

Subject Index Vol. 1009

Affinity adsorbents

Characterization of *p*-aminobenzamidine-based sorbent and its use for high-performance affinity chromatography of trypsin-like proteases 1009(2003)133

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Affinity sorbents

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Albumin

Characterization of recombinant human serum albumin using matrix-assisted laser desorption/ionization time-of-flight mass spectrometry 1009(2003)111

Sample preparation of human serum for the analysis of tumor markers. Comparison of different approaches for albumin and γ -globulin depletion 1009(2003)171

Aminobenzamidine

Characterization of *p*-aminobenzamidine-based sorbent and its use for high-performance affinity chromatography of trypsin-like proteases 1009(2003)133

Annular chromatography

Continuous matrix-assisted refolding of proteins 1009(2003)119

Antibodies

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

Next generation of protein microarray support materials: Evaluation for protein and antibody microarray applications 1009(2003)97

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Binding domains

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Biosensors

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

Chip technology

Next generation of protein microarray support materials: Evaluation for protein and antibody microarray applications 1009(2003)97

Coaxial liquid sheath flow

Analysis of non-covalent protein complexes by capillary electrophoresis–time-of-flight mass spectrometry 1009(2003)147

Coiled-coils

Temperature profiling of polypeptides in reversed-phase liquid chromatography. II. Monitoring of folding and stability of two-stranded α -helical coiled-coils 1009(2003)45

Column length

Effect of chromatographic conditions on resolution in high-performance ion-exchange chromatography of proteins on nonporous support 1009(2003)141

Cytochromes

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Detection, LC

Analysis of aggregates of human immunoglobulin G using size-exclusion chromatography, static and dynamic light scattering 1009(2003)89

DNA

Chromatographic behaviour and purification of linear lambda phage and plasmid DNA molecules on 2-hydroxyethyl methacrylate–ethylene dimethacrylate-based supports 1009(2003)207

Efficiency

Separation of structurally related synthetic peptides by capillary zone electrophoresis 1009(2003)3

Electrochromatography

Separation of structurally related peptides by open-tubular capillary electrochromatography using (metallo)porphyrins as the adsorbed stationary phase 1009(2003)73

Enzyme inhibitors

Characterization of *p*-aminobenzamidine-based sorbent and its use for high-performance affinity chromatography of trypsin-like proteases 1009(2003)133

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Enzymes

Characterization of *p*-aminobenzamidine-based sorbent and its use for high-performance affinity chromatography of trypsin-like proteases 1009(2003)133

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Purification and partial characterization by matrix-assisted laser desorption ionization time-of-flight mass spectrometry of the recombinant transposase, TniA 1009(2003)179

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Escherichia coli

Two-dimensional nano-liquid chromatography–mass spectrometry system for applications in proteomics 1009(2003)197

Ethylene methacrylate

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Globulins

Sample preparation of human serum for the analysis of tumor markers. Comparison of different approaches for albumin and γ -globulin depletion 1009(2003)171

Glycidyl methacrylate

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Gradient elution

Effect of chromatographic conditions on resolution in high-performance ion-exchange chromatography of proteins on nonporous support 1009(2003)141

Hydrodynamic radius

Analysis of aggregates of human immunoglobulin G using size-exclusion chromatography, static and dynamic light scattering 1009(2003)89

Hydrophilic interaction chromatography

Comparison of reversed-phase liquid chromatography and hydrophilic interaction/cation-exchange chromatography for the separation of amphipathic α -helical peptides with L- and D-amino acid substitutions in the hydrophilic face 1009(2003)61

Hydrophobic interaction chromatography

Methodology for predicting the separation of proteins by hydrophobic interaction chromatography and its application to a cell extract 1009(2003)189

Hydrophobicity

Methodology for predicting the separation of proteins by hydrophobic interaction chromatography and its application to a cell extract 1009(2003)189

Hydroxyethyl methacrylate

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Hydroxyethyl methacrylate–ethylene dimethacrylate

Chromatographic behaviour and purification of linear lambda phage and plasmid DNA molecules on 2-hydroxyethyl methacrylate–ethylene dimethacrylate-based supports 1009(2003)207

Immobilized proteins

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Immunoglobulins

Analysis of aggregates of human immunoglobulin G using size-exclusion chromatography, static and dynamic light scattering 1009(2003)89

Ion-exchange chromatography

Effect of chromatographic conditions on resolution in high-performance ion-exchange chromatography of proteins on nonporous support 1009(2003)141

Kinetic studies

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

Light-scattering detection

Analysis of aggregates of human immunoglobulin G using size-exclusion chromatography, static and dynamic light scattering 1009(2003)89

Lupinus albus

Analysis of proteins in the spent culture medium of *Lupinus albus* by electrospray ionisation tandem mass spectrometry 1009(2003)105

Magnetic sorbents

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Mass spectrometry

Analysis of non-covalent protein complexes by capillary electrophoresis–time-of-flight mass spectrometry 1009(2003)147

Matrix-assisted refolding

Continuous matrix-assisted refolding of proteins 1009(2003)119

Matrix metalloproteinases

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Metalloporphyrins

Separation of structurally related peptides by open-tubular capillary electrochromatography using (metallo)porphyrins as the adsorbed stationary phase 1009(2003)73

Metalloproteinases

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Mixed-mode chromatography

Comparison of reversed-phase liquid chromatography and hydrophilic interaction/cation-exchange chromatography for the separation of amphipathic α -helical peptides with L- and D-amino acid substitutions in the hydrophilic face 1009(2003)61

Molten globular state

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Monolithic columns

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Oligonucleotides

Rigid polymeric: the future of oligonucleotide analysis and purification 1009(2003)223

