

Subject Index Vol. 1036

Active carbon spheres

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Adenosine

Streptavidin chiral stationary phase for the separation of adenosine enantiomers 1036(2004)155

Adsorbents

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Advanced mesoporous organosilica material containing microporous β -cyclodextrins for the removal of humic acid from water 1036(2004)113

Adsorption

Adsorption of charged macromolecules on oppositely charged porous column materials 1036(2004)25

Adsorption and desorption behavior of plasmid DNA on ion-exchange membranes. Effect of salt valence and compaction agents 1036(2004)73

Adsorption energy

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Adsorption isotherms

Adsorption of charged macromolecules on oppositely charged porous column materials 1036(2004)25

Effectiveness of the H-root method for determining adsorption isotherms of protein–salt systems in open micro-channels 1036(2004)61

Alkyl benzene sulfonates

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Alkyl ether sulfates

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Allium sativum

Solid-phase microextraction–gas chromatographic–mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Alternating least squares

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Antibiotics

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Avocado

Solid-phase microextraction and gas chromatography–mass spectrometry of volatile compounds from avocado puree after microwave processing 1036(2004)87

Bacillus spores

Gas chromatography using a resistively heated column with mass spectrometric detection for rapid analysis of pyridine released from *Bacillus* spores 1036(2004)249

Benzoic acids

Preparative-scale isoelectric trapping separations in methanol–water mixtures 1036(2004)3

Berberine chloride

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Bisbenzo crown ether

Development of new solid-phase microextraction fibers by sol–gel technology for the determination of organophosphorus pesticide multiresidues in food 1036(2004)101

tert-Butyl-carbamoylquinine

Monolithic silica columns with chemically bonded *tert*-butylcarbamoylquinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

Carbon spheres

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Chiral stationary phases, LC

Monolithic silica columns with chemically bonded *tert*-butylcarbamoylquinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

Streptavidin chiral stationary phase for the separation of adenosine enantiomers 1036(2004)155

Chromium

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Clerodendrum floribundum

Isolation of the active constituents in natural materials by ‘heart-cutting’ isocratic reversed-phase two-dimensional liquid chromatography 1036(2004)15

Cloud point extraction

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Column coupling

Monolithic silica columns with chemically bonded *tert*-butylcarbamoyl-quinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

***Cordyceps* spp**

Simultaneous determination of ergosterol, nucleosides and their bases from natural and cultured *Cordyceps* by pressurised liquid extraction and high-performance liquid chromatography 1036(2004)239

Counter-current chromatography

Isolation and purification of honokiol and magnolol from cortex *Magnoliae officinalis* by high-speed counter-current chromatography 1036(2004)171

Cyclodextrins

Advanced mesoporous organosilica material containing microporous β -cyclodextrins for the removal of humic acid from water 1036(2004)113

Decarbamoylsaxitoxin

Liquid chromatography/quadrupole time-of-flight mass spectrometry for determination of saxitoxin and decarbamoylsaxitoxin in shellfish 1036(2004)233

Displacement chromatography

Separation of phosphatidylcholine and phosphatidylethanolamine by using high-performance displacement chromatography 1036(2004)145

DNA

Adsorption and desorption behavior of plasmid DNA on ion-exchange membranes. Effect of salt valence and compaction agents 1036(2004)73

Dynamic capacity

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Electrokinetic chromatography

High-salt stacking principles and sweeping: comments and contrasts on mechanisms for high-sensitivity analysis in capillary electrophoresis 1036(2004)95

Electrostatic interactions

Adsorption of charged macromolecules on oppositely charged porous column materials 1036(2004)25

Enantiomer separation

Monolithic silica columns with chemically bonded *tert*-butylcarbamoyl-quinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

Streptavidin chiral stationary phase for the separation of adenosine enantiomers 1036(2004)155

Environmental analysis

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Quantitative analysis of imazamox herbicide in environmental water samples by capillary electrophoresis electrospray ionization mass spectrometry 1036(2004)217

Equilibrium capacity

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Ergosterol

Simultaneous determination of ergosterol, nucleosides and their bases from natural and cultured *Cordyceps* by pressurised liquid extraction and high-performance liquid chromatography 1036(2004)239

