

## Subject Index Vol. 1056

### Alcohols

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

### Aldehydes

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

### Anisoles

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

### Arsenic

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

### Atomic fluorescence detection

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

### Bioterrorism

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization-gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

### Branching

Determination of low amounts of long-chain branches in polypropylene using a combination of chromatographic and rheological methods 1056(2004)217

### Breakthrough

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### Breath analysis

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### Breath ethane

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### Breath methane

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### γ-Butyrolactone

Simultaneous analysis of gamma-hydroxybutyric acid and its precursors in urine using liquid chromatography–tandem mass spectrometry 1056(2004)83

### Carbofrit®

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

### Carboxen

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### Chemiluminescence detection

Field-flow fractionation of cells with chemiluminescence detection 1056(2004)229

### Chemiluminescent nitrogen detection

Liquid chromatography–mass spectrometry with chemiluminescent nitrogen detection for on-line quantitative analysis of compound collections: advantages and limitations 1056(2004)67

### Chemometrics

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

### Chloroanisoles

Optimisation of a headspace solid-phase microextraction method for the direct determination of chloroanisoles related to cork taint in red wine 1056(2004)49

### CO<sub>2</sub> sensor

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

### Cobalt ferrite particles

Isolation of genomic DNA using magnetic cobalt ferrite and silica particles 1056(2004)43

### Cork taint

Optimisation of a headspace solid-phase microextraction method for the direct determination of chloroanisoles related to cork taint in red wine 1056(2004)49

### Coulometric detection

Pressurized liquid extraction prior to liquid chromatography with electrochemical detection for the analysis of vitamin E isomers in seeds and nuts 1056(2004)249

**Cryogenic trapping**

Rapid sequential heart-cut multidimensional gas chromatographic analysis 1056(2004)163

**Cyproterone acetate**

Fully automated method for the liquid chromatographic–tandem mass spectrometric determination of cyproterone acetate in human plasma using restricted access material for on-line sample clean-up 1056(2004)105

**Deconvolution**

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

**Derivatisation**

Liquid chromatography coupled with inductively coupled plasma mass spectrometry in the pharmaceutical industry: selected examples (Review) 1056(2004)3

**Derivatization, GC**

Applicability of solid-phase microextraction followed by on-fiber silylation for the determination of estrogens in water samples by gas chromatography–tandem mass spectrometry 1056(2004)179

**Derivatization, LC**

Determination of  $\alpha$ -tocopherolquinone in human serum samples by liquid chromatography with fluorescence detection and on-line post-column derivatization 1056(2004)257

**Detection, GC**

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

**Diazabicyclo-(5,4,0)undec-7-en**

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography–mass spectrometry with post-column base addition 1056(2004)131

**Dimethylsulfoxide**

Selective determination of polychlorinated biphenyls in waste oils using liquid–liquid partition followed by headspace solid-phase microextraction and gas chromatography with atomic emission detection 1056(2004)263

**Dinophysistoxins**

Rapid determination of polyether marine toxins using liquid chromatography–multiple tandem mass spectrometry 1056(2004)77

**Diphenylbutadiene**

Determination of diphenylbutadiene by liquid chromatography–UV–fluorescence in foodstuffs 1056(2004)99

**Direct coupling**

Direct coupling of supercritical fluid extraction to a gas phase atmospheric pressure chemical ionisation source ion trap mass spectrometer for fast extraction and analysis of food components 1056(2004)27

**DNA**

Isolation of genomic DNA using magnetic cobalt ferrite and silica particles 1056(2004)43

**Electroantennographic detection**

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

**Electron beam irradiation**

Determination of low amounts of long-chain branches in polypropylene using a combination of chromatographic and rheological methods 1056(2004)217

**Electrospray emitter**

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

**Emilia coccinea**

On-line structure characterization of pyrrolizidine alkaloids in *Onosma stellulatum* and *Emilia coccinea* by liquid chromatography–ion-trap mass spectrometry 1056(2004)91

**Endocrine disruptors**

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography–mass spectrometry with post-column base addition 1056(2004)131

**Enzymes**

Determination of protein phosphorylation and the translocation of green fluorescence protein–extracellular signal-regulated kinase 2 by capillary electrophoresis using laser induced fluorescence detection 1056(2004)237

**Erythromycin**

Identification of impurities in erythromycin by liquid chromatography–mass spectrometric detection 1056(2004)111

