

## Subject Index Vol. 1079

### Acidic herbicides

Polypyrrole-coated capillaries for capillary zone electrophoresis 1079(2005)344

### Adsorption isotherms

Retrograde adsorption isotherms: An impossible fact? 1079(2005)77

### Affinity enrichment

Solid-phase capture and release of arginine peptides by selective tagging and boronate affinity chromatography 1079(2005)187

### Amino acid substitution

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

### Amino acids

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

### Anion-exchange

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

### Antibiotics

Exploiting pH mismatch in preparative high-performance liquid chromatographic recovery of ertapenem from mother liquor streams 1079(2005)80

### Arginine-peptides

Solid-phase capture and release of arginine peptides by selective tagging and boronate affinity chromatography 1079(2005)187

### Band narrowing

Dynamic pH junction technique for on-line preconcentration of peptides in capillary electrophoresis 1079(2005)266

### Basic solutes

Comparison of silanization/hydrosilation and organosilanization modification procedures on etched capillaries for electrokinetic chromatography 1079(2005)366

### Batch release

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

### Biocompatible

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

### Biopharmaceuticals

Studies on the use of needle-free injection device on proteins 1079(2005)397

### Caco-2 cell permeability

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

### Capillary columns

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

### Capillary electrochromatography

Homogeneous gels for capillary electrochromatography (Review) 1079(2005)50

Electrochemical properties of columns in capillary electrochromatography. I. Ohm's law, resistivity and field strength (Review) 1079(2005)69

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides (Review) 1079(2005)328

Comparison of silanization/hydrosilation and organosilanization modification procedures on etched capillaries for electrokinetic chromatography 1079(2005)366

### Capillary electrophoresis

Haplotyping by capillary electrophoresis (Review) 1079(2005)41

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

Rapid quantitative capillary zone electrophoresis method for monitoring the micro-heterogeneity of an intact recombinant glycoprotein 1079(2005)254

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

Polypyrrole-coated capillaries for capillary zone electrophoresis 1079(2005)344

### Capillary zone electrophoresis

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**CEC**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Cellulose digest**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography–electrospray ionization mass spectrometry 1079(2005)146

**Chain conformation**

Molecular simulation study of the bonded-phase structure in reversed-phase liquid chromatography with neat aqueous solvent 1079(2005)127

**Characterization**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Cholic acid**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**Chromatography**

High temperature fast chromatography of proteins using a silica-based stationary phase with greatly enhanced low pH stability 1079(2005)213

**Competitive adsorption**

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

**Competitive binding**

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

**Competitive isotherms**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

**Compound libraries**

Application of main component fraction collection method for purification of compound libraries 1079(2005)349

**Conductivity**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Contactless conductivity detection**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Cyclodextrin stationary phases**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography–electrospray ionization mass spectrometry 1079(2005)146

**Cytochrome c**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**L-Deprenyl**

Detection of *N*<sup>ε</sup>-monomethyllysine using high-performance liquid chromatography and high-performance liquid chromatography–mass spectrometry 1079(2005)208

**Derivatization**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

Automated headspace-solid-phase micro extraction–retention time locked-isotope dilution gas chromatography–mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Dextran digest**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography–electrospray ionization mass spectrometry 1079(2005)146

**Dextran sulfate**

Polypyrrole-coated capillaries for capillary zone electrophoresis 1079(2005)344

**Dielectrophoresis**

Harnessing dielectric forces for separations of cells, fine particles and macromolecules (Review) 1079(2005)59

**Disaccharide separations**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography–electrospray ionization mass spectrometry 1079(2005)146

**Disc-electrophoresis**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Displacement chromatography**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

Effect of charge regulation on steric mass-action equilibrium for the ion-exchange adsorption of proteins 1079(2005)92

