

## Subject Index Vol. 1021

### Abscisic acid

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

### Adsorption isotherms

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Adsorption profile

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part I. The interplay of sorbent structure and fluid phase conditions 1021(2003)93

### Affinity energy distribution

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Amine ligands

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

### Amines

Determination of aliphatic amines using *N*-succinimidyl benzoate as a new derivatization reagent in gas chromatography combined with solid-phase microextraction 1021(2003)175

### Amino acids

Liquid chromatographic enantioseparation of spin-labelled β-amino acids 1021(2003)1

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

### Aminopyrenetrisulfonate

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

### Aniline

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Antibiotics

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

### Antiphlogistics

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

### Band profiles

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Basic compounds

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Benzene

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

### Bypass flow system

Split flow and bypass flow systems for monolithic capillary columns in liquid chromatography 1021(2003)55

### Caffeine

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

### Calixarene

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

### Carbohydrates

Application of carbohydrate analysis to verify honey authenticity 1021(2003)145

### Carotenes

Liquid chromatographic determination of geometrical retinol isomers and carotene in enteral feeding formulas 1021(2003)125

### Chip technology

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Chiral stationary phases, LC**

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

**Chitin carbamate**

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

**Column reproducibility**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

**Composite media**

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part I. The interplay of sorbent structure and fluid phase conditions 1021(2003)93

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part II. Impact on chromatographic separations 1021(2003)105

**Confocal laser scanning microscopy**

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part I. The interplay of sorbent structure and fluid phase conditions 1021(2003)93

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part II. Impact on chromatographic separations 1021(2003)105

**Counter-current chromatography**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Cross polarization–magic-angle spinning**

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

**Cross-linking**

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

**Cycloalkylcarbamates**

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

**Derivatization, CC**

Liquid chromatographic enantioseparation of spin-labelled  $\beta$ -amino acids 1021(2003)1

**Derivatization, GC**

Determination of aliphatic amines using *N*-succinimidyl benzoate as a new derivatization reagent in gas chromatography combined with solid-phase microextraction 1021(2003)175

**Derivatization, electrophoresis**

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

**Enantiomer separation**

Liquid chromatographic enantioseparation of spin-labelled  $\beta$ -amino acids 1021(2003)1

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

**Enteral feeding formulas**

Liquid chromatographic determination of geometrical retinol isomers and carotene in enteral feeding formulas 1021(2003)125

**Environmental analysis**

Isolation of poly(propylene glycol)s from water for quantitative analysis by reversed-phase liquid chromatography 1021(2003)11

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

**Ethylbenzene**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Extraction methods**

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

Determination of 39 polybrominated diphenyl ether congeners in sediment samples using fast selective pressurized liquid extraction and purification 1021(2003)165

**Extraterrestrial life detection**

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

**Fatty acids**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Flavin–adenine dinucleotide**

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Flavin coenzymes**

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Flavin mononucleotide**

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Fluorescamine**

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

**Food analysis**

Application of carbohydrate analysis to verify honey authenticity 1021(2003)145

**Frontal analysis**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

**Gasoline**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Gradient elution**

Split flow and bypass flow systems for monolithic capillary columns in liquid chromatography 1021(2003)55

**Grapes**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Halogenated compounds**

Determination of 39 polybrominated diphenyl ether congeners in sediment samples using fast selective pressurized liquid extraction and purification 1021(2003)165

**Headspace analysis**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Honey**

Application of carbohydrate analysis to verify honey authenticity 1021(2003)145

**Hydrophobic interactions**

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

**Ion exchange**

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part II. Impact on chromatographic separations 1021(2003)105

**Isotherm modeling**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

**Ivermectin**

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

**Lipid regulators**

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography–tandem mass spectrometry 1021(2003)133

**Mars exploration**

Chiral separation of fluorescamine-labeled amino acids using microfabricated capillary electrophoresis devices for extraterrestrial exploration 1021(2003)191

**Methyl *tert*-butyl ether**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Mobile phase composition**

Retention of 3,5-dinitrobenzoyl derivatives of linear alcohol polyethoxylates in reversed-phase liquid chromatographic system with acetonitrile–water mobile phase 1021(2003)19

**Monolithic columns**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

Split flow and bypass flow systems for monolithic capillary columns in liquid chromatography 1021(2003)55

**(S)-N-(4-Nitrophenoxycarbonyl)-phenylalanine methoxyethyl ester**

Liquid chromatographic enantioseparation of spin-labelled  $\beta$ -amino acids 1021(2003)1

**Nuclear magnetic resonance spectroscopy**

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

**Oils**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Organic–inorganic hybrid silica**

Studies on a poly(styrene-divinylbenzene)-encapsulated sub-micrometer sized organic–inorganic hybrid silica packing, its synthesis, some of its characteristics and applications 1021(2003)183

**Phenyl carbamates**

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

**1-Phenylethylcarbamates**

High-performance liquid chromatographic enantioseparation using chitin carbamate derivatives as chiral stationary phases 1021(2003)83

