

Subject Index Vol. 1068

Alkylimidazolium salts

Specific background electrolytes for nonaqueous capillary electrophoresis 1068(2005)83

Amines

Determination of the dissociation constants (pK_a) of secondary and tertiary amines in organic media by capillary electrophoresis and their role in the electrophoretic mobility order inversion 1068(2005)99

Angelica sinensis

Assay of free ferulic acid and total ferulic acid for quality assessment of *Angelica sinensis* 1068(2005)209

Aqueous capillary electrophoresis

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Axial temperature gradient

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Background electrolyte composition

Influence of the nature of the electrolyte on the chiral separation of basic compounds in nonaqueous capillary electrophoresis using heptakis(2,3-di-*O*-methyl-6-*O*-sulfo)- β -cyclodextrin 1068(2005)143

Basic drugs

Influence of the nature of the electrolyte on the chiral separation of basic compounds in nonaqueous capillary electrophoresis using heptakis(2,3-di-*O*-methyl-6-*O*-sulfo)- β -cyclodextrin 1068(2005)143

Binding constants

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Biodegradation

Isotachophoretic determination of carboxylic acids in biodegradation samples 1068(2005)327

β -Blockers

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

Brominated flame retardants

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Bromophenols

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Capillary electromigration technique

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Capillary electrophoresis

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Capillary gas chromatography

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Capillary gel electrophoresis

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Carboxylic acids

Isotachophoretic determination of carboxylic acids in biodegradation samples 1068(2005)327

Catecholamines metabolites

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

Central composite design

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Chemometrics

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Chiral counter-ions

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral ion-exchangers

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Chiral recognition

Chiral separation by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Chiral selector

Chiral separation by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Chiral separation

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Chiral stationary phase

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Direct separation of regio- and enantiomeric isomers of diacylglycerols by a tandem column high-performance liquid chromatography 1068(2005)243

Chlorins

Enhanced detection of seven glucoconjugated and hydroxylated porphyrins and chlorins by nonaqueous capillary electrophoresis combined with stacking 1068(2005)123

Coniferyl ferulate

Assay of free ferulic acid and total ferulic acid for quality assessment of *Angelica sinensis* 1068(2005)209

Contactless conductivity detection

Contactless conductivity detection of synthetic polymers in non-aqueous size-exclusion electrokinetic chromatography 1068(2005)183

Continuous on-line analysis

Development of a total analytical system by interfacing membrane extraction, pervaporation and high-performance liquid chromatography 1068(2005)237

Cork stoppers

Determination of odour-causing volatile organic compounds in cork stoppers by multiple headspace solid-phase microextraction 1068(2005)201

Cork taint

Determination of odour-causing volatile organic compounds in cork stoppers by multiple headspace solid-phase microextraction 1068(2005)201

Cyclodextrin derivatives

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Cyclodextrins

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Influence of the nature of the electrolyte on the chiral separation of basic compounds in nonaqueous capillary electrophoresis using heptakis(2,3-di-*O*-methyl-6-*O*-sulfo)- β -cyclodextrin 1068(2005)143

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Data evaluation

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Density measurement

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Derivatisation, GC

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Diacylglycerols

Direct separation of regio- and enantiomeric isomers of diacylglycerols by a tandem column high-performance liquid chromatography 1068(2005)243

Dielectric constant

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Dispersion

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Displacement chromatography

Optimization of parameters of high-performance displacement chromatography for separation of soybean phosphatidylcholine and phosphatidylethanolamine 1068(2005)269

Dissociation constants

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

Determination of the dissociation constants (pK_a) of secondary and tertiary amines in organic media by capillary electrophoresis and their role in the electrophoretic mobility order inversion 1068(2005)99

Analysis of neutral surfactants by non-aqueous capillary electrophoresis using an electroosmotic flow reversal 1068(2005)159

Donor number

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Dual light scattering/refractometric detection

Distribution analysis of ultra-high molecular mass poly(ethylene oxide) containing silica particles by size-exclusion chromatography with dual light-scattering and refractometric detection 1068(2005)249

Dual selector system

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Dynamic method

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Edge effects

Elimination of edge effects in micro-thermal field-flow fractionation channel of low aspect ratio by splitting the carrier liquid flow into the main central stream and the thin stream layers at the side channel walls 1068(2005)261

Electrochromatography

Contactless conductivity detection of synthetic polymers in non-aqueous size-exclusion electrokinetic chromatography 1068(2005)183

Electrolyte additives

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Electrolyte modifier

Specific background electrolytes for nonaqueous capillary electrophoresis 1068(2005)83

Electromigration

Chiral separations by capillary electromigration techniques in nonaqueous media I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Electroosmotic flow reversal

