

## Subject Index

---

### Acylaminoethylarylsulphonylurea

TLC determination of acylaminoethyl-arylsulphonylureas in serum after hydrolysis and dansylation 533

### Adrenaline

Quantitation of adrenaline and nor-adrenaline from human plasma by combined GC-high-resolution mass fragmentography 221

### Adrenal steroids

Convenient system for the simultaneous separation of 11-deoxycortisol and aldosterone by Sephadex LH-20 multiple column chromatography 333

### Albumin

Electrophoretic bimorphism of serum albumin in the presence of indocyanine green 77

### Aldosterone

Convenient system for the simultaneous separation of 11-deoxycortisol and aldosterone by Sephadex LH-20 multiple column chromatography 333

### Aldosterone

Determination of aldosterone in urine and plasma 273

### Amino acids

MS study of the transesterification of O,N<sup>α</sup>-bis(trifluoroacetyl)n-butyl esters of some hydroxylated amino acids into their O-carbethoxy, N<sup>α</sup>-trifluoroacetyl n-butyl ester derivatives during the N-carbethoxy derivatization of histidine 413

### Aminophenazone

GC determination of phenazone derivatives in human plasma. I. Aminophenazone 503

### Amitriptyline

Simplified method for monitoring tricyclic antidepressant therapy using GLC with nitrogen detection 449

### Anaesthetics

Rapid GC analysis of plasma levels of ketamine and major metabolites employing either nitrogen selective or MS detection 344

### Anaesthetics

Routine direct injection GLC procedure for the analysis of volatile halogenated anaesthetics in whole blood using a new external injection port 297

### Analgesic drugs

Fluorimetric determination of flufenamic acid from plasma by direct measurement of TLC plates 169

### Analgesic drugs

GC determination of phenazone derivatives in human plasma. I. Aminophenazone 503

### Analgesic drugs

GC determination of phenazone derivatives in human plasma. II. Propylphenazone 508

### Anti-anginal drugs

Determination of molsidomine in plasma by column HPLC 465

### Anti-anginal drugs

Improved method for the rapid determination of isosorbide dinitrate in human plasma and its application in pharmacokinetic studies 457

### Anti-anxiety drugs

Analysis of lorazepam and its glucuronide metabolite by electron-capture GLC. Use in pharmacokinetic studies of lorazepam 311

### Anti-asthmatic drugs

Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175

### Anticoagulants

Comparison of HPLC and a spectrophotometric technique for determining plasma warfarin 522

