

## Subject Index

---

- Adenosine 5'-monophosphate**  
 Adsorption of aromatic molecules on hydrophilic gel chromatography media. A thermodynamic study 103
- Adsorption, salt-promoted**  
 Salt-promoted adsorption: recent developments 331
- Affinity adsorbents**  
 Controlled primary functionalization of agarose affinity supports by carboxymethylation and subsequent addition of spacer units 273
- Affinity adsorbents**  
 Divinylsulphone-activated agarose. Formation of stable and non-leaking affinity matrices by immobilization of immunoglobulins and other proteins 299
- Affinity adsorbents**  
 Sulfonyl chloride activation of hydroxylic materials 289
- Affinity electrophoresis**  
 Qualitative and quantitative applications of affinity electrophoresis for the study of protein-ligand interactions: a review 49
- Affinity partition**  
 Efforts to integrate affinity interactions with conventional separation technologies. Affinity partition using biospecific chromatographic particles in aqueous two-phase systems 235
- Affinity partitioning**  
 Affinity partitioning: a new approach for studying dye-protein interactions 141
- Agarose**  
 Controlled primary functionalization of agarose affinity supports by carboxymethylation and subsequent addition of spacer units 273
- Agarose**  
 Divinylsulphone-activated agarose. Formation of stable and non-leaking affinity matrices by immobilization of immunoglobulins and other proteins 299
- Agarose**  
 Sulfonyl chloride activation of hydroxylic materials 289
- Albumin**  
 Affinity partitioning: a new approach for studying dye-protein interactions 141
- Albumin**  
 Competitive adsorption of plasma proteins at solid-liquid interfaces 191
- Alcohol dehydrogenase**  
 Zonal chromatographic analysis of the interaction of alcohol dehydrogenase with Blue-Sepharose 149
- Amylase**  
 Biospecific sorption, Prague, 1910: Emil Starckenstein (1884-1942) 5
- Anhydrochymotrypsin**  
 Affinophoresis of anhydrochymotrypsin with an affinophore based on poly-L-lysine as a matrix 323
- Antibodies**  
 Bioaffinity therapy with antibodies and drugs bound to soluble synthetic polymers 221
- Antibodies**  
 Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269
- Antibodies**  
 Immobilization of enzymatic inhibitors for the realization of reversible immunosensors 199
- Antigen-antibody interaction**  
 Nature of the antigen-antibody interaction. Primary and secondary bonds: optimal conditions for association and dissociation 111
- Antigens**  
 Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269
- Antigens**  
 Immobilization of enzymatic inhibitors for the realization of reversible immunosensors 199
- Anti-Thy 1.2 antibodies**  
 Bioaffinity therapy with antibodies and drugs bound to soluble synthetic polymers 221
- Arginine<sup>+</sup>-vasopressin**  
 Quantitative high-performance affinity chromatography: evaluation of use for analyzing peptide and protein interactions 87
- Aromatic molecules**  
 Adsorption of aromatic molecules on hydrophilic gel chromatography media. A thermodynamic study 103
- Bioaffinity adsorbents**  
 Adsorption of aromatic molecules on hydrophilic gel chromatography media. A thermodynamic study 103
- Bioaffinity adsorbents**  
 Application of 1,1'-carbonyldiimidazole-activated matrices for the purification

