

## Subject Index Vol. 1080

### Accreditation requirements

Long-term stability of pure standards and stock standard solutions for the determination of pesticide residues using gas chromatography 1080(2005)166

### Acetonitrile

Viscous fingering induced flow instability in multidimensional liquid chromatography 1080(2005)124

### Addiction drug

Automated multiple development thin-layer chromatography for separation of opiate alkaloids and derivatives 1080(2005)186

### Affinity screening

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

### Affinity-tagged proteins

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

### ÅKTExpress

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

### AMD

Automated multiple development thin-layer chromatography for separation of opiate alkaloids and derivatives 1080(2005)186

### Amperometric detection;

Integrated capillary electrophoresis amperometric detection microchip with replaceable microdisk working electrode. II. Influence of channel cross-sectional area on the separation and detection of dopamine and catechol 1080(2005)192

### Anionic ion-pairing reagents

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

### Anions

The perchlorate anion is more effective than the trifluoroacetate anion as an ion-pairing reagent for reversed-phase chromatography of peptides 1080(2005)49

### Annular chromatography

Continuous matrix assisted refolding of  $\alpha$ -lactalbumin by ion exchange chromatography with recycling of aggregates combined with ultrafiltration 1080(2005)29

### Antioxidants

Solid-phase microextraction for qualitative and quantitative determination of migrated degradation products of antioxidants in an organic aqueous solution 1080(2005)107

### Antithrombin

On the variation of glycosylation in human plasma derived antithrombin 1080(2005)15

### Antitussives

Automated multiple development thin-layer chromatography for separation of opiate alkaloids and derivatives 1080(2005)186

### Automated multistep chromatography

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

### Biopanning

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

### Building block principle

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

### Cationic surfactant

Enantiomer separation by reversed-phase liquid chromatography with novel hydrophobic phases composed of chiral cationic surfactants 1080(2005)140

### 9-Chloromethylanthracene

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

### Chromatographic system

Viscous fingering induced flow instability in multidimensional liquid chromatography 1080(2005)124

### Cobalt ferrite magnetic particles

Ferrite supports for isolation of DNA from complex samples and polymerase chain reaction amplification 1080(2005)90

### Comprehensive two-dimensional

Determination of aromatic hydrocarbons in gasolines by flow modulated comprehensive two-dimensional gas chromatography 1080(2005)157

### Confirmation

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

### Dairy products

Ferrite supports for isolation of DNA from complex samples and polymerase chain reaction amplification 1080(2005)90

### Derivatives

Automated multiple development thin-layer chromatography for separation of opiate alkaloids and derivatives 1080(2005)186

**DNA**

Ferrite supports for isolation of DNA from complex samples and polymerase chain reaction amplification 1080(2005)90

**Dopamine and catechol**

Integrated capillary electrophoresis amperometric detection microchip with replaceable microdisk working electrode. II. Influence of channel cross-sectional area on the separation and detection of dopamine and catechol 1080(2005)192

**DTX-1**

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

**DTX-2**

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

**Electrophoresis**

Identification of non-idealities in gel electrophoresis 1080(2005)2

**Enantiomer separation using aqueous media**

Enantiomer separation by reversed-phase liquid chromatography with novel hydrophobic phases composed of chiral cationic surfactants 1080(2005)140

**Fish**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**Flow through microdispenser**

Flow-through microdispenser for interfacing  $\mu$ -HPLC to Raman and mid-IR spectroscopic detection 1080(2005)132

**Fluorescence**

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

**FTIR microscopy**

Flow-through microdispenser for interfacing  $\mu$ -HPLC to Raman and mid-IR spectroscopic detection 1080(2005)132

**Gas chromatography**

Determination of aromatic hydrocarbons in gasolines by flow modulated comprehensive two-dimensional gas chromatography 1080(2005)157

Long-term stability of pure standards and stock standard solutions for the determination of pesticide residues using gas chromatography 1080(2005)166

**Gasolines**

Determination of aromatic hydrocarbons in gasolines by flow modulated comprehensive two-dimensional gas chromatography 1080(2005)157

**Gene therapy**

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

**Genetic vaccination**

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

**Glycoform analysis**

On the variation of glycosylation in human plasma derived antithrombin 1080(2005)15

