

## Subject Index Vol. 991

### Adsorption isotherms

Theoretical and experimental study of binary perturbation peaks with focus on peculiar retention behaviour and vanishing peaks in chiral liquid chromatography 991(2003)31

### Aglycones

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

### Air-driven pumps

Safety concerns in ultrahigh pressure capillary liquid chromatography using air-driven pumps 991(2003)189

### Allicin

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

### Alliin

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

### Amines, aromatic

New technique using solid-phase extraction for the analysis of aromatic amines in mainstream cigarette smoke 991(2003)99

### Apigenin

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

### Background electrolyte composition

Performance of capillary gel electrophoretic analysis of oligonucleotides coupled on-line with electrospray mass spectrometry 991(2003)129

### Band broadening

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

### Betahistine dihydrochloride

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

### Caragana Jubata

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

### Carbon composite electrodes

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

### Carbon dioxide

Chemical compositional separation of styrene–methyl methacrylate copolymers using high-performance liquid chromatography with liquefied carbon dioxide as eluent 991(2003)197

### Catechins

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

### Cation-exchange chromatofocusing

High-performance cation-exchange chromatofocusing of proteins 991(2003)117

### Chloride

Efficiency and characteristics of solid-phase (ion-exchange) extraction for removal of Cl<sup>−</sup> matrix 991(2003)23

### Chromatofocusing

High-performance cation-exchange chromatofocusing of proteins 991(2003)117

### Cigarette smoke

New technique using solid-phase extraction for the analysis of aromatic amines in mainstream cigarette smoke 991(2003)99

### Color additives

Separation and quantitation of components in FD&C Red No. 3 using capillary electrophoresis 991(2003)275

**Column packing**

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

**Computational fluid dynamics simulations**

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

**Computer simulation**

Computer-assisted method development and optimization in HPLC 991(2003)281

**Computer-assisted optimization**

Computer-assisted method development and optimization in HPLC 991(2003)281

**Deoxyalliin**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Derivatisation, GC**

Derivatisation and gas chromatography–chemical ionisation mass spectrometry of selected synthetic and natural endocrine disruptive chemicals 991(2003)77

**Derivatization, GC**

Determination of ethylene oxide by solid-phase microextraction device with on-fiber derivatization 991(2003)1

**Detection, electrophoresis**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**Dihydroxyflavone**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Dopamine**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**DryLab**

Computer-assisted method development and optimization in HPLC 991(2003)281

**Dyes**

Separation and quantitation of components in FD&C Red No. 3 using capillary electrophoresis 991(2003)275

**Electrochemical detection**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**Electrodes**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**Elution temperature**

Extending the range of compounds amenable for gas chromatography–mass spectrometric analysis 991(2003)217

**Enantiomer separation**

Theoretical and experimental study of binary perturbation peaks with focus on peculiar retention behaviour and vanishing peaks in chiral liquid chromatography 991(2003)31

**Endocrine disruptive chemicals**

Derivatisation and gas chromatography–chemical ionisation mass spectrometry of selected synthetic and natural endocrine disruptive chemicals 991(2003)77

**Environmental analysis**

Microscale solid-phase extraction system for explosives 991(2003)159

**Enzyme inhibitors**

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

**Epidermal growth factor receptor**

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

**Epinephrine**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**Erythrosine**

Separation and quantitation of components in FD&C Red No. 3 using capillary electrophoresis 991(2003)275

**Estrogens**

Derivatisation and gas chromatography–chemical ionisation mass spectrometry of selected synthetic and natural endocrine disruptive chemicals 991(2003)77

**Ethylene oxide**

Determination of ethylene oxide by solid-phase microextraction device with on-fiber derivatization 991(2003)1

**Explosives**

Microscale solid-phase extraction system for explosives 991(2003)159

**Extraction methods**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Fatty acids**

Comparison of gas chromatography–mass spectrometry and liquid chromatography–mass spectrometry for the determination of fatty and resin acids in paper mill process waters 991(2003)205

**FD&C Red No. 3**

Separation and quantitation of components in FD&C Red No. 3 using capillary electrophoresis 991(2003)275

**Flavanols**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Flavones**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Flavonoids**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

**Flow simulations**

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

**Food analysis**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Garlic**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Gas chromatography–mass spectrometry**