Analysis of neutral surfactants by non-aqueous capillary electrophoresis using an electroosmotic flow reversal 1068(2005)159

Electroosmotic flow

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Specific background electrolytes for nonaqueous capillary electrophoresis 1068(2005)83

Electrophoresis

Chiral separations by capillary electromigration techniques in nonaqueous media I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Enantiomer separations

Influence of the nature of the electrolyte on the chiral separation of basic compounds in nonaqueous capillary electrophoresis using heptakis(2,3-di-*O*-methyl-6-*O*-sulfo)- β -cyclodextrin 1068(2005)143

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Enantiomeric resolution

Direct separation of regio- and enantiomeric isomers of diacylglycerols by a tandem column high-performance liquid chromatography 1068(2005)243

Ethanolysis

Direct separation of regio- and enantiomeric isomers of diacylglycerols by a tandem column high-performance liquid chromatography 1068(2005)243

Fats and oils

Evaluation of gas chromatography–tandem quadrupole mass spectrometry for the determination of organochlorine pesticides in fats and oils 1068(2005)289

Ferulic acid

Assay of free ferulic acid and total ferulic acid for quality assessment of *Angelica sinensis* 1068(2005)209

Gas chromatography

Evaluation of gas chromatography–tandem quadrupole mass spectrometry for the determination of organochlorine pesticides in fats and oils 1068(2005)289

Gleevec

Nonaqueous capillary electrophoresis method for the analysis of gleevec and its main metabolite in human urine 1068(2005)175

Gradient elution

New approach to linear gradient elution used for optimisation in reversed-phase liquid chromatography 1068(2005)279

Heptakis(2,3-di-*O*-acetyl-6-*O*-sulfo)-cyclomaltoheptaose

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Hexadimethrine coating

Analysis of neutral surfactants by non-aqueous capillary electrophoresis using an electroosmotic flow reversal 1068(2005)159

Hollow fibre membrane

Analysis of persistent organic pollutants in marine sediments using a novel microwave assisted solvent extraction and liquid-phase microextraction technique 1068(2005)221

HPLC

Assay of free ferulic acid and total ferulic acid for quality assessment of *Angelica sinensis* 1068(2005)209

HPLC–MS

Isotachophoretic determination of carboxylic acids in biodegradation samples 1068(2005)327

HPLC–UV detection

Development of a total analytical system by interfacing membrane extraction, pervaporation and high-performance liquid chromatography 1068(2005)237

Human urine

Nonaqueous capillary electrophoresis method for the analysis of gleevec and its main metabolite in human urine 1068(2005)175

Hydrocarbon

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Hydroorganic solvent

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Imatinib mesylate

Nonaqueous capillary electrophoresis method for the analysis of gleevec and its main metabolite in human urine 1068(2005)175

Inlet and outlet hydrodynamic splitting

Elimination of edge effects in micro-thermal field-flow fractionation channel of low aspect ratio by splitting the carrier liquid flow into the main central stream and the thin stream layers at the side channel walls 1068(2005)261

Inverse gas chromatography

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Ion-pairing selectors

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

iPBu-1

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Isotachophoresis

Enhanced detection of seven glucoconjugated and hydroxylated porphyrins and chlorins by nonaqueous capillary electrophoresis combined with stacking 1068(2005)123

Isotachophoretic determination of carboxylic acids in biodegradation samples 1068(2005)327

Joule heating

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Large-volume sample stacking

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Lewisite

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Lipids

Optimization of parameters of high-performance displacement chromatography for separation of soybean phosphatidylcholine and phosphatidylethanolamine 1068(2005)269

Liquid chromatography

New approach to linear gradient elution used for optimisation in reversed-phase liquid chromatography 1068(2005)279

Liquid-phase microextraction

Analysis of persistent organic pollutants in marine sediments using a novel microwave assisted solvent extraction and liquid-phase microextraction technique 1068(2005)221

Macrocyclic antibiotics

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Macromolecules

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Mass-calibration

Contactless conductivity detection of synthetic polymers in non-aqueous size-exclusion electrokinetic chromatography 1068(2005)183

Membrane extraction

Development of a total analytical system by interfacing membrane extraction, pervaporation and high-performance liquid chromatography 1068(2005)237

Methanol

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

3,4-Methylenedioxyamphetamine

Sample-stacking techniques in non-aqueous capillary electrophoresis 1068(2005)115

Micellar electrokinetic chromatography

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Micro-thermal field-flow fractionation

Elimination of edge effects in micro-thermal field-flow fractionation channel of low aspect ratio by splitting the carrier liquid flow into the main central stream and the thin stream layers at the side channel walls 1068(2005)261

Microwave-assisted extraction

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Molecular mass distribution

Distribution analysis of ultra-high molecular mass poly(ethylene oxide) containing silica particles by size-exclusion chromatography with dual light-scattering and refractometric detection 1068(2005)249