**Drug**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Drug delivery**

Studies on the use of needle-free injection device on proteins 1079(2005)397

**Dynamic pH junction**

Dynamic pH junction technique for on-line preconcentration of peptides in capillary electrophoresis 1079(2005)266

**EDCs**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography–mass spectrometry 1079(2005)136

**Electrochemical properties of packed capillaries**

Electrochemical properties of columns in capillary electrochromatography. I. Ohm's law, resistivity and field strength (Review) 1079(2005)69

**Electrochromatography**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Electroosmotic flow**

Polypyrrole-coated capillaries for capillary zone electrophoresis 1079(2005)344

**Electrophoretic methodologies**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Electrospray ionization mass spectrometry**

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

**Electrospray ionization**

Characterisation and evaluation of metal-loaded iminodiacetic acid-silica of different porosity for the selective enrichment of phosphopeptides 1079(2005)197

**Entropy-enthalpy compensation**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Epimerization**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**Fraction**

Application of main component fraction collection method for purification of compound libraries 1079(2005)349

**Free energy relationships**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Frontal analysis**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

**Gas chromatography-mass spectrometry**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography-mass spectrometry 1079(2005)136

**Genotype**

Haplotyping by capillary electrophoresis (Review) 1079(2005)41

**Glycans**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

**Glycomics**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

**Glycoproteins**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

Rapid quantitative capillary zone electrophoresis method for monitoring the micro-heterogeneity of an intact recombinant glycoprotein 1079(2005)254

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**Gradient elution**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

Theory of peak capacity in gradient elution 1079(2005)153

Modeling of overloaded gradient elution of nociceptin/orphanin FQ in reversed-phase liquid chromatography 1079(2005)162

**Hafnia monoliths**

Metal oxide monolithic columns 1079(2005)392

**Haplotype**

Haplotyping by capillary electrophoresis (Review) 1079(2005)41

**Heteroconjugation**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**HETP**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**HIC**

Effect of pH changes on water release values in hydrophobic interaction chromatographic systems 1079(2005)229

**High temperature**

High temperature fast chromatography of proteins using a silica-based stationary phase with greatly enhanced low pH stability 1079(2005)213

**High throughput analysis**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**Homogeneous gels**

Homogeneous gels for capillary electrochromatography (Review) 1079(2005)50

**HPLC/MS**

Detection of *N*<sup>ε</sup>-monomethyllysine using high-performance liquid chromatography and high-performance liquid chromatography-mass spectrometry 1079(2005)208

**HPLC**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

Detection of *N*<sup>ε</sup>-monomethyllysine using high-performance liquid chromatography and high-performance liquid chromatography-mass spectrometry 1079(2005)208

**Hydrophobic interaction**

Hydrophobic interaction chromatography of proteins. III. Unfolding of proteins upon adsorption 1079(2005)221

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides 1079(2005)328

**Hyphenated techniques**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Immobilized lectins**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

**Immuno-electrophoresis**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Induced dipole**

Harnessing dielectric forces for separations of cells, fine particles and macromolecules (Review) 1079(2005)59

**Ion exchange**

Two-component protein adsorption kinetics in porous ion exchange media 1079(2005)105

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides 1079(2005)328

**Ion-exchange equilibrium**

Effect of charge regulation on steric mass-action equilibrium for the ion-exchange adsorption of proteins 1079(2005)92

**Isoelectric focusing**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Isotachopheresis**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Isotherm determination**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

Modeling of overloaded gradient elution of nociceptin/orphanin FQ in reversed-phase liquid chromatography 1079(2005)162

**Isotope dilution**

Automated headspace-solid-phase micro extraction-retention time locked-isotope dilution gas chromatography-mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Langmuir-Freundlich isotherm**

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

Hydrophobic interaction chromatography of proteins. III. Unfolding of proteins upon adsorption 1079(2005)221

**Laser-induced fluorescence detection**

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

**Lauric acid**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**LC/MS**

Evaluation of multidimensional (ion-exchange/reversed-phase) protein separations using linear and step gradients in the first dimension 1079(2005)287