- tion of proteins. IX. Dynamic multi-zoning effects in biospecific affinity chromatography on porous supports: evaluation of activation and ligand coupling effects with different support materials 245
- Bioaffinity adsorbents**  
Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269
- Bioaffinity adsorbents**  
New support for the large-scale purification of proteins 259
- Bioaffinity adsorbents**  
Oligo-D-galactosiduronic acid—Separons: selective bioaffinity adsorbents of endopolygalacturonase 413
- Bioaffinity adsorbents**  
Quantitative criterion for evaluation of hydrophobic sorbents 95
- Bioaffinity adsorbents**  
Strategies for enzyme isolation using dye-ligand and related adsorbents 131
- Bioaffinity therapy**  
Bioaffinity therapy with antibodies and drugs bound to soluble synthetic polymers 221
- Bio-mimetic dyes**  
Design and application of bio-mimetic dyes in biotechnology 121
- Bis-dyes**  
Affinity precipitation of proteins using bis-dyes 157
- 1,1'-Carbonyldiimidazole**  
Application of 1,1'-carbonyldiimidazole-activated matrices for the purification of proteins. IX. Dynamic multi-zoning effects in biospecific affinity chromatography on porous supports: evaluation of activation and ligand coupling effects with different support materials 245
- Carboxypeptidase Y**  
Reversible and irreversible immobilization of carboxypeptidase Y using biospecific adsorption 315
- Casein kinases**  
Separation and purification of maize casein kinases by affinity chromatography 421
- Charge-controlled hydrophobic chromatography**  
Charge-controlled hydrophobic chromatography: an effective enzyme purification technique 349
- Chloride**  
Biospecific sorption, Prague, 1910: Emil Starkenstein (1884—1942) 5
- $\alpha$ -Chymotrypsin**  
Subunit exchange chromatography: a tool for the purification of oligomeric and self-associating protein systems 343
- Concanavalin A**  
Equilibrium and rate constants of immobilized concanavalin A determined by high-performance affinity chromatography 69
- $\epsilon$ -Dinitrophenyllysine**  
Adsorption of aromatic molecules on hydrophilic gel chromatography media. A thermodynamic study 103
- Drugs**  
Bioaffinity therapy with antibodies and drugs bound to soluble synthetic polymers 221
- Dyes**  
Affinity partitioning: a new approach for studying dye—protein interactions 141
- Dyes**  
Affinity precipitation of proteins using bis-dyes 157
- Dyes**  
Strategies for enzyme isolation using dye-ligand and related adsorbents 131
- Dyes, bio-mimetic**  
Design and application of bio-mimetic dyes in biotechnology 121
- Elastase**  
Affinity purification of kallikrein and elastase from hog pancreas powder 385
- Endopolygalacturonase**  
Oligo-D-galactosiduronic acid—Separons: selective bioaffinity adsorbents of endopolygalacturonase 413
- Enzymatic inhibitors**  
Immobilization of enzymatic inhibitors for the realization of reversible immunosensors 199
- Enzymes**  
Biospecific sorption, Prague, 1910: Emil Starkenstein (1884—1942) 5
- Equilibrium constants**  
Equilibrium and rate constants of immobilized concanavalin A determined by high-performance affinity chromatography 69
- Esperase**  
Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269
- Fibrinogen**  
Competitive adsorption of plasma proteins at solid—liquid interfaces 191

**Fluorescent probes**

Design of fluorescent probes for an enzyme on the surface of tumour cells 211

**Formate dehydrogenase**

Process design for large-scale purification of formate dehydrogenase from *Candida boidinii* by affinity partition 375

**Frontal affinity chromatography**

Frontal affinity chromatography: theory for its application to studies on specific interactions of biomolecules 33

**Gastricsin**

Separation of human pepsin and gastricsin by affinity chromatography with an immobilized synthetic inhibitor 409

**Glucose-6-phosphate dehydrogenase**

Affinity partitioning: a new approach for studying dye-protein interactions 141

**Glycidyl methacrylate copolymers**

Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269

**Guanidinobenzoate**

Design of fluorescent probes for an enzyme on the surface of tumour cells 211

**Haptens**

Immobilization of enzymatic inhibitors for the realization of reversible immunosensors 199

**Histidine**

New support for the large-scale purification of proteins 259

**Hormones**

Quantitative high-performance affinity chromatography: evaluation of use for analyzing peptide and protein interactions 87

**Hydrolases**

Charge-controlled hydrophobic chromatography: an effective enzyme purification technique 349

**Hydrophobic sorbents**

Quantitative criterion for evaluation of hydrophobic sorbents 95

**Hydroxyethyl methacrylate**

Separation of human lymphoid cells by affinity chromatography and cell surface labelling by hydroxyethyl methacrylate particles using monoclonal antibodies 401

**N-(2-Hydroxypropyl)methacrylamide**

Bioaffinity therapy with antibodies and

drugs bound to soluble synthetic polymers 221

**Immunoglobulin G**

Competitive adsorption of plasma proteins at solid-liquid interfaces 191

**Immunoglobulin G**

New support for the large-scale purification of proteins 259

**Immunoglobulins**

Divinylsulphone-activated agarose. Formation of stable and non-leaking affinity matrices by immobilization of immunoglobulins and other proteins 299

**Immunosensors**

Immobilization of enzymatic inhibitors for the realization of reversible immunosensors 199

