3rd International Symposium on Separations in the Biosciences 100 Years of Chromatography

Moscow, Russia, 13–18 May 2003

In 2003, the 3rd Symposium on Separations in the BioSciences (SBS) will be organised by the Russian Academy of Sciences in Moscow. The symposium will commemorate the 100th anniversary of chromatography as one of the most important discoveries in the history of science. The conference is aimed at specialists in separation methods, namely, chromatography and electromigration techniques, as well as at biochemists and bioorganic chemists, molecular biologists, clinical and pharmaceutical chemists. The symposium will focus on both the methodology achievements and on the applications of bioseparation methods in different fields of biomedical and chemical research and practice.

The scientific program will cover all aspects of modern liquid and gas chromatography, as well as electromigration techniques. The program will include a number of invited lectures giving an overview of major achievements and modern trends of the principal branches of chromatography in a historical perspective, keynote lectures on the state-of-the-art of basic chromatographic techniques, oral presentations on novel chromatographic separation phenomena, and poster presentations of recent experimental findings. Special emphasis will be placed on achievements and applications of chromatography in the natural sciences.

Plenary and invited speakers who will participate:

Gottfried Blaschke, Udo Brinkman, Heinz Engelhardt, Georges Guiochon, Josef Janca, G.J. (Ad) de Jong, Wolfgang Lindner, Henk Lingeman, Imre Molnar, Pat Sandra, Peter Schoenmakers, Nobua Tanaka, Shigeru Terabe, Irving Wainer and Ed Yeung.

For further details contact:

Symposium Chairman:
Professor V. Davankov;
