

## Subject Index Vol. 1016

### Adsorption isotherms

Adsorption isotherms and retention behavior of 1,1'-bis (2-naphthol) on CHIRIS AD1 and CHIRIS AD2 columns 1016(2003)143

### Air analysis

Determination of volatile aliphatic amines in air by solid-phase microextraction coupled with gas chromatography with flame ionization detection 1016(2003)1

### Air pollution

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

### Amines

Determination of volatile aliphatic amines in air by solid-phase microextraction coupled with gas chromatography with flame ionization detection 1016(2003)1

### Ammonium

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

### Angelica polysaccharide

Determination of hydroxyl radical by capillary zone electrophoresis with amperometric detection 1016(2003)123

### Anion-exchange ligands

Preparation and characterization of prototypes for multi-modal separation media aimed for capture of negatively charged biomolecules at high salt conditions 1016(2003)21

### Atropisomer separation

Adsorption isotherms and retention behavior of 1,1'-bis (2-naphthol) on CHIRIS AD1 and CHIRIS AD2 columns 1016(2003)143

### Band broadening

Extracolumn band broadening in capillary liquid chromatography 1016(2003)129

### 1,1'-bis(2-Naphthol)

Adsorption isotherms and retention behavior of 1,1'-bis (2-naphthol) on CHIRIS AD1 and CHIRIS AD2 columns 1016(2003)143

### Caffeic acid

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

### Capillary columns

Extracolumn band broadening in capillary liquid chromatography 1016(2003)129

### Capture

Preparation and characterization of prototypes for multi-modal separation media aimed for capture of negatively charged biomolecules at high salt conditions 1016(2003)21

Preparation and characterization of prototypes for multi-modal separation aimed for capture of positively charged biomolecules at high-salt conditions 1016(2003)35

### Cation-exchange ligands

Preparation and characterization of prototypes for multi-modal separation aimed for capture of positively charged biomolecules at high-salt conditions 1016(2003)35

### Ceramide

Isolation of ceramide fractions from skin sample by subcritical chromatography with packed silica and evaporative light scattering detection 1016(2003)111

### Chemometrics

Determination of the volatile chemical constituents of *Notoptergium incium* by gas chromatography–mass spectrometry and iterative or non-iterative chemometrics resolution methods 1016(2003)99

### Chiral stationary phases, LC

Adsorption isotherms and retention behavior of 1,1'-bis (2-naphthol) on CHIRIS AD1 and CHIRIS AD2 columns 1016(2003)143

**Chlorogenic acid**

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

**Cholates**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

**Computer simulation**

Strategy for developing and optimizing liquid chromatography methods in pharmaceutical development using computer-assisted screening and Plackett–Burman experimental design 1016(2003)165

**Congener identification**

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Cost function**

Business-objective-directed, constraint-based multivariate optimization of high-performance liquid chromatography operational parameters 1016(2003)181

**18-Crown-6**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

**Damping gas flow**

Enhanced mass resolution tandem mass spectrometry method for 2,3,7,8-tetrachlorodibenzo-*p*-dioxin detection with ion trap mass spectrometry using high damping gas pressure 1016(2003)249

**Derivatization, LC**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**Electrospray ionization**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**Environmental analysis**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Essential oils**

Determination of the volatile chemical constituents of *Notoptergium incium* by gas chromatography–mass spectrometry and iterative or non-iterative chemometrics resolution methods 1016(2003)99

**Evaporative light scattering detection**

Isolation of ceramide fractions from skin sample by subcritical chromatography with packed silica and evaporative light scattering detection 1016(2003)111

**Evolving window orthogonal projection**

Determination of the volatile chemical constituents of *Notoptergium incium* by gas chromatography–mass spectrometry and iterative or non-iterative chemometrics resolution methods 1016(2003)99

**Extracolumn band broadening**

Extracolumn band broadening in capillary liquid chromatography 1016(2003)129

**Ferulic acid**

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

**Flame retardants**

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Glycans**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**High salt conditions**

