

## Subject index of volume 1092

### Adsorption equilibria

Adsorbed solution model for prediction of normal-phase chromatography process with varying composition of the mobile phase 1092(2005)65

### Adsorption isotherm

Enantioseparation of 1-phenyl-1-propanol by supercritical fluid-simulated moving bed chromatography 1092(2005)55

### Adsorptive membranes

Binding *Aedes aegypti* dengue virus to ion exchange membranes 1092(2005)114

### *Aedes aegypti* dengue virus

Binding *Aedes aegypti* dengue virus to ion exchange membranes 1092(2005)114

### Affinity separation

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

### Amino acid

Kinetic studies for sorption of amino acids using a strong anion-exchange resin. Effect of ionic strength 1092(2005)101

### Antibiotics

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

### Aquatic ecosystem

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

### Band splitting

Analysis of applying different solvents for the mobile phase and for sample injection 1092(2005)142

### Batch solute exclusion method

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

### *Beauveria brongniartii*

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

### Bilobalide

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

### Biochromatography

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

### Biological pest control formulation

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

### Brominated flame retardants

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

### Calibration linearity

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

### Column overloading

Analysis of applying different solvents for the mobile phase and for sample injection 1092(2005)142

### Carboxylic sorbents

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

### (+)Catechin

Preparative isolation and purification of *trans*-3,5,4'-trihydroxystilbene-4'-*O*- $\beta$ -D-glucopyranoside and (+)catechin from *Rheum tanguticum* Maxim. ex Balf. using high-speed counter-current chromatography by stepwise elution and stepwise increasing the flow-rate of the mobile phase 1092(2005)241

### Cellulose gel

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

### Cellulose

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

### Centrifugal partition chromatography (CPC)

Enantiomer separation by counter-current chromatography. Optimisation and drawbacks in the use of L-proline derivatives as chiral selectors 1092(2005)36

### Chiral discrimination

Less common applications of simulated moving bed chromatography in the pharmaceutical industry 1092(2005)24

### Chiral separation

Less common applications of simulated moving bed chromatography in the pharmaceutical industry 1092(2005)24

### Chirobiotic T

Shortcut method for evaluation and design of a hybrid process for enantioseparations 1092(2005)43

**Chromatogram**

Comparison of chromatographic band profiles obtained under microwave irradiated and non-irradiated reversed-phase liquid chromatography column 1092(2005)222

**Comprehensive two-dimensional separation**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

**ConA**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Concentration profiles**

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

**Conductivity**

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

**Counter-current chromatography (CCC)**

Enantiomer separation by counter-current chromatography. Optimisation and drawbacks in the use of L-proline derivatives as chiral selectors 1092(2005)36

**Counter-current chromatography**

Preparative isolation and separation of a novel and two known flavonoids from *Patrinia villosa* Juss by high-speed counter-current chromatography 1092(2005)235

Isolation and purification of flavonoid glycosides from *Trollius ledebouri* using high-speed counter-current chromatography by stepwise increasing the flow-rate of the mobile phase 1092(2005)216

**Crystallisation**

Shortcut method for evaluation and design of a hybrid process for enantioseparations 1092(2005)43

Analysis of applying different solvents for the mobile phase and for sample injection 1092(2005)142

**Data treatment**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

**Dextran**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

**Dielectric polarization**

Comparison of chromatographic band profiles obtained under microwave irradiated and non-irradiated reversed-phase liquid chromatography column 1092(2005)222

**Dienestrol**

Separation of structurally related estrogens using isocratic elution pressurized capillary electrochromatography 1092(2005)258

**Diethylstilbestrol**

Separation of structurally related estrogens using isocratic elution pressurized capillary electrochromatography 1092(2005)258

**Diffusivity**

Comparison of chromatographic band profiles obtained under microwave irradiated and non-irradiated reversed-phase liquid chromatography column 1092(2005)222

