## Subject Index Vol. 955

### Activity coefficients

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

### Adsorption isotherm

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

### Air analysis

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

### Albumin

Use of a linear gradient flow program for liquid chromatography–mass spectrometry protein-binding studies 955(2002)237

### Alcohols

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

### Aldehydes

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

### Alkaline earth ions

Ethylenediamine as eluent component in cation chromatography. Predictive and comparative study for analysis of alkaline earth ions 955(2002)1

### Alkaloids

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

### Amines, aromatic

Harmful azo colorants in leather. Determination based on their cleavage and extraction of corresponding carcinogenic aromatic amines using modern extraction techniques 955(2002)215

### Amino acids

New triazine spectroscopic reagent for the separation of DL-amino acids by micellar electrokinetic chromatography 955(2002)125

Chiral separation of amino acids derivatized with fluoresceine-5-isothiocyanate by capillary electrophoresis and laser-induced fluorescence detection using mixed selectors of  $\beta$ -cyclodextrin and sodium taurocholate 955(2002)133

Direct high-performance liquid chromatographic enantioseparation of apolar  $\beta$ -amino acids on a quinine-derived chiral anion-exchanger stationary phase 955(2002)141

### Anion-exchangers

Ion-exchange separation of proteins by polyallylamine-grafted cellulose gel 955(2002)191

Studies on separation of rare earth elements on various types of anion-exchangers in the  $C_3H_7OH-7 M HNO_3$  systems 955(2002)257

### Azo dyes

Harmful azo colorants in leather. Determination based on their cleavage and extraction of corresponding carcinogenic aromatic amines using modern extraction techniques 955(2002)215

### Carbon loads

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

### Carbonyl compounds

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

### *Catharanthus roseus*

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

### Cellulose

Ion-exchange separation of proteins by polyallylamine-grafted cellulose gel 955(2002)191

**Chiral stationary phases, LC**

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

Separation of chiral sulfoxides by liquid chromatography using macrocyclic glycopeptide chiral stationary phases 955(2002)53

Amino-bonded silica as stationary phase for liquid chromatographic determination of cyclopiazonic acid in fungal extracts 955(2002)79

Direct high-performance liquid chromatographic enantioseparation of apolar  $\beta$ -amino acids on a quinine-derived chiral anion-exchanger stationary phase 955(2002)141

**Continuous-flow liquid membrane extraction**

Determination of sulfonyleurea herbicides by continuous-flow liquid membrane extraction on-line coupled with high-performance liquid chromatography 955(2002)183

**Critical interaction mode**

Theory of liquid chromatography of mono- and difunctional macromolecules. I. Studies in the critical interaction mode 955(2002)9

 **$\beta$ -Cyclodextrin**

Chiral separation of amino acids derivatized with fluoresceine-5-isothiocyanate by capillary electrophoresis and laser-induced fluorescence detection using mixed selectors of  $\beta$ -cyclodextrin and sodium taurocholate 955(2002)133

**Cyclodextrins**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Cyclopiazonic acid**

Amino-bonded silica as stationary phase for liquid chromatographic determination of cyclopiazonic acid in fungal extracts 955(2002)79

**Derivatisation, LC**

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245

**Derivatization, electrophoresis**

New triazine spectroscopic reagent for the separation of DL-amino acids by micellar electrokinetic chromatography 955(2002)125

**Derivatization, GC**

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

**Derivatisation, electrophoresis**

Chiral separation of amino acids derivatized with fluoresceine-5-isothiocyanate by capillary electrophoresis and laser-induced fluorescence detection using mixed selectors of  $\beta$ -cyclodextrin and sodium taurocholate 955(2002)133

**Dichlorotriazinylamino-dimethylaminomethylphenazine**

New triazine spectroscopic reagent for the separation of DL-amino acids by micellar electrokinetic chromatography 955(2002)125

**Drugs**

Use of a linear gradient flow program for liquid chromatography-mass spectrometry protein-binding studies 955(2002)237

**Dual-field and flow-programming**

Field and flow programming in frit-inlet asymmetrical flow field-flow fractionation 955(2002)263

**Enantiomer separation**

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

Separation of chiral sulfoxides by liquid chromatography using macrocyclic glycopeptide chiral stationary phases 955(2002)53

New triazine spectroscopic reagent for the separation of DL-amino acids by micellar electrokinetic chromatography 955(2002)125

Chiral separation of amino acids derivatized with fluoresceine-5-isothiocyanate by capillary electrophoresis and laser-induced fluorescence detection using mixed selectors of  $\beta$ -cyclodextrin and sodium taurocholate 955(2002)133

Direct high-performance liquid chromatographic enantioseparation of apolar  $\beta$ -amino acids on a quinine-derived chiral anion-exchanger stationary phase 955(2002)141