Preparation and characterization of prototypes for multi-modal separation media aimed for capture of negatively charged biomolecules at high salt conditions 1016(2003)21

Preparation and characterization of prototypes for multi-modal separation aimed for capture of positively charged biomolecules at high-salt conditions 1016(2003)35

**Hydrophobic interaction chromatography**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

**Hydroxyl radical**

Determination of hydroxyl radical by capillary zone electrophoresis with amperometric detection 1016(2003)123

**Inductively coupled plasma mass spectrometry**

Speciation of Pt(II) and Pt(IV) in spiked extracts from road dust using on-line liquid chromatography–inductively coupled plasma mass spectrometry 1016(2003)223

**Ion chromatography**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

**Isoflavones**

Determination of isoflavones in red clover and related species by high-performance liquid chromatography combined with ultraviolet and mass spectrometric detection 1016(2003)195

**Library of chromatographic media**

Preparation and characterization of prototypes for multi-modal separation media aimed for capture of negatively charged biomolecules at high salt conditions 1016(2003)21

Preparation and characterization of prototypes for multi-modal separation aimed for capture of positively charged biomolecules at high-salt conditions 1016(2003)35

**Lipids**

Isolation of ceramide fractions from skin sample by subcritical chromatography with packed silica and evaporative light scattering detection 1016(2003)111

**Liquid-phase microextraction**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

**Mass spectrometry**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

Enhanced mass resolution tandem mass spectrometry method for 2,3,7,8-tetrachlorodibenzo-*p*-dioxin detection with ion trap mass spectrometry using high damping gas pressure 1016(2003)249

**Matrix-assisted laser desorption ionization**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**Method development**

Strategy for developing and optimizing liquid chromatography methods in pharmaceutical development using computer-assisted screening and Plackett–Burman experimental design 1016(2003)165

**Micelles**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

**Mobile phase composition**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

**Molecular descriptors**

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Multi-modal separation media**

Preparation and characterization of prototypes for multi-modal separation media aimed for capture of negatively charged biomolecules at high salt conditions 1016(2003)21

Preparation and characterization of prototypes for multi-modal separation aimed for capture of positively charged biomolecules at high-salt conditions 1016(2003)35

**Multivariate optimization**

Business-objective-directed, constraint-based multivariate optimization of high-performance liquid chromatography operational parameters 1016(2003)181

**Nitrogenase**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

***Notoptergium incium***

Determination of the volatile chemical constituents of *Notoptergium incium* by gas chromatography–mass spectrometry and iterative or non-iterative chemometrics resolution methods 1016(2003)99

**Octyl-dimethyl-*p*-aminobenzoic acid**

Aqueous photolysis of the sunscreen agent octyl-dimethyl-*p*-aminobenzoic acid. Formation of disinfection byproducts in chlorinated swimming pool water 1016(2003)211

**Oligosaccharides**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**Operational parameter optimization**

Business-objective-directed, constraint-based multivariate optimization of high-performance liquid chromatography operational parameters 1016(2003)181

**Optimization**

Strategy for developing and optimizing liquid chromatography methods in pharmaceutical development using computer-assisted screening and Plackett–Burman experimental design 1016(2003)165

Business-objective-directed, constraint-based multivariate optimization of high-performance liquid chromatography operational parameters 1016(2003)181

**Organochlorine compounds**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

Characterization of polychlorinated aromatic hydrocarbons by reversed-phase liquid chromatography with ultraviolet absorbance and mass spectrometric detection 1016(2003)61

**Orthogonal projection approach**

Determination of the volatile chemical constituents of *Notoptergium incium* by gas chromatography–mass spectrometry and iterative or non-iterative chemometrics resolution methods 1016(2003)99