Essential oils

Essential oil composition of the leaves and stems of *Meum athamanticum* Jacq., from Spain 1036(2004)245

Ethoxylated alkyl sulfates

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Extraction methods

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Flavones, polysubstituted

Separation of rutin nona(H-) and deca(H-) sulfonate sodium by ion-pairing reversed-phase liquid chromatography 1036(2004)229

Flow injection

On-line coupling of flow injection displacement sorption preconcentration to high-performance liquid chromatography for speciation analysis of mercury in seafood 1036(2004)119

Food analysis

Solid-phase microextraction and gas chromatography–mass spectrometry of volatile compounds from avocado puree after microwave processing 1036(2004)87

On-line coupling of flow injection displacement sorption preconcentration to high-performance liquid chromatography for speciation analysis of mercury in seafood 1036(2004)119

Application of liquid chromatography with electrospray tandem mass spectrometry to the determination of a new generation of pesticides in processed fruits and vegetables 1036(2004)161

Interlaboratory evaluation of injection techniques for triglyceride analysis of cocoa butter by capillary gas chromatography 1036(2004)197

Fruits

Application of liquid chromatography with electrospray tandem mass spectrometry to the determination of a new generation of pesticides in processed fruits and vegetables 1036(2004)161

Garlic oil

Solid-phase microextraction–gas chromatographic–mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Gradiflow

Preparative-scale isoelectric trapping separations in methanol–water mixtures 1036(2004)3

Growth factors

Relative retention of the fibroblast growth factors FGF-1 and FGF-2 on strong cation-exchange sorbents 1036(2004)51

Heart-cutting

Isolation of the active constituents in natural materials by 'heart-cutting' isocratic reversed-phase two-dimensional liquid chromatography 1036(2004)15

Heat of adsorption

Calorimetric investigation of the adsorption of nitrogen bases and nucleosides on a hydrophobic interaction sorbent 1036(2004)79

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Heparin

Relative retention of the fibroblast growth factors FGF-1 and FGF-2 on strong cation-exchange sorbents 1036(2004)51

High-salt stacking

High-salt stacking principles and sweeping: comments and contrasts on mechanisms for high-sensitivity analysis in capillary electrophoresis 1036(2004)95

Honokiol

Isolation and purification of honokiol and magnolol from cortex *Magnoliae officinalis* by high-speed counter-current chromatography 1036(2004)171

H-root method

Effectiveness of the H-root method for determining adsorption isotherms of protein-salt systems in open micro-channels 1036(2004)61

Humic acid

Advanced mesoporous organosilica material containing microporous β -cyclodextrins for the removal of humic acid from water 1036(2004)113

Hydrodistillation

Solid-phase microextraction-gas chromatographic-mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Hydrophobic interaction chromatography

Hydrophobic interaction chromatography at low salt concentration for the capture of monoclonal antibodies 1036(2004)45

Calorimetric investigation of the adsorption of nitrogen bases and nucleosides on a hydrophobic interaction sorbent 1036(2004)79

Hydrophobicity

Hydrophobic interaction chromatography at low salt concentration for the capture of monoclonal antibodies 1036(2004)45

Hydroxymorpholinomethylbenzoic acid

Preparative-scale isoelectric trapping separations in methanol-water mixtures 1036(2004)3

Imazamox

Quantitative analysis of imazamox herbicide in environmental water samples by capillary electrophoresis electrospray ionization mass spectrometry 1036(2004)217

Indirect detection interferences

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Injection methods

Interlaboratory evaluation of injection techniques for triglyceride analysis of cocoa butter by capillary gas chromatography 1036(2004)197

Instrumentation

High-throughput preparative process utilizing three complementary chromatographic purification technologies 1036(2004)7

Interlaboratory studies

Interlaboratory evaluation of injection techniques for triglyceride analysis of cocoa butter by capillary gas chromatography 1036(2004)197

Inverse gas chromatography

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Isoelectric trapping

Preparative-scale isoelectric trapping separations in methanol-water mixtures 1036(2004)3

Lipids

Separation of phosphatidylcholine and phosphatidylethanolamine by using high-performance displacement chromatography 1036(2004)145