**Equilibrium-dispersive model**

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

**Esters**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Estrogens**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Ethylenediamine**

Ethylenediamine as eluent component in cation chromatography. Predictive and comparative study for analysis of alkaline earth ions 955(2002)1

**Extraction methods**

Harmful azo colorants in leather. Determination based on their cleavage and extraction of corresponding carcinogenic aromatic amines using modern extraction techniques 955(2002)215

**Field programming**

Different elution modes and field programming in gravitational field-flow fractionation. IV. Field programming achieved with channels of non-constant cross-sections 955(2002)95

**Field-flow fractionation**

Different elution modes and field programming in gravitational field-flow fractionation. IV. Field programming achieved with channels of non-constant cross-sections 955(2002)95

Field and flow programming in frit-inlet asymmetrical flow field-flow fractionation 955(2002)263

**Flow-velocity gradients**

Different elution modes and field programming in gravitational field-flow fractionation. IV. Field programming achieved with channels of non-constant cross-sections 955(2002)95

**Frit inlet asymmetrical flow field-flow fractionation**

Field and flow programming in frit-inlet asymmetrical flow field-flow fractionation 955(2002)263

**Fumonisin**

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245

***Fusarium* spp.**

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245

**Glutaraldehyde**

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

**Glycopeptides**

Separation of chiral sulfoxides by liquid chromatography using macrocyclic glycopeptide chiral stationary phases 955(2002)53

**Gradient elution**

Use of a linear gradient flow program for liquid chromatography–mass spectrometry protein-binding studies 955(2002)237

**Gravitational field-flow fractionation**

Different elution modes and field programming in gravitational field-flow fractionation. IV. Field programming achieved with channels of non-constant cross-sections 955(2002)95

**Hold-up time**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Honey**

Rapid determination of minority organic acids in honey by high-performance liquid chromatography 955(2002)207

**Hormones**

Separation and detection of neuroactive steroids from biological matrices (Review) 955(2002)151

Reversed-phase high-performance liquid chromatography method for the determination of prolactin in bacterial extracts and in its purified form 955(2002)229

**Hydrodynamic lift forces**

Different elution modes and field programming in gravitational field-flow fractionation. IV. Field programming achieved with channels of non-constant cross-sections 955(2002)95

**Hydrodynamic relaxation**

Field and flow programming in frit-inlet asymmetrical flow field-flow fractionation 955(2002)263

**Immobilized proteins**

Use of a linear gradient flow program for liquid chromatography–mass spectrometry protein-binding studies 955(2002)237

**Indoles**

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

**Iridoids**

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

**Lipids**

Separation and detection of neuroactive steroids from biological matrices (Review) 955(2002)151

**Mathematical modelling**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Microwave-assisted extraction**

Harmful azo colorants in leather. Determination based on their cleavage and extraction of corresponding carcinogenic aromatic amines using modern extraction techniques 955(2002)215

**Mobile phase composition**

Ethylenediamine as eluent component in cation chromatography. Predictive and comparative study for analysis of alkaline earth ions 955(2002)1

Studies on separation of rare earth elements on various types of anion-exchangers in the  $C_3H_7OH-7 M HNO_3$  systems 955(2002)257

**Molecular descriptors**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Monoterpenes**

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

**Multilayer adsorption**

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

**Mycotoxins**

Amino-bonded silica as stationary phase for liquid chromatographic determination of cyclopiazonic acid in fungal extracts 955(2002)79

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245

**Neural networks, artificial**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Organic acids**

Rapid determination of minority organic acids in honey by high-performance liquid chromatography 955(2002)207

**Pentafluorobenzylhydroxylamine**

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

**Peptides**

Reversed-phase high-performance liquid chromatography method for the determination of prolactin in bacterial extracts and in its purified form 955(2002)229

**Pesticides**

Determination of sulfonylurea herbicides by continuous-flow liquid membrane extraction on-line coupled with high-performance liquid chromatography 955(2002)183

**Plant materials**

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

**Polarity measurements**

Prediction of the retention in reversed-phase liquid chromatography using solute–mobile phase–stationary phase polarity parameters 955(2002)19

**Polyallylamine**

Ion-exchange separation of proteins by polyallylamine-grafted cellulose gel 955(2002)191

**Polyethylene glycols**

Theory of liquid chromatography of mono- and difunctional macromolecules. I. Studies in the critical interaction mode 955(2002)9

**Polymers**

Theory of liquid chromatography of mono- and difunctional macromolecules. I. Studies in the critical interaction mode 955(2002)9

**Polystyrene sulfonate**

Field and flow programming in frit-inlet asymmetrical flow field-flow fractionation 955(2002)263