**Peak resolution**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

**Pesticides**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

**Phenolic acids**

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

**Phenylhydrazine**

Profiling of *N*-linked oligosaccharides using phenylhydrazine derivatization and mass spectrometry 1016(2003)71

**Photodegradation**

Aqueous photolysis of the sunscreen agent octyl-dimethyl-*p*-aminobenzoic acid. Formation of disinfection byproducts in chlorinated swimming pool water 1016(2003)211

**Plackett–Burman design**

Strategy for developing and optimizing liquid chromatography methods in pharmaceutical development using computer-assisted screening and Plackett–Burman experimental design 1016(2003)165

**Plant materials**

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

**Platinum**

Speciation of Pt(II) and Pt(IV) in spiked extracts from road dust using on-line liquid chromatography-inductively coupled plasma mass spectrometry 1016(2003)223

**Polybrominated diphenyl ethers**

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Polychlorinated dibenzodioxins**

Enhanced mass resolution tandem mass spectrometry method for 2,3,7,8-tetrachlorodibenzo-*p*-dioxin detection with ion trap mass spectrometry using high damping gas pressure 1016(2003)249

**Polynuclear aromatic hydrocarbons**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

Characterization of polychlorinated aromatic hydrocarbons by reversed-phase liquid chromatography with ultraviolet absorbance and mass spectrometric detection 1016(2003)61

**Polysaccharides**

Determination of hydroxyl radical by capillary zone electrophoresis with amperometric detection 1016(2003)123

**Proteins**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

**Radical scavengers**

Determination of hydroxyl radical by capillary zone electrophoresis with amperometric detection 1016(2003)123

**Rainwater**

Determination of organic micropollutants in rainwater using hollow fiber membrane/liquid-phase microextraction combined with gas chromatography–mass spectrometry 1016(2003)11

**Red clover**

Determination of isoflavones in red clover and related species by high-performance liquid chromatography combined with ultraviolet and mass spectrometric detection 1016(2003)195

**Retention behavior**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

**Retention prediction**

Predicting gas chromatographic retention times for the 209 polybrominated diphenyl ether congeners 1016(2003)235

**Road dust**

Speciation of Pt(II) and Pt(IV) in spiked extracts from road dust using on-line liquid chromatography-inductively coupled plasma mass spectrometry 1016(2003)223

**Separation performance function**

Business-objective-directed, constraint-based multivariate optimization of high-performance liquid chromatography operational parameters 1016(2003)181

***Smallanthus sonchifolius***

Investigation of phenolic acids in yacon (*Smallanthus sonchifolius*) leaves and tubers 1016(2003)89

**Sodium**

Use of mobile phase 18-crown-6 to improve peak resolution between mono- and divalent metal and amine cations in ion chromatography 1016(2003)155

**Solid-phase microextraction**

Determination of volatile aliphatic amines in air by solid-phase microextraction coupled with gas chromatography with flame ionization detection 1016(2003)1

**Speciation**

Speciation of Pt(II) and Pt(IV) in spiked extracts from road dust using on-line liquid chromatography-inductively coupled plasma mass spectrometry 1016(2003)223

**Subcritical fluid chromatography**

Isolation of ceramide fractions from skin sample by subcritical chromatography with packed silica and evaporative light scattering detection 1016(2003)111

**Sunscreens agents**

Aqueous photolysis of the sunscreen agent octyl-dimethyl-*p*-aminobenzoic acid. Formation of disinfection byproducts in chlorinated swimming pool water 1016(2003)211

**Surfactants**

Use of cholate derivatives with submicellar concentration for controlling selectivity of proteins in hydrophobic interaction chromatography 1016(2003)51

***Trifolium pratense* L**

Determination of isoflavones in red clover and related species by high-performance liquid chromatography combined with ultraviolet and mass spectrometric detection 1016(2003)195

**Volatile organic compounds**

Determination of volatile aliphatic amines in air by solid-phase microextraction coupled with gas chromatography with flame ionization detection 1016(2003)1
