

## Subject Index Vol. 1025

### Acetylsalicylic acid

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

### Acyclic octenes

Capillary gas chromatography–mass spectrometry of all 93 acyclic octenes and their identification in fluid catalytic cracked gasoline 1025(2004)237

### Affinity extraction

Purification of phospholipase D by two-phase affinity extraction 1025(2004)297

### Air analysis

System for the generation of standard gas mixtures of volatile and semi-volatile organic compounds for calibrations of solid-phase microextraction and other sampling devices 1025(2004)3

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

Sampling and analysis of volatile organic compounds in bovine breath by solid-phase microextraction and gas chromatography–mass spectrometry 1025(2004)63

### Alginate

Purification of phospholipase D by two-phase affinity extraction 1025(2004)297

### Alkanes

Fast solid-phase extraction–gas chromatography–mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

### Alkyldiol

Monitoring of drugs and metabolites in whole blood by restricted-access solid-phase microextraction coupled to liquid chromatography–mass spectrometry 1025(2004)85

### Alkylpyrazines

Studies on the aroma of cupuassu liquor by headspace solid-phase microextraction and gas chromatography 1025(2004)115

### Amino acids

Simultaneous analysis of amino acid and biogenic polyamines by high-performance liquid chromatography after pre-column derivatization with *N*-(9-fluorenyl)methoxycarbonyloxy)succinimide 1025(2004)201

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

Effects of the length and modification of the separation channel on microchip electrophoresis–mass spectrometry for analysis of bioactive compounds 1025(2004)287

### Antioxidants

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

### Aqueous two-phase systems

Purification of phospholipase D by two-phase affinity extraction 1025(2004)297

### Aroma compounds

Studies on the aroma of cupuassu liquor by headspace solid-phase microextraction and gas chromatography 1025(2004)115

### Art analysis

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

### Atomic fluorescence spectrometry

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

### Automation

Full automation of derivatization—solid-phase microextraction–gas chromatography–mass spectrometry with a dual-arm system for the determination of organometallic compounds in aqueous samples 1025(2004)77

### Benzene

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

### Benzo[*a*]pyrene

Gas chromatographic–mass spectrometric determination of polycyclic aromatic hydrocarbons formed during the pyrolysis of phenylalanine 1025(2004)255

### Bile acids

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

**Biogenic amines**

Simultaneous analysis of amino acid and biogenic polyamines by high-performance liquid chromatography after pre-column derivatization with *N*-(9-fluorenylmethoxycarbonyloxy)succinimide 1025(2004)201

**Calibration**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

**Carvone**

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

**Centrifugal partition chromatography**

Effect of Coriolis force on counter-current chromatographic separation by centrifugal partition chromatography 1025(2004)169

**Chemometrics**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Chip technology**

Effects of the length and modification of the separation channel on microchip electrophoresis–mass spectrometry for analysis of bioactive compounds 1025(2004)287

**Chlorobenzenes**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

**Cholesterol**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

**Chromatographic tests**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Cigarette smoke**

Gas chromatographic–mass spectrometric determination of polycyclic aromatic hydrocarbons formed during the pyrolysis of phenylalanine 1025(2004)255

**CL-20**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Cold-vapour atomic fluorescence spectrometry**

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

**Column characterisation**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on

chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Column performance**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Copper**

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

**Coriolis force**

Effect of Coriolis force on counter-current chromatographic separation by centrifugal partition chromatography 1025(2004)169

**Derivatisation, GC**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

**Derivatization, LC**

Simultaneous analysis of amino acid and biogenic polyamines by high-performance liquid chromatography after pre-column derivatization with *N*-(9-fluorenylmethoxycarbonyloxy)succinimide 1025(2004)201

**Detection, GC**

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

**Diffusion**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

**Drugs**

Monitoring of drugs and metabolites in whole blood by restricted-access solid-phase microextraction coupled to liquid chromatography–mass spectrometry 1025(2004)85

**Efficiency**

Effect of Coriolis force on counter-current chromatographic separation by centrifugal partition chromatography 1025(2004)169

**Electroosmotic flow**

Mobility-based selective on-line preconcentration of proteins in capillary electrophoresis by controlling electroosmotic flow 1025(2004)139

**Environmental analysis**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

Fast solid-phase extraction–gas chromatography–mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

**Enzymes**

Purification of phospholipase D by two-phase affinity extraction  
1025(2004)297

***Ephedra sinica***

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

**Essential oils**

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

**Ethyl chloroformate**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

**Ethylbenzene**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

**Explosives**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Extraction methods**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

Development of miniaturized sample preparation with fibrous extraction media 1025(2004)27