**Estrogens**

Applicability of solid-phase microextraction followed by on-fiber silylation for the determination of estrogens in water samples by gas chromatography–tandem mass spectrometry 1056(2004)179

**Evaporative light scattering detection**

Identification of impurities in erythromycin by liquid chromatography–mass spectrometric detection 1056(2004)111

**Experimental design**

Optimization of solid-phase extraction for a liquid chromatographic–tandem mass spectrometric general unknown screening procedure by means of computational techniques 1056(2004)57

**Extracellular signal-regulated kinase**

Determination of protein phosphorylation and the translocation of green fluorescence protein–extracellular signal-regulated kinase 2 by capillary electrophoresis using laser induced fluorescence detection 1056(2004)237

**Fats**

Application of matrix solid-phase dispersion to the determination of polychlorinated biphenyls in fat by gas chromatography with electron-capture and mass spectrometric detection 1056(2004)187

**Field-flow fractionation**

Field-flow fractionation of cells with chemiluminescence detection 1056(2004)229

**Fish**

Gas chromatography–ion trap tandem mass spectrometry versus GC–high-resolution mass spectrometry for the determination of non-ortho-polychlorinated biphenyls in fish 1056(2004)171

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

#### **Flow-injection analysis**

Field-flow fractionation of cells with chemiluminescence detection 1056(2004)229

#### **Food analysis**

Direct coupling of supercritical fluid extraction to a gas phase atmospheric pressure chemical ionisation source ion trap mass spectrometer for fast extraction and analysis of food components 1056(2004)27

Determination of diphenylbutadiene by liquid chromatography–UV–fluorescence in foodstuffs 1056(2004)99

Application of matrix solid-phase dispersion to the determination of polychlorinated biphenyls in fat by gas chromatography with electron-capture and mass spectrometric detection 1056(2004)187

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

Pressurized liquid extraction prior to liquid chromatography with electrochemical detection for the analysis of vitamin E isomers in seeds and nuts 1056(2004)249

#### **Food safety**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization-gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

#### **Gas chromatography, comprehensive two-dimensional**

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

Comparison of conventional gas chromatography and comprehensive two-dimensional gas chromatography for the detailed analysis of petrochemical samples 1056(2004)155

Rapid sequential heart-cut multidimensional gas chromatographic analysis 1056(2004)163

#### **General unknown screening**

Optimization of solid-phase extraction for a liquid chromatographic–tandem mass spectrometric general unknown screening procedure by means of computational techniques 1056(2004)57

#### **Green fluorescent protein**

Determination of protein phosphorylation and the translocation of green fluorescence protein–extracellular signal-regulated kinase 2 by capillary electrophoresis using laser induced fluorescence detection 1056(2004)237

#### **Headspace**

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

#### **Headspace analysis**

Selective determination of polychlorinated biphenyls in waste oils using liquid–liquid partition followed by headspace solid-phase microextraction and gas chromatography with atomic emission detection 1056(2004)263

#### **HT-2-toxin**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization-gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

#### **Human red blood cells**

Field-flow fractionation of cells with chemiluminescence detection 1056(2004)229

#### **Hydrocarbons**

Comparison of conventional gas chromatography and comprehensive two-dimensional gas chromatography for the detailed analysis of petrochemical samples 1056(2004)155

#### **$\gamma$ -Hydroxybutyric acid**

Simultaneous analysis of gamma-hydroxybutyric acid and its precursors in urine using liquid chromatography–tandem mass spectrometry 1056(2004)83

#### **Hygroscopic membrane**

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

#### ***Hylotrupes bajulus***

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

#### **Inductively coupled plasma mass spectrometry (ICP-MS)**

Liquid chromatography coupled with inductively coupled plasma mass spectrometry in the pharmaceutical industry: selected examples (Review) 1056(2004)3

#### **Information-dependent acquisition**

Optimization of solid-phase extraction for a liquid chromatographic–tandem mass spectrometric general unknown screening procedure by means of computational techniques 1056(2004)57

#### **Instrumentation**

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

#### **Internal standard**

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

#### **LC-MS**

Liquid chromatography–mass spectrometry with chemiluminescent nitrogen detection for on-line quantitative analysis of compound collections: advantages and limitations 1056(2004)67