### Anticonvulsant drugs

New direct micro-method for determination of valproic acid in serum by GC 494

### Anticonvulsant drugs

Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide,

- diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167
- Anticonvulsant drugs**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361
- Antidepressant drugs**  
Quantitation of zimelidine and norzimelidine in plasma using HPLC 113
- Antidepressants, tricyclic**  
Simplified method for monitoring tricyclic antidepressant therapy using GLC with nitrogen detection 449
- Antidiabetic drugs**  
TLC determination of acylaminoethylarylsulphonylureas in serum after hydrolysis and dansylation 533
- Antihistamine drugs**  
HPLC determination of cimetidine sulphoxide in human blood and urine 354
- Antihypertensive drugs**  
Determination of the thiazide diuretic bemetizide in the plasma and urine of humans by HPLC 152
- Anti-inflammatory drugs**  
GC determination of phenazone derivatives in human plasma. I. Aminophenazone 503
- Anti-inflammatory drugs**  
GC determination of phenazone derivatives in human plasma. II. Propylphenazone 508
- Antileukemic drugs**  
Determination of cytosine arabinoside in human plasma by GC with a nitrogen-sensitive detector and by GC-MS 283
- Antimetabolites**  
Determination of cytosine arabinoside in human plasma by HPLC 350
- Antiprotozoal drugs**  
Determination of metronidazole and misonidazole and their metabolites in plasma and urine by HPLC 163
- Antipyretic drugs**  
GC determination of phenazone derivatives in human plasma. I. Aminophenazone 503
- Antipyretic drugs**  
GC determination of phenazone derivatives in human plasma. II. Propylphenazone 508
- Antirheumatic drugs**  
Fluorimetric determination of flufenamic acid from plasma by direct measurement of TLC plates 169
- Antitumour agents**  
Determination of cytosine arabinoside in human plasma by HPLC 350
- Antitumour drugs**  
Quantitative analysis of 5-fluorouracil in human serum by selected ion monitoring GC-MS 512
- Antitumour drugs**  
Rapid determination of 1-(2-tetrahydrofuryl)-5-fluorouracil in human blood by HPLC 518
- Arylsulphonylurea, acylaminoethyl derivatives**  
TLC determination of acylaminoethylarylsulphonylureas in serum after hydrolysis and dansylation 533
- Assays, mass fragmentographic**  
Automation of HPLC sample clean-up for mass fragmentographic assays 425
- Auto-sampling**  
Automation of HPLC sample clean-up for mass fragmentographic assays 425
- Bemetizide**  
Determination of the thiazide diuretic bemetizide in the plasma and urine of humans by HPLC 152
- Benzodiazepines**  
Analysis of lorazepam and its glucuronide metabolite by electron-capture GLC. Use in pharmacokinetic studies of lorazepam 311
- Benzodiazepines**  
Quantitation of chlordiazepoxide and its metabolites in biological fluids by TLC 473
- Benzodiazepines**  
Quantitative analysis of prazepam and its metabolites by electron capture GC and selected ion monitoring. Application to diaplacental passage and fetal hepatic metabolism in early human pregnancy 227
- Bile salts**  
Quantitative separation of bile salts from mixtures by gradient elution HPLC 137

- Cadaverine**  
Monoacylcadaverines in the blood of schizophrenic patients 67
- Caffeine**  
Microdetermination of caffeine in blood by GC-MS 85
- Caffeine**  
Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175
- Carbamazepine**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167
- Carbamazepine**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361
- Carboxy tolbutamide**  
Simple, rapid and micro HPLC method for the simultaneous determination of tolbutamide and carboxy tolbutamide in plasma 121
- Catecholamines**  
Fluorimetric detection of octopamine in HPLC and its application to the assay of dopamine  $\beta$ -monooxygenase in human serum 433
- Catecholamines**  
Quantitation of adrenaline and nor-adrenaline from human plasma by combined GC-high-resolution mass fragmentography 221
- Chemotherapeutic drugs**  
Determination of sulfapyridine and its major metabolites by HPLC 157
- Chemotherapeutic drugs**  
Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103
- Chemotherapeutic drugs**  
GLC analysis of trimethoprim in plasma and urine 143
- Chlordiazepoxide**  
Quantitation of chlordiazepoxide and its metabolites in biological fluids by TLC 473
- Cholesterol**  
Automated quantitative GLC of intact lipids. I. Preparation and calibration of the column 241
- Cholesterol**  
Comparative determination of plasma cholesterol and triacylglycerol levels by automated GLC and AutoAnalyzer methods 393
- Cholesterol**  
Quantitative analysis of human and rabbit tear cholesterol by GLC 321
- Chondroitin sulphates**  
Rapid and sensitive determination of enzymatic degradation products of isomeric chondroitin sulfates by HPLC 439
- Cimetidine**  
HPLC determination of cimetidine sulphoxide in human blood and urine 354
- Clinical chemistry**  
Place of GC-MS in clinical chemistry 185
- Co-enzymes**  
New method for quantitative analysis of pyridoxal-5'-phosphate in biological material 485
- Co-Trimoxazole**  
Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103
- Cytosine arabinoside**  
Determination of cytosine arabinoside in human plasma by GC with a nitrogen-sensitive detector and by GC-MS 283
- Cytosine arabinoside**  
Determination of cytosine arabinoside in human plasma by HPLC 350
- Deoxycortisol**  
Convenient system for the simultaneous separation of 11-deoxycortisol and aldosterone by Sephadex LH-20 multiple column chromatography 333
- Diphenylhydantoin**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167

**Diphenylhydantoin**

Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361

**Dipropylacetic acid**

New direct micro-method for determination of valproic acid in serum by GC 494

**Diuretic drugs**

Determination of the thiazide diuretic bemetizide in the plasma and urine of humans by HPLC 152

