JOURNAL OF CHROMATOGRAPHY A
www.elsevier.com/locate/chroma

Subject index of volume 1096

Acenapthene
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Aligning
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Alignment
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Alternating least squares
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Amitriptyline
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

ANN
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

ANOVA
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Antioxidant capacity
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Artificial neural networks
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

Artificial neural network modeling of peptide mobility and peptide mapping in capillary zone electrophoresis 1096(2005)58

Augmentation
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165

Biocides
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Butylparaben
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Capillary zone electrophoresis
Artificial neural network modeling of peptide mobility and peptide mapping in capillary zone electrophoresis 1096(2005)58

CART
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Chemical taxonomy
Identification of Africanized honeybees 1096(2005)69

Chemometrics
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

Chromatographic one-way signals
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part I: Peak detection 1096(2005)133

Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part II: Peak model and deconvolution algorithms 1096(2005)146

Classification
Identification of Africanized honeybees 1096(2005)69

Cluster analysis
Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

Clustering
Classification of highly similar crude oils using data sets from comprehensive two-dimensional gas chromatography and multivariate techniques 1096(2005)156

Coelution
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Column capacity
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

doi:10.1016/S0021-9673(05)02050-9

n-Column separation
Probability theory for number of mixture components resolved by n independent columns 1096(2005)28

Complex mixtures
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Crude oil characterization
Classification of highly similar crude oils using data sets from comprehensive two-dimensional gas chromatography and multivariate techniques 1096(2005)156

Diode array detection
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165

Discrimination
Classification of highly similar crude oils using data sets from comprehensive two-dimensional gas chromatography and multivariate techniques 1096(2005)156

Electrophoretic mobility
Artificial neural network modeling of peptide mobility and peptide mapping in capillary zone electrophoresis 1096(2005)58

Environmental samples
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Essential oil
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

Experimental design
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

Factor analysis
Application of multivariate curve resolution methods to on-flow LC-NMR 1096(2005)2

Fast chromatography
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Feature selection
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Fractional experimental design
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

Fuel
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Gas chromatography
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Gas chromatography–mass spectrometry (GC–MS)
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

GC×GC
Classification of highly similar crude oils using data sets from comprehensive two-dimensional gas chromatography and multivariate techniques 1096(2005)156

Genetic algorithms
Identification of Africanized honeybees 1096(2005)69

Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part II: Peak model and deconvolution algorithms 1096(2005)146

GRAM
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Green tea
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Heuristic evolving latent projections (HELP)
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

High performance liquid chromatography
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165

HPLC
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Interpretive optimisation
Robust interpretive optimisation in high-performance liquid chromatography considering uncertainties in peak position 1096(2005)123

Iterative target transformation factor analysis
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165

LC–MS
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Legendre moments
Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

Liquid chromatography
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

Liquid chromatography, two-dimensional
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Load capacity
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

MCKVR
Application of multivariate curve resolution methods to on-flow LC-NMR 1096(2005)2

MCR-ALS
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Method development
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Micellar electrokinetic chromatography
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165

Modeling
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Modelling of retention
Robust interpretive optimisation in high-performance liquid chromatography considering uncertainties in peak position 1096(2005)123

monolithic
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Monolithic channels rod monolithic HPLC columns
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Monolithic columns
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Monolithic silica
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part II: Peak model and deconvolution algorithms 1096(2005)146

Moving subwindow searching (MSS)
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

Multi-column separation
Probability theory for number of mixture components resolved by *n* independent columns 1096(2005)28

Multidimensional separational
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Multivariate calibration
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Multivariate curve resolution
Application of multivariate curve resolution methods to on-flow LC-NMR 1096(2005)2
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Multivariate optimisation
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Multivariate regression trees
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Naphthalene
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Neuroprotective peptides
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

On-flow LC-NMR
Application of multivariate curve resolution methods to on-flow LC-NMR 1096(2005)2

Optimisation of separation
Optimisation of high performance liquid chromatography separation of neuroprotective peptides. Fractional experimental designs combined with artificial neural networks 1096(2005)50

Optimization
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Orthogonal chromatographic systems
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Orthogonal moments
Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

Overlapped peaks
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part I: Peak detection 1096(2005)133

PARAFAC
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Parallel linked monolithic
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Particle diameter
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Pattern recognition
Identification of Africanized honeybees 1096(2005)69

Peak capacity
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Peak deconvolution
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part II: Peak model and deconvolution algorithms 1096(2005)146

Peak detection
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part I: Peak detection 1096(2005)133

Peptide mapping
Artificial neural network modeling of peptide mobility and peptide mapping in capillary zone electrophoresis 1096(2005)58

PLS
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Preparative HPLC
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Pressure
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Principal component analysis
Classification of gasoline data obtained by gas chromatography using a piecewise alignment algorithm combined with feature selection and principal component analysis 1096(2005)101

Propranolol
A virtual-modeling and multivariate-optimization examination of HPLC parameter interactions and opportunities for saving analysis time 1096(2005)16

Proteomics
Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

Reversed-phase liquid chromatography
Robust interpretive optimisation in high-performance liquid chromatography considering uncertainties in peak position 1096(2005)123

Robustness
Robust interpretive optimisation in high-performance liquid chromatography considering uncertainties in peak position 1096(2005)123

Serial linked monolithic
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Short column
Solving liquid chromatography mass spectrometry coelution problems in the analysis of environmental samples by multivariate curve resolution 1096(2005)111

Smoothing
Automatic program for peak detection and deconvolution of multi-overlapped chromatographic signals. Part I: Peak detection 1096(2005)133

Statistical-overlap theory
Probability theory for number of mixture components resolved by *n* independent columns 1096(2005)28

Stepwise linear discriminant analysis
Use of Legendre moments for the fast comparison of two-dimensional polyacrylamide gel electrophoresis maps images 1096(2005)86

***Syringa oblata Lindl* (lilac)**
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

Temperature-programmed retention indices (PTRIs)
Temperature-programmed retention indices for gas chromatography–mass spectroscopy analysis of plant essential oils 1096(2005)76

Three-way data
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Trilinear
The chemometric resolution and quantification of overlapped peaks form comprehensive two-dimensional liquid chromatography 1096(2005)40

Univariate regression trees
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Unsupervised
Selection of orthogonal reversed-phase HPLC systems by univariate and auto-associative multivariate regression trees 1096(2005)187

Validation
Classification of highly similar crude oils using data sets from comprehensive two-dimensional gas chromatography and multivariate techniques 1096(2005)156

Volume load capacity
A column capacity study of single, serial, and parallel linked rod monolithic high performance liquid chromatography columns 1096(2005)92

Warping
Prediction of total green tea antioxidant capacity from chromatograms by multivariate modeling 1096(2005)177

Wavelength shift eigenstructure tracking
Simultaneous resolution of overlapping peaks in high-performance liquid chromatography and micellar electrokinetic chromatography with diode array detection using augmented iterative target transformation factor analysis 1096(2005)165
