

## Subject Index Vol. 1053

### ACE

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

### Acidic buffers

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

### Adsorption

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

### Adsorption isotherms

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

### Affinity capillary electrophoresis

Determination of the amylose–amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

### Affinity energy distribution

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

### Alcohol polyethoxylates

Separation of fatty alcohol polyethoxylates by capillary electrophoresis through easy electroosmotic flow control with a quaternary diammonium salt 1053(2004)235

### Aminosalicic acid

Determination of impurities in the drug 5-aminosalicylic acid by micellar electrokinetic capillary chromatography using an electrolyte pH that approaches the isoelectric point of the parent compound 1053(2004)217

### Amphipathicity

Monitoring the hydrophilicity/hydrophobicity of amino acid side-chains in the non-polar and polar faces of amphipathic  $\alpha$ -helices by reversed-phase and hydrophilic interaction/cation-exchange chromatography 1053(2004)161

### Amylopectin

Determination of the amylose–amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

### Amylose

Determination of the amylose–amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

### Angiotensins

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

### Antibodies

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

### Antimicrobial peptides

Monitoring the hydrophilicity/hydrophobicity of amino acid side-chains in the non-polar and polar faces of amphipathic  $\alpha$ -helices by reversed-phase and hydrophilic interaction/cation-exchange chromatography 1053(2004)161

### Band profiles

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

### Binding constants

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

### Bradykinins

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

### Buckminsterfullerenes

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

### Capillary curvature

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

### Carbohydrates

Latex-functionalized monolithic columns for the separation of carbohydrates by micro anion-exchange chromatography 1053(2004)101

### CE

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

### CE interface

Sheathless electrospray ionization interfaces for capillary electrophoresis–mass spectrometric detection. Advantages and limitations (Review) 1053(2004)37

**CE/ESI-MS**

Sheathless electrospray ionization interfaces for capillary electrophoresis–mass spectrometric detection. Advantages and limitations (Review) 1053(2004)37

**CE/MS**

Sheathless electrospray ionization interfaces for capillary electrophoresis–mass spectrometric detection. Advantages and limitations (Review) 1053(2004)37

**Characterization**

Development of an analytical reversed-phase high-performance liquid chromatography–electrospray ionization mass spectrometry method for characterization of recombinant antibodies 1053(2004)299

**Charge variants**

Development of an analytical reversed-phase high-performance liquid chromatography–electrospray ionization mass spectrometry method for characterization of recombinant antibodies 1053(2004)299

**Chiral stationary phases**

Novel urea-linked cinchona-calixarene hybrid-type receptors for efficient chromatographic enantiomer separation of carbamate-protected cyclic amino acids 1053(2004)119

**Chromatofocusing**

Use of two-dimensional liquid fractionation for separation of proteins from cell lysates without the presence of methionine oxidation 1053(2004)133

**cIEF**

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

**CLOD**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Complexation**

Determination of the amylose–amylopectin ratio of starches by iodine–affinity capillary electrophoresis 1053(2004)227

**Concanavalin A**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**Concentric post-column splitting**

Improved liquid chromatography–mass spectrometry performance in quantitative analysis using a nanosplitter interface 1053(2004)151

**Concentration boundary**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**Conductivity and pH distortions**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Conductivity distortion**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**Cyclic amino acids**

Novel urea-linked cinchona-calixarene hybrid-type receptors for efficient chromatographic enantiomer separation of carbamate-protected cyclic amino acids 1053(2004)119

**CZE**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Degradation**

Development of an analytical reversed-phase high-performance liquid chromatography–electrospray ionization mass spectrometry method for characterization of recombinant antibodies 1053(2004)299

**Diffusion**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**2D-LC**

Use of two-dimensional liquid fractionation for separation of proteins from cell lysates without the presence of methionine oxidation 1053(2004)133