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

Analysis of volatile secondary metabolites from Colombian *Xylopia aromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

**Fatty acids**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

**Fingerprinting**

Fast solid-phase extraction–gas chromatography–mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

***N*-(9-Fluorenylmethoxycarbonyloxy)succinimide**

Simultaneous analysis of amino acid and biogenic polyamines by high-performance liquid chromatography after pre-column derivatization with *N*-(9-fluorenylmethoxycarbonyloxy)succinimide 1025(2004)201

**Food analysis**

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

Simultaneous determination of Vitamin E homologs in chicken meat by liquid chromatography with fluorescence detection 1025(2004)313

**Food and lysis**

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid–liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

**Gases**

System for the generation of standard gas mixtures of volatile and semi-volatile organic compounds for calibrations of solid-phase microextraction and other sampling devices 1025(2004)3

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

**Gasoline**

Capillary gas chromatography–mass spectrometry of all 93 acyclic octenes and their identification in fluid catalytic cracked gasoline 1025(2004)237

**Headspace analysis**

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

Analysis of volatile secondary metabolites from Colombian *Xylopia aromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105

**HMX**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Instrumentation**

Development of miniaturized sample preparation with fibrous extraction media 1025(2004)27

Full automation of derivatization—solid-phase microextraction–gas chromatography–mass spectrometry with a dual-arm system for the determination of organometallic compounds in aqueous samples 1025(2004)77

Effects of the length and modification of the separation channel on microchip electrophoresis–mass spectrometry for analysis of bioactive compounds 1025(2004)287

**Isoelectric points**

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

**Lactoglobulins**

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

**Lactones**

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid-liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

***Lippia alba***

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

**Liquid-phase microextraction**

Determination of ochratoxin A in wine using liquid-phase microextraction combined with liquid chromatography with fluorescence detection 1025(2004)163

**Meat**

Simultaneous determination of Vitamin E homologs in chicken meat by liquid chromatography with fluorescence detection 1025(2004)313

**Membranes**

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

**Metal cations**

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

**Methylmercury**

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

**Microporous membrane liquid-liquid extraction**

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

**Microwave-assisted hydrodistillation**

Analysis of volatile secondary metabolites from Colombian *Xylopiaromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105

**Milk**

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

**Multiple ionic polymer layers coating**

Effects of the length and modification of the separation channel on microchip electrophoresis-mass spectrometry for analysis of bioactive compounds 1025(2004)287

**Mycotoxins**

Determination of ochratoxin A in wine using liquid-phase microextraction combined with liquid chromatography with fluorescence detection 1025(2004)163

**Nitramines**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Ochratoxin A**

Determination of ochratoxin A in wine using liquid-phase microextraction combined with liquid chromatography with fluorescence detection 1025(2004)163

**Octanol-water partition coefficients**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Oils**

Fast solid-phase extraction-gas chromatography-mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography-mass spectrometry 1025(2004)269

**Optimization**

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid-liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

**Organomercury compounds**

Improvements in the methylmercury extraction from human hair by headspace solid-phase microextraction followed by gas-chromatography cold-vapour atomic fluorescence spectrometry 1025(2004)71

**Organometallic compounds**

Full automation of derivatization-solid-phase microextraction-gas chromatography-mass spectrometry with a dual-arm system for the determination of organometallic compounds in aqueous samples 1025(2004)77

**Ox bile**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography-mass spectrometry 1025(2004)269

**Ozone**

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

**Paints**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography-mass spectrometry 1025(2004)269

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

**Paraffins, chlorinated**

Solid-phase extraction versus solid-phase microextraction for the determination of chlorinated paraffins in water using gas chromatography-negative chemical ionisation mass spectrometry 1025(2004)157

**Peptides**

Enrichment of proteinaceous materials on a strong cation-exchange diol silica restricted access material: protein-protein displacement and interaction effects 1025(2004)209

Effects of the length and modification of the separation channel on microchip electrophoresis-mass spectrometry for analysis of bioactive compounds 1025(2004)287

**Permeation liquid membranes**

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

**Pharmaceutical analysis**

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

**Phellandrene**

Analysis of volatile secondary metabolites from Colombian *Xylopia aromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105

**Phenols**

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

**Phenylalanine**

Gas chromatographic–mass spectrometric determination of polycyclic aromatic hydrocarbons formed during the pyrolysis of phenylalanine 1025(2004)255

**pH-gradients**

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

**Phospholipases**

Purification of phospholipase D by two-phase affinity extraction 1025(2004)297

**Phthalates**

Development of miniaturized sample preparation with fibrous extraction media 1025(2004)27