**Dopamine  $\beta$ -monooxygenase**

Fluorimetric detection of octopamine in HPLC and its application to the assay of dopamine  $\beta$ -monooxygenase in human serum 433

**Drug monitoring**

Comparison of HPLC and a spectrophotometric technique for determining plasma warfarin 522

**Drug monitoring**

Determination of cytosine arabinoside in human plasma by GC with a nitrogen-sensitive detector and by GC-MS 283

**Drug monitoring**

Determination of metformin in plasma at therapeutic levels by GLC using a nitrogen detector 148

**Drug monitoring**

Determination of metronidazole and misonidazole and their metabolites in plasma and urine by HPLC 163

**Drug monitoring**

Determination of molsidomine in plasma by column HPLC 465

**Drug monitoring**

Determination of sulfapyridine and its major metabolites by HPLC 157

**Drug monitoring**

Determination of the thiazide diuretic bemetizide in the plasma and urine of humans by HPLC 152

**Drug monitoring**

Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103

**Drug monitoring**

Fluorimetric determination of flufenamic acid from plasma by direct measurement of TLC plates 169

**Drug monitoring**

GC determination of phenazone derivatives in human plasma. I. Amino-phenazone 503

**Drug monitoring**

GC determination of phenazone derivatives in human plasma. II. Propyphenazone 508

**Drug monitoring**

GC-MS analysis of optically active metabolites and drugs on a novel chiral stationary phase 197

**Drug monitoring**

GLC analysis of trimethoprim in plasma and urine 143

**Drug monitoring**

HPLC determination of cimetidine sulphoxide in human blood and urine 354

**Drug monitoring**

Improved method for the rapid determination of isosorbide dinitrate in human plasma and its application in pharmacokinetic studies 457

**Drug monitoring**

Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175

**Drug monitoring**

New direct micro-method for determination of valproic acid in serum by GC 494

**Drug monitoring**

Quantitation of chlordiazepoxide and its metabolites in biological fluids by TLC 473

**Drug monitoring**

Quantitation of zimelidine and nor-zimelidine in plasma using HPLC 113

**Drug monitoring**

Quantitative analysis of 5-fluorouracil in human serum by selected ion monitoring GC-MS 512

**Drug monitoring**

Quantitative analysis of prazepam and its metabolites by electron capture GC and selected ion monitoring. Application to diaplacental passage and fetal hepatic metabolism in early human pregnancy 227

**Drug monitoring**

Rapid determination of 1-(2-tetrahydrofuryl)-5-fluorouracil in human blood by HPLC 518

