Subject Index Vol. 965

Adsorbents

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Bypass HPLC

Bypass high-performance liquid chromatography for purification of trace analytes 965(2002)233

Chiral non-racemic metal β -diketonates

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Columns

Monolithic silica columns for high-efficiency chromatographic separations (Review) 965(2002)35

Column temperature

Temperature selectivity in reversed-phase high performance liquid chromatography (Review) 965(2002)195

Comprehensive two-dimensional gas chromatography

Comprehensive two-dimensional gas chromatography with time-of-flight mass spectrometric detection applied to the determination of pesticides in food extracts 965(2002)207

Computer simulation

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions (Review) 965(2002)93

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Critical chromatography

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions 965(2002)93

C-term

Expressions for the C-term in the presence of pore flow 965(2002)75

Dispersion

Expressions for the C-term in the presence of pore flow 965(2002)75

DryLab

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Electrochromatography

Expressions for the C-term in the presence of pore flow 965(2002)75

Capillary electrochromatography of proteins with polymer-based strong-cation-exchanger microspheres 965(2002)83

Enantiomeric separation

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Enantiorecognition

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Enantioselective complexation

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Enantioselectivity

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Food analysis

Comprehensive two-dimensional gas chromatography with time-of-flight mass spectrometric detection applied to the determination of pesticides in food extracts 965(2002)207

Gradient elution

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions 965(2002)93

Lipophilicity and pK_a estimates from gradient high-performance liquid chromatography 965(2002)117

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Hemoperfusion

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Hydrophobicity

Lipophilicity and pK_a estimates from gradient high-performance liquid chromatography 965(2002)117

Hypercross-linked polystyrene

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Industrial chromatography

Preparative liquid chromatography (Review) 965(2002)129

Isoenantioselective temperature

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Iterative subtraction

Comparison of methods for characterization of reversed-phase liquid chromatographic selectivity 965(2002)301

Linear free energy relationships

Comparison of methods for characterization of reversed-phase liquid chromatographic selectivity 965(2002)301

Linear solvation energy relationship

Comparative study of the linear solvation energy relationship, linear solvent strength theory, and typical-conditions model for retention prediction in reversed-phase liquid chromatography 965(2002)3

Linear solvation relationships

Comparison of methods for characterization of reversed-phase liquid chromatographic selectivity 965(2002)301

Linear solvent strength theory

Comparative study of the linear solvation energy relationship, linear solvent strength theory, and typical-conditions model for retention prediction in reversed-phase liquid chromatography 965(2002)3

Lipophilicity

Lipophilicity and pK_a estimates from gradient high-performance liquid chromatography 965(2002)117

Liquid–solid chromatography

Mechanistic molecular model of liquid–solid chromatography. Retention–eluent composition relationships (Review) 965(2002)109

Mass transfer

Expressions for the C-term in the presence of pore flow 965(2002)75

Method development

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Mobile phase composition

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Models of chromatography

Preparative liquid chromatography (Review) 965(2002)129

Monolithic columns

Comparison of conventional microparticulate and a monolithic reversed-phase column for high-efficiency fast liquid chromatography of basic compounds 965(2002)51

Monolithic silica columns

Monolithic silica columns for high-efficiency chromatographic separations (Review) 965(2002)35

Non-linear chromatography

Preparative liquid chromatography (Review) 965(2002)129

Nucleic acids

Perspectives on analyses of nucleic acid constituents: the basis of genomics (Review) 965(2002)163

Nucleobases

Perspectives on analyses of nucleic acid constituents: the basis of genomics (Review) 965(2002)163

Nucleosides

Perspectives on analyses of nucleic acid constituents: the basis of genomics (Review) 965(2002)163

Nucleotides

Perspectives on analyses of nucleic acid constituents: the basis of genomics (Review) 965(2002)163

Pesticides

Comprehensive two-dimensional gas chromatography with time-of-flight mass spectrometric detection applied to the determination of pesticides in food extracts 965(2002)207

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Pharmaceuticals

Comparison of conventional microparticulate and a monolithic reversed-phase column for high-efficiency fast liquid chromatography of basic compounds 965(2002)51

Phenylureas

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

 pK_a

Lipophilicity and pK_a estimates from gradient high-performance liquid chromatography 965(2002)117

Plate height

Expressions for the C-term in the presence of pore flow 965(2002)75

Polar adsorbents

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Polydisperse polymers

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions 965(2002)93

Polymeric networks

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Polymers

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions 965(2002)93

Pore flow

Expressions for the C-term in the presence of pore flow 965(2002)75

Preconcentration

Sweeping: concentration mechanism and applications to high-sensitivity analysis in capillary electrophoresis (Review) 965(2002)357