**Pigments**

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

**Plant materials**

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

Studies on the aroma of cupuassu liquor by headspace solid-phase microextraction and gas chromatography 1025(2004)115

**Polyamines**

Simultaneous analysis of amino acid and biogenic polyamines by high-performance liquid chromatography after pre-column derivatization with *N*-(9-fluorenylmethoxycarbonyloxy)succinimide 1025(2004)201

**Polychlorinated biphenyls**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

**Polychlorinated hydroxybiphenyls**

Using new structurally related additive schemes in the precalculation of gas chromatographic retention indices of polychlorinated hydroxybiphenyls on HP-5 stationary phase 1025(2004)227

**Polydimethylsiloxane rod extraction**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

**Polynuclear aromatic hydrocarbons**

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

Fast solid-phase extraction–gas chromatography–mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

Gas chromatographic–mass spectrometric determination of polycyclic aromatic hydrocarbons formed during the pyrolysis of phenylalanine 1025(2004)255

**Preconcentration**

Mobility-based selective on-line preconcentration of proteins in capillary electrophoresis by controlling electroosmotic flow 1025(2004)139

**Pressurised hot water extraction**

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

**Principal component analysis**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Proteins**

Mobility-based selective on-line preconcentration of proteins in capillary electrophoresis by controlling electroosmotic flow 1025(2004)139

Enrichment of proteinaceous materials on a strong cation-exchange diol silica restricted access material: protein–protein displacement and interaction effects 1025(2004)209

Isoelectric point separation of proteins by capillary pH-gradient ion-exchange chromatography 1025(2004)217

Suppression of pigment interference in the gas chromatographic analysis of proteinaceous binding media in paintings with EDTA 1025(2004)277

**Pyrolysis**

Gas chromatographic–mass spectrometric determination of polycyclic aromatic hydrocarbons formed during the pyrolysis of phenylalanine 1025(2004)255

**Quaternary ammonium compounds**

Determination of homologues of quaternary ammonium surfactants by capillary electrophoresis using indirect UV detection 1025(2004)303

**RDX**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Reference material**

Development of standard operation procedures for the manufacture of *n*-octadecyl bonded silicas as packing material in certified reference columns for reversed-phase liquid chromatography 1025(2004)177

**Restricted access media**

Monitoring of drugs and metabolites in whole blood by restricted-access solid-phase microextraction coupled to liquid chromatography–mass spectrometry 1025(2004)85

Enrichment of proteinaceous materials on a strong cation-exchange diol silica restricted access material: protein–protein displacement and interaction effects 1025(2004)209

**Retention indices**

Using new structurally related additive schemes in the precalculation of gas chromatographic retention indices of polychlorinated hydroxybiphenyls on HP-5 stationary phase 1025(2004)227

Capillary gas chromatography–mass spectrometry of all 93 acyclic octenes and their identification in fluid catalytic cracked gasoline 1025(2004)237

**Retention prediction**

Using new structurally related additive schemes in the precalculation of gas chromatographic retention indices of polychlorinated hydroxybiphenyls on HP-5 stationary phase 1025(2004)227

**Sample preparation**

Development of miniaturized sample preparation with fibrous extraction media 1025(2004)27

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

Enrichment of proteinaceous materials on a strong cation-exchange diol silica restricted access material: protein–protein displacement and interaction effects 1025(2004)209

**Sediments**

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

**Selectivity**

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Semi-volatile organic compounds**

System for the generation of standard gas mixtures of volatile and semi-volatile organic compounds for calibrations of solid-phase microextraction and other sampling devices 1025(2004)3

**Silica**

Monitoring of drugs and metabolites in whole blood by restricted-access solid-phase microextraction coupled to liquid chromatography–mass spectrometry 1025(2004)85

**Silica, *n*-octadecyl bonded**

Development of standard operation procedures for the manufacture of *n*-octadecyl bonded silicas as packing material in certified reference columns for reversed-phase liquid chromatography 1025(2004)177

**Soil**

Comparison of different trapping methods for pressurised hot water extraction 1025(2004)41

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Solid–liquid distribution coefficients**

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid–liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

**Solid-phase extraction**

Fast solid-phase extraction–gas chromatography–mass spectrometry procedure for oil fingerprinting. Application to the Prestige oil spill 1025(2004)133

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid–liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

Solid-phase extraction versus solid-phase microextraction for the determination of chlorinated paraffins in water using gas chromatography–negative chemical ionisation mass spectrometry 1025(2004)157

**Solid-phase microextraction**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Full automation of derivatization—solid-phase microextraction–gas chromatography–mass spectrometry with a dual-arm system for the determination of organometallic compounds in aqueous samples 1025(2004)77