**LC**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography-electrospray ionization mass spectrometry 1079(2005)146

**LC-ESI-MS**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography-electrospray ionization mass spectrometry 1079(2005)146

**LIF**

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

**Lipid bilayers**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Lipophilicity**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Liposome electrokinetic chromatography**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Liquid chromatography**

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

**Liquid chromatography-mass spectrometry**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography-mass spectrometry 1079(2005)136

**Mannan digest**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography-electrospray ionization mass spectrometry 1079(2005)146

**Mass spectrometry (MS)**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**Mass spectrometry**

Solid-phase capture and release of arginine peptides by selective tagging and boronate affinity chromatography 1079(2005)187

**Mass transfer modeling**

Two-component protein adsorption kinetics in porous ion exchange media 1079(2005)105

**Metal oxide**

Metal oxide monolithic columns 1079(2005)392

**Micellar electrokinetic chromatography (MEKC)**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**Microchip electrophoresis**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Microdevice**

Homogeneous gels for capillary electrochromatography (Review) 1079(2005)50

**Mobility**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Molecular parameters**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Molecular simulation**

Molecular simulation study of the bonded-phase structure in reversed-phase liquid chromatography with neat aqueous solvent 1079(2005)127

**Monolith columns**

Use of electrokinetic measurements for characterization of columns used in capillary electrochromatography 1079(2005)299

**Monolith**

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

**Monolithic capillary**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

**Monolithic column**

Metal oxide monolithic columns 1079(2005)392

**Monoliths**

Homogeneous gels for capillary electrochromatography (Review) 1079(2005)50

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

Metal oxide monolithic columns 1079(2005)392

**N<sup>ε</sup>-Monomethyllysine**

Detection of N<sup>ε</sup>-monomethyllysine using high-performance liquid chromatography and high-performance liquid chromatography-mass spectrometry 1079(2005)208

**Monosaccharides**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**Multidimensional chromatography**

Evaluation of multidimensional (ion-exchange/reversed-phase) protein separations using linear and step gradients in the first dimension 1079(2005)287

**Nano-liquid affinity chromatography**

Affinity chromatography with monolithic capillary columns. II. Polymethacrylate monoliths with immobilized lectins for the separation of glycoconjugates by nano-liquid affinity chromatography 1079(2005)236

**Needle-free injection**

Studies on the use of needle-free injection device on proteins 1079(2005)397

**Negative mode**

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

**Nitromethane**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Non-aqueous**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Nonlinear chromatography**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

**On-capillary derivatization**

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

**Oral bioavailability**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Organic buffer systems**

Buffer system for the separation of neutral and charged small molecules using micellar electrokinetic chromatography with mass spectrometric detection 1079(2005)372

**Organic solvent**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Organotin compounds analysis**

Automated headspace-solid-phase micro extraction-retention time locked-isotope dilution gas chromatography-mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Partition coefficient**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Passive transmembrane permeability**

pH effects on drug interactions with lipid bilayers by liposome electrokinetic chromatography 1079(2005)307

**Peak capacity**

Theory of peak capacity in gradient elution 1079(2005)153

**Peptides**

Dynamic pH junction technique for on-line preconcentration of peptides in capillary electrophoresis 1079(2005)266

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

**pH**

Effect of pH changes on water release values in hydrophobic interaction chromatographic systems 1079(2005)229

**Pharmaceutical analysis**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**Pharmaceutical drugs**

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

**Phenolic endocrine disrupting chemicals**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography-mass spectrometry 1079(2005)136

**Phenylboronic acid beads**

Solid-phase capture and release of arginine peptides by selective tagging and boronate affinity chromatography 1079(2005)187

**Phosphopeptides**

Characterisation and evaluation of metal-loaded iminodiacetic acid–silica of different porosity for the selective enrichment of phosphopeptides 1079(2005)197

