfluidics-based membrane chromatography 942(2001)115

**Enantiomeric separation**

Analytical and semipreparative enantiomeric separation of azole antifungal agents by high-performance liquid chromatography on polysaccharide-based chiral stationary phases. Application to in vitro biological studies 942(2001)107

**Fast-scanning fluorescence spectroscopy**

Fast-scanning fluorescence spectroscopy as a detection system in liquid chromatography for confirmatory analysis of flumequine and oxolinic acid 942(2001)275

**Fermentation broth**

Direct capture of product from fermentation broth using a cell-repelling ion exchanger 942(2001)123

**Fish**

Determination of linear alkylbenzenes in fish tissue by gel permeation chromatography and gas chromatography-mass spectrometry 942(2001)223

**Fitting procedures**

On the use of genetic algorithms for response surface modeling in high-performance liquid chromatography and their combination with the Microsoft Solver 942(2001)93

**Flame ionization detection**

Flame ionization detection after splitting the water effluent in subcritical water chromatography 942(2001)231

**Forensic analysis**

Determination of cannabinoids in hair using high-pH\* non-aqueous electrolytes and electrochemical detection. Some aspects of sensitivity and selectivity 942(2001)259

**Fludioxonil**

Solid-phase microextraction–gas chromatographic–mass spectrometric method for the determination of the fungicides cyprodinil and fludioxonil in white wines 942(2001)41

**Flumequine**

Fast-scanning fluorescence spectroscopy as a detection system in liquid chromatography for confirmatory analysis of flumequine and oxolinic acid 942(2001)275

**9-Fluorenylmethyl chloroformate**

Reversed-phase liquid chromatographic determination of phytometallophores from Strategy II Fe-uptake species by 9-fluorenylmethyl chloroformate fluorescence 942(2001)177

**Gas chromatography**

Considerations on the temperature dependence of the gas–liquid chromatographic retention 942(2001)211

**Genetic algorithms**

On the use of genetic algorithms for response surface modeling in high-performance liquid chromatography and their combination with the Microsoft Solver 942(2001)93

**Headspace sampling**

Optimization of headspace sampling using solid-phase microextraction for volatile components in tobacco 942(2001)33

**Heat capacity**

Considerations on the temperature dependence of the gas–liquid chromatographic retention 942(2001)211

**Heavy metals**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

**Hydrogen peroxide**

Development of a peptide mapping procedure to identify and quantify methionine oxidation in recombinant human  $\alpha$ 1-antitrypsin 942(2001)133

**Hydroxy acids**

Chemically modified chiral monolithic silica column prepared by a sol–gel process for enantiomeric separation by micro high-performance liquid chromatography 942(2001)83

**Iminodiacetic acid bonded silica**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

**Inorganic anions**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

Simultaneous determination of inorganic anions, carboxylic and aromatic carboxylic acids by capillary zone electrophoresis with direct UV detection 942(2001)289

**Inorganic cations**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

**Instrumentation**

Contactless conductivity detection for capillary electrophoresis. Hardware improvements and optimization of the input-signal amplitude and frequency 942(2001)249

**Ion chromatography–capillary electrophoresis**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

**Ion exchangers**

Direct capture of product from fermentation broth using a cell-repelling ion exchanger 942(2001)123

**Ionic strength**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

**Ion-exchange chromatography**

Strategy for highly selective ion-exchange capture using a charge-polarizing fusion partner 942(2001)157

**Lignosulfonates**

Molecular weight determination of lignosulfonates by size-exclusion chromatography and multi-angle laser light scattering 942(2001)191

**Linear solvation energy relationships**

Solute–solvent interactions in micellar electrokinetic chromatography

III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

**Liquid chromatography**

Analysis of purines and pyrimidines by mixed partition–adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

**Membrane chromatography**

High-resolution chiral separation using microfluidics-based membrane chromatography 942(2001)115

**Metal cations**

Contactless conductivity detection for capillary electrophoresis. Hardware improvements and optimization of the input-signal amplitude and frequency 942(2001)249

**Methionine**

Development of a peptide mapping procedure to identify and quantify methionine oxidation in recombinant human  $\alpha$ 1-antitrypsin 942(2001)133

**Micellar electrokinetic chromatography**

Solute-solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

**Micelles**

Solute-solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

**Michelia alba**

Rapid determination of volatile constituents of *Michelia alba* flowers by gas chromatography-mass spectrometry with solid-phase microextraction 942(2001)283