**DNA**

Ionic boundaries in biological capillary electrophoresis (Review) 1053(2004)43

Phenolic extraction of DNA from mammalian tissues and conversion to deoxyribonucleoside-5'-monophosphates devoid of ribonucleotides 1053(2004)143

Single-molecule spectroscopy for molecular identification in capillary electrophoresis 1053(2004)173

**Dopamine D4 receptor gene**

Genotyping and haplotyping of the dopamine D4 receptor gene by capillary electrophoresis 1053(2004)241

**Drug discovery**

Improved liquid chromatography–mass spectrometry performance in quantitative analysis using a nanosplitter interface 1053(2004)151

**Dyes**

Single-molecule spectroscopy for molecular identification in capillary electrophoresis 1053(2004)173

**Electroosmotic flow**

Surfing silica surfaces superciliously (Review) 1053(2004)15

Separation of fatty alcohol polyethoxylates by capillary electrophoresis through easy electroosmotic flow control with a quaternary diammonium salt 1053(2004)235

**Electrophoresis**

Free flow electrophoresis coupled with liquid chromatography–mass spectrometry for a proteomic study of the human cell line (K562/CR3) 1053(2004)269

**ELISAs**

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

**Enantiomer separation**

Novel urea-linked cinchona-calixarene hybrid-type receptors for efficient chromatographic enantiomer separation of carbamate-protected cyclic amino acids 1053(2004)119

**Enkephalins**

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

**Enrichment**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**Enzymatic assay**

Capillary electrophoretic approach to screen for enzyme inhibitors in natural extracts 1053(2004)247

**Ethoxylates**

Separation of fatty alcohol polyethoxylates by capillary electrophoresis through easy electroosmotic flow control with a quaternary diammonium salt 1053(2004)235

**Extraction methods**

Capillary liquid chromatographic determination of cellular flavins 1053(2004)71

**Fatty alcohol polyethoxylates**

Separation of fatty alcohol polyethoxylates by capillary electrophoresis through easy electroosmotic flow control with a quaternary diammonium salt 1053(2004)235

**Flavins**

Capillary liquid chromatographic determination of cellular flavins 1053(2004)71

**Frontal analysis**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Fullerenes**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Genes**

Genotyping and haplotyping of the dopamine D4 receptor gene by capillary electrophoresis 1053(2004)241

**Glycoprotein**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**Glycosylation**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**Gradient separation**

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

**Heterogeneity**

Development of an analytical reversed-phase high-performance liquid chromatography–electrospray ionization mass spectrometry method for characterization of recombinant antibodies 1053(2004)299

**Hydrophilicity**

Monitoring the hydrophilicity/hydrophobicity of amino acid side-chains in the non-polar and polar faces of amphipathic  $\alpha$ -helices by reversed-phase and hydrophilic interaction/cation-exchange chromatography 1053(2004)161

**Hydrophobicity**

Monitoring the hydrophilicity/hydrophobicity of amino acid side-chains in the non-polar and polar faces of amphipathic  $\alpha$ -helices by reversed-phase and hydrophilic interaction/cation-exchange chromatography 1053(2004)161

**Hyper-sharp peaks**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Iodine**

Determination of the amylose–amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

**Ion suppression**

Improved liquid chromatography–mass spectrometry performance in quantitative analysis using a nanosplitter interface 1053(2004)151

**Ionic boundaries**

Ionic boundaries in biological capillary electrophoresis (Review) 1053(2004)43

**Jacalin lectins**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**Joule heat**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Laser capture microscopy**

Microscale protein expression profiling during disease evolution 1053(2004)279

**Latex**

Latex-functionalized monolithic columns for the separation of carbohydrates by micro anion-exchange chromatography 1053(2004)101

**Liquid chromatography**

Free flow electrophoresis coupled with liquid chromatography–mass spectrometry for a proteomic study of the human cell line (K562/CR3) 1053(2004)269