Monolithic column

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Multicomponent hydrocarbon separation

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Multiple headspace solid-phase microextraction

Determination of odour-causing volatile organic compounds in cork stoppers by multiple headspace solid-phase microextraction 1068(2005)201

Multivariate techniques

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Neutral surfactants

Analysis of neutral surfactants by non-aqueous capillary electrophoresis using an electroosmotic flow reversal 1068(2005)159

New injection mode

Elimination of edge effects in micro-thermal field-flow fractionation channel of low aspect ratio by splitting the carrier liquid flow into the main central stream and the thin stream layers at the side channel walls 1068(2005)261

Non-aqueous capillary electrophoresis

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Specific background electrolytes for nonaqueous capillary electrophoresis 1068(2005)83

Determination of the dissociation constants (pK_a) of secondary and tertiary amines in organic media by capillary electrophoresis and their role in the electrophoretic mobility order inversion 1068(2005)99

Sample-stacking techniques in non-aqueous capillary electrophoresis 1068(2005)115

Enhanced detection of seven glucoconjugated and hydroxylated porphyrins and chlorins by nonaqueous capillary electrophoresis combined with stacking 1068(2005)123

Influence of solvent properties on separation and detection performance in non-aqueous capillary electrophoresis–mass spectrometry of basic analytes 1068(2005)131

Influence of the nature of the electrolyte on the chiral separation of basic compounds in nonaqueous capillary electrophoresis using heptakis(2,3-di-*O*-methyl-6-*O*-sulfo)- β -cyclodextrin 1068(2005)143

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Analysis of neutral surfactants by non-aqueous capillary electrophoresis using an electroosmotic flow reversal 1068(2005)159

Separation of transition metals in nonaqueous media with capillary electrophoresis 1068(2005)169

Nonaqueous capillary electrophoresis method for the analysis of gleevec and its main metabolite in human urine 1068(2005)175

Contactless conductivity detection of synthetic polymers in non-aqueous size-exclusion electrokinetic chromatography 1068(2005)183

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Nonaqueous capillary zone electrophoresis

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

Nonaqueous media

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Nonylphenol ethoxylates

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Nonylphenols

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

OECD

Isotachophoretic determination of carboxylic acids in biodegradation samples 1068(2005)327

Optimisation techniques

New approach to linear gradient elution used for optimisation in reversed-phase liquid chromatography 1068(2005)279

Organic acids

Separation of transition metals in nonaqueous media with capillary electrophoresis 1068(2005)169

Organochlorine pesticides

Evaluation of gas chromatography–tandem quadrupole mass spectrometry for the determination of organochlorine pesticides in fats and oils 1068(2005)289

Packed column

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Peak efficiency

Influence of solvent properties on separation and detection performance in non-aqueous capillary electrophoresis–mass spectrometry of basic analytes 1068(2005)131

Persistent organic pollutants

Analysis of persistent organic pollutants in marine sediments using a novel microwave assisted solvent extraction and liquid-phase microextraction technique 1068(2005)221

Pervaporation

Development of a total analytical system by interfacing membrane extraction, pervaporation and high-performance liquid chromatography 1068(2005)237

Pharmaceutical analysis

Assay of free ferulic acid and total ferulic acid for quality assessment of *Angelica sinensis* 1068(2005)209

Phenolic compounds

Specific background electrolytes for nonaqueous capillary electrophoresis 1068(2005)83

Phosphatidylcholine

Optimization of parameters of high-performance displacement chromatography for separation of soybean phosphatidylcholine and phosphatidylethanolamine 1068(2005)269

Phosphatidylethanolamine

Optimization of parameters of high-performance displacement chromatography for separation of soybean phosphatidylcholine and phosphatidylethanolamine 1068(2005)269

Phthalate esters

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Poly(ethylene oxide)

Distribution analysis of ultra-high molecular mass poly(ethylene oxide) containing silica particles by size-exclusion chromatography with dual light-scattering and refractometric detection 1068(2005)249

Polychlorinated biphenyls

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Polycyclic aromatic hydrocarbons

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Polysaccharides

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Porphyrins

Enhanced detection of seven glucoconjugated and hydroxylated porphyrins and chlorins by nonaqueous capillary electrophoresis combined with stacking 1068(2005)123

Review

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Ruggedness

Nonaqueous capillary electrophoresis method for the analysis of gleevec and its main metabolite in human urine 1068(2005)175

Sediment analysis

Analysis of persistent organic pollutants in marine sediments using a novel microwave assisted solvent extraction and liquid-phase microextraction technique 1068(2005)229