**Microfluidics**

High-resolution chiral separation using microfluidics-based membrane chromatography 942(2001)115

**Mixed-mode chromatography**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

DNA-support coupling for transcription factor purification. Comparison of aldehyde, cyanogen bromide and *N*-hydroxysuccinimide chemistries 942(2001)167

**Mobile phase composition**

Temperature-dependent refractive index issues using a UV-visible detector in high-performance liquid chromatography 942(2001)63

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**Modeling**

On the use of genetic algorithms for response surface modeling in high-performance liquid chromatography and their combination with the Microsoft Solver 942(2001)93

**Modifiers**

Temperature-dependent refractive index issues using a UV-visible detector in high-performance liquid chromatography 942(2001)63

**Molecular mass determination**

Molecular weight determination of lignosulfonates by size-exclusion chromatography and multi-angle laser light scattering 942(2001)191

**Monobromobimane**

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

**Monolithic columns**

Chemically modified chiral monolithic silica column prepared by a sol-gel process for enantiomeric separation by micro high-performance liquid chromatography 942(2001)83

**Mugineic acid**

Reversed-phase liquid chromatographic determination of phytometallophores from Strategy II Fe-uptake species by 9-fluorenylmethyl chloroformate fluorescence 942(2001)177

**Multi-angle laser light scattering**

Molecular weight determination of lignosulfonates by size-exclusion chromatography and multi-angle laser light scattering 942(2001)191

**NIST 1640**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

**Non-aqueous capillary electrophoresis**

Determination of cannabinoids in hair using high-pH\* non-aqueous electrolytes and electrochemical detection. Some aspects of sensitivity and selectivity 942(2001)259

**Nucleobases**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

**Optimization**

Optimization of headspace sampling using solid-phase microextraction for volatile components in tobacco 942(2001)33

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**Organic acids**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

**Organophosphorous compounds**

Determination of phosphonic acid breakdown products by high-performance liquid chromatography after derivatization 942(2001)185

**Oxolinic acid**

Fast-scanning fluorescence spectroscopy as a detection system in liquid chromatography for confirmatory analysis of flumequine and oxolinic acid 942(2001)275

**Partition coefficients**

Considerations on the temperature dependence of the gas-liquid chromatographic retention 942(2001)211

**Partition-adsorption systems**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

**Peptides**

Development of a peptide mapping procedure to identify and quantify methionine oxidation in recombinant human  $\alpha$ 1-antitrypsin 942(2001)133

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**Pesticides**

Solid-phase microextraction-gas chromatographic-mass spectrometric method for the determination of the fungicides cyprodinil and fludioxonil in white wines 942(2001)41

**pH effects**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**Phosphonic acid**

Determination of phosphonic acid breakdown products by high-performance liquid chromatography after derivatization 942(2001)185

**Phytometallophores**

Reversed-phase liquid chromatographic determination of phytometallophores from Strategy II Fe-uptake species by 9-fluorenylmethyl chloroformate fluorescence 942(2001)177

**Plant materials**

Simultaneous determination of inorganic anions, carboxylic and aromatic carboxylic acids by capillary zone electrophoresis with direct UV detection 942(2001)289

**Poly(acrylic acid)**

Direct capture of product from fermentation broth using a cell-repelling ion exchanger 942(2001)123

**Polyphenols**

Rapid determination of caffeine in tea leaves 942(2001)271

**Polysulfone**

Preferential solvation of a dicyanate ester monomer and poly(sulfone) in different organic solvents by size-exclusion chromatography 942(2001)53

**Proteins**

Strategy for highly selective ion-exchange capture using a charge-polarizing fusion partner 942(2001)157

DNA-support coupling for transcription factor purification. Comparison of aldehyde, cyanogen bromide and *N*-hydroxysuccinimide chemistries 942(2001)167

**Principal component analysis**

Solute-solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

**Purines**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

**Pyrimidines**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

**Refractive index detection**

Temperature-dependent refractive index issues using a UV-visible detector in high-performance liquid chromatography 942(2001)63

**Relation prediction**

$pK_a$  values of peptides in aqueous and aqueous-organic media. Prediction of chromatographic and electrophoretic behaviour 942(2001)145