**MALDI-TOF**

Use of two-dimensional liquid fractionation for separation of proteins from cell lysates without the presence of methionine oxidation 1053(2004)133

**Mass spectrometry**

Free flow electrophoresis coupled with liquid chromatography–mass spectrometry for a proteomic study of the human cell line (K562/CR3) 1053(2004)269

**Mathematical modelling**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Matrix preparation**

Effect of solvent composition on signal intensity in liquid chromatography–matrix-assisted laser desorption ionization experiments 1053(2004)291

**Matrix-assisted laser desorption ionization**

Effect of solvent composition on signal intensity in liquid chromatography–matrix-assisted laser desorption ionization experiments 1053(2004)291

**Mediated micro analysis**

Capillary electrophoretic approach to screen for enzyme inhibitors in natural extracts 1053(2004)247

**Methionine oxidation**

Use of two-dimensional liquid fractionation for separation of proteins from cell lysates without the presence of methionine oxidation 1053(2004)133

**Methylnaphthalene**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Migration time**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Monolithic columns**

Latex-functionalized monolithic columns for the separation of carbohydrates by micro anion-exchange chromatography 1053(2004)101

Operational variables in high-performance liquid chromatography–electrospray ionization mass spectrometry of peptides and proteins using poly(styrene–divinylbenzene) monoliths 1053(2004)107

**Multi-lectin affinity column**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**On-line preconcentration**

Chromatographic preconcentration coupled on-line to capillary electrophoresis via a Tee-split interface 1053(2004)263

**Peak distortion**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Peptides**

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

Operational variables in high-performance liquid chromatography–electrospray ionization mass spectrometry of peptides and proteins using poly(styrene–divinylbenzene) monoliths 1053(2004)107

Chromatographic preconcentration coupled on-line to capillary electrophoresis via a Tee-split interface 1053(2004)263

**pH distortion**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**pH effects**

Determination of impurities in the drug 5-aminosalicylic acid by micellar electrokinetic capillary chromatography using an electrolyte pH that approaches the isoelectric point of the parent compound 1053(2004)217

**Pharmaceutical analysis**

Determination of impurities in the drug 5-aminosalicylic acid by micellar electrokinetic capillary chromatography using an electrolyte pH that approaches the isoelectric point of the parent compound 1053(2004)217

**Piperazines**

Surfing silica surfaces superciliously (Review) 1053(2004)15

**Poly(styrene–divinylbenzene)**

Operational variables in high-performance liquid chromatography–electrospray ionization mass spectrometry of peptides and proteins using poly(styrene–divinylbenzene) monoliths 1053(2004)107

**Polysaccharides**

Determination of the amylose–amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

**Prefractionation**

Free flow electrophoresis coupled with liquid chromatography–mass spectrometry for a proteomic study of the human cell line (K562/CR3) 1053(2004)269

**Preparative chromatography**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Prion protein**

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

**Protein/buffer interaction**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Protein expression**

Microscale protein expression profiling during disease evolution 1053(2004)279

**Protein interaction**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**Protein tyrosine phosphatase**

Capillary electrophoretic approach to screen for enzyme inhibitors in natural extracts 1053(2004)247

**Protein-precipitated plasma samples**

Improved liquid chromatography–mass spectrometry performance in quantitative analysis using a nanosplitter interface 1053(2004)151

**Proteins**

Strategies for shotgun identification of post-translational modifications by mass spectrometry (Review) 1053(2004)7

Operational variables in high-performance liquid chromatography–electrospray ionization mass spectrometry of peptides and proteins using poly(styrene–divinylbenzene) monoliths 1053(2004)107

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

Microscale protein expression profiling during disease evolution 1053(2004)279

**Proteomics**

Strategies for shotgun identification of post-translational modifications by mass spectrometry (Review) 1053(2004)7

The role of liquid chromatography in proteomics (Review) 1053(2004)27

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

Free flow electrophoresis coupled with liquid chromatography–mass spectrometry for a proteomic study of the human cell line (K562/CR3) 1053(2004)269