Sediment samples

Simultaneous microwave-assisted extraction of polycyclic aromatic hydrocarbons, polychlorinated biphenyls, phthalate esters and nonylphenols in sediments 1068(2005)229

Selectivity control

Influence of solvent properties on separation and detection performance in non-aqueous capillary electrophoresis–mass spectrometry of basic analytes 1068(2005)131

Selectivity

Determination of the dissociation constants (pK_a) of secondary and tertiary amines in organic media by capillary electrophoresis and their role in the electrophoretic mobility order inversion 1068(2005)99

Separation efficiency

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Separation mechanism

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Separation speed

Influence of solvent properties on separation and detection performance in non-aqueous capillary electrophoresis–mass spectrometry of basic analytes 1068(2005)131

Single isomer charged cyclodextrins

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Single-isomer sulfated β -cyclodextrin

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Size-exclusion chromatography

Distribution analysis of ultra-high molecular mass poly(ethylene oxide) containing silica particles by size-exclusion chromatography with dual light-scattering and refractometric detection 1068(2005)249

Size-exclusion

Contactless conductivity detection of synthetic polymers in non-aqueous size-exclusion electrokinetic chromatography 1068(2005)183

Solubility parameter

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Solvent effects

Chiral separations by capillary electromigration techniques in nonaqueous media. I. Enantioselective nonaqueous capillary electrophoresis (Review) 1068(2005)3

Chiral separations by capillary electromigration techniques in nonaqueous media. II. Enantioselective nonaqueous capillary electrochromatography (Review) 1068(2005)31

Solvent weight fraction activity coefficient at infinite dilution

Determination of thermodynamic properties of isotactic poly(1-butene) at infinite dilution using density and inverse gas chromatography 1068(2005)297

Solvents properties

Influence of solvent properties on separation and detection performance in non-aqueous capillary electrophoresis–mass spectrometry of basic analytes 1068(2005)131

Soybean phospholipids

Optimization of parameters of high-performance displacement chromatography for separation of soybean phosphatidylcholine and phosphatidylethanolamine 1068(2005)269

Stacking

Sample-stacking techniques in non-aqueous capillary electrophoresis 1068(2005)115

Sulfated cyclodextrins

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Sulfur mustard

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Synthetic polymers

Nonaqueous and aqueous capillary electrophoresis of synthetic polymers (Review) 1068(2005)59

Tandem column

Direct separation of regio- and enantiomeric isomers of diacylglycerols by a tandem column high-performance liquid chromatography 1068(2005)243

Tandem quadrupole mass spectrometry

Evaluation of gas chromatography–tandem quadrupole mass spectrometry for the determination of organochlorine pesticides in fats and oils 1068(2005)289

TBBPA

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

TCBPA

Comparative study of aqueous and non-aqueous capillary electrophoresis in the separation of halogenated phenolic and bisphenolic compounds in water samples 1068(2005)189

Tetrabutylammonium salt of heptakis(2,3-di-*O*-acetyl-6-*O*-sulfo)-cyclomaltoheptaose

Non-aqueous capillary electrophoretic enantiomer separations using the tetrabutylammonium salt of heptakis(2,3-*O*-diacetyl-6-*O*-sulfo)-cyclomaltoheptaose, a single-isomer sulfated β -cyclodextrin highly-soluble in organic solvents 1068(2005)151

Thermal desorption

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Thermodynamic parameters

Determination of the dissociation constants (pK_a) of secondary and tertiary amines in organic media by capillary electrophoresis and their role in the electrophoretic mobility order inversion 1068(2005)99

Thiols

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315

Three columns coupled in series

Chemometric studies of retention in capillary gas chromatographic separation of hydrocarbons in coupled columns 1068(2005)307

Total analytical system

Development of a total analytical system by interfacing membrane extraction, pervaporation and high-performance liquid chromatography 1068(2005)237

Transition metals

Separation of transition metals in nonaqueous media with capillary electrophoresis 1068(2005)169

2,4,6-Trichloroanisole

Determination of odour-causing volatile organic compounds in cork stoppers by multiple headspace solid-phase microextraction 1068(2005)201

Urine

Capillary zone electrophoresis of cationic and anionic drugs in methanol 1068(2005)89

Viscosity

Determination of electroosmotic flow in nonaqueous capillary electrophoresis 1068(2005)75

Volatile organic compounds

Determination of odour-causing volatile organic compounds in cork stoppers by multiple headspace solid-phase microextraction 1068(2005)201

Voltage ramp

Effect of initial voltage ramp on separation efficiency in non-aqueous capillary electrophoresis with ethanol as background electrolyte solvent 1068(2005)107

Warfare agents

Analysis of chemical warfare agents. II. Use of thiols and statistical experimental design for the trace level determination of vesicant compounds in air samples 1068(2005)315
