Journal of Chromatography A, 996 (2003) 241–245

JOURNAL OF
CHROMATOGRAPHY A

www.elsevier.com/locate/chroma

Subject Index Vol. 996

Acrylonitrile

Determining and correcting “moment bias” in gradient polymer elution chromatography 996(2003)45

Activity coefficients

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Adsorption

Analysis of protein adsorption on regenerated cellulose-based immobilized copper ion affinity membranes 996(2003)53

Air analysis

Measurement of toxic volatile organic compounds in indoor air of semiconductor foundries using multisorbent adsorption/thermal desorption coupled with gas chromatography–mass spectrometry 996(2003)225

Aldehyde-2,4-dinitrophenylhydrazone

Isomerization of aldehyde-2,4-dinitrophenylhydrazone derivatives and validation of high-performance liquid chromatographic analysis 996(2003)95

Alkaloids

Lipophilicity of vinpocetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Amines

Determination of biogenic amines as dansyl derivatives in alcoholic beverages by high-performance liquid chromatography with fluorimetric detection and characterization of the dansylated amines by liquid chromatography–atmospheric pressure chemical ionization mass spectrometry 996(2003)103

Antibiotics

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Apovincaminic acid

Lipophilicity of vinpocetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Aroma compounds

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Basic compounds

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Beer

Determination of biogenic amines as dansyl derivatives in alcoholic beverages by high-performance liquid chromatography with fluorimetric detection and characterization of the dansylated amines by liquid chromatography–atmospheric pressure chemical ionization mass spectrometry 996(2003)103

Binding studies

Analysis of protein adsorption on regenerated cellulose-based immobilized copper ion affinity membranes 996(2003)53

Biogenic amines

Determination of biogenic amines as dansyl derivatives in alcoholic beverages by high-performance liquid chromatography with fluorimetric detection and characterization of the dansylated amines by liquid chromatography–atmospheric pressure chemical ionization mass spectrometry 996(2003)103

Brassica spp

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Calibration

Fractal calibration in size-exclusion chromatography. I. An introduction 996(2003)33

Carbamates

Considerations on ultra trace analysis of carbamates in water samples 996(2003)133

Carbonate

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

Chewing gum

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Chip technology

A microfabricated microconcentrator for sensors and gas chromatography 996(2003)1

Chiral stationary phases, LC

Enantiomeric separation of tocinide and its analogues on an optically active crown ether-based stationary phase by liquid chromatography 996(2003)233

Counter-current chromatography

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Crown ether-based stationary phase

Enantiomeric separation of tocinide and its analogues on an optically active crown ether-based stationary phase by liquid chromatography 996(2003)233

Cyclodextrins

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Derivatization, LC

Isomerization of aldehyde-2,4-dinitrophenylhydrazone derivatives and validation of high-performance liquid chromatographic analysis 996(2003)95

Dideoxyiminoarabinitol

Development and validation of a capillary electrophoresis-indirect photometric detection method for the determination of the non-UV-absorbing 1,4-dideoxy-1,4-imino-D-arabinitol in active pharmaceutical ingredients, solutions and tablets using an internal standard 996(2003)213

Diesel fuel

High-speed peak matching algorithm for retention time alignment of gas chromatographic data for chemometric analysis 996(2003)141

Enantiomer separation

Enantiomeric separation of tocinide and its analogues on an optically active crown ether-based stationary phase by liquid chromatography 996(2003)233

Environmental analysis

Measurement of toxic volatile organic compounds in indoor air of semiconductor foundries using multisorbent adsorption/thermal desorption coupled with gas chromatography-mass spectrometry 996(2003)225

Fatty acid methyl esters

Isolation of chlorinated fatty acid methyl esters derived from cell-culture medium and from fish lipids by using an aminopropyl solid-phase extraction column 996(2003)173

Food analysis

Determination of biogenic amines as dansyl derivatives in alcoholic beverages by high-performance liquid chromatography with fluorimetric detection and characterization of the dansylated amines by liquid chromatography-atmospheric pressure chemical ionization mass spectrometry 996(2003)103

Rapid multi-residue method for the determination of azinphos methyl, bromopropylate, chlorpyrifos, dimethoate, parathion methyl and phosalone in apricots and peaches by using negative chemical ionization ion trap technology 996(2003)181