**PrPc**

Capillary isoelectric focusing and affinity capillary electrophoresis approaches for the determination of binding constants for antibodies to the prion protein 1053(2004)253

**Quantitative**

The role of liquid chromatography in proteomics (Review) 1053(2004)27

**Quantitative analysis**

Improved liquid chromatography–mass spectrometry performance in quantitative analysis using a nanosplitter interface 1053(2004)151

**Quaternary ammonium compounds**

Surfing silica surfaces superciliously (Review) 1053(2004)15

Separation of fatty alcohol polyethoxylates by capillary electrophoresis through easy electroosmotic flow control with a quaternary diammonium salt 1053(2004)235

**Recombinant antibody**

Development of an analytical reversed-phase high-performance liquid chromatography–electrospray ionization mass spectrometry method for characterization of recombinant antibodies 1053(2004)299

**Reversed-phase separation**

Use of two-dimensional liquid fractionation for separation of proteins from cell lysates without the presence of methionine oxidation 1053(2004)133

**Reviews**

Strategies for shotgun identification of post-translational modifications by mass spectrometry (Review) 1053(2004)7

Surfing silica surfaces superciliously (Review) 1053(2004)15

The role of liquid chromatography in proteomics (Review) 1053(2004)27

**Ristocetin A**

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

**Sedimentation**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Sheathless CE interfaces**

Sheathless electrospray ionization interfaces for capillary electrophoresis–mass spectrometric detection. Advantages and limitations (Review) 1053(2004)37

**Signal intensity**

Effect of solvent composition on signal intensity in liquid chromatography–matrix-assisted laser desorption ionization experiments 1053(2004)291

**Silica**

Surfing silica surfaces superciliously (Review) 1053(2004)15

**Single-molecule detection**

Single-molecule spectroscopy for molecular identification in capillary electrophoresis 1053(2004)173

**Solid-phase extraction**

Chromatographic preconcentration coupled on-line to capillary electrophoresis via a Tee-split interface 1053(2004)263

**Solid-phase ion-pair microextraction**

Capillary liquid chromatographic determination of cellular flavins 1053(2004)71

**Starch**

Determination of the amylose-amylopectin ratio of starches by iodine-affinity capillary electrophoresis 1053(2004)227

**Stationary phases, LC**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

Latex-functionalized monolithic columns for the separation of carbohydrates by micro anion-exchange chromatography 1053(2004)101

**Surface coating**

Surfing silica surfaces superciliously (Review) 1053(2004)15

**Tee-split interface**

Chromatographic preconcentration coupled on-line to capillary electrophoresis via a Tee-split interface 1053(2004)263

**Teicoplanin**

Selective separations of peptides with sequence deletions, single amino acid polymorphisms, and/or epimeric centers using macrocyclic glycopeptide liquid chromatography stationary phases 1053(2004)89

**Tetraphenylporphyrin**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Toluene**

Adsorption isotherms of the fullerenes C<sub>60</sub> and C<sub>70</sub> on a tetraphenylporphyrin-bonded silica 1053(2004)59

**Urea-linked cinchona-calixarene hybrid-type selector**

Novel urea-linked cinchona-calixarene hybrid-type receptors for efficient chromatographic enantiomer separation of carbamate-protected cyclic amino acids 1053(2004)119

**Variance**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201

**Wheat germ**

Approach to the comprehensive analysis of glycoproteins isolated from human serum using a multi-lectin affinity column 1053(2004)79

**Width of starting zone**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

**Zone sharpening**

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. I. Theoretical studies 1053(2004)181

Influence of ignored and well-known zone distortions on the separation performance of proteins in capillary free zone electrophoresis with special reference to analysis in polyacrylamide-coated fused silica capillaries in various buffers. II. Experimental studies at acidic pH with on-line enrichment 1053(2004)201