Liquid chromatography, fast

Practical aspects of fast reversed-phase high-performance liquid chromatography using 3 μ m particle packed columns and monolithic columns in pharmaceutical development and production working under current good manufacturing practice 1036(2004)127

Liquid chromatography, two-dimensional

Isolation of the active constituents in natural materials by 'heart-cutting' isocratic reversed-phase two-dimensional liquid chromatography 1036(2004)15

Magnoliae officinalis

Isolation and purification of honokiol and magnolol from cortex *Magnoliae officinalis* by high-speed counter-current chromatography 1036(2004)171

Magnolol

Isolation and purification of honokiol and magnolol from cortex *Magnoliae officinalis* by high-speed counter-current chromatography 1036(2004)171

Mathematical modelling

Effectiveness of the H-root method for determining adsorption isotherms of protein-salt systems in open micro-channels 1036(2004)61

Membranes

Adsorption and desorption behavior of plasmid DNA on ion-exchange membranes. Effect of salt valence and compaction agents 1036(2004)73

Mercury

On-line coupling of flow injection displacement sorption preconcentration to high-performance liquid chromatography for speciation analysis of mercury in seafood 1036(2004)119

Metal cations

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Meum athamanticum

Essential oil composition of the leaves and stems of *Meum athamanticum* Jacq., from Spain 1036(2004)245

Monoclonal antibodies

Hydrophobic interaction chromatography at low salt concentration for the capture of monoclonal antibodies 1036(2004)45

Monolithic columns

Practical aspects of fast reversed-phase high-performance liquid chromatography using 3 μ m particle packed columns and monolithic columns in pharmaceutical development and production working under current good manufacturing practice 1036(2004)127

Monolithic silica columns with chemically bonded *tert*-butylcarbamoyl-quinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

Monoterpenes

Essential oil composition of the leaves and stems of *Meum athamanticum* Jacq., from Spain 1036(2004)245

Multidimensional techniques

Isolation of the active constituents in natural materials by 'heart-cutting' isocratic reversed-phase two-dimensional liquid chromatography 1036(2004)15

Multivariate deconvolution

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Nitrogen oxides

Products of the reaction between α - or γ -tocopherol and nitrogen oxides analyzed by high-performance liquid chromatography with UV-visible and atmospheric pressure chemical ionization mass spectrometric detection 1036(2004)177

Nucleosides

Simultaneous determination of ergosterol, nucleosides and their bases from natural and cultured *Cordyceps* by pressurised liquid extraction and high-performance liquid chromatography 1036(2004)239

Null-balance detection window

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Oils

Solid-phase microextraction-gas chromatographic-mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Oligonucleotides

Calorimetric investigation of the adsorption of nitrogen bases and nucleosides on a hydrophobic interaction sorbent 1036(2004)79

On-line sample concentration

High-salt stacking principles and sweeping: comments and contrasts on mechanisms for high-sensitivity analysis in capillary electrophoresis 1036(2004)95

Open parallel plate systems, micro

Effectiveness of the H-root method for determining adsorption isotherms of protein-salt systems in open micro-channels 1036(2004)61

Open tubular systems, micro

Effectiveness of the H-root method for determining adsorption isotherms of protein-salt systems in open micro-channels 1036(2004)61

Organophosphorus compounds

Development of new solid-phase microextraction fibers by sol-gel technology for the determination of organophosphorus pesticide multiresidues in food 1036(2004)101

Organosulfur compounds

Solid-phase microextraction-gas chromatographic-mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Orthogonal projection

Resolution of overlapped non-absorbing and absorbing solutes using either an absorption null-balance detection window or multivariate deconvolution applied to capillary electrophoresis of anionic surfactants 1036(2004)205

Parallel synthesis

High-throughput preparative process utilizing three complementary chromatographic purification technologies 1036(2004)7

Pesticides

Development of new solid-phase microextraction fibers by sol-gel technology for the determination of organophosphorus pesticide multiresidues in food 1036(2004)101

Application of liquid chromatography with electrospray tandem mass spectrometry to the determination of a new generation of pesticides in processed fruits and vegetables 1036(2004)161