**Dissolved carbon dioxide**

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

**DNB-leucine**

Enantiomer separation by counter-current chromatography. Optimisation and drawbacks in the use of L-proline derivatives as chiral selectors 1092(2005)36

**Efficiency**

Effect of pressure drop on solute retention and column efficiency in supercritical fluid chromatography 1092(2005)149

**Enantiomer separation**

Less common applications of simulated moving bed chromatography in the pharmaceutical industry 1092(2005)24

Enantiomer separation by counter-current chromatography. Optimisation and drawbacks in the use of L-proline derivatives as chiral selectors 1092(2005)36

**Enantioseparation**

Shortcut method for evaluation and design of a hybrid process for enantioseparations 1092(2005)43

Enantioseparation of 1-phenyl-1-propanol by supercritical fluid-simulated moving bed chromatography 1092(2005)55

**Equilibrium partitioning**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

**Eremomycin**

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

**Estrogens**

Separation of structurally related estrogens using isocratic elution pressurized capillary electrochromatography 1092(2005)258

**Evaporative light scattering detection (ELSD)**

Separation of monosaccharides by hydrophilic interaction chromatography with evaporative light scattering detection 1092(2005)246

**Flavonoid glycoside**

Isolation and purification of flavonoid glycosides from *Trollius ledebouri* using high-speed counter-current chromatography by stepwise increasing the flow-rate of the mobile phase 1092(2005)216

**Flavonoid**

Preparative isolation and separation of a novel and two known flavonoids from *Patrinia villosa* Juss by high-speed counter-current chromatography 1092(2005)235

**Fraction analysis**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Gel structure**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

**Ginkgo biloba leaves**

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

**Ginkgolides**

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

**Glycoprotein purification**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Graft polymerization**

Anion-exchange supermacroporous monolithic matrices with grafted polymer brushes of *N,N*-dimethylaminoethyl-methacrylate 1092(2005)199

**Hexabromocyclododecane**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Hexestrol**

Separation of structurally related estrogens using isocratic elution pressurized capillary electrochromatography 1092(2005)258

**High throughput purification and analysis**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**High throughput purification**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**High-pressure liquid chromatography tandem mass spectrometry (HPLC-MS-MS)**

A multiresidue analytical method using solid-phase extraction and high-pressure liquid chromatography tandem mass spectrometry to measure pharmaceuticals of different therapeutic classes in urban wastewaters 1092(2005)206

**High-speed counter-current chromatography**

Preparative isolation and purification of *trans*-3,5,4'-trihydroxystilbene-4'-*O*- $\beta$ -D-glucopyranoside and (+)catechin from *Rheum tanguticum* Maxim. ex Balf. using high-speed counter-current chromatography by stepwise elution and stepwise increasing the flow-rate of the mobile phase 1092(2005)241

**HPLC/MS purification**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**HPLC-DAD**

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

**Human milk oligosaccharides**

Separation of lactose from human milk oligosaccharides with simulated moving bed chromatography 1092(2005)17

**Hybrid processes**

Shortcut method for evaluation and design of a hybrid process for enantiomer separations 1092(2005)43

**Hydrophilic interaction liquid chromatography (HILIC)**

Separation of monosaccharides by hydrophilic interaction chromatography with evaporative light scattering detection 1092(2005)246

**Ion exchange membrane**

Binding *Aedes aegypti* densovirus to ion exchange membranes 1092(2005)114

**Ion exchange**

Kinetic studies for sorption of amino acids using a strong anion-exchange resin. Effect of ionic strength 1092(2005)101

**Ion-exchange chromatography**

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

**Ion-exchange gel**

Separation of lactose from human milk oligosaccharides with simulated moving bed chromatography 1092(2005)17

**Ion-exchange**

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

**Ion-exclusion chromatography**

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

**Ionic strength**

Kinetic studies for sorption of amino acids using a strong anion-exchange resin. Effect of ionic strength 1092(2005)101