**Glycoproteins**

On the variation of glycosylation in human plasma derived antithrombin 1080(2005)15

**Glycosaminoglycans**

Analysis of proteoglycans derived sulphated disaccharides by liquid chromatography/mass spectrometry 1080(2005)43

**GST**

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

**Half lipid structure**

Enantiomer separation by reversed-phase liquid chromatography with novel hydrophobic phases composed of chiral cationic surfactants 1080(2005)140

**Heart cutting**

Viscous fingering induced flow instability in multidimensional liquid chromatography 1080(2005)124

**Hexahistidine**

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

**HFBA**

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

**High voltage interference;**

Integrated capillary electrophoresis amperometric detection microchip with replaceable microdisk working electrode. II. Influence of channel cross-sectional area on the separation and detection of dopamine and catechol 1080(2005)192

**HPLC**

Flow-through microdispenser for interfacing  $\mu$ -HPLC to Raman and mid-IR spectroscopic detection 1080(2005)132

**Hydrocarbons aromatic**

Determination of aromatic hydrocarbons in gasolines by flow modulated comprehensive two-dimensional gas chromatography 1080(2005)157

**Intestine**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**Ion exchange chromatography**

Continuous matrix assisted refolding of  $\alpha$ -lactalbumin by ion exchange chromatography with recycling of aggregates combined with ultrafiltration 1080(2005)29

**LC/DAD**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**LC/MS**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**LC-MS/MS**

Development and application of a new on-line SPE system combined with LC-MS/MS detection for high throughput direct analysis of pharmaceutical compounds in plasma 1080(2005)99

**Lectin-affinity chromatography**

On the variation of glycosylation in human plasma derived antithrombin 1080(2005)15

**Liposome**

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

**Liquid chromatography**

Analysis of proteoglycans derived sulphated disaccharides by liquid chromatography/mass spectrometry 1080(2005)43

**Liver**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**Mass spectrometry**

Analysis of proteoglycans derived sulphated disaccharides by liquid chromatography/mass spectrometry 1080(2005)43

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**Matrix assisted refolding**

Continuous matrix assisted refolding of  $\alpha$ -lactalbumin by ion exchange chromatography with recycling of aggregates combined with ultrafiltration 1080(2005)29

**Microcystins**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**Microchip capillary electrophoresis;**

Integrated capillary electrophoresis amperometric detection microchip with replaceable microdisk working electrode. II. Influence of channel cross-sectional area on the separation and detection of dopamine and catechol 1080(2005)192

**Migration**

Solid-phase microextraction for qualitative and quantitative determination of migrated degradation products of antioxidants in an organic aqueous solution 1080(2005)107

**Modeling**

Identification of non-idealities in gel electrophoresis 1080(2005)2

**Okadaic acid**

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

**On-column cleavage**

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

**On-column refolding**

Continuous matrix assisted refolding of  $\alpha$ -lactalbumin by ion exchange chromatography with recycling of aggregates combined with ultrafiltration 1080(2005)29

**On-line digestion**

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**Opiate alkaloids**

Automated multiple development thin-layer chromatography for separation of opiate alkaloids and derivatives 1080(2005)186

**Peptides**

The perchlorate anion is more effective than the trifluoroacetate anion as an ion-pairing reagent for reversed-phase chromatography of peptides 1080(2005)49

Effect of anionic ion-pairing reagent concentration (1–60 mM) on reversed-phase liquid chromatography elution behaviour of peptides 1080(2005)58

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

**Perchlorate**

The perchlorate anion is more effective than the trifluoroacetate anion as an ion-pairing reagent for reversed-phase chromatography of peptides 1080(2005)49

**Pesticide standards**

Long-term stability of pure standards and stock standard solutions for the determination of pesticide residues using gas chromatography 1080(2005)166

**PFFA**

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

**Phage display**

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

**Plasma**

Development and application of a new on-line SPE system combined with LC-MS/MS detection for high throughput direct analysis of pharmaceutical compounds in plasma 1080(2005)99

**Plasmid DNA purification**

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

**Plasmid DNA**

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

**Polymerase chain reaction**

Ferrite supports for isolation of DNA from complex samples and polymerase chain reaction amplification 1080(2005)90

**Protein characterization**

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**Protein purification**

Production of milligram quantities of affinity tagged-proteins using automated multistep chromatographic purification 1080(2005)84