Optimisation

Methodology for predicting the separation of proteins by hydrophobic interaction chromatography and its application to a cell extract 1009(2003)189

Peak assignment

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Peptides

Separation of structurally related synthetic peptides by capillary zone electrophoresis 1009(2003)3

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Temperature profiling of polypeptides in reversed-phase liquid chromatography. I. Monitoring of dimerization and unfolding of amphipathic α -helical peptides 1009(2003)29

Temperature profiling of polypeptides in reversed-phase liquid chromatography. II. Monitoring of folding and stability of two-stranded α -helical coiled-coils 1009(2003)45

Comparison of reversed-phase liquid chromatography and hydrophilic interaction/cation-exchange chromatography for the separation of amphipathic α -helical peptides with L- and D-amino acid substitutions in the hydrophilic face 1009(2003)61

Separation of structurally related peptides by open-tubular capillary electrochromatography using (metallo)porphyrins as the adsorbed stationary phase 1009(2003)73

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

Peptide mass fingerprinting

Characterization of recombinant human serum albumin using matrix-assisted laser desorption ionization time-of-flight mass spectrometry 1009(2003)111

Polypeptides

Temperature profiling of polypeptides in reversed-phase liquid chromatography. I. Monitoring of dimerization and unfolding of amphipathic α -helical peptides 1009(2003)29

Temperature profiling of polypeptides in reversed-phase liquid chromatography. II. Monitoring of folding and stability of two-stranded α -helical coiled-coils 1009(2003)45

Porphyrins

Separation of structurally related peptides by open-tubular capillary electrochromatography using (metallo)porphyrins as the adsorbed stationary phase 1009(2003)73

Post-source decay

Characterization of recombinant human serum albumin using matrix-assisted laser desorption ionization time-of-flight mass spectrometry 1009(2003)111

Proteinase K

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Proteins

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

Analysis of aggregates of human immunoglobulin G using size-exclusion chromatography, static and dynamic light scattering 1009(2003)89

Next generation of protein microarray support materials: Evaluation for protein and antibody microarray applications 1009(2003)97

Analysis of proteins in the spent culture medium of *Lupinus albus* by electrospray ionisation tandem mass spectrometry 1009(2003)105

Characterization of recombinant human serum albumin using matrix-assisted laser desorption ionization time-of-flight mass spectrometry 1009(2003)111

Continuous matrix-assisted refolding of proteins 1009(2003)119

Effect of chromatographic conditions on resolution in high-performance ion-exchange chromatography of proteins on nonporous support 1009(2003)141

Analysis of non-covalent protein complexes by capillary electrophoresis–time-of-flight mass spectrometry 1009(2003)147

Sample preparation of human serum for the analysis of tumor markers. Comparison of different approaches for albumin and γ -globulin depletion 1009(2003)171

Methodology for predicting the separation of proteins by hydrophobic interaction chromatography and its application to a cell extract 1009(2003)189

Two-dimensional nano-liquid chromatography–mass spectrometry system for applications in proteomics 1009(2003)197

Proteomics

Activity-based enrichment of matrix metalloproteinases using reversible inhibitors as affinity ligands 1009(2003)155

Two-dimensional nano-liquid chromatography–mass spectrometry system for applications in proteomics 1009(2003)197

Resolution

Effect of chromatographic conditions on resolution in high-performance ion-exchange chromatography of proteins on nonporous support 1009(2003)141

Resolution maps

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Retention time prediction

Methodology for predicting the separation of proteins by hydrophobic interaction chromatography and its application to a cell extract 1009(2003)189

***Salmonella* spp**

Immunomagnetic separation and detection of *Salmonella* cells using newly designed carriers 1009(2003)215

Selectivity

Separation of structurally related synthetic peptides by capillary zone electrophoresis 1009(2003)3

Separation mechanism

Separation of structurally related synthetic peptides by capillary zone electrophoresis 1009(2003)3

Slalom chromatography

Chromatographic behaviour and purification of linear lambda phage and plasmid DNA molecules on 2-hydroxyethyl methacrylate–ethylene dimethacrylate-based supports 1009(2003)207

Solvent strength theory

Peptide mapping by reversed-phase high-performance liquid chromatography employing silica rod monoliths 1009(2003)15

Stationary phases, electrochromatography

Separation of structurally related peptides by open-tubular capillary electrochromatography using (metallo)porphyrins as the adsorbed stationary phase 1009(2003)73

Stationary phases, LC

Chromatographic behaviour and purification of linear lambda phage and plasmid DNA molecules on 2-hydroxyethyl methacrylate–ethylene dimethacrylate-based supports 1009(2003)207

Rigid polymeric: the future of oligonucleotide analysis and purification 1009(2003)223

Temperature effects

Temperature profiling of polypeptides in reversed-phase liquid chromatography. I. Monitoring of dimerization and unfolding of amphipathic α -helical peptides 1009(2003)29

Temperature profiling of polypeptides in reversed-phase liquid chromatography. II. Monitoring of folding and stability of two-stranded α -helical coiled-coils 1009(2003)45

Thermodynamic parameters

Complex formation of a calcium-dependent antibody: A thermodynamical consideration 1009(2003)81

TniA

Purification and partial characterization by matrix-assisted laser desorption ionization time-of-flight mass spectrometry of the recombinant transposase, TniA 1009(2003)179

Transposase

Purification and partial characterization by matrix-assisted laser desorption ionization time-of-flight mass spectrometry of the recombinant transposase, TniA 1009(2003)179

Two-dimensional liquid chromatography

Two-dimensional nano-liquid chromatography–mass spectrometry system for applications in proteomics 1009(2003)197