Extending the range of compounds amenable for gas chromatography–mass spectrometric analysis 991(2003)217

**Ginger**

Analysis of a ginger extract by high-performance liquid chromatography coupled to nuclear magnetic resonance spectroscopy using superheated deuterium oxide as the mobile phase 991(2003)143

**Glycosides**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Gradient elution**

Chemical compositional separation of styrene–methyl methacrylate copolymers using high-performance liquid chromatography with liquefied carbon dioxide as eluent 991(2003)197

**Headspace analysis**

Determination of major compounds in sweet wines by headspace solid-phase microextraction and gas chromatography 991(2003)13

**Hydrocarbon group type analysis**

Optimized conditions for hydrocarbon group type analysis of base oils by thin-layer chromatography–flame ionisation detection 991(2003)255

**Hydrocarbons**

Optimized conditions for hydrocarbon group type analysis of base oils by thin-layer chromatography–flame ionisation detection 991(2003)255

**Injection methods**

Large-volume programmed-temperature vaporiser injection for fast gas chromatography with electron capture and mass spectrometric detection of polybrominated diphenyl ethers 991(2003)241

**Inorganic anions**

Efficiency and characteristics of solid-phase (ion-exchange) extraction for removal of Cl<sup>-</sup> matrix 991(2003)23

**Instrumentation**

Microscale solid-phase extraction system for explosives 991(2003)159

**Ion-pairing reagents**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Isoflavones**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Luteolin**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Mathematical modelling**

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

**Mobile phase composition**

Chemical compositional separation of styrene–methyl methacrylate copolymers using high-performance liquid chromatography with liquefied carbon dioxide as eluent 991(2003)197

**Molecular imprinting**

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

**Monolithic columns**

Computational fluid dynamics simulations yielding guidelines for the ideal internal structure of monolithic liquid chromatography columns 991(2003)169

**Natural products**

Analysis of a ginger extract by high-performance liquid chromatography coupled to nuclear magnetic resonance spectroscopy using superheated deuterium oxide as the mobile phase 991(2003)143

**Net analyte signal**

Net analyte signal as a deconvolution-oriented resolution criterion in the optimisation of chromatographic techniques 991(2003)47

**Nuclear magnetic resonance spectroscopy**

Analysis of a ginger extract by high-performance liquid chromatography coupled to nuclear magnetic resonance spectroscopy using superheated deuterium oxide as the mobile phase 991(2003)143

**Objective function**

Net analyte signal as a deconvolution-oriented resolution criterion in the optimisation of chromatographic techniques 991(2003)47

**Oligonucleotides**

Performance of capillary gel electrophoretic analysis of oligonucleotides coupled on-line with electrospray mass spectrometry 991(2003)129

**Oils**

Optimized conditions for hydrocarbon group type analysis of base oils by thin-layer chromatography–flame ionisation detection 991(2003)255

**Optimisation**

Net analyte signal as a deconvolution-oriented resolution criterion in the optimisation of chromatographic techniques 991(2003)47

**Organosulfur compounds**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Paper mill**

Comparison of gas chromatography–mass spectrometry and liquid chromatography–mass spectrometry for the determination of fatty and resin acids in paper mill process waters 991(2003)205

**Peak deconvolution**

Net analyte signal as a deconvolution-oriented resolution criterion in the optimisation of chromatographic techniques 991(2003)47

**Peptides**

High-performance ion-pair chromatography method for simultaneous analysis of alliin, deoxyalliin, allicin and dipeptide precursors in garlic products using multiple mass spectrometry and UV detection 991(2003)69

**Perturbation method**

Theoretical and experimental study of binary perturbation peaks with focus on peculiar retention behaviour and vanishing peaks in chiral liquid chromatography 991(2003)31

**Petroleum**

Optimized conditions for hydrocarbon group type analysis of base oils by thin-layer chromatography–flame ionisation detection 991(2003)255

**Pharmaceutical analysis**

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

**pH gradients**

High-performance cation-exchange chromatofocusing of proteins 991(2003)117

**Phosphodiesterases**

Performance of capillary gel electrophoretic analysis of oligonucleotides coupled on-line with electrospray mass spectrometry 991(2003)129