Monitoring of drugs and metabolites in whole blood by restricted-access solid-phase microextraction coupled to liquid chromatography–mass spectrometry 1025(2004)85

Solid-phase extraction versus solid-phase microextraction for the determination of chlorinated paraffins in water using gas chromatography–negative chemical ionisation mass spectrometry 1025(2004)157

**Solubility**

Physico-chemical measurements of CL-20 for environmental applications. Comparison with RDX and HMX 1025(2004)125

**Standard operation procedure**

Development of standard operation procedures for the manufacture of *n*-octadecyl bonded silicas as packing material in certified reference columns for reversed-phase liquid chromatography 1025(2004)177

**Stationary phases, LC**

Development of standard operation procedures for the manufacture of *n*-octadecyl bonded silicas as packing material in certified reference columns for reversed-phase liquid chromatography 1025(2004)177

Characterisation of reversed-phase liquid-chromatographic columns by chromatographic tests. Comparing column classification based on chromatographic parameters and column performance for the separation of acetylsalicylic acid and related compounds 1025(2004)189

**Steam distillation**

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

**Stir bar sorptive extraction**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

**Structure–retention relationships**

Capillary gas chromatography–mass spectrometry of all 93 acyclic octenes and their identification in fluid catalytic cracked gasoline 1025(2004)237

**Surfactants**

Determination of homologues of quaternary ammonium surfactants by capillary electrophoresis using indirect UV detection 1025(2004)303

***Theobroma grandiflorum***

Studies on the aroma of cupuassu liquor by headspace solid-phase microextraction and gas chromatography 1025(2004)115

**Thermal desorption**

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

**Tocopherols**

Simultaneous determination of Vitamin E homologs in chicken meat by liquid chromatography with fluorescence detection 1025(2004)313

**Tocotrienols**

Simultaneous determination of Vitamin E homologs in chicken meat by liquid chromatography with fluorescence detection 1025(2004)313

**Toluene**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

**Trimethylsilylimidazole**

Characterization of bile acids and fatty acids from ox bile in oil paintings by gas chromatography–mass spectrometry 1025(2004)269

**Vinylnisole**

Steam distillation–solid-phase microextraction for the detection of *Ephedra sinica* in herbal preparations 1025(2004)51

**Vitamins**

Simultaneous determination of Vitamin E homologs in chicken meat by liquid chromatography with fluorescence detection 1025(2004)313

**Volatile organic compounds**

System for the generation of standard gas mixtures of volatile and semi-volatile organic compounds for calibrations of solid-phase microextraction and other sampling devices 1025(2004)3

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

Sampling and analysis of volatile organic compounds in bovine breath by solid-phase microextraction and gas chromatography–mass spectrometry 1025(2004)63

Comparison of different extraction methods for the analysis of volatile secondary metabolites of *Lippia alba* (Mill.) N.E. Brown, grown in Colombia, and evaluation of its in vitro antioxidant activity 1025(2004)93

Analysis of volatile secondary metabolites from Colombian *Xylopiya aromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105

Studies on the aroma of cupuassu liquor by headspace solid-phase microextraction and gas chromatography 1025(2004)115

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid–liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

**Water analysis**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

Polydimethylsiloxane rod extraction, a novel technique for the determination of organic micropollutants in water samples by thermal desorption–capillary gas chromatography–mass spectrometry 1025(2004)17

Development of miniaturized sample preparation with fibrous extraction media 1025(2004)27

Permeation liquid membrane for trace metal speciation in natural waters. Transport of liposoluble Cu(II) complexes 1025(2004)33

Solid-phase extraction versus solid-phase microextraction for the determination of chlorinated paraffins in water using gas chromatography–negative chemical ionisation mass spectrometry 1025(2004)157

**Wine**

Simple strategy for the optimization of solid-phase extraction procedures through the use of solid–liquid distribution coefficients. Application to the determination of aliphatic lactones in wine 1025(2004)147

Determination of ochratoxin A in wine using liquid-phase microextraction combined with liquid chromatography with fluorescence detection 1025(2004)163

Optimisation of stir bar sorptive extraction for the analysis of volatile phenols in wines 1025(2004)263

**Xylenes**

Air sampling of aromatic hydrocarbons in the presence of ozone by solid-phase microextraction 1025(2004)57

***p*-Xylenes**

Diffusion-based calibration for solid-phase microextraction of benzene, toluene, ethylbenzene, *p*-xylene and chlorobenzenes from aqueous samples 1025(2004)11

***Xylopiya aromatica***

Analysis of volatile secondary metabolites from Colombian *Xylopiya aromatica* (Lamarck) by different extraction and headspace methods and gas chromatography 1025(2004)105