- Drug monitoring**  
Rapid GC analysis of plasma levels of ketamine and major metabolites employing either nitrogen selective or mass spectroscopic detection 344
- Drug monitoring**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167
- Drug monitoring**  
Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361
- Drug monitoring**  
Rapid, sensitive analysis of 8-methoxy-psoralen in human plasma 498
- Drug monitoring**  
Routine direct injection GLC procedure for the analysis of volatile halogenated anaesthetics in whole blood using a new external injection port 297
- Drug monitoring**  
Simple, rapid and micro HPLC method for the simultaneous determination of tolbutamide and carboxy tolbutamide in plasma 121
- Drug monitoring**  
Simplified method for monitoring tricyclic antidepressant therapy using GLC with nitrogen detection 449
- Drug monitoring**  
TLC determination of acylaminoethyl-arylsulphonylureas in serum after hydrolysis and dansylation 533
- Enzymes**  
Fluorimetric detection of octopamine in HPLC and its application to the assay of dopamine  $\beta$ -monooxygenase in human serum 433
- Ergenyl**  
New direct micro-method for determination of valproic acid in serum by GC 494
- Flufenamic acid**  
Fluorimetric determination of flufenamic acid from plasma by direct measurement of TLC plates 169
- 5-Fluorouracil**  
Quantitative analysis of 5-fluorouracil in human serum by selected ion monitoring GC-MS 512
- Furocoumarins**  
Rapid, sensitive GC analysis of 8-methoxy-psoralen in human plasma 498
- Glycopeptides**  
Two-dimensional separation of glycopeptides and charged oligosaccharides on silica thin layers 337
- Glycosaminoglycans**  
Rapid and sensitive determination of enzymatic degradation products of isomeric chondroitin sulfates by HPLC 439
- Halogenated anaesthetics**  
Routine direct injection GLC procedure for the analysis of volatile halogenated anaesthetics in whole blood using a new external injection port 297
- Hawkinsin**  
New tyrosine metabolites in humans: hawkinsin and *cis*- and *trans*-4-hydroxycyclohexylacetic acids. Unusual adsorption of deuterated and non-deuterated hawkinsin during GC 207
- Histamine**  
Determination of histamine in plasma by high-speed LC 490
- Histidine**  
MS study of the transesterification of O,N $^{\alpha}$ -bis(trifluoroacetyl)*n*-butyl esters of some hydroxylated amino acids into their O-carbomethoxy, N $^{\alpha}$ -trifluoroacetyl, *n*-butyl ester derivatives during the N $^{\alpha}$ -carbomethoxy derivatization of histidine 413
- Hormones, steroid**  
Determination of aldosterone in urine and plasma 273
- Hydrocarbons, saturated**  
Paraffin oil pneumonia. Analysis of saturated hydrocarbons in different human tissues 91
- Hydroxycyclohexylacetic acids**  
New tyrosine metabolites in humans: hawkinsin and *cis*- and *trans*-4-hydroxycyclohexylacetic acids. Unusual adsorption of deuterated and non-deuterated hawkinsin during GC 207
- Hydroxylated amino acids**  
MS study of the transesterification of O,N $^{\alpha}$ -bis(trifluoroacetyl)*n*-butyl esters of some hydroxylated amino acids into their O-carbomethoxy, N $^{\alpha}$ -trifluoroacetyl *n*-butyl ester derivatives during the N $^{\alpha}$ -carbomethoxy derivatization of histidine 413

**Hydroxyproline**

MS study of the transesterification of  $O,N^{\alpha}$ -bis(trifluoroacetyl)*n*-butyl esters of some hydroxylated amino acids into their *O*-carbethoxy, $N^{\alpha}$ -trifluoroacetyl *n*-butyl ester derivatives during the  $N^{\alpha}$ -carbethoxy derivatization of histidine 413

**Hypoglycaemic drugs**

Determination of metformin in plasma at therapeutic levels by GLC using a nitrogen detector 148

**Hypoglycaemic drugs**

Simple, rapid and micro HPLC method for the simultaneous determination of tolbutamide and carboxy tolbutamide in plasma 121

**Hypoglycaemic drugs**

TLC determination of acylaminoethyl-arylsulphonylureas in serum after hydrolysis and dansylation 533

**Immunoreactive substances**

Isolation of immunoreactive components from experimental and human tumour tissues and serums by HPLC 253

**Indocyanine green**

Electrophoretic bimorphism of serum albumin in the presence of indocyanine green 77

**Isosorbide dinitrate**

Improved method for the rapid determination of isosorbide dinitrate in human plasma and its application in pharmacokinetic studies 457

**Ketamine**

Rapid GC analysis of plasma levels of ketamine and major metabolites employing either nitrogen selective or mass spectroscopic detection 344

**Ketone bodies**

GC head-space analysis of clinically interesting ketone bodies 327

**Kynurenine**

Determination of kynurenine by a simple gas-liquid chromatographic method applicable to urine, plasma, brain and cerebrospinal fluid 33

**Lipids**

Automated quantitative GLC of intact lipids. I. Preparation and calibration of the column 241

**Lipids**

Comparative determination of plasma cholesterol and triacylglycerol levels by automated GLC and AutoAnalyzer methods 393

**Lipids**

Quantitative HPTLC of lipids in plasma and liver homogenates after direct application of 0.5- $\mu$ l samples to the silica-gel layer 261

**Lorazepam**

Analysis of lorazepam and its glucuronide metabolite by electron-capture GLC. Use in pharmacokinetic studies of lorazepam 311