**Kinetics**

Kinetic studies for sorption of amino acids using a strong anion-exchange resin. Effect of ionic strength 1092(2005)101

**L-Proline derivatives**

Enantiomer separation by counter-current chromatography. Optimisation and drawbacks in the use of L-proline derivatives as chiral selectors 1092(2005)36

**Lactose separation**

Separation of lactose from human milk oligosaccharides with simulated moving bed chromatography 1092(2005)17

**LC/MS purification**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Lectin**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Liquid chromatography**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

**Liquid-liquid extraction**

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

**Liquid-liquid-liquid microextraction**

Orthogonal array designs for the optimization of liquid-liquid-liquid microextraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

**Liquid-phase microextraction**

Orthogonal array designs for the optimization of liquid-liquid-liquid microextraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

**Low-abundant components**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

**Macroporous resin**

Isolation and purification of flavonoid glycosides from *Trollius ledebouri* using high-speed counter-current chromatography by stepwise increasing the flow-rate of the mobile phase 1092(2005)216

**Mandelic acid**

Shortcut method for evaluation and design of a hybrid process for enantio-separations 1092(2005)43

**Mass balance**

Shortcut method for evaluation and design of a hybrid process for enantio-separations 1092(2005)43

**Mass-directed fraction collection**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Membrane chromatography**

Binding *Aedes aegypti* denso-nucleosis virus to ion exchange membranes 1092(2005)114

**Microwave irradiation**

Comparison of chromatographic band profiles obtained under microwave irradiated and non-irradiated reversed-phase liquid chromatography column 1092(2005)222

**Mobile phase composition**

Adsorbed solution model for prediction of normal-phase chromatography process with varying composition of the mobile phase 1092(2005)65

**Modeling**

Effect of pressure drop on solute retention and column efficiency in supercritical fluid chromatography 1092(2005)149

**Molecularly imprinted polymers**

Selective solid-phase extraction using molecularly imprinted polymer for the analysis of polar organophosphorus pesticides in water and soil samples 1092(2005)161

**Monocrotophos**

Selective solid-phase extraction using molecularly imprinted polymer for the analysis of polar organophosphorus pesticides in water and soil samples 1092(2005)161

**Monosaccharides**

Separation of monosaccharides by hydrophilic interaction chromatography with evaporative light scattering detection 1092(2005)246

**Musk compounds**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

***N,N*-dimethylaminoethylmethacrylate**

Anion-exchange supermacroporous monolithic matrices with grafted polymer brushes of *N,N*-dimethylaminoethyl-methacrylate 1092(2005)199

**Non-linear chromatography**

Adsorbed solution model for prediction of normal-phase chromatography process with varying composition of the mobile phase 1092(2005)65

**Nonsteroidal anti-inflammatory drugs**

Orthogonal array designs for the optimization of liquid-liquid-liquid micro-extraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

**Octachlorostyrene**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Ogston model**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

**Online optimization**

Optimizing control of simulated moving beds—experimental implementation 1092(2005)2

**Oosporein**

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

**Optimization**

Orthogonal array designs for the optimization of liquid-liquid-liquid micro-extraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

**Optimizing control**

Optimizing control of simulated moving beds—experimental implementation 1092(2005)2

**Organochlorine pesticides**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Organophosphorus pesticides**

Selective solid-phase extraction using molecularly imprinted polymer for the analysis of polar organophosphorus pesticides in water and soil samples 1092(2005)161

**Orthogonal array design**

Orthogonal array designs for the optimization of liquid-liquid-liquid micro-extraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

**Partition coefficient**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

***Patrinia villosa* Juss**

Preparative isolation and separation of a novel and two known flavonoids from *Patrinia villosa* Juss by high-speed counter-current chromatography 1092(2005)235

**Pharmaceutical protein**

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

**Pharmaceuticals**

A multiresidue analytical method using solid-phase extraction and high-pressure liquid chromatography tandem mass spectrometry to measure pharmaceuticals of different therapeutic classes in urban wastewaters 1092(2005)206

