

## Subject Index Vol. 1018

### Adsorption

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

### Adsorption energies

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

### Adsorption isotherms

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

### Aerosols

Method development for the analysis of particle phase substituted methoxy phenols and aromatic acids from biomass burning using capillary electrophoresis/electrospray ionization mass spectrometry (CE/ESI-MS) 1018(2003)105

### Albumin

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

### Amines, aromatic

Analyses of carcinogenic aromatic amines released from harmful azo colorants by *Streptomyces* SP. SS07 1018(2003)117

### Anilines

On-line sample preconcentration of cationic analytes by dynamic pH junction in capillary electrophoresis 1018(2003)251

### Antioxidants

Determination of antioxidant migration levels from low-density polyethylene films into food simulants 1018(2003)53

### Aromatic acids

Method development for the analysis of particle phase substituted methoxy phenols and aromatic acids from biomass burning using capillary electrophoresis/electrospray ionization mass spectrometry (CE/ESI-MS) 1018(2003)105

### Azo dyes

Analyses of carcinogenic aromatic amines released from harmful azo colorants by *Streptomyces* SP. SS07 1018(2003)117

### Biomass burning

Method development for the analysis of particle phase substituted methoxy phenols and aromatic acids from biomass burning using capillary electrophoresis/electrospray ionization mass spectrometry (CE/ESI-MS) 1018(2003)105

### $\beta$ -Blockers

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

### Boswellia

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

### Calorimetry

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

### Capillary electrophoresis

Two-dimensional capillary electrophoresis involving capillary isoelectric focusing and capillary zone electrophoresis 1018(2003)97

### Capillary isoelectric focusing

Two-dimensional capillary electrophoresis involving capillary isoelectric focusing and capillary zone electrophoresis 1018(2003)97

### Carotenes

Advantages of the use of monolithic stationary phases for modelling the retention in sub/supercritical chromatography. Application to *cis/trans*- $\beta$ -carotene separation 1018(2003)225

### Column coupling

Advantages of the use of monolithic stationary phases for modelling the retention in sub/supercritical chromatography. Application to *cis/trans*- $\beta$ -carotene separation 1018(2003)225

**Column packing**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

**Critical liquid chromatography**

Robust isocratic liquid chromatographic separation of functional poly(methyl methacrylate) 1018(2003)19

**Cytochromes**

Performance and reliability of splitless microliter gradient pumps in a metabolic stability study using cytochrome P450/3A4 and capillary liquid chromatography-mass spectrometry 1018(2003)203

**Dialysis interface**

Two-dimensional capillary electrophoresis involving capillary isoelectric focusing and capillary zone electrophoresis 1018(2003)97

**Discrete spacers**

Computer-assisted choice of discrete spacers for anionic isotachopheresis separations 1018(2003)233

**Displacement chromatography**

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyldimethylammonium chloride) as displacer 1018(2003)155

**Diterpenes**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Dynamic pH junction**

On-line sample preconcentration of cationic analytes by dynamic pH junction in capillary electrophoresis 1018(2003)251

**Dynamic sorption**

Choice of procedures for preparative chromatography 1018(2003)129

**Electroosmotic flow**

Two-dimensional capillary electrophoresis involving capillary isoelectric focusing and capillary zone electrophoresis 1018(2003)97

**Environmental analysis**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography-mass detection 1018(2003)1

**Enzymes**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Error analysis**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

**Extracellular fluid protein**

Analyses of carcinogenic aromatic amines released from harmful azo colorants by *Streptomyces* SP. SS07 1018(2003)117

**Extraction methods**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography-mass detection 1018(2003)1

**Fingerprint profiling**

Fingerprint profiling of acid hydrolyzates of polysaccharides extracted from the fruiting bodies and spores of *Lingzhi* by high-performance thin-layer chromatography 1018(2003)85

**Food analysis**

Rapid determination by reversed-phase high-performance liquid chromatography of Vitamins A and E in infant formulas 1018(2003)197

**Frankincense**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Fruit analysis**

Optimization of a new mobile phase to know the complex and real polyphenolic composition: towards a total phenolic index using high-performance liquid chromatography 1018(2003)29