**Mephénytoin**

Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephénytoin, phenobarbital and primidone in serum by TLC 167

**Mephénytoin**

Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephénytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361

**Metabolic disorders**

New tyrosine metabolites in humans: hawkinsin and *cis*- and *trans*-4-hydroxycyclohexylacetic acids. Unusual adsorption of deuterated and non-deuterated hawkinsin during GC 207

**Metabolic disorders**

Quantitative analysis of  $\beta$ -phenylpyruvic acid by single ion monitoring. Evaluation of isomeric internal standards 213

**Metabolic disorders**

Rapid and simplified extraction procedure for GC-MS profiling of urinary organic acids 481

**Metformin**

Determination of metformin in plasma at therapeutic levels by GLC using a nitrogen detector 148

**Methoxypsoralen**

Rapid, sensitive GC analysis of 8-methoxy-psoralen in human plasma 498

**Methylene diphosphonate**

In vitro and in vivo studies with sodium pertechnetate and technetium-labelled methylene diphosphonate 527

**Metronidazole**

Determination of metronidazole and misonidazole and their metabolites in plasma and urine by HPLC 163

- "Middle molecules"**  
 Determination of "middle molecules" presenting vitamin B<sub>12</sub> molecular size in normal and uremic body fluids 55
- Misonidazole**  
 Determination of metronidazole and misonidazole and their metabolites in plasma and urine by HPLC 163
- Molsidomine**  
 Determination of molsidomine in plasma by column HPLC 465
- Monoacylcadaverines**  
 Monoacylcadaverines in the blood of schizophrenic patients 67
- Mucopolysaccharides**  
 Rapid and sensitive determination of enzymatic degradation products of isomeric chondroitin sulfates by HPLC 439
- Nitroimidazole derivatives**  
 Determination of metronidazole and misonidazole and their metabolites in plasma and urine by HPLC 163
- Noradrenaline**  
 Quantitation of adrenaline and noradrenaline from human plasma by combined GC-high-resolution mass fragmentography 221
- Nortriptyline**  
 Simplified method for monitoring tricyclic antidepressant therapy using GLC with nitrogen detection 449
- Norzimelidine**  
 Quantitation of zimelidine and norzimelidine in plasma using HPLC 113
- Octopamine**  
 Fluorimetric detection of octopamine in HPLC and its application to the assay of dopamine  $\beta$ -monooxygenase in human serum 433
- Oligosaccharides**  
 Two-dimensional separation of glycopeptides and charged oligosaccharides on silica thin layers 337
- Organic acids**  
 Rapid and simplified extraction procedure for GC-MS profiling of urinary organic acids 481
- Paraffin oil pneumonia**  
 Paraffin oil pneumonia. Analysis of saturated hydrocarbons in different human tissues 91
- Phenazone derivatives**  
 GC determination of phenazone derivatives in human plasma. I. Aminophenazone 503
- Phenazone derivatives**  
 GC determination of phenazone derivatives in human plasma. II. Propylphenazone 508
- Phenobarbital**  
 Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167
- Phenobarbital**  
 Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361
- Phenylpyruvic acid**  
 Quantitative analysis of  $\beta$ -phenylpyruvic acid by single ion monitoring. Evaluation of isomeric internal standards 213
- Plasma lipids**  
 Automated quantitative GLC of intact lipids. I. Preparation and calibration of the column 241
- Plasma lipids**  
 Quantitative HPTLC of lipids in plasma and liver homogenates after direct application of 0.5- $\mu$ l samples to the silica-gel layer 261
- Plasma proteins**  
 Applications of polyacrylamide gel electrophoresis and polyacrylamide gel isoelectric focusing in clinical chemistry 1
- Polyacrylamide gel electrophoresis**  
 Applications of polyacrylamide gel electrophoresis and polyacrylamide gel isoelectric focusing in clinical chemistry 1
- Prazepam**  
 Quantitative analysis of prazepam and its metabolites by electron capture GC and selected ion monitoring. Application to diaplacental passage and fetal hepatic metabolism in early human pregnancy 227
- Primidone**  
 Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC 167