**pK<sub>a</sub> shift**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Planar electrochromatography**

Characterization of flow and voltage profiles in planar electrochromatography 1079(2005)317

**Plasma samples**

Amino acids determination using capillary electrophoresis with on-capillary derivatization and laser-induced fluorescence detection 1079(2005)335

**Polarizability**

Harnessing dielectric forces for separations of cells, fine particles and macromolecules (Review) 1079(2005)59

**Polyethylene glycol acrylate**

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

**Polymorphism**

Haplotyping by capillary electrophoresis (Review) 1079(2005)41

**Polypeptides**

Modeling of overloaded gradient elution of nociceptin/orphanin FQ in reversed-phase liquid chromatography 1079(2005)162

**Polypyrrole-coated capillaries**

Polypyrrole-coated capillaries for capillary zone electrophoresis 1079(2005)344

**Positive mode**

Separation, detection, and identification of peptides by ion-pair reversed-phase high-performance liquid chromatography-electrospray ionization mass spectrometry at high and low pH 1079(2005)274

**Preparative chromatography**

Exploiting pH mismatch in preparative high-performance liquid chromatographic recovery of ertapenem from mother liquor streams 1079(2005)80

**Pressure injection**

Studies on the use of needle-free injection device on proteins 1079(2005)397

**Proteins**

High temperature fast chromatography of proteins using a silica-based stationary phase with greatly enhanced low pH stability 1079(2005)213

Hydrophobic interaction chromatography of proteins. III. Unfolding of proteins upon adsorption 1079(2005)221

Evaluation of multidimensional (ion-exchange/reversed-phase) protein separations using linear and step gradients in the first dimension 1079(2005)287

Preparation and evaluation of poly(polyethylene glycol methyl ether acrylate-co-polyethylene glycol diacrylate) monolith for protein analysis 1079(2005)382

**Protein adsorption**

Effect of charge regulation on steric mass-action equilibrium for the ion-exchange adsorption of proteins 1079(2005)92

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

**Protein adsorption kinetics**

Two-component protein adsorption kinetics in porous ion exchange media 1079(2005)105

**Protein HPLC**

Studies on the use of needle-free injection device on proteins 1079(2005)397

**Protein micro-heterogeneity**

Rapid quantitative capillary zone electrophoresis method for monitoring the micro-heterogeneity of an intact recombinant glycoprotein 1079(2005)254

**Protein stability**

Studies on the use of needle-free injection device on proteins 1079(2005)397

**Pulse response**

Hydrophobic interaction chromatography of proteins. III. Unfolding of proteins upon adsorption 1079(2005)221

**Purification**

Application of main component fraction collection method for purification of compound libraries 1079(2005)349

**Reacetylation**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**Resistivity of buffers**

Electrochemical properties of columns in capillary electrochromatography. I. Ohm's law, resistivity and field strength 1079(2005)69

**Retention mechanism**

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides 1079(2005)328

**Retention time locking**

Automated headspace-solid-phase micro extraction-retention time locked-isotope dilution gas chromatography-mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Retention**

Effect of pH changes on water release values in hydrophobic interaction chromatographic systems 1079(2005)229

**Retrograde adsorption behavior**

Retrograde adsorption isotherms: An impossible fact? 1079(2005)77

**Reversed-phase chromatography**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Reversed-phase liquid chromatography**

Molecular simulation study of the bonded-phase structure in reversed-phase liquid chromatography with neat aqueous solvent 1079(2005)127

**Reversed-phase**

Exploiting pH mismatch in preparative high-performance liquid chromatographic recovery of ertapenem from mother liquor streams 1079(2005)80

**RP-HPLC**

Application of capillary zone electrophoresis and reversed-phase high-performance liquid chromatography in the biopharmaceutical industry for the quantitative analysis of the monosaccharides released from a highly glycosylated therapeutic protein 1079(2005)354