**Porous graphitic carbon**

Role of the Na<sup>+</sup> ion on phenol derivatives/hydroxypropyl- $\beta$ -cyclodextrin complex formation on porous graphitic carbon phase 955(2002)197

**Progestogens**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Prolactin**

Reversed-phase high-performance liquid chromatography method for the determination of prolactin in bacterial extracts and in its purified form 955(2002)229

**1-Propanol**

Studies on separation of rare earth elements on various types of anion-exchangers in the C<sub>3</sub>H<sub>7</sub>OH–7 M HNO<sub>3</sub> systems 955(2002)257

**2-Propanol**

Studies on separation of rare earth elements on various types of anion-exchangers in the C<sub>3</sub>H<sub>7</sub>OH–7 M HNO<sub>3</sub> systems 955(2002)257

**Proteins**

Ion-exchange separation of proteins by polyallylamine-grafted cellulose gel 955(2002)191

Reversed-phase high-performance liquid chromatography method for the determination of prolactin in bacterial extracts and in its purified form 955(2002)229

Use of a linear gradient flow program for liquid chromatography–mass spectrometry protein-binding studies 955(2002)237

**Quantitative structure–property relationships**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Rare earth elements**

Studies on separation of rare earth elements on various types of anion-exchangers in the C<sub>3</sub>H<sub>7</sub>OH–7 M HNO<sub>3</sub> systems 955(2002)257

**Regression analysis**

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Retention indices**

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

Simultaneous modeling of the Kovats retention indices on OV-1 and SE-54 stationary phases using artificial neural networks 955(2002)273

**Retention mechanisms**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Retention models**

Ethylenediamine as eluent component in cation chromatography. Predictive and comparative study for analysis of alkaline earth ions 955(2002)1

Theory of liquid chromatography of mono- and difunctional macromolecules. I. Studies in the critical interaction mode 955(2002)9

**Retention prediction**

Prediction of the retention in reversed-phase liquid chromatography using solute–mobile phase–stationary phase polarity parameters 955(2002)19

**Reviews**

Separation and detection of neuroactive steroids from biological matrices (Review) 955(2002)151

**Sodium ion**

Role of the Na<sup>+</sup> ion on phenol derivatives/hydroxypropyl- $\beta$ -cyclodextrin complex formation on porous graphitic carbon phase 955(2002)197

**Sodium taurocholate**

Chiral separation of amino acids derivatized with fluoresceine-5-isothiocyanate by capillary electrophoresis and laser-induced fluorescence detection using mixed selectors of  $\beta$ -cyclodextrin and sodium taurocholate 955(2002)133

**Solid-phase microextraction**

Gas chromatographic determination of glutaraldehyde in the workplace atmosphere after derivatization with *O*-(2,3,4,5,6-pentafluorobenzyl)hydroxylamine on a solid-phase microextraction fibre 955(2002)117

**Stationary phases, LC**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

Ion-exchange separation of proteins by polyallylamine-grafted cellulose gel 955(2002)191

**Steroid hormones**

Separation and detection of neuroactive steroids from biological matrices (Review) 955(2002)151

**Steroids**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

Separation and detection of neuroactive steroids from biological matrices (Review) 955(2002)151

**Sulfonylureas**

Determination of sulfonylurea herbicides by continuous-flow liquid membrane extraction on-line coupled with high-performance liquid chromatography 955(2002)183

**Sulfoxides**

Separation of chiral sulfoxides by liquid chromatography using macrocyclic glycopeptide chiral stationary phases 955(2002)53

**Supercritical fluid extraction**

Harmful azo colorants in leather. Determination based on their cleavage and extraction of corresponding carcinogenic aromatic amines using modern extraction techniques 955(2002)215

**Temperature effects**

Chromatographic behaviour of selected steroids and their inclusion complexes with  $\beta$ -cyclodextrin on octadecylsilica stationary phases with different carbon loads 955(2002)71

**Terpenes**

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

**Terpenoids**

Screening of *Catharanthus roseus* secondary metabolites by high-performance liquid chromatography 955(2002)87

**Thermodynamic parameters**

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

**Trace enrichment**

Determination of sulfonylurea herbicides by continuous-flow liquid membrane extraction on-line coupled with high-performance liquid chromatography 955(2002)183

**Triazines**

New triazine spectroscopic reagent for the separation of DL-amino acids by micellar electrokinetic chromatography 955(2002)125

**Trichothecenes**

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245

**Tröger's base**

Measurement and modeling of the equilibrium behavior of the Tröger's base enantiomers on an amylose-based chiral stationary phase 955(2002)35

**Vapour pressures**

Gas chromatographic determination of vapour pressure and related thermodynamic properties of monoterpenes and biogenically related compounds 955(2002)105

**Zearalenone**

Liquid chromatographic determination of toxigenic secondary metabolites produced by *Fusarium* strains 955(2002)245