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Fractal calibration

Fractal calibration in size-exclusion chromatography. I. An introduction 996(2003)33

Fruits

Rapid multi-residue method for the determination of azinphos methyl, bromopropylate, chlorpyrifos, dimethoate, parathion methyl and phosalone in apricots and peaches by using negative chemical ionization ion trap technology 996(2003)181

Gradient polymer elution chromatography

Determining and correcting "moment bias" in gradient polymer elution chromatography 996(2003)45

Glucoraphanin

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Glucosinolates

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Glycopeptides

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Headspace analysis

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

High osmotic pressure chromatography

Scale-up study of high osmotic pressure chromatography for separation of poly(ϵ -caprolactone) 996(2003)71

Immobilized metal affinity chromatography

Analysis of protein adsorption on regenerated cellulose-based immobilized copper ion affinity membranes 996(2003)53

Indirect detection

Development and validation of a capillary electrophoresis–indirect photometric detection method for the determination of the non-UV-absorbing 1,4-dideoxy-1,4-imino-D-arabinitol in active pharmaceutical ingredients, solutions and tablets using an internal standard 996(2003)213

Injection methods

Optimization of a preparative capillary gas chromatography–mass spectrometry system for the isolation and harvesting of individual polycyclic aromatic hydrocarbons 996(2003)163

Inorganic salts

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

Instrumentation

A microfabricated microconcentrator for sensors and gas chromatography 996(2003)1

Optimization of a preparative capillary gas chromatography–mass spectrometry system for the isolation and harvesting of individual polycyclic aromatic hydrocarbons 996(2003)163

Inverse gas chromatography

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Ion-exchange

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Large-volume injection

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Lipids

Isolation of chlorinated fatty acid methyl esters derived from cell-culture medium and from fish lipids by using an aminopropyl solid-phase extraction column 996(2003)173

Lipophilicity

Lipophilicity of vinpocetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Matrix effects

Rapid multi-residue method for the determination of azinphos methyl, bromopropylate, chlorpyrifos, dimethoate, parathion methyl and phosalone in apricots and peaches by using negative chemical ionization ion trap technology 996(2003)181

Membranes

Analysis of protein adsorption on regenerated cellulose-based immobilized copper ion affinity membranes 996(2003)53

Microconcentrator

A microfabricated microconcentrator for sensors and gas chromatography 996(2003)1

Mixed-mode retention

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Moment bias

Determining and correcting “moment bias” in gradient polymer elution chromatography 996(2003)45

Multisorbent adsorption

Measurement of toxic volatile organic compounds in indoor air of semiconductor foundries using multisorbent adsorption/thermal desorption coupled with gas chromatography–mass spectrometry 996(2003)225

Naphthalenesulfonates

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

One-site mixed-mode model

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Organic gel packings

Fractal calibration in size-exclusion chromatography. I. An introduction 996(2003)33

Organochlorine compounds

Isolation of chlorinated fatty acid methyl esters derived from cell-culture medium and from fish lipids by using an aminopropyl solid-phase extraction column 996(2003)173

Organosulfur compounds

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Partition coefficients

Lipophilicity of vinpocetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Peak matching algorithm

High-speed peak matching algorithm for retention time alignment of gas chromatographic data for chemometric analysis 996(2003)141

Peptides

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Pesticides

Considerations on ultra trace analysis of carbamates in water samples 996(2003)133

Rapid multi-residue method for the determination of azinphos methyl, bromopropylate, chlorpyrifos, dimethoate, parathion methyl and phosalone in apricots and peaches by using negative chemical ionization ion trap technology 996(2003)181

Pharmaceutical analysis

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Development and validation of a capillary electrophoresis–indirect photometric detection method for the determination of the non-UV-absorbing 1,4-dideoxy-1,4-imino-D-arabinitol in active pharmaceutical ingredients, solutions and tablets using an internal standard 996(2003)213

Piperidine

Development and validation of a capillary electrophoresis–indirect photometric detection method for the determination of the non-UV-absorbing 1,4-dideoxy-1,4-imino-D-arabinitol in active pharmaceutical ingredients, solutions and tablets using an internal standard 996(2003)213

Plant materials

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Polybutadiene

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Poly(ϵ -caprolactone)