**Phase screening**

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

**Phase selection**

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

**1-Phenyl-1-propanol**

Enantioseparation of 1-phenyl-1-propanol by supercritical fluid-simulated moving bed chromatography 1092(2005)55

**Polybrominated diphenyl ethers**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Polychlorinated biphenyls**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Polyfunctional binding**

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

**Potato tubers**

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

**Prenylated flavonoid**

Preparative isolation and separation of a novel and two known flavonoids from *Patrinia villosa* Juss by high-speed counter-current chromatography 1092(2005)235

**Prep LC/MS**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Preparative chromatography**

Generic method for systematic phase selection and method development of biochromatographic processes. Part I. Selection of a suitable cation-exchanger for the purification of a pharmaceutical protein 1092(2005)89

Influence of polyfunctional interactions between organic zwitter-ion eremomycin and carboxylic cation exchangers on forming concentration front 1092(2005)135

Analysis of applying different solvents for the mobile phase and for sample injection 1092(2005)142

Preparative isolation and separation of a novel and two known flavonoids from *Patrinia villosa* Juss by high-speed counter-current chromatography 1092(2005)235

Isolation and purification of flavonoid glycosides from *Trollius ledebouri* using high-speed counter-current chromatography by stepwise increasing the flow-rate of the mobile phase 1092(2005)216

**Preparative HPLC**

Less common applications of simulated moving bed chromatography in the pharmaceutical industry 1092(2005)24

**Preparative isolation**

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

**Pressure drop**

Effect of pressure drop on solute retention and column efficiency in supercritical fluid chromatography 1092(2005)149

**Pressurized capillary electrochromatography**

Separation of structurally related estrogens using isocratic elution pressurized capillary electrochromatography 1092(2005)258

**Protein binding**

Anion-exchange supermacroporous monolithic matrices with grafted polymer brushes of *N,N*-dimethylaminoethyl-methacrylate 1092(2005)199

**Protein ligand**

Quantitative characterization of pore structure of cellulose gels with or without bound protein ligand 1092(2005)107

**Purity**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Repetitive model predictive control**

Optimizing control of simulated moving beds—experimental implementation 1092(2005)2

**Representative flow stream sampling**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Representative sampling**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

***Rheum tanguticum***

Preparative isolation and purification of *trans*-3,5,4'-trihydroxystilbene-4'-*O*- $\beta$ -D-glucopyranoside and (+)catechin from *Rheum tanguticum* Maxim. ex Balf. using high-speed counter-current chromatography by stepwise elution and stepwise increasing the flow-rate of the mobile phase 1092(2005)241

**Risk assessment**

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

**RPLC**

Comparison of chromatographic band profiles obtained under microwave irradiated and non-irradiated reversed-phase liquid chromatography column 1092(2005)222

**Sampling**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Segregation factor**

Shortcut method for evaluation and design of a hybrid process for enantio-separations 1092(2005)43

**Selective adsorbents**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Semipermeable membrane devices**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Sewage treatment plant (STP)**

A multiresidue analytical method using solid-phase extraction and high-pressure liquid chromatography tandem mass spectrometry to measure pharmaceuticals of different therapeutic classes in urban wastewaters 1092(2005)206

**Shortcut method**

Shortcut method for evaluation and design of a hybrid process for enantio-separations 1092(2005)43

**Silica monolithic column**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

**Silica**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Simulated moving bed chromatography**

Optimizing control of simulated moving beds—experimental implementation 1092(2005)2

Separation of lactose from human milk oligosaccharides with simulated moving bed chromatography 1092(2005)17

Less common applications of simulated moving bed chromatography in the pharmaceutical industry 1092(2005)24

**Simulation**

Effect of pressure drop on solute retention and column efficiency in supercritical fluid chromatography 1092(2005)149