#### **Light hydrocarbon**

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

#### **Lipids**

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

#### **Mass spectrometry**

Simultaneous analysis of gamma-hydroxybutyric acid and its precursors in urine using liquid chromatography–tandem mass spectrometry 1056(2004)83

Fully automated method for the liquid chromatographic–tandem mass spectrometric determination of cyproterone acetate in human plasma using restricted access material for on-line sample clean-up 1056(2004)105

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

#### **Matrix solid-phase dispersion**

Application of matrix solid-phase dispersion to the determination of polychlorinated biphenyls in fat by gas chromatography with electron-capture and mass spectrometric detection 1056(2004)187

#### **Membrane extraction with sorbent interface (MESI)**

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

#### **Mercury**

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

#### **Microporous membrane liquid–liquid extraction**

Determination of pesticides in red wines with on-line coupled microporous membrane liquid–liquid extraction–gas chromatography 1056(2004)267

#### **Multielemental speciation analysis**

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

#### **Multivariate selectivity**

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

#### **Musty compounds**

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

#### **Muti-angle laser light scattering**

Determination of low amounts of long-chain branches in polypropylene using a combination of chromatographic and rheological methods 1056(2004)217

#### **Mycotoxins**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization–gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

#### **Net analyte signal**

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

#### **Nivalenol**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization–gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

#### **Non-ortho-polychlorinated biphenyls**

Gas chromatography–ion trap tandem mass spectrometry versus GC–high-resolution mass spectrometry for the determination of non-ortho-polychlorinated biphenyls in fish 1056(2004)171

#### **Off-flavour**

Dynamic headspace coupled to preevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

#### **Oils**

Selective determination of polychlorinated biphenyls in waste oils using liquid–liquid partition followed by headspace solid-phase microextraction and gas chromatography with atomic emission detection 1056(2004)263

#### **Okadaic acid**

Rapid determination of polyether marine toxins using liquid chromatography–multiple tandem mass spectrometry 1056(2004)77

#### **Olfactometry**

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

#### **On-fiber derivatization**

Applicability of solid-phase microextraction followed by on-fiber silylation for the determination of estrogens in water samples by gas chromatography–tandem mass spectrometry 1056(2004)179

#### **On-line monitoring**

On-line monitoring of breath by membrane extraction with sorbent interface coupled with CO<sub>2</sub> sensor 1056(2004)35

#### ***Onosma stellulatum***

On-line structure characterization of pyrrolizidine alkaloids in *Onosma stellulatum* and *Emilia coccinea* by liquid chromatography–ion-trap mass spectrometry 1056(2004)91

#### **Optimisation**

Optimisation of a headspace solid-phase microextraction method for the direct determination of chloroanisoles related to cork taint in red wine 1056(2004)49

#### **Packaging materials**

Determination of diphenylbutadiene by liquid chromatography–UV–fluorescence in foodstuffs 1056(2004)99

#### **Parallel factor analysis**

Multivariate selectivity as a metric for evaluating comprehensive two-dimensional gas chromatography–time-of-flight mass spectrometry subjected to chemometric peak deconvolution 1056(2004)145

#### ***Passiflora L.***

Application of a novel sol–gel polydimethylsiloxane–poly(vinyl alcohol) solid-phase microextraction fiber for gas chromatographic determination of pesticide residues in herbal infusions 1056(2004)21

#### **Patulin**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization–gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

#### **Pectenotoxins**

Rapid determination of polyether marine toxins using liquid chromatography–multiple tandem mass spectrometry 1056(2004)77

**Peppermint oil**

Rapid sequential heart-cut multidimensional gas chromatographic analysis 1056(2004)163

**Perevaporation**

Dynamic headspace coupled to perevaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

**Pervaporation**

Dynamic headspace coupled to pervaporation for the analysis of anisoles in wine by gas chromatography–ion-trap tandem mass spectrometry 1056(2004)243

**Pesticides**

Application of a novel sol–gel polydimethylsiloxane–poly(vinyl alcohol) solid-phase microextraction fiber for gas chromatographic determination of pesticide residues in herbal infusions 1056(2004)21

Determination of pesticides in red wines with on-line coupled microporous membrane liquid–liquid extraction–gas chromatography 1056(2004)267

**Petrochemical samples**

Comparison of conventional gas chromatography and comprehensive two-dimensional gas chromatography for the detailed analysis of petrochemical samples 1056(2004)155