**Primidone**

Rapid quantitative method for the simultaneous determination of carbamazepine, carbamazepine-10,11-epoxide, diphenylhydantoin, mephenytoin, phenobarbital and primidone in serum by TLC. Improvement of the buffer system 361

**Profiles, chromatographic**

Analysis of sulfonic acids by GC-MS of trimethylsilyl derivatives 132

**Profiles, chromatographic**

Determination of aldosterone in urine and plasma 273

**Profiles, chromatographic**

Determination of kynurenine by a simple gas-liquid method applicable to urine, plasma, brain and cerebrospinal fluid 33

**Profiles, chromatographic**

Determination of "middle molecules" presenting vitamin B<sub>12</sub> molecular size in normal and uremic body fluids 55

**Profiles, chromatographic**

Determination of urinary thiamine by HPLC utilizing the thiochrome fluorescent method 43

**Profiles, chromatographic**

GC head-space analysis of clinically interesting ketone bodies 327

**Profiles, chromatographic**

GC-MS analysis of optically active metabolites and drugs on a novel chiral stationary phase 197

**Profiles, chromatographic**

Isolation of immunoreactive components from experimental and human tumour tissues and serums by high-performance gel chromatography 253

**Profiles, chromatographic**

Monoacylcadaverines in the blood of schizophrenic patients 67

**Profiles, chromatographic**

Place of GC-MS in clinical chemistry 185

**Profiles, chromatographic**

Profiles in chronic diseases. I. Investigations of steroid profiles in uremia 381

**Profiles, chromatographic**

Quantitative analysis of  $\beta$ -phenylpyruvic acid by single ion monitoring. Evaluation of isomeric internal standards 213

**Profiles, chromatographic**

Quantitative analysis of steroid profiles from urine by capillary GC. I. Accuracy and reproducibility of the sample preparation 365

**Profiles, chromatographic**

Quantitative HPTLC of lipids in plasma and liver homogenates after direct application of 0.5- $\mu$ l samples to the silica-gel layer 261

**Profiles, chromatographic**

Rapid and simplified extraction procedure for GC-MS profiling of urinary organic acids 481

**Propyphenazone**

GC determination of phenazone derivatives in human plasma. II. Propyphenazone 508

**Proteins**

Applications of polyacrylamide gel electrophoresis and polyacrylamide gel isoelectric focusing in clinical chemistry 1

**Pyridoxal-5'-phosphate**

New method for quantitative analysis of pyridoxal-5'-phosphate in biological material 485

**Pyrimidines**

Determination of cytosine arabinoside in human plasma by HPLC 350

**Pyrimidines**

Quantitative analysis of 5-fluorouracil in human serum by selected ion monitoring GC-MS 512

**Sample clean-up**

Automation of HPLC sample clean-up for mass fragmentographic assays 425

**Sedatives**

Analysis of lorazepam and its glucuronide metabolite by electron-capture GLC. Use in pharmacokinetic studies of lorazepam 311

**Serine**

MS study of the transesterification of O,N $^{\alpha}$ -bis(trifluoroacetyl)n-butyl esters of some hydroxylated amino acids into their O-carbethoxy, N $^{\alpha}$ -trifluoroacetyl n-butyl ester derivatives during the N $^{\alpha}$ -carbethoxy derivatization of histidine 413

**Serum albumin**

Electrophoretic bimorphism of serum albumin in the presence of indocyanine green 77