**Single pass purification and analysis**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**Size-exclusion gel**

Separation of lactose from human milk oligosaccharides with simulated moving bed chromatography 1092(2005)17

**SMB chromatography**

Shortcut method for evaluation and design of a hybrid process for enantioseparations 1092(2005)43

***Solanum tuberosum***

High-performance liquid chromatography-diode array detection assay for the detection and quantification of the *Beauveria* metabolite oosporein from potato tubers 1092(2005)254

**Solid-phase extraction**

Selective solid-phase extraction using molecularly imprinted polymer for the analysis of polar organophosphorus pesticides in water and soil samples 1092(2005)161

**Solubility limits**

Analysis of applying different solvents for the mobile phase and for sample injection 1092(2005)142

**SPACPASS**

A novel method for immediate post-purification purity determination of fractions collected during high-throughput purification 1092(2005)228

**SPMDs**

Fast isolation of hydrophobic organic environmental contaminants from exposed semipermeable membrane devices (SPMDs) prior to GC analysis 1092(2005)170

**Supercritical fluid chromatography**

Effect of pressure drop on solute retention and column efficiency in supercritical fluid chromatography 1092(2005)149

**Supercritical fluid-simulated moving bed chromatography**

Enantioseparation of 1-phenyl-1-propanol by supercritical fluid-simulated moving bed chromatography 1092(2005)55

**Supermacroporous polyacrylamide**

Anion-exchange supermacroporous monolithic matrices with grafted polymer brushes of *N,N*-dimethylaminoethyl-methacrylate 1092(2005)199

**Supports**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Surface heterogeneity**

Adsorbed solution model for prediction of normal-phase chromatography process with varying composition of the mobile phase 1092(2005)65

**Surface modification**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76

**Terpene trilactones**

Preparative isolation of terpene trilactones from *Ginkgo biloba* leaves 1092(2005)125

**TMB**

Shortcut method for evaluation and design of a hybrid process for enantioseparations 1092(2005)43

**Traditional Chinese medicines**

Improved performance of comprehensive two-dimensional HPLC separation of traditional Chinese medicines by using a silica monolithic column and normalization of peak heights 1092(2005)191

***Trans*-3,5,4'-trihydroxystilbene-4'-*O*- $\beta$ -D-glucopyranoside**

Preparative isolation and purification of *trans*-3,5,4'-trihydroxystilbene-4'-*O*- $\beta$ -D-glucopyranoside and (+)catechin from *Rheum tanguticum* Maxim. ex Balf. using high-speed counter-current chromatography by stepwise elution and stepwise increasing the flow-rate of the mobile phase 1092(2005)241

**Triangle theory**

Enantioseparation of 1-phenyl-1-propanol by supercritical fluid-simulated moving bed chromatography 1092(2005)55

***Trollius ledebouri* Reichb.**

Isolation and purification of flavonoid glycosides from *Trollius ledebouri* using high-speed counter-current chromatography by stepwise increasing the flow-rate of the mobile phase 1092(2005)216

**Urban wastewaters**

A multiresidue analytical method using solid-phase extraction and high-pressure liquid chromatography tandem mass spectrometry to measure pharmaceuticals of different therapeutic classes in urban wastewaters 1092(2005)206

**Water analysis**

Orthogonal array designs for the optimization of liquid-liquid-liquid microextraction of nonsteroidal anti-inflammatory drugs combined with high-performance liquid chromatography-ultraviolet detection 1092(2005)182

High-speed ion-exclusion chromatography of dissolved carbon dioxide on a small weakly acidic cation-exchange resin column with ion-exchange enhancement columns of conductivity detection 1092(2005)250

**Water and soil samples**

Selective solid-phase extraction using molecularly imprinted polymer for the analysis of polar organophosphorus pesticides in water and soil samples 1092(2005)161

**WGA**

Comparison of modified supports on the base of glycoprotein interaction studies and of adsorption investigations 1092(2005)76
