## Subject Index Vol. 944

### Adenosine monophosphate

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

### Adsorbents

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

### Adsorption

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

### Adsorption isotherms

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

Two-step solvent gradients in simulated moving bed chromatography. Numerical study for linear equilibria 944(2002)77

Separation of binaphthol enantiomers through achiral chromatography 944(2002)225

Impact of adsorption isotherm parameters on the performance of enantioseparation using simulated moving bed chromatography 944(2002)249

### Albumin

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

### Alkaloids

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

### Antibodies

Preparative electrophoresis: a general method for the purification of polyclonal antibodies 944(2002)161

### Antithrombin

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

### Azeotropy

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

### Binaphthol

Separation of binaphthol enantiomers through achiral chromatography 944(2002)225

### Catechins

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

### Cellulases

Comparative study on the fractionation of cellulases on some hydrophobic interaction chromatography adsorbents 944(2002)211

### Column performance

Maintenance of column performance at scale 944(2002)69

### Computer simulation

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

**Curcumin**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Derivatization, LC**

Set-up of large laboratory-scale chromatographic separations of poly(ethylene glycol) derivatives of the growth hormone-releasing factor 1–29 analogue 944(2002)141

**Displacement chromatography**

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

**EMD53986**

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

**Enantiomer separation**

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

Separation of binaphthol enantiomers through achiral chromatography 944(2002)225

Impact of adsorption isotherm parameters on the performance of enantioseparation using simulated moving bed chromatography 944(2002)249

**Enzyme inhibitors**

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

**Enzymes**

Comparative study on the fractionation of cellulases on some hydrophobic interaction chromatography adsorbents 944(2002)211

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Expanded bed adsorption**

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

**Expanded bed chromatography**

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

**Food analysis**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Glucopyranoses**

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Glycoproteins**

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

**Glycosylation**

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Gradient elution**

Two-step solvent gradients in simulated moving bed chromatography. Numerical study for linear equilibria 944(2002)77

**Gradiflow**

Preparative electrophoresis: a general method for the purification of polyclonal antibodies 944(2002)161

**Growth hormone releasing factor**

Set-up of large laboratory-scale chromatographic separations of poly(ethylene glycol) derivatives of the growth hormone-releasing factor 1–29 analogue 944(2002)141

**Heat of adsorption**

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

**Hydrophobic interaction chromatography**

Hydrophobic interaction chromatography of homo-oligonucleotides on derivatized Sepharose CL-6B. Application of the solvophobic theory 944(2002)119

Comparative study on the fractionation of cellulases on some hydrophobic interaction chromatography adsorbents 944(2002)211

**Immunoglobulins**

Preparative electrophoresis: a general method for the purification of polyclonal antibodies 944(2002)161

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179

**Indolocarbazoles**

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Inositol phosphates**

Scale-up potential of ion-pair high-performance liquid chromatography method to produce biologically active inositol phosphates 944(2002)241

**Instrumentation**

Preparative electrophoresis: a general method for the purification of polyclonal antibodies 944(2002)161

**Ion-exchange chromatography**

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

**Ionone**

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

**Isoflavones**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Kraft pulp**

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

**Lysozyme**

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

**Maleimides**

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Mandelic acid**

Impact of adsorption isotherm parameters on the performance of enantioseparation using simulated moving bed chromatography 944(2002)249

**Mathematical modelling**

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

Two-step solvent gradients in simulated moving bed chromatography. Numerical study for linear equilibria 944(2002)77

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

Separation of binaphthol enantiomers through achiral chromatography 944(2002)225

**Membrane chromatography**

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

**Milk**

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

**Mitsunobu reaction**

Efficient reversed-phase purification of a hydrophobic reaction product following Mitsunobu-mediated glycosylation 944(2002)263

**Mobile phase composition**

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

**Oligonucleotides**

Hydrophobic interaction chromatography of homo-oligonucleotides on derivatized Sepharose CL-6B. Application of the solvophobic theory 944(2002)119

**Optimization**

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

**Ovalbumin**

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

**Particle Size**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Peptides**

Set-up of large laboratory-scale chromatographic separations of poly(ethylene glycol) derivatives of the growth hormone-releasing factor 1–29 analogue 944(2002)141