Scale-up study of high osmotic pressure chromatography for separation of poly(ϵ -caprolactone) 996(2003)71

Polymers

Fractal calibration in size-exclusion chromatography. I. An introduction 996(2003)33

Polynuclear aromatic hydrocarbons

Optimization of a preparative capillary gas chromatography–mass spectrometry system for the isolation and harvesting of individual polycyclic aromatic hydrocarbons 996(2003)163

Positional isomers

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Preparative chromatography

Scale-up study of high osmotic pressure chromatography for separation of poly(ϵ -caprolactone) 996(2003)71

Optimization of a preparative capillary gas chromatography–mass spectrometry system for the isolation and harvesting of individual polycyclic aromatic hydrocarbons 996(2003)163

Principal component analysis

High-speed peak matching algorithm for retention time alignment of gas chromatographic data for chemometric analysis 996(2003)141

Proteins

Analysis of protein adsorption on regenerated cellulose-based immobilized copper ion affinity membranes 996(2003)53

Retention mechanisms

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Retention times

High-speed peak matching algorithm for retention time alignment of gas chromatographic data for chemometric analysis 996(2003)141

Reversed-phase liquid chromatography

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Sample handling

A microfabricated microconcentrator for sensors and gas chromatography 996(2003)1

Sample stacking

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Silane

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13

Solid-phase extraction

Considerations on ultra trace analysis of carbamates in water samples 996(2003)133

Solubility

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

Stationary phases, LC

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Styrene–acrylonitrile copolymers

Determining and correcting “moment bias” in gradient polymer elution chromatography 996(2003)45

Sulfate

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

Thermal desorption

Measurement of toxic volatile organic compounds in indoor air of semiconductor foundries using multisorbent adsorption/thermal desorption coupled with gas chromatography–mass spectrometry 996(2003)225

Thermodynamic parameters

Thermodynamic study of two different chewing-gum bases by inverse gas chromatography 996(2003)189

Theta solvent

Scale-up study of high osmotic pressure chromatography for separation of poly(ϵ -caprolactone) 996(2003)71

Tocainide

Enantiomeric separation of tocainide and its analogues on an optically active crown ether-based stationary phase by liquid chromatography 996(2003)233

Trace analysis

Considerations on ultra trace analysis of carbamates in water samples 996(2003)133

Universal calibration

Fractal calibration in size-exclusion chromatography. I. An introduction 996(2003)33

Validation

Isomerization of aldehyde-2,4-dinitrophenylhydrazone derivatives and validation of high-performance liquid chromatographic analysis 996(2003)95

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Development and validation of a capillary electrophoresis–indirect photometric detection method for the determination of the non-UV-absorbing 1,4-dideoxy-1,4-imino-D-arabinitol in active pharmaceutical ingredients, solutions and tablets using an internal standard 996(2003)213

Vancomycin

Development and validation of an improved method for the analysis of vancomycin by liquid chromatography. Selectivity of reversed-phase columns towards vancomycin components 996(2003)115

Vapor–liquid equilibrium partitioning

Determination of the solubility of inorganic salts by headspace gas chromatography 996(2003)157

Vegetables

Separation and purification of glucosinolates from crude plant homogenates by high-speed counter-current chromatography 996(2003)85

Vincamine

Lipophilicity of vincopetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Vinopetine

Lipophilicity of vinopetine and related compounds characterized by reversed-phase thin-layer chromatography 996(2003)195

Volatile organic compounds

Measurement of toxic volatile organic compounds in indoor air of semiconductor foundries using multisorbent adsorption/thermal desorption coupled with gas chromatography–mass spectrometry 996(2003)225

Water analysis

Considerations on ultra trace analysis of carbamates in water samples 996(2003)133

Analysis of naphthalenesulfonate compounds by cyclodextrin-mediated capillary electrophoresis with sample stacking 996(2003)205

Wine

Determination of biogenic amines as dansyl derivatives in alcoholic beverages by high-performance liquid chromatography with fluorimetric detection and characterization of the dansylated amines by liquid chromatography–atmospheric pressure chemical ionization mass spectrometry 996(2003)103

Zirconia

Analysis and critical comparison of the reversed-phase and ion-exchange contributions to retention on polybutadiene coated zirconia and octadecyl silane bonded silica phases 996(2003)13
