

Publisher's note

We are pleased to announce that the Journal of Chromatography B has implemented a system for electronic handling of research papers during the submission and peer review process.

This Elsevier Editorial System (EES) is a web-based system with full online submission, review and status update capabilities. EES allows you to upload files directly from your computer. The new system will help us handling the manuscripts submitted to the journal more efficiently by streamlining the editorial process. It will also facilitate communication among editors, reviewers, and authors.

As of now all authors are invited to submit their new manuscripts electronically. Reviews for these new submissions will also be dealt with electronically. We strongly encourage all authors and reviewers to use EES when submitting new materials to the Journal of Chromatography B. To avoid any misunderstanding: current submissions to the journal, already under review will still be processed by the old system.

EES can be reached via the Online Submission link on the journal's Author Gateway page, <http://authors.elsevier.com/journal/jchromb>, or directly at <http://ees.elsevier.com/chromb>. The submission website contains all further details of EES including its Guide for Authors for manuscript submission.

As a service to our authors and reviewers, we have pre-registered on the EES site, all recent authors and reviewers for whom we hold an e-mail address. In this case, you have received an email informing you about your username and password which you will need to access the Elsevier Editorial System. We would appreciate if you check your personal data in our database (menu option 'change details' after logging)

We welcome your feedback on EES and value your continuing contributions to the Journal of Chromatography B as an author and as a reviewer.