**Response surface modeling**

On the use of genetic algorithms for response surface modeling in high-performance liquid chromatography and their combination with the Microsoft Solver 942(2001)93

**Reviews**

Analysis of purines and pyrimidines by mixed partition-adsorption normal-phase high-performance liquid chromatography (Review) 942(2001)1

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

**Selectivity**

Solute-solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

Determination of cannabinoids in hair using high-pH\* non-aqueous electrolytes and electrochemical detection. Some aspects of sensitivity and selectivity 942(2001)259

#### **Sensitivity**

Determination of cannabinoids in hair using high-pH\* non-aqueous electrolytes and electrochemical detection. Some aspects of sensitivity and selectivity 942(2001)259

#### **Shikimic acid**

Direct capture of product from fermentation broth using a cell-repelling ion exchanger 942(2001)123

#### **Soil**

Simultaneous determination of inorganic anions, carboxylic and aromatic carboxylic acids by capillary zone electrophoresis with direct UV detection 942(2001)289

#### **Solid-phase microextraction**

Optimization of headspace sampling using solid-phase microextraction for volatile components in tobacco 942(2001)33

Solid-phase microextraction–gas chromatographic–mass spectrometric method for the determination of the fungicides cyprodinil and fludioxonil in white wines 942(2001)41

#### **Solute descriptors**

Solute–solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

#### **Solvation parameters**

Preferential solvation of a dicyanate ester monomer and poly(sulfone) in different organic solvents by size-exclusion chromatography 942(2001)53

#### **Stationary phases, electrochromatography**

Use of ionic polymers as stationary and pseudo-stationary phases in the separation of ions by capillary electrophoresis and capillary electrochromatography (Review) 942(2001)11

#### **Stationary phases, LC**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

Direct capture of product from fermentation broth using a cell-repelling ion exchanger 942(2001)123

DNA–support coupling for transcription factor purification. Comparison of aldehyde, cyanogen bromide and *N*-hydroxysuccinimide chemistries 942(2001)167

#### **Subcritical water chromatography**

Flame ionization detection after splitting the water effluent in subcritical water chromatography 942(2001)231

#### **Sulfide**

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

#### **Sulfite**

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

#### **Surfactants**

Solute–solvent interactions in micellar electrokinetic chromatography III. Characterization of the selectivity of micellar electrokinetic chromatography systems 942(2001)237

#### **Superheated water**

Flame ionization detection after splitting the water effluent in subcritical water chromatography 942(2001)231

#### **Tea leaves**

Rapid determination of caffeine in tea leaves 942(2001)271

#### **Temperature effects**

Temperature-dependent refractive index issues using a UV–visible detector in high-performance liquid chromatography 942(2001)63

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

Considerations on the temperature dependence of the gas–liquid chromatographic retention 942(2001)211

#### **Thermodynamic parameters**

Considerations on the temperature dependence of the gas–liquid chromatographic retention 942(2001)211

#### **Thiopental**

High-resolution chiral separation using microfluidics-based membrane chromatography 942(2001)115

#### **Thiosulfate**

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

#### **Tobacco**

Optimization of headspace sampling using solid-phase microextraction for volatile components in tobacco 942(2001)33

**Transition metals**

Ionic strength, pH and temperature effects upon selectivity for transition and heavy metal ions when using chelation ion chromatography with an iminodiacetic acid bonded silica gel column and simple inorganic eluents 942(2001)73

**Tryptophan**

High-resolution chiral separation using microfluidics-based membrane chromatography 942(2001)115

**Volatile compounds**

Optimization of headspace sampling using solid-phase microextraction for volatile components in tobacco 942(2001)33

**Volatile organic compounds**

Rapid determination of volatile constituents of *Michelia alba* flowers by gas chromatography–mass spectrometry with solid-phase microextraction 942(2001)283

**Wastewater analysis**

Quantification of sulfur and sulfur-containing compounds in wastewaters by means of a combination of liquid chromatographic methods 942(2001)201

**Water analysis**

Determination of phosphonic acid breakdown products by high-performance liquid chromatography after derivatization 942(2001)185

**Wine**

Solid-phase microextraction–gas chromatographic–mass spectrometric method for the determination of the fungicides cyprodinil and fludioxonil in white wines 942(2001)41

**Z<sub>basic</sub> protein domain**

Strategy for highly selective ion-exchange capture using a charge-polarizing fusion partner 942(2001)157