**Gas chromatography, reversed-flow**

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

**Gradient elution**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

**Headspace analysis**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Hydrophobic interaction chromatography**

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

**Infant formulas**

Rapid determination by reversed-phase high-performance liquid chromatography of Vitamins A and E in infant formulas 1018(2003)197

**Inositol phosphates**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Inverse gas chromatography**

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

**Isocratic elution**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

**Isotachopheresis**

Computer-assisted choice of discrete spacers for anionic isotachopheresis separations 1018(2003)233

**Ketoconazole**

Performance and reliability of splitless microliter gradient pumps in a metabolic stability study using cytochrome P450/3A4 and capillary liquid chromatography–mass spectrometry 1018(2003)203

**Linear solvent strength theory**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

**Lingzhi**

Fingerprint profiling of acid hydrolyzates of polysaccharides extracted from the fruiting bodies and spores of Lingzhi by high-performance thin-layer chromatography 1018(2003)85

**Methoxy phenols**

Method development for the analysis of particle phase substituted methoxy phenols and aromatic acids from biomass burning using capillary electrophoresis/electrospray ionization mass spectrometry (CE/ESI-MS) 1018(2003)105

**Midazolame**

Performance and reliability of splitless microliter gradient pumps in a metabolic stability study using cytochrome P450/3A4 and capillary liquid chromatography–mass spectrometry 1018(2003)203

**Migration order prediction**

Computer-assisted choice of discrete spacers for anionic isotachopheresis separations 1018(2003)233

**Mobile phase composition**

Optimization of a new mobile phase to know the complex and real polyphenolic composition: towards a total phenolic index using high-performance liquid chromatography 1018(2003)29

**Molecular interactions**

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

**Monolithic columns**

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyl-dimethylammonium chloride) as displacer 1018(2003)155

Advantages of the use of monolithic stationary phases for modelling the retention in sub/supercritical chromatography. Application to *cis/trans*- $\beta$ -carotene separation 1018(2003)225

**Monoterpenes**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Nitropolynuclear aromatic hydrocarbons**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography–mass detection 1018(2003)1

**Olibanum**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Optimization**

Optimization of a new mobile phase to know the complex and real polyphenolic composition: towards a total phenolic index using high-performance liquid chromatography 1018(2003)29

Choice of procedures for preparative chromatography 1018(2003)129

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

**Packaging materials**

Determination of antioxidant migration levels from low-density polyethylene films into food simulants 1018(2003)53

**Packed capillary**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

**Parcel model**

Further clarifications on the parcel model 1018(2003)125

**Peak purity**

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

**Peak shape**

Further clarifications on the parcel model 1018(2003)125

**Phenolic compounds**

Determination of antioxidant migration levels from low-density polyethylene films into food simulants 1018(2003)53

Method development for the analysis of particle phase substituted methoxy phenols and aromatic acids from biomass burning using capillary electrophoresis/electrospray ionization mass spectrometry (CE/ESI-MS) 1018(2003)105

**Phosphates**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Phytase**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Phytic acid**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Poly(diallyl-dimethylammonium chloride)**

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyl-dimethylammonium chloride) as displacer 1018(2003)155

**Poly(methyl methacrylate)**

Robust isocratic liquid chromatographic separation of functional poly(methyl methacrylate) 1018(2003)19

**Polybutadiene**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

**Polychlorinated biphenyls**

Use of topological indices of polychlorinated biphenyls in structure-retention relationships 1018(2003)63

**Polyethylene**

Determination of antioxidant migration levels from low-density polyethylene films into food simulants 1018(2003)53

**Polymer characterization**

Robust isocratic liquid chromatographic separation of functional poly(methyl methacrylate) 1018(2003)19

**Polynuclear aromatic hydrocarbons**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography-mass detection 1018(2003)1

**Polyphenols**

Optimization of a new mobile phase to know the complex and real polyphenolic composition: towards a total phenolic index using high-performance liquid chromatography 1018(2003)29