**Planar extraction**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Plant materials**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Polybrominated diphenyl ethers**

Large-volume programmed-temperature vaporiser injection for fast gas chromatography with electron capture and mass spectrometric detection of polybrominated diphenyl ethers 991(2003)241

**Polymers**

Chemical compositional separation of styrene–methyl methacrylate copolymers using high-performance liquid chromatography with liquefied carbon dioxide as eluent 991(2003)197

**Poly(styrene–methyl methacrylate)**

Chemical compositional separation of styrene–methyl methacrylate copolymers using high-performance liquid chromatography with liquefied carbon dioxide as eluent 991(2003)197

**Proteins**

High-performance cation-exchange chromatofocusing of proteins 991(2003)117

**PTV injection**

Large-volume programmed-temperature vaporiser injection for fast gas chromatography with electron capture and mass spectrometric detection of polybrominated diphenyl ethers 991(2003)241

**Quercetin**

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

***Quercus robur***

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Resin acids**

Comparison of gas chromatography–mass spectrometry and liquid chromatography–mass spectrometry for the determination of fatty and resin acids in paper mill process waters 991(2003)205

**Resolution**

Net analyte signal as a deconvolution-oriented resolution criterion in the optimisation of chromatographic techniques 991(2003)47

**Retention behaviour**

Theoretical and experimental study of binary perturbation peaks with focus on peculiar retention behaviour and vanishing peaks in chiral liquid chromatography 991(2003)31

**Rotation planar chromatography**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Rotation planar extraction**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Safety concerns**

Safety concerns in ultrahigh pressure capillary liquid chromatography using air-driven pumps 991(2003)189

**Sample preparation**

Efficiency and characteristics of solid-phase (ion-exchange) extraction for removal of  $\text{Cl}^-$  matrix 991(2003)23

**Sheath liquid effects**

Performance of capillary gel electrophoretic analysis of oligonucleotides coupled on-line with electrospray mass spectrometry 991(2003)129

**Solid–liquid extraction**

Rotation planar extraction and rotation planar chromatography of oak (*Quercus robur* L.) bark 991(2003)267

**Solid-phase extraction**

Efficiency and characteristics of solid-phase (ion-exchange) extraction for removal of  $\text{Cl}^-$  matrix 991(2003)23

Selective separation of active inhibitors of epidermal growth factor receptor from Caragana Jubata by molecularly imprinted solid-phase extraction 991(2003)151

Microscale solid-phase extraction system for explosives 991(2003)159

**Solid-phase microextraction**

Determination of ethylene oxide by solid-phase microextraction device with on-fiber derivatization 991(2003)1

Determination of major compounds in sweet wines by headspace solid-phase microextraction and gas chromatography 991(2003)13

**Sol–gel**

Evaluation of a sol–gel derived carbon composite electrode as an amperometric detector for capillary electrophoresis 991(2003)109

**Soybean**

Identification of flavone aglycones and glycosides in soybean pods by liquid chromatography–tandem mass spectrometry 991(2003)61

**Superheated water chromatography**

Analysis of a ginger extract by high-performance liquid chromatography coupled to nuclear magnetic resonance spectroscopy using superheated deuterium oxide as the mobile phase 991(2003)143

**Supersonic GC–MS**

Extending the range of compounds amenable for gas chromatography–mass spectrometric analysis 991(2003)217

**Temperature programming**

Extending the range of compounds amenable for gas chromatography–mass spectrometric analysis 991(2003)217

**Thermally labile compounds**

Extending the range of compounds amenable for gas chromatography–mass spectrometric analysis 991(2003)217

**Ultrahigh-pressure liquid chromatography**

Safety concerns in ultrahigh pressure capillary liquid chromatography using air-driven pumps 991(2003)189

**Volatile organic compounds**

Determination of major compounds in sweet wines by headspace solid-phase microextraction and gas chromatography  
991(2003)13

**Water analysis**

Microscale solid-phase extraction system for explosives  
991(2003)159

Comparison of gas chromatography–mass spectrometry and liquid chromatography–mass spectrometry for the determination of fatty and resin acids in paper mill process waters  
991(2003)205

**Wine**

Determination of major compounds in sweet wines by headspace solid-phase microextraction and gas chromatography  
991(2003)13