Reversed-phase poly(styrene–divinylbenzene) materials optimised for large scale preparative and process purification of synthetic peptides and recombinant proteins 944(2002)169

**Phosphates**

Scale-up potential of ion-pair high-performance liquid chromatography method to produce biologically active inositol phosphates 944(2002)241

**Phthalates**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Phytic acid**

Scale-up potential of ion-pair high-performance liquid chromatography method to produce biologically active inositol phosphates 944(2002)241

**Poly(diallyldimethylammonium chloride)**

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

**Poly(ethylene glycol)**

Set-up of large laboratory-scale chromatographic separations of poly(ethylene glycol) derivatives of the growth hormone-releasing factor 1–29 analogue 944(2002)141

**Poly(styrene–divinylbenzene)**

Reversed-phase poly(styrene–divinylbenzene) materials optimised for large scale preparative and process purification of synthetic peptides and recombinant proteins 944(2002)169

**Porosity**

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

**Preparative chromatography**

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

Maintenance of column performance at scale 944(2002)69

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

Set-up of large laboratory-scale chromatographic separations of poly(ethylene glycol) derivatives of the growth hormone-releasing factor 1–29 analogue 944(2002)141

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

Reversed-phase poly(styrene–divinylbenzene) materials optimised for large scale preparative and process purification of synthetic peptides and recombinant proteins 944(2002)169

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

Scale-up potential of ion-pair high-performance liquid chromatography method to produce biologically active inositol phosphates 944(2002)241

Impact of adsorption isotherm parameters on the performance of enantioseparation using simulated moving bed chromatography 944(2002)249

**Preparative electrophoresis**

Preparative electrophoresis: a general method for the purification of polyclonal antibodies 944(2002)161

**Proteins**

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

Reversed-phase poly(styrene–divinylbenzene) materials optimised for large scale preparative and process purification of synthetic peptides and recombinant proteins 944(2002)169

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

Recovery of antithrombin III from milk by expanded bed chromatography 944(2002)203

**Pseudoaffinity separations**

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179

**Salt gradients**

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

**Simulated moving bed chromatography**

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

Two-step solvent gradients in simulated moving bed chromatography. Numerical study for linear equilibria 944(2002)77

Optimal design of batch and simulated moving bed chromatographic separation processes 944(2002)93

Optimization of azeotropic protein separations in gradient and isocratic ion-exchange simulated moving bed chromatography 944(2002)189

Impact of adsorption isotherm parameters on the performance of enantioseparation using simulated moving bed chromatography 944(2002)249

**Solvent gradients**

Solvent gradient operation of simulated moving beds. I. Linear isotherms 944(2002)23

**Soybean**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Stationary phases, LC**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

Reversed-phase poly(styrene–divinylbenzene) materials optimised for large scale preparative and process purification of synthetic peptides and recombinant proteins 944(2002)169

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179

Comparative study on the fractionation of cellulases on some hydrophobic interaction chromatography adsorbents 944(2002)211

**Steric mass action model**

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

**Surface**

Mass influences in the performance of oligomeric poly(diallyldimethylammonium chloride) as displacer for cation-exchange displacement chromatography of proteins 944(2002)149

**Tea**

Characterization of synthetic adsorbents with fine particle sizes for preparative-scale chromatographic separation 944(2002)41

**Thermodynamic parameters**

Characterization of enthalpic events in overloaded ion-exchange chromatography 944(2002)61

**Thyroglobulin**

Performance and scale-up of adsorptive membrane chromatography 944(2002)129

***Trichoderma reesei***

Comparative study on the fractionation of cellulases on some hydrophobic interaction chromatography adsorbents 944(2002)211

**Tröger's base**

Effect of the homogeneity of the column set on the performance of a simulated moving bed unit. II. Experimental study 944(2002)3

**True moving beds**

Two-step solvent gradients in simulated moving bed chromatography. Numerical study for linear equilibria 944(2002)77

**Xylanase**

Preparative chromatography of xylanase using expanded bed adsorption 944(2002)217

**Zirconia**

Use of a modified zirconia support in the separation of immunoproteins 944(2002)179