Quantitative analysis of imazamox herbicide in environmental water samples by capillary electrophoresis electrospray ionization mass spectrometry 1036(2004)217

Pharmaceutical analysis

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Practical aspects of fast reversed-phase high-performance liquid chromatography using 3 μ m particle packed columns and monolithic columns in pharmaceutical development and production working under current good manufacturing practice 1036(2004)127

Isolation and purification of honokiol and magnolol from cortex *Magnoliae officinalis* by high-speed counter-current chromatography 1036(2004)171

Simultaneous determination of ergosterol, nucleosides and their bases from natural and cultured *Cordyceps* by pressurised liquid extraction and high-performance liquid chromatography 1036(2004)239

Phosphatidylcholine

Separation of phosphatidylcholine and phosphatidylethanolamine by using high-performance displacement chromatography 1036(2004)145

Phosphatidylethanolamine

Separation of phosphatidylcholine and phosphatidylethanolamine by using high-performance displacement chromatography 1036(2004)145

Phospholipids

Separation of phosphatidylcholine and phosphatidylethanolamine by using high-performance displacement chromatography 1036(2004)145

Phosphorous

Ion chromatographic determination of trace level phosphorus in purified quartz 1036(2004)223

Plant materials

Essential oil composition of the leaves and stems of *Meum athamanticum* Jacq., from Spain 1036(2004)245

Polyelectrolytes

Adsorption of charged macromolecules on oppositely charged porous column materials 1036(2004)25

Polymers

Adsorption of charged macromolecules on oppositely charged porous column materials 1036(2004)25

Pore structure

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Porosity

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Preconcentration

On-line coupling of flow injection displacement sorption preconcentration to high-performance liquid chromatography for speciation analysis of mercury in seafood 1036(2004)119

Preparative chromatography

High-throughput preparative process utilizing three complementary chromatographic purification technologies 1036(2004)7

Isolation of the active constituents in natural materials by 'heart-cutting' isocratic reversed-phase two-dimensional liquid chromatography 1036(2004)15

Isolation and purification of honokiol and magnolol from cortex *Magnolia officinalis* by high-speed counter-current chromatography 1036(2004)171

Preparative electrophoresis

Preparative-scale isoelectric trapping separations in methanol-water mixtures 1036(2004)3

Proteins

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Hydrophobic interaction chromatography at low salt concentration for the capture of monoclonal antibodies 1036(2004)45

Relative retention of the fibroblast growth factors FGF-1 and FGF-2 on strong cation-exchange sorbents 1036(2004)51

Protein-salt systems

Effectiveness of the H-root method for determining adsorption isotherms of protein-salt systems in open micro-channels 1036(2004)61

Pyridine

Gas chromatography using a resistively heated column with mass spectrometric detection for rapid analysis of pyridine released from *Bacillus* spores 1036(2004)249

Pyridinepropionic acid

Preparative-scale isoelectric trapping separations in methanol-water mixtures 1036(2004)3

Quartz

Ion chromatographic determination of trace level phosphorus in purified quartz 1036(2004)223

Resistive heating

Gas chromatography using a resistively heated column with mass spectrometric detection for rapid analysis of pyridine released from *Bacillus* spores 1036(2004)249

Response surface

Solid-phase microextraction and gas chromatography-mass spectrometry of volatile compounds from avocado puree after microwave processing 1036(2004)87

Rutin deca(H-) sulfonate sodium

Separation of rutin nona(H-) and deca(H-) sulfonate sodium by ion-pairing reversed-phase liquid chromatography 1036(2004)229

Rutin nona(H-) sulfonate sodium

Separation of rutin nona(H-) and deca(H-) sulfonate sodium by ion-pairing reversed-phase liquid chromatography 1036(2004)229

Salt effects

Hydrophobic interaction chromatography at low salt concentration for the capture of monoclonal antibodies 1036(2004)45

Adsorption and desorption behavior of plasmid DNA on ion-exchange membranes. Effect of salt valence and compaction agents 1036(2004)73

Saxitoxin

Liquid chromatography/quadrupole time-of-flight mass spectrometry for determination of saxitoxin and decarbamoylsaxitoxin in shellfish 1036(2004)233