**Plant hormones**

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

**Plant materials**

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

**Poly(propylene glycol)**

Isolation of poly(propylene glycol)s from water for quantitative analysis by reversed-phase liquid chromatography 1021(2003)11

**Poly(styrene-divinylbenzene)**

Studies on a poly(styrene-divinylbenzene)-encapsulated sub-micrometer sized organic–inorganic hybrid silica packing, its synthesis, some of its characteristics and applications 1021(2003)183

**Polybrominated diphenyl ethers**

Determination of 39 polybrominated diphenyl ether congeners in sediment samples using fast selective pressurized liquid extraction and purification 1021(2003)165

**Polyethoxylates**

Retention of 3,5-dinitrobenzoyl derivatives of linear alcohol polyethoxylates in reversed-phase liquid chromatographic system with acetonitrile–water mobile phase 1021(2003)19

**Preparative chromatography**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Pressurized liquid extraction**

Determination of 39 polybrominated diphenyl ether congeners in sediment samples using fast selective pressurized liquid extraction and purification 1021(2003)165

**Principal components analysis**

Application of carbohydrate analysis to verify honey authenticity 1021(2003)145

**Propylbenzoate**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

**Protein transport**

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part I. The interplay of sorbent structure and fluid phase conditions 1021(2003)93

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part II. Impact on chromatographic separations 1021(2003)105

**Proteins**

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part I. The interplay of sorbent structure and fluid phase conditions 1021(2003)93

Mechanism and kinetics of protein transport in chromatographic media studied by confocal laser scanning microscopy. Part II. Impact on chromatographic separations 1021(2003)105

**Resorcinarene**

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

**Retention behaviour**

Retention of 3,5-dinitrobenzoyl derivatives of linear alcohol polyethoxylates in reversed-phase liquid chromatographic system with acetonitrile-water mobile phase 1021(2003)19

**Retinol**

Liquid chromatographic determination of geometrical retinol isomers and carotene in enteral feeding formulas 1021(2003)125

**Riboflavin**

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Sediments**

Determination of acidic pharmaceuticals, antibiotics and ivermectin in river sediment using liquid chromatography-tandem mass spectrometry 1021(2003)133

Determination of 39 polybrominated diphenyl ether congeners in sediment samples using fast selective pressurized liquid extraction and purification 1021(2003)165

**Silica**

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

**Solid-phase microextraction**

Reevaluation of headspace solid-phase microextraction and gas chromatography-mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Spin-labelled  $\beta$ -amino acids**

Liquid chromatographic enantioseparation of spin-labelled  $\beta$ -amino acids 1021(2003)1

**Split flow system**

Split flow and bypass flow systems for monolithic capillary columns in liquid chromatography 1021(2003)55

**Stationary phases, CEC**

Studies on a poly(styrene-divinylbenzene)-encapsulated sub-micrometer sized organic-inorganic hybrid silica packing, its synthesis, some of its characteristics and applications 1021(2003)183

**Stationary phases, LC**

Nuclear magnetic resonance analysis of silica gel surfaces modified with mixed, amine-containing ligands 1021(2003)61

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

**Steroids**

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

**Subsecond separations**

Subsecond separation of cellular flavin coenzymes by microchip capillary electrophoresis with laser-induced fluorescence detection 1021(2003)201

**Succinimidyl benzoate**

Determination of aliphatic amines using *N*-succinimidyl benzoate as a new derivatization reagent in gas chromatography combined with solid-phase microextraction 1021(2003)175

**Supercritical fluid extraction**

Supercritical fluid extraction of grape seed oil and subsequent separation of free fatty acids by high-speed counter-current chromatography 1021(2003)117

**Surfactants**

Isolation of poly(propylene glycol)s from water for quantitative analysis by reversed-phase liquid chromatography 1021(2003)11

Retention of 3,5-dinitrobenzoyl derivatives of linear alcohol polyethoxylates in reversed-phase liquid chromatographic system with acetonitrile-water mobile phase 1021(2003)19

**2,3,4,6-Tetra-*O*-acetyl- $\alpha$ -D-glucopyranosyl isothiocyanate**

Liquid chromatographic enantioseparation of spin-labelled  $\beta$ -amino acids 1021(2003)1

**Thioxanthenes**

Characterization of calixarene- and resorcinarene-bonded stationary phases. I. Hydrophobic interactions 1021(2003)71

**Tobacco**

Determination of abscisic acid by capillary electrophoresis with laser-induced fluorescence detection 1021(2003)209

**Toluene**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Toluidine**

Reproducibility of low and high concentration data in reversed-phase liquid chromatography. II. Overloaded band profiles on Chromolith-C<sub>18</sub> 1021(2003)25

**Trimethylbenzenes**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Vitamin A**

Liquid chromatographic determination of geometrical retinol isomers and carotene in enteral feeding formulas 1021(2003)125

**Volatile organic compounds**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Water analysis**

Isolation of poly(propylene glycol)s from water for quantitative analysis by reversed-phase liquid chromatography 1021(2003)11

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157

**Xylenes**

Reevaluation of headspace solid-phase microextraction and gas chromatography–mass spectrometry for the determination of methyl *tert*-butyl ether in water samples 1021(2003)157