**RPLC**

Modeling of overloaded gradient elution of nociceptin/orphanin FQ in reversed-phase liquid chromatography 1079(2005)162

**Salt type**

Effect of pH changes on water release values in hydrophobic interaction chromatographic systems 1079(2005)229

**Scale-up**

Exploiting pH mismatch in preparative high-performance liquid chromatographic recovery of ertapenem from mother liquor streams 1079(2005)80

**SDS-electrophoresis**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Sediment samples**

Automated headspace-solid-phase micro extraction–retention time locked-isotope dilution gas chromatography–mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Separation**

Separation and characterization of underivatized oligosaccharides using liquid chromatography and liquid chromatography–electrospray ionization mass spectrometry 1079(2005)146

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides 1079(2005)328

**Separations**

Harnessing dielectric forces for separations of cells, fine particles and macromolecules 1079(2005)59

**Silica particles**

Characterisation and evaluation of metal-loaded iminodiacetic acid–silica of different porosity for the selective enrichment of phosphopeptides 1079(2005)197

**Silver stains**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**SNP**

Haplotyping by capillary electrophoresis (Review) 1079(2005)41

**Solid-phase extraction (SPE)**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography–mass spectrometry 1079(2005)136

**Spectral deconvolution**

Evaluation of multidimensional (ion-exchange/reversed-phase) protein separations using linear and step gradients in the first dimension 1079(2005)287

**Stationary phases**

Comparison of silanization/hydrosilation and organosilanization modification procedures on etched capillaries for electrokinetic chromatography 1079(2005)366

**Steric mass-action isotherm**

Effect of charge regulation on steric mass-action equilibrium for the ion-exchange adsorption of proteins 1079(2005)92

**Stoichiometric displacement model**

Csaba Horváth and preparative liquid chromatography (Review) 1079(2005)7

**Sulfonate adsorption**

Retrograde adsorption isotherms: An impossible fact? 1079(2005)77

**Surface area dependencies**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Synthetic peptides**

Use of mixed-mode sorbents for the electrochromatographic separation of thrombin receptor antagonistic peptides 1079(2005)328

**Temkin isotherm**

Competitive ion-exchange adsorption of proteins: Competitive isotherms with controlled competitor concentration 1079(2005)116

**Theory of chromatography**

Theory of peak capacity in gradient elution 1079(2005)153

**Transmethylation**

Detection of *N*<sup>E</sup>-monomethyllysine using high-performance liquid chromatography and high-performance liquid chromatography–mass spectrometry 1079(2005)208

**Tryptic digest**

Solid-phase capture and release of arginine peptides by selective tagging and boronate affinity chromatography 1079(2005)187

**Two-dimensional maps**

Electrophoresis: The march of pennies, the march of dimes (Review) 1079(2005)24

**Unfolding**

Hydrophobic interaction chromatography of proteins. III. Unfolding of proteins upon adsorption 1079(2005)221

**UV detection**

Nitromethane as solvent in capillary electrophoresis 1079(2005)246

**Van't Hoff plots**

Binding behaviour and conformational properties of globular proteins in the presence of immobilised non-polar ligands used in reversed-phase liquid chromatography 1079(2005)173

**Water penetration**

Molecular simulation study of the bonded-phase structure in reversed-phase liquid chromatography with neat aqueous solvent 1079(2005)127

**Water release**

Effect of pH changes on water release values in hydrophobic interaction chromatographic systems 1079(2005)229

**Water**

Automated headspace-solid-phase micro extraction–retention time locked-isotope dilution gas chromatography–mass spectrometry for the analysis of organotin compounds in water and sediment samples 1079(2005)408

**Xenoestrogens**

Analyses of phenolic endocrine disrupting chemicals in marine samples by both gas and liquid chromatography–mass spectrometry 1079(2005)136

**Zirconia monoliths**

Metal oxide monolithic columns 1079(2005)392