**Photoreactor**

Determination of  $\alpha$ -tocopherolquinone in human serum samples by liquid chromatography with fluorescence detection and on-line post-column derivatization 1056(2004)257

**Phytomedicines**

Application of a novel sol–gel polydimethylsiloxane–poly(vinyl alcohol) solid-phase microextraction fiber for gas chromatographic determination of pesticide residues in herbal infusions 1056(2004)21

**Phytoplankton**

Rapid determination of polyether marine toxins using liquid chromatography–multiple tandem mass spectrometry 1056(2004)77

Nano liquid chromatography with hybrid quadrupole time-of-flight mass spectrometry for the determination of yessotoxin in marine phytoplankton 1056(2004)253

**Poly(vinyl alcohol)**

Preparation and characterization of polydimethylsiloxane/poly(vinylalcohol) coated solid phase microextraction fibers using sol–gel technology 1056(2004)13

**Polychlorinated biphenyls**

Preparation and characterization of polydimethylsiloxane/poly(vinylalcohol) coated solid phase microextraction fibers using sol–gel technology 1056(2004)13

Gas chromatography–ion trap tandem mass spectrometry versus GC–high-resolution mass spectrometry for the determination of non-*ortho*-polychlorinated biphenyls in fish 1056(2004)171

Application of matrix solid-phase dispersion to the determination of polychlorinated biphenyls in fat by gas chromatography with electron-capture and mass spectrometric detection 1056(2004)187

Selective determination of polychlorinated biphenyls in waste oils using liquid–liquid partition followed by headspace solid-phase microextraction and gas chromatography with atomic emission detection 1056(2004)263

**Polydimethylsiloxane**

Preparation and characterization of polydimethylsiloxane/poly(vinylalcohol) coated solid phase microextraction fibers using sol–gel technology 1056(2004)13

**Polymerase chain reaction**

Isolation of genomic DNA using magnetic cobalt ferrite and silica particles 1056(2004)43

**Polynuclear aromatic hydrocarbons**

Strategic sample composition in the screening of polycyclic aromatic hydrocarbons in drinking water samples using liquid chromatography with fluorimetric detection 1056(2004)121

**Polypropylene**

Determination of low amounts of long-chain branches in polypropylene using a combination of chromatographic and rheological methods 1056(2004)217

**Post-column base addition**

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography–mass spectrometry with post-column base addition 1056(2004)131

**Pressurized liquid extraction**

Pressurized liquid extraction prior to liquid chromatography with electrochemical detection for the analysis of vitamin E isomers in seeds and nuts 1056(2004)249

**Prostaglandins**

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

**Protein phosphorylation**

Determination of protein phosphorylation and the translocation of green fluorescence protein-extracellular signal-regulated kinase 2 by capillary electrophoresis using laser induced fluorescence detection 1056(2004)237

**Proteins**

Properties of an electrospray emitter coated with material of low surface energy 1056(2004)223

**Pyrrolizidine alkaloids**

On-line structure characterization of pyrrolizidine alkaloids in *Onosma stellulatum* and *Emilia coccinea* by liquid chromatography–ion-trap mass spectrometry 1056(2004)91

**Quantitative analysis**

Liquid chromatography–mass spectrometry with chemiluminescent nitrogen detection for on-line quantitative analysis of compound collections: advantages and limitations 1056(2004)67

**Rapid remobilisation**

Rapid sequential heart-cut multidimensional gas chromatographic analysis 1056(2004)163

**Ricinine**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization–gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

**Sample composition**

Strategic sample composition in the screening of polycyclic aromatic hydrocarbons in drinking water samples using liquid chromatography with fluorimetric detection 1056(2004)121

**Screening**

Optimization of solid-phase extraction for a liquid chromatographic–tandem mass spectrometric general unknown screening procedure by means of computational techniques 1056(2004)57

**Seeds and nuts**

Pressurized liquid extraction prior to liquid chromatography with electrochemical detection for the analysis of vitamin E isomers in seeds and nuts 1056(2004)249

**Silica particles**

Isolation of genomic DNA using magnetic cobalt ferrite and silica particles 1056(2004)43

***Silurus glanis***

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

**Sol–gel technology**

Preparation and characterization of polydimethylsiloxane/poly(vinylalcohol) coated solid phase microextraction fibers using sol–gel technology 1056(2004)13