- Sodium pertechnetate**  
In vitro and in vivo studies with sodium pertechnetate and technetium-labelled methylene diphosphonate 527
- Stationary phases, chiral**  
GC-MS analysis of optically active metabolites and drugs on a novel chiral stationary phase 197
- Steroids**  
Convenient system for the simultaneous separation of 11-deoxycortisol and aldosterone by Sephadex LH-20 multiple column chromatography 333
- Steroids**  
Determination of aldosterone in urine and plasma 273
- Steroids**  
Profiles in chronic diseases. I. Investigations of steroid profiles in uremia 381
- Steroids**  
Quantitative analysis of steroid profiles from urine by capillary GC. I. Accuracy and reproducibility of the sample preparation 365
- Sterols**  
Quantitative analysis of human and rabbit tear cholesterol by GLC 321
- Stimulants**  
Microdetermination of caffeine in blood in GC-MS 85
- Stimulants**  
Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175
- Sulphamethoxazole**  
Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103
- Sulphonamides**  
Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103
- Sulphonic acids**  
Analysis of sulfonic acids by GC-MS of trimethylsilyl derivatives 132
- Tagamet**  
HPLC determination of cimetidine sulphoxide in human blood and urine 354
- Tear cholesterol**  
Quantitative analysis of human and rabbit tear cholesterol by GLC 321
- Technetium-99**  
in vitro and in vivo studies with sodium pertechnetate and technetium-labelled methylene diphosphonate 527.
- 1-(2-Tetrahydrofuryl)-5-fluoroacyl**  
Rapid determination of 1-(2-tetrahydrofuryl)-5-fluorouracil in human blood by HPLC 518
- Theophylline**  
Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175
- Thiamine**  
Determination of urinary thiamine by HPLC utilizing the thiochrome fluorescent method 43
- Threonine**  
MS study of the transesterification of O,N<sup>α</sup>-bis(trifluoroacetyl)*n*-butyl esters of some hydroxylated amino acids into their O-carbethoxy, N<sup>α</sup>-trifluoroacetyl *n*-butyl ester derivatives during the N<sup>α</sup>-carbethoxy derivatization of histidine 413
- Tissue proteins**  
Applications of polyacrylamide gel electrophoresis and polyacrylamide gel isoelectric focusing in clinical chemistry 1
- Tolbutamide**  
Simple, rapid and micro HPLC method for the simultaneous determination of tolbutamide and carboxy tolbutamide in plasma 121
- Tranquilizers**  
Quantitation of chlordiazepoxide and its metabolites in biological fluids by TLC 473
- Tranquilizers**  
Quantitative analysis of prazepam and its metabolites by electron capture GC and selected ion monitoring. Application to diaplacental passage and fetal hepatic metabolism in early human pregnancy 227
- Triacylglycerol**  
Comparative determination of plasma cholesterol and triacylglycerol levels by automated GLC and AutoAnalyzer methods 393

- Triglycerides**  
Automated quantitative GLC of intact lipids. I. Preparation and calibration of the column 241
- Trimethoprim**  
Determination of trimethoprim and sulfamethoxazole (Co-Trimoxazole) in body fluids of man by means of HPLC 103
- Trimethoprim**  
GLC analysis of trimethoprim in plasma and urine 143
- Tyrosine**  
MS study of the transesterification of O,N<sup>α</sup>-bis(trifluoroacetyl)*n*-butyl esters of some hydroxylated amino acids into their O-carbethoxy, N<sup>α</sup>-trifluoroacetyl *n*-butyl ester derivatives during the N<sup>α</sup>-carbethoxy derivatization of histidine 413
- Tyrosine metabolites**  
New tyrosine metabolites in humans: hawkinsin and *cis*- and *trans*-4-hydroxycyclohexylacetic acids. Unusual adsorption of deuterated and non-deuterated hawkinsin during GC 207
- Uremia**  
Determination of "middle molecules" presenting vitamin B<sub>12</sub> molecular size in normal and uremic body fluids 55
- Urinary metabolites**  
Rapid and simplified extraction procedure for GC-MS profiling of urinary organic acids 481
- Valproic acid**  
New direct micro-method for determination of valproic acid in serum by GC 494
- Vasodilators**  
Improved method for the rapid determination of isosorbide dinitrate in human plasma and its application in pharmacokinetic studies 457
- Vitamins**  
Determination of urinary thiamine by HPLC utilizing the thiochrome fluorescent method 43
- Vitamins**  
New method for quantitative analysis of pyridoxal-5'-phosphate in biological material 485
- Warfarin**  
Comparison of HPLC and spectrophotometric technique for determining plasma warfarin 522
- Xanthine derivatives**  
Micro-method for the determination of caffeine and theophylline allowing direct application of biological fluids to TLC plates 175
- Zimelidine**  
Quantitation of zimelidine and nor-zimelidine in plasma using HPLC 113