**Protein-DNA interaction**

Immobilisation of a repressor protein for binding of plasmid DNA 1080(2005)76

**Proteoliposome**

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

**Proteomics**

Identification of non-idealities in gel electrophoresis 1080(2005)2

**Pulsed flame photometric detection**

Sensitive quantification of sulfur compounds in wine by headspace solid-phase microextraction technique 1080(2005)177

**Quantification**

Sensitive quantification of sulfur compounds in wine by headspace solid-phase microextraction technique 1080(2005)177

**Raman microspectrometry**

Flow-through microdispenser for interfacing  $\mu$ -HPLC to Raman and mid-IR spectroscopic detection 1080(2005)132

**Random peptide library**

Application of protein-coupled liposomes to effective affinity screening from phage library 1080(2005)22

**Reproducibility**

Identification of non-idealities in gel electrophoresis 1080(2005)2

**Reversed-phase liquid chromatography**

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

Enantiomer separation by reversed-phase liquid chromatography with novel hydrophobic phases composed of chiral cationic surfactants 1080(2005)140

**RP-HPLC**

The perchlorate anion is more effective than the trifluoroacetate anion as an ion-pairing reagent for reversed-phase chromatography of peptides 1080(2005)49

Effect of anionic ion-pairing reagent concentration (1–60 mM) on reversed-phase liquid chromatography elution behaviour of peptides 1080(2005)58

**SDS-PAGE**

Identification of non-idealities in gel electrophoresis 1080(2005)2

**Sequence coverage**

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**Solid-phase microextraction**

Solid-phase microextraction for qualitative and quantitative determination of migrated degradation products of antioxidants in an organic aqueous solution 1080(2005)107

**Solvent extraction**

Determination of microcystins in fish by solvent extraction and liquid chromatography 1080(2005)199

**SPE**

Development and application of a new on-line SPE system combined with LC-MS/MS detection for high throughput direct analysis of pharmaceutical compounds in plasma 1080(2005)99

**SPME**

Solid-phase microextraction for qualitative and quantitative determination of migrated degradation products of antioxidants in an organic aqueous solution 1080(2005)107

Sensitive quantification of sulfur compounds in wine by headspace solid-phase microextraction technique 1080(2005)177

**Standard stability**

Long-term stability of pure standards and stock standard solutions for the determination of pesticide residues using gas chromatography 1080(2005)166

**Steady state refolding**

Continuous matrix assisted refolding of  $\alpha$ -lactalbumin by ion exchange chromatography with recycling of aggregates combined with ultrafiltration 1080(2005)29

**Sulphated disaccharides**

Analysis of proteoglycans derived sulphated disaccharides by liquid chromatography/mass spectrometry 1080(2005)43

**Tandem mass spectrometry**

On the variation of glycosylation in human plasma derived antithrombin 1080(2005)15

**TFA**

Effect of anionic ion-pairing reagent hydrophobicity on selectivity of peptide separations by reversed-phase liquid chromatography 1080(2005)68

**q-TOF**

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**Transformation products**

Solid-phase microextraction for qualitative and quantitative determination of migrated degradation products of antioxidants in an organic aqueous solution 1080(2005)107

**Trifluoroacetate**

The perchlorate anion is more effective than the trifluoroacetate anion as an ion-pairing reagent for reversed-phase chromatography of peptides 1080(2005)49

**Trypsin**

Fast on-column protein digestion with subsequent peptide mapping using tandem mass spectrometry with information dependent acquisition 1080(2005)117

**UV**

Confirmation of okadaic acid, dinophysistoxin-1 and dinophysistoxin-2 in shellfish as their anthrylmethyl derivatives using UV radiation 1080(2005)148

**Viscous fingering**

Viscous fingering induced flow instability in multidimensional liquid chromatography 1080(2005)124

**Volatile perfluorinated acid**

Effect of anionic ion-pairing reagent concentration (1–60 mM) on reversed-phase liquid chromatography elution behaviour of peptides 1080(2005)58

**Volatile sulfur compound**

Sensitive quantification of sulfur compounds in wine by headspace solid-phase microextraction technique 1080(2005)177

**Wine off-flavor**

Sensitive quantification of sulfur compounds in wine by headspace solid-phase microextraction technique 1080(2005)177