Shellfish poisoning

Liquid chromatography/quadrupole time-of-flight mass spectrometry for determination of saxitoxin and decarbamoylsaxitoxin in shellfish 1036(2004)233

Silica

Monolithic silica columns with chemically bonded *tert*-butylcarbamoyl-quinine chiral anion-exchanger selector as a stationary phase for enantiomer separations 1036(2004)135

Sol-gel technology

Development of new solid-phase microextraction fibers by sol-gel technology for the determination of organophosphorus pesticide multiresidues in food 1036(2004)101

Solid-phase microextraction

Solid-phase microextraction-gas chromatographic-mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Development of new solid-phase microextraction fibers by sol-gel technology for the determination of organophosphorus pesticide multiresidues in food 1036(2004)101

Speciation analysis

On-line coupling of flow injection displacement sorption preconcentration to high-performance liquid chromatography for speciation analysis of mercury in seafood 1036(2004)119

Stationary phases, GC

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Stationary phases, LC

Relative retention of the fibroblast growth factors FGF-1 and FGF-2 on strong cation-exchange sorbents 1036(2004)51

Practical aspects of fast reversed-phase high-performance liquid chromatography using 3 μm particle packed columns and monolithic columns in pharmaceutical development and production working under current good manufacturing practice 1036(2004)127

Sterols

Simultaneous determination of ergosterol, nucleosides and their bases from natural and cultured *Cordyceps* by pressurised liquid extraction and high-performance liquid chromatography 1036(2004)239

Streptavidin

Streptavidin chiral stationary phase for the separation of adenosine enantiomers 1036(2004)155

Supercritical fluid chromatography

High-throughput preparative process utilizing three complementary chromatographic purification technologies 1036(2004)7

Surfactant extraction

Advanced mesoporous organosilica material containing microporous β -cyclodextrins for the removal of humic acid from water 1036(2004)113

Sweeping

High-salt stacking principles and sweeping: comments and contrasts on mechanisms for high-sensitivity analysis in capillary electrophoresis 1036(2004)95

Terpenes

Essential oil composition of the leaves and stems of *Meum athamanticum* Jacq., from Spain 1036(2004)245

Thermodynamic parameters

Calorimetric investigation of the adsorption of nitrogen bases and nucleosides on a hydrophobic interaction sorbent 1036(2004)79

Study of microporosity of active carbon spheres using inverse gas chromatographic and static adsorption techniques 1036(2004)189

Tocopherols

Products of the reaction between α - or γ -tocopherol and nitrogen oxides analyzed by high-performance liquid chromatography with UV-visible and atmospheric pressure chemical ionization mass spectrometric detection 1036(2004)177

Triglycerides

Interlaboratory evaluation of injection techniques for triglyceride analysis of cocoa butter by capillary gas chromatography 1036(2004)197

Validation

Quantitative analysis of imazamox herbicide in environmental water samples by capillary electrophoresis electrospray ionization mass spectrometry 1036(2004)217

Vapour phase digestion

Ion chromatographic determination of trace level phosphorus in purified quartz 1036(2004)223

Vegetables

Application of liquid chromatography with electrospray tandem mass spectrometry to the determination of a new generation of pesticides in processed fruits and vegetables 1036(2004)161

Vitamin

Fundamental characteristics of synthetic adsorbents intended for industrial chromatographic separations 1036(2004)33

Volatile organic compounds

Solid-phase microextraction and gas chromatography–mass spectrometry of volatile compounds from avocado puree after microwave processing 1036(2004)87

Solid-phase microextraction–gas chromatographic–mass spectrometric analysis of garlic oil obtained by hydrodistillation 1036(2004)91

Water analysis

Advanced mesoporous organosilica material containing microporous β -cyclodextrins for the removal of humic acid from water 1036(2004)113

Cloud point extraction for high-performance liquid chromatographic speciation of Cr(III) and Cr(VI) in aqueous solutions 1036(2004)183

Quantitative analysis of imazamox herbicide in environmental water samples by capillary electrophoresis electrospray ionization mass spectrometry 1036(2004)217