**Kallikrein**

Affinity purification of kallikrein and elastase from hog pancreas powder 385

**Lactate dehydrogenase**

Affinity precipitation of proteins using bis-dyes 157

**Lyases**

Charge-controlled hydrophobic chromatography: an effective enzyme purification technique 349

**Lymphoid cells**

Separation of human lymphoid cells by affinity chromatography and cell surface labelling by hydroxyethyl methacrylate particles using monoclonal antibodies 401

**Maxatase**

Glycidyl methacrylate copolymers as suitable supports for immobilizing antigens and antibodies 269

**Molecular recognition**

Analytical affinity chromatography in studies of molecular recognition in biology: a review 11

**Monoclonal antibodies**

Separation of human lymphoid cells by affinity chromatography and cell surface labelling by hydroxyethyl methacrylate particles using monoclonal antibodies 401

**Multizone effects**

Application of 1,1'-carbonyldiimidazole-activated matrices for the purification of proteins. IX. Dynamic multizone effects in biospecific affinity chromatography on porous supports: evaluation of activation and ligand coupling effects with different support materials 245

- Neurohypophysial hormones**  
Analytical affinity chromatography in studies of molecular recognition in biology: a review 11
- Neuropeptides**  
Targeted immobilization of neurotransmitters and neuropeptides on agarose and on Acrylex polymers 307
- Neurophysin**  
Quantitative high-performance affinity chromatography: evaluation of use for analyzing peptide and protein interactions 87
- Neurophysins**  
Analytical affinity chromatography in studies of molecular recognition in biology: a review 11
- Neurotransmitters**  
Targeted immobilization of neurotransmitters and neuropeptides on agarose and on Acrylex polymers 307
- Oligo-D-galactosiduronic acid—Separons**  
Oligo-D-galactosiduronic acid—Separons: selective bioaffinity adsorbents of endopolygalacturonase 413
- Oxidoreductases**  
Charge-controlled hydrophobic chromatography: an effective enzyme purification technique 349
- Particle-labelled immunoassays**  
Particle-labelled immunoassays: a review 175
- Pepsin**  
Separation of human pepsin and gastricsin by affinity chromatography with an immobilized synthetic inhibitor 409
- Phosphofructokinase**  
Affinity partitioning: a new approach for studying dye—protein interactions 141
- Poly-L-lysine**  
Affinophoresis of anhydrochymotrypsin with an affinophore based on poly-L-lysine as a matrix 323
- Prealbumin**  
Affinity partitioning: a new approach for studying dye—protein interactions 141
- Protease inhibitor**  
Detection of antigen immunologically related to basic pancreatic inhibitor (Kunitz) in porcine blood plasma by immunoaffinity chromatography 395
- Protein—ligand interactions**  
Qualitative and quantitative applications of affinity electrophoresis for the study of protein—ligand interactions: a review 49
- Pyruvate dehydrogenase**  
Crossed affinity immunoelectrophoresis of the *Escherichia coli* pyruvate dehydrogenase complex 163
- Rate constants**  
Analytical affinity chromatography in studies of molecular recognition in biology: a review 11
- Rate constants**  
Equilibrium and rate constants of immobilized concanavalin A determined by high-performance affinity chromatography 69
- Sorption, biospecific**  
Biospecific sorption, Prague, 1910: Emil Starckenstein (1884—1942) 5
- Starckenstein, Emil**  
Biospecific sorption, Prague, 1910: Emil Starckenstein (1884—1942) 5
- Subunit exchange chromatography**  
Subunit exchange chromatography: a tool for the purification of oligomeric and self-associating protein systems 343
- Sulphonyl chloride**  
Sulfonyl chloride activation of hydroxylic materials 289
- Thrombin**  
Affinity chromatography of thrombin on modified polystyrene resins 429
- Transferases**  
Charge-controlled hydrophobic chromatography: an effective enzyme purification technique 349
- Trypsin—kallikrein inhibitor**  
Detection of antigen immunologically related to basic pancreatic inhibitor (Kunitz) in porcine blood plasma by immunoaffinity chromatography 395
- Tryptophan**  
Adsorption of aromatic molecules on hydrophilic gel chromatography media. A thermodynamic study 103
- Vasopressin**  
Quantitative high-performance affinity chromatography: evaluation of use for analyzing peptide and protein interactions 87
