

Subject Index Vol. 1037

Acid–base equilibria

Determination of equilibrium constants from chromatographic and electrophoretic measurements (Review) 1037(2004)15

Adenine

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Adsorbents

Determination of pore size distributions of porous chromatographic adsorbents by inverse size-exclusion chromatography (Review) 1037(2004)273

Adsorption

Introduction into the characterisation of porous materials by inverse gas chromatography (Review) 1037(2004)115

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Adsorption isotherms

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Experimental determination of single solute and competitive adsorption isotherms (Review) 1037(2004)255

Adsorption rates

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Affinity chromatography

Determination of binding constants by affinity chromatography (Review) 1037(2004)351

Alkylbenzenes

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Amino acids

Determination of the isoelectric point of proteins by capillary isoelectric focusing (Review) 1037(2004)491

Background electrolytes

Capillary zone electrophoresis in non-aqueous solutions: pH of the background electrolyte (Review) 1037(2004)455

Binding constants

Determination of binding constants by affinity chromatography (Review) 1037(2004)351

Biosensors

Determination of binding constants by affinity chromatography (Review) 1037(2004)351

Capillary electrophoresis

Joule heating and determination of temperature in capillary electrophoresis and capillary electrochromatography columns (Review) 1037(2004)431

Capillary zone electrophoresis in non-aqueous solutions: pH of the background electrolyte (Review) 1037(2004)455

Determination of critical micelle concentration of surfactants by capillary electrophoresis (Review) 1037(2004)467

Catalysts

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Chemical composition distributions

Determination of chemical composition distributions in synthetic polymers (Review) 1037(2004)329

Chemical correlation

Chiral liquid chromatography contribution to the determination of the absolute configuration of enantiomers (Review) 1037(2004)311

Chiral stationary phases, LC

Chiral liquid chromatography contribution to the determination of the absolute configuration of enantiomers (Review) 1037(2004)311

Chromatographic hydrophobicity index

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299

Circular dichroism

Chiral liquid chromatography contribution to the determination of the absolute configuration of enantiomers (Review) 1037(2004)311

Complexation

Determination of equilibrium constants from chromatographic and electrophoretic measurements (Review) 1037(2004)15

Counter-current chromatography

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Critical micellar concentration

Determination of critical micelle concentration of surfactants by capillary electrophoresis (Review) 1037(2004)467

Curve fitting

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Cytosine

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Density

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Detection, GC

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Diffusion coefficients

Determination of diffusion coefficients by gas chromatography (Review) 1037(2004)147

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Dissociation constants

Determination of acid dissociation constants by capillary electrophoresis (Review) 1037(2004)445

Distribution constants

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Dynamic sorption

Introduction into the characterisation of porous materials by inverse gas chromatography (Review) 1037(2004)115

Electrochromatography

Joule heating and determination of temperature in capillary electrophoresis and capillary electrochromatography columns (Review) 1037(2004)431

Electrokinetic chromatography

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Electron affinities

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Electron-capture detection

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Enantiomer separation

Chiral liquid chromatography contribution to the determination of the absolute configuration of enantiomers (Review) 1037(2004)311

Enhance-fluidity liquid solvents

Physicochemical properties of enhanced-fluidity liquid solvents (Review) 1037(2004)405

Environmental analysis

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Equilibrium constants

Determination of equilibrium constants from chromatographic and electrophoretic measurements (Review) 1037(2004)15

Flow injection analysis

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Free-volume

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Gas chromatography

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Determination of diffusion coefficients by gas chromatography (Review) 1037(2004)147

Determination of gas–liquid partition coefficients by gas chromatography (Review) 1037(2004)223

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Gas–solid chromatography

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Guanine

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Heat capacity

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Hydrophobicity

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Immobilised artificial membrane chromatography

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299

Impulse response

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Inverse gas chromatography

Introduction into the characterisation of porous materials by inverse gas chromatography (Review) 1037(2004)115

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Inverse size-exclusion chromatography

Determination of pore size distributions of porous chromatographic adsorbents by inverse size-exclusion chromatography (Review) 1037(2004)273

Ionic liquids

Chromatographic and spectroscopic methods for the determination of solvent properties of room temperature ionic liquids (Review) 1037(2004)49

Isoelectric focusing

Determination of the isoelectric point of proteins by capillary isoelectric focusing (Review) 1037(2004)491

Isoelectric points

Determination of the isoelectric point of proteins by capillary isoelectric focusing (Review) 1037(2004)491

Joule heating

Joule heating and determination of temperature in capillary electrophoresis and capillary electrochromatography columns (Review) 1037(2004)431

Kinetic studies

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Lateral interactions

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Lipophilicity

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299

Liquid–vapor equilibria

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Mathematical modelling

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Experimental determination of single solute and competitive adsorption isotherms (Review) 1037(2004)255

Micellar electrokinetic chromatography

Determination of critical micelle concentration of surfactants by capillary electrophoresis (Review) 1037(2004)467

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Microemulsion electrokinetic chromatography

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Migration window

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Mobile phase composition

Determination of the pH of binary mobile phases for reversed-phase liquid chromatography (Review) 1037(2004)283

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Physicochemical properties of enhanced-fluidity liquid solvents (Review) 1037(2004)405

Molar volume

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Non-aqueous organic solvents

Capillary zone electrophoresis in non-aqueous solutions: pH of the background electrolyte (Review) 1037(2004)455