Preparative liquid chromatography

Preparative liquid chromatography (Review) 965(2002)129

Principal component analysis

Comparison of methods for characterization of reversed-phase liquid chromatographic selectivity 965(2002)301

Proteins

Capillary electrochromatography of proteins with polymer-based strong-cation-exchanger microspheres 965(2002)83

Quality control

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Resolution

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Resolution map

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Retention

Column selectivity from the perspective of the solvation parameter model (Review) 965(2002)263

Retention behaviour

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Retention models

Comparative study of the linear solvation energy relationship, linear solvent strength theory, and typical-conditions model for retention prediction in reversed-phase liquid chromatography 965(2002)3

Predicting the behaviour of polydisperse polymers in liquid chromatography under isocratic and gradient conditions 965(2002)93

Retention prediction

Comparative study of the linear solvation energy relationship, linear solvent strength theory, and typical-conditions model for retention prediction in reversed-phase liquid chromatography 965(2002)3

Retention–eluent composition relationship

Mechanistic molecular model of liquid–solid chromatography. Retention–eluent composition relationships (Review) 965(2002)109

Reviews

Monolithic silica columns for high-efficiency chromatographic separations (Review) 965(2002)35

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Mechanistic molecular model of liquid–solid chromatography. Retention–eluent composition relationships (Review) 965(2002)109

Preparative liquid chromatography (Review) 965(2002)129

Perspectives on analyses of nucleic acid constituents: the basis of genomics (Review) 965(2002)163

Computerized design of separation strategies by reversed-phase liquid chromatography: development of DryLab software (Review) 965(2002)175

Temperature selectivity in reversed-phase high performance liquid chromatography (Review) 965(2002)195

The measurement and meaning of void volumes in reversed-phase liquid chromatography (Review) 965(2002)219

Column selectivity from the perspective of the solvation parameter model (Review) 965(2002)263

Practice and theory of enantioselective complexation gas chromatography (Review) 965(2002)315

Sweeping: concentration mechanism and applications to high-sensitivity analysis in capillary electrophoresis (Review) 965(2002)357

Selectivity

Column selectivity from the perspective of the solvation parameter model (Review) 965(2002)263

Comparison of methods for characterization of reversed-phase liquid chromatographic selectivity 965(2002)301

Silica-based column packings

Atypical silica-based column packings for high-performance liquid chromatography 965(2002)25

Snyder– Soczewinski model

Mechanistic molecular model of liquid–solid chromatography. Retention–eluent composition relationships (Review) 965(2002)109

Solid phase extraction

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Solvation parameter model

Column selectivity from the perspective of the solvation parameter model (Review) 965(2002)263

Solvent uptake

Gradient elution in normal-phase high-performance liquid chromatographic systems 965(2002)239

Stationary phases

Column selectivity from the perspective of the solvation parameter model (Review) 965(2002)263

Stationary phases, electrochromatography

Capillary electrochromatography of proteins with polymer-based strong-cation-exchanger microspheres 965(2002)83

Stationary phases, LC

Atypical silica-based column packings for high-performance liquid chromatography 965(2002)25

Monolithic silica columns for high-efficiency chromatographic separations (Review) 965(2002)35

Comparison of conventional microparticulate and a monolithic reversed-phase column for high-efficiency fast liquid chromatography of basic compounds 965(2002)51

Hypercross-linked polystyrene and its potentials for liquid chromatography: a mini-review (Review) 965(2002)65

Sweeping

Sweeping: concentration mechanism and applications to high-sensitivity analysis in capillary electrophoresis (Review) 965(2002)357

Temperature selectivity

Temperature selectivity in reversed-phase high performance liquid chromatography (Review) 965(2002)195

Theory of chromatography

Preparative liquid chromatography (Review) 965(2002)129

Trace analysis

Bypass high-performance liquid chromatography for purification of trace analytes 965(2002)233

Typical-conditions model

Comparative study of the linear solvation energy relationship, linear solvent strength theory, and typical-conditions model for retention prediction in reversed-phase liquid chromatography 965(2002)3

Vegetables

Comprehensive two-dimensional gas chromatography with time-of-flight mass spectrometric detection applied to the determination of pesticides in food extracts 965(2002)207

Void volume

The measurement and meaning of void volumes in reversed-phase liquid chromatography (Review) 965(2002)219