**Polypropylene glycol-Sepharose**

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

**Polysaccharides**

Fingerprint profiling of acid hydrolyzates of polysaccharides extracted from the fruiting bodies and spores of *Lingzhi* by high-performance thin-layer chromatography 1018(2003)85

**Preparative chromatography**

Choice of procedures for preparative chromatography 1018(2003)129

**Probability density functions**

Experimental determination of adsorption energies, adsorption isotherms, probability density functions, and lateral molecular interactions on  $C_xH_y/CaO$  systems 1018(2003)213

**Proteins**

Analyses of carcinogenic aromatic amines released from harmful azo colorants by *Streptomyces* SP. SS07 1018(2003)117

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyl-dimethylammonium chloride) as displacer 1018(2003)155

**Pumps**

Performance and reliability of splitless microliter gradient pumps in a metabolic stability study using cytochrome P450/3A4 and capillary liquid chromatography-mass spectrometry 1018(2003)203

**Resolution**

Enhanced calculation of optimal gradient programs in reversed-phase liquid chromatography 1018(2003)183

**Retention mechanism**

Separation of phytic acid and other related inositol phosphates by high-performance ion chromatography and its applications 1018(2003)41

**Retention models**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

**Retention prediction**

Error analysis and performance of different retention models in the transference of data from/to isocratic/gradient elution 1018(2003)169

**Retinol acetate**

Rapid determination by reversed-phase high-performance liquid chromatography of Vitamins A and E in infant formulas 1018(2003)197

**Salt effects**

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

**Sample handling**

On-line sample preconcentration of cationic analytes by dynamic pH junction in capillary electrophoresis 1018(2003)251

**Selectivity**

Choice of procedures for preparative chromatography 1018(2003)129

**Sesquiterpenes**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Soil**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography-mass detection 1018(2003)1

**Solid phase microextraction**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Stationary phases, LC**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyl-dimethylammonium chloride) as displacer 1018(2003)155

**Steric mass action model**

Investigation of particle-based and monolithic columns for cation exchange protein displacement chromatography using poly(diallyl-dimethylammonium chloride) as displacer 1018(2003)155

***Streptomyces* spp.**

Analyses of carcinogenic aromatic amines released from harmful azo colorants by *Streptomyces* SP. SS07 1018(2003)117

**Structure-retention relationships**

Use of topological indices of polychlorinated biphenyls in structure-retention relationships 1018(2003)63

**Supercritical fluid chromatography**

Advantages of the use of monolithic stationary phases for modelling the retention in sub/supercritical chromatography. Application to *cis/trans*- $\beta$ -carotene separation 1018(2003)225

**Temperature effects**

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

**Temperature programming**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

**Terpenoids**

Optimization of headspace solid phase microextraction for gas chromatography/mass spectrometry analysis of widely different volatility and polarity terpenoids in olibanum 1018(2003)73

**Thermodynamic parameters**

Effect of salts and temperature on the adsorption of bovine serum albumin on polypropylene glycol-Sepharose under linear and overloaded chromatographic conditions 1018(2003)137

**Tocopherols**

Rapid determination by reversed-phase high-performance liquid chromatography of Vitamins A and E in infant formulas 1018(2003)197

**Topological indices**

Use of topological indices of polychlorinated biphenyls in structure-retention relationships 1018(2003)63

**Total phenolic index**

Optimization of a new mobile phase to know the complex and real polyphenolic composition: towards a total phenolic index using high-performance liquid chromatography 1018(2003)29

**Two-dimensional capillary electrophoresis**

Two-dimensional capillary electrophoresis involving capillary isoelectric focusing and capillary zone electrophoresis 1018(2003)97

**Ultrasound-assisted extraction**

Ultrasound-assisted extraction of nitropolycyclic aromatic hydrocarbons from soil prior to gas chromatography-mass detection 1018(2003)1

**Vitamins**

Rapid determination by reversed-phase high-performance liquid chromatography of Vitamins A and E in infant formulas 1018(2003)197

**Zirconia**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7

**Zirconium oxide**

Mesoporous polybutadiene-modified zirconia for high-temperature packed capillary liquid chromatography: column preparation and temperature programming stability 1018(2003)7