**Solid-phase extraction**

Optimization of solid-phase extraction for a liquid chromatographic–tandem mass spectrometric general unknown screening procedure by means of computational techniques 1056(2004)57

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography–mass spectrometry with post-column base addition 1056(2004)131

**Solid-phase microextraction**

Preparation and characterization of polydimethylsiloxane/poly(vinylalcohol) coated solid phase microextraction fibers using sol–gel technology 1056(2004)13

Optimisation of a headspace solid-phase microextraction method for the direct determination of chloroanisoles related to cork taint in red wine 1056(2004)49

Applicability of solid-phase microextraction followed by on-fiber silylation for the determination of estrogens in water samples by gas chromatography–tandem mass spectrometry 1056(2004)179

Selective determination of polychlorinated biphenyls in waste oils using liquid–liquid partition followed by headspace solid-phase microextraction and gas chromatography with atomic emission detection 1056(2004)263

**Speciation analysis**

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

**Substance P**

Liquid chromatography coupled with inductively coupled plasma mass spectrometry in the pharmaceutical industry: selected examples (Review) 1056(2004)3

**Supercritical fluid extraction**

Direct coupling of supercritical fluid extraction to a gas phase atmospheric pressure chemical ionisation source ion trap mass spectrometer for fast extraction and analysis of food components 1056(2004)27

**Terpenes**

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

**Tocopherolquinones**

Determination of  $\alpha$ -tocopherolquinone in human serum samples by liquid chromatography with fluorescence detection and on-line post-column derivatization 1056(2004)257

**Tocopherols**

Pressurized liquid extraction prior to liquid chromatography with electrochemical detection for the analysis of vitamin E isomers in seeds and nuts 1056(2004)249

**T2-toxin**

Reliable identification and quantification of trichothecenes and other mycotoxins by electron impact and chemical ionization–gas chromatography–mass spectrometry, using an ion-trap system in the multiple mass spectrometry mode 1056(2004)195

**Validation**

Fully automated method for the liquid chromatographic–tandem mass spectrometric determination of cyproterone acetate in human plasma using restricted access material for on-line sample clean-up 1056(2004)105

**Viscosity**

Determination of low amounts of long-chain branches in polypropylene using a combination of chromatographic and rheological methods 1056(2004)217

**Vitamin E quinones**

Determination of  $\alpha$ -tocopherolquinone in human serum samples by liquid chromatography with fluorescence detection and on-line post-column derivatization 1056(2004)257

**Volatile organic compounds**

New gas chromatography–olfactometric investigative method, and its application to cooked *Silurus glanis* (European catfish) odor characterization 1056(2004)201

**Water analysis**

Strategic sample composition in the screening of polycyclic aromatic hydrocarbons in drinking water samples using liquid chromatography with fluorimetric detection 1056(2004)121

Determination of weakly acidic endocrine-disrupting compounds by liquid chromatography–mass spectrometry with post-column base addition 1056(2004)131

Simultaneous determination of mercury and arsenic species in natural freshwater by liquid chromatography with on-line UV irradiation, generation of hydrides and cold vapor and tandem atomic fluorescence detection 1056(2004)139

Applicability of solid-phase microextraction followed by on-fiber silylation for the determination of estrogens in water samples by gas chromatography–tandem mass spectrometry 1056(2004)179

**Wine**

Optimisation of a headspace solid-phase microextraction method for the direct determination of chloroanisoles related to cork taint in red wine 1056(2004)49

Dynamic headspace coupled to perevaporation for the analysis of anisoles in wine by gas chromatography-ion-trap tandem mass spectrometry 1056(2004)243

Determination of pesticides in red wines with on-line coupled microporous membrane liquid-liquid extraction-gas chromatography 1056(2004)267

**Wood volatiles**

Gas chromatography with mass spectrometric and electroantennographic detection: analysis of wood odorants by direct coupling of insect olfaction and mass spectrometry 1056(2004)209

**Yessotoxin**

Nano liquid chromatography with hybrid quadrupole time-of-flight mass spectrometry for the determination of yessotoxin in marine phytoplankton 1056(2004)253

**Zinc-reduction column**

Determination of  $\alpha$ -tocopherolquinone in human serum samples by liquid chromatography with fluorescence detection and on-line post-column derivatization 1056(2004)257