Octanol–water partition coefficients

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299

Organochlorine compounds

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Partition coefficients

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Determination of sets of solute descriptors from chromatographic measurements (Review) 1037(2004)29

Determination of gas–liquid partition coefficients by gas chromatography (Review) 1037(2004)223

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

pH

Capillary zone electrophoresis in non-aqueous solutions: pH of the background electrolyte (Review) 1037(2004)455

pH determination

Determination of the pH of binary mobile phases for reversed-phase liquid chromatography (Review) 1037(2004)283

Phase equilibria

Determination of thermodynamic properties by supercritical fluid chromatography (Review) 1037(2004)369

Polymers

Determination of chemical composition distributions in synthetic polymers (Review) 1037(2004)329

Pore size distribution

Determination of pore size distributions of porous chromatographic adsorbents by inverse size-exclusion chromatography (Review) 1037(2004)273

Porous materials

Introduction into the characterisation of porous materials by inverse gas chromatography (Review) 1037(2004)115

Pressure effects

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Probability density function

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Proteins

Determination of the isoelectric point of proteins by capillary isoelectric focusing (Review) 1037(2004)491

Quinolines

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Resolution

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Retention factor

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Retention indices

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Retention times

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Retention volumes

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Reversed-flow gas chromatography

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Reviews

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Determination of equilibrium constants from chromatographic and electrophoretic measurements (Review) 1037(2004)15

Determination of sets of solute descriptors from chromatographic measurements (Review) 1037(2004)29

Chromatographic and spectroscopic methods for the determination of solvent properties of room temperature ionic liquids (Review) 1037(2004)49

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Introduction into the characterisation of porous materials by inverse gas chromatography (Review) 1037(2004)115

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Determination of diffusion coefficients by gas chromatography (Review) 1037(2004)147

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Determination of gas–liquid partition coefficients by gas chromatography (Review) 1037(2004)223

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Experimental determination of single solute and competitive adsorption isotherms (Review) 1037(2004)255

Determination of pore size distributions of porous chromatographic adsorbents by inverse size-exclusion chromatography (Review) 1037(2004)273

Determination of the pH of binary mobile phases for reversed-phase liquid chromatography (Review) 1037(2004)283

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299

Chiral liquid chromatography contribution to the determination of the absolute configuration of enantiomers (Review) 1037(2004)311

Determination of chemical composition distributions in synthetic polymers (Review) 1037(2004)329

Determination of binding constants by affinity chromatography (Review) 1037(2004)351

Determination of thermodynamic properties by supercritical fluid chromatography (Review) 1037(2004)369

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Physicochemical properties of enhanced-fluidity liquid solvents (Review) 1037(2004)405

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Joule heating and determination of temperature in capillary electrophoresis and capillary electrochromatography columns (Review) 1037(2004)431

Determination of acid dissociation constants by capillary electrophoresis (Review) 1037(2004)445

Capillary zone electrophoresis in non-aqueous solutions: pH of the background electrolyte (Review) 1037(2004)455

Determination of critical micelle concentration of surfactants by capillary electrophoresis (Review) 1037(2004)467

Determination and regulation of the migration window in electrokinetic chromatography (Review) 1037(2004)479

Determination of the isoelectric point of proteins by capillary isoelectric focusing (Review) 1037(2004)491

Room temperature ionic liquids

Chromatographic and spectroscopic methods for the determination of solvent properties of room temperature ionic liquids (Review) 1037(2004)49

Solubility

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Solute descriptors

Determination of sets of solute descriptors from chromatographic measurements (Review) 1037(2004)29

Solute–solvent interactions

Determination of sets of solute descriptors from chromatographic measurements (Review) 1037(2004)29

Solvation

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Solvation equation

Determination of sets of solute descriptors from chromatographic measurements (Review) 1037(2004)29

Solvent properties

Chromatographic and spectroscopic methods for the determination of solvent properties of room temperature ionic liquids (Review) 1037(2004)49

Supercritical fluid chromatography

Determination of thermodynamic properties by supercritical fluid chromatography (Review) 1037(2004)369

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Surface diffusion

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Surface energy

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Surfactants

Determination of critical micelle concentration of surfactants by capillary electrophoresis (Review) 1037(2004)467

Temperature effects

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Determination of pressure–temperature coordinates of liquid–vapor critical loci by supercritical fluid flow injection analysis (Review) 1037(2004)393

Thermodynamic parameters

Determination of liquid–liquid partition coefficients by separation methods (Review) 1037(2004)3

Application of capillary gas chromatography to studies on solvation thermodynamics (Review) 1037(2004)233

Determination of thermodynamic properties by supercritical fluid chromatography (Review) 1037(2004)369

Impulse response techniques to measure binary diffusion coefficients under supercritical conditions (Review) 1037(2004)411

Thymine

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Time resolved chromatography

Determination of chemical kinetic properties of heterogeneous catalysts (Review) 1037(2004)125

Determination of isotherms by gas–solid chromatography. Applications (Review) 1037(2004)191

Uracil

Molecular electron affinities and the calculation of the temperature dependence of the electron-capture detector response (Review) 1037(2004)83

Vapor pressure

Determination of vapor pressures using gas chromatography (Review) 1037(2004)107

Volume of distribution

Application of high-performance liquid chromatography based measurements of lipophilicity to model biological distribution (Review) 1037(2004)299
