

## Keyword Index Vol. 823

### **O-Acetylated (+)-2-butyl ester**

Differential chemical diagnosis of primary hyperoxaluria type II. Highly sensitive analysis of optical isomers of glyceric acid by GC/MS as diastereoisomeric derivatives 823(2005)2

### **Affinity chromatography**

Further application of a two-step heparin affinity chromatography method using divalent cations as eluents: Purification and identification of membrane-bound heparin binding proteins from the mitochondrial fraction of HL-60 cells 823(2005)209

### **Alpha-methyltryptamine**

Sensitive determination of alpha-methyltryptamine (AMT) and 5-methoxy-*N,N*-diisopropyltryptamine (5MeO-DIPT) in whole blood and urine using gas chromatography–mass spectrometry 823(2005)47

### **5-Aminolevulinic acid**

Stability of 5-aminolevulinic acid on dried urine filter paper for a diagnostic marker of tyrosinemia type I 823(2005)44

### **Bioequivalence Study**

High-performance liquid chromatographic determination of lamivudine in human serum using liquid–liquid extraction; application to pharmacokinetic studies 823(2005)213

### **Biomarker**

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

### **Bupropion**

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

### **Carnitine**

Stable-isotope dilution gas chromatography–mass spectrometric measurement of 3-hydroxyglutaric acid, glutaric acid and related metabolites in body fluids of patients with glutaric aciduria type 1 found in newborn screening 823(2005)7

### **Chiral inversion**

Determination of D- and L-enantiomers of methionine and [<sup>2</sup>H<sub>3</sub>]methionine in plasma by gas chromatography–mass spectrometry 823(2005)203

### **Chromatography**

Downstream processing of MDCK cell-derived equine influenza virus 823(2005)75

### **Clobazam**

Simultaneous determination of clobazam and its major metabolite in human plasma by a rapid HPLC method 823(2005)167

### **Colon cancer**

Two-dimensional electrophoresis database of fluorescence-labeled proteins of colon cancer cells 823(2005)82

### **CYP2B6 phenotype**

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

### **CYP2D6**

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

### **2D database**

Two-dimensional electrophoresis database of fluorescence-labeled proteins of colon cancer cells 823(2005)82

### **2D-DIGE**

Two-dimensional electrophoresis database of fluorescence-labeled proteins of colon cancer cells 823(2005)82

### **Dermal exposure**

Skin analysis to determine causative agent in dermal exposure to petroleum products 823(2005)53

### **N-Desmethyloclobazam**

Simultaneous determination of clobazam and its major metabolite in human plasma by a rapid HPLC method 823(2005)167

### **N-desmethylmianserin**

Analytical method development and validation of mianserin hydrochloride and its metabolite in human plasma by LC–MS 823(2005)69

### **Diet**

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

### **Dihydrouracil**

An accurate dihydrouracil/uracil determination using improved high performance liquid chromatography method for preventing fluoropyrimidines-related toxicity in clinical practice 823(2005)98

**Divalent cations**

Further application of a two-step heparin affinity chromatography method using divalent cations as eluents: Purification and identification of membrane-bound heparin binding proteins from the mitochondrial fraction of HL-60 cells 823(2005)209

**Downstream processing**

Downstream processing of MDCK cell-derived equine influenza virus 823(2005)75

**Dried urine filter paper**

Stability of 5-aminolevulinic acid on dried urine filter paper for a diagnostic marker of tyrosinemia type I 823(2005)44

**Enantiomers**

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

**Entacapone**

High-performance liquid chromatography method for the quantification of entacapone in human plasma 823(2005)189

**Enzymatic assay**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

**Erythrohydrobupropion**

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

**ESI/MS/MS**

Prenatal diagnosis for organic acid disorders using two mass spectrometric methods, gas chromatography mass spectrometry and tandem mass spectrometry 823(2005)13

**Ferrioxamine**

Validated HPLC assay for iron determination in biological matrices based on ferrioxamine formation 823(2005)177

**Flavonoids**

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

**Fluoropyrimidines**

An accurate dihydrouracil/uracil determination using improved high performance liquid chromatography method for preventing fluoropyrimidines-related toxicity in clinical practice 823(2005)98

**GC/MS analysis**

Stability of 5-aminolevulinic acid on dried urine filter paper for a diagnostic marker of tyrosinemia type I 823(2005)44

**GC/MS**

Prenatal diagnosis for organic acid disorders using two mass spectrometric methods, gas chromatography mass spectrometry and tandem mass spectrometry 823(2005)13

A systematic method for the sensitive and specific determination of hair lipids in combination with chromatography 823(2005)131

**GC-MS**

Skin analysis to determine causative agent in dermal exposure to petroleum products 823(2005)53

Determination of D- and L-enantiomers of methionine and [<sup>2</sup>H<sub>3</sub>]methionine in plasma by gas chromatography-mass spectrometry 823(2005)203

**Germacrone**

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172

**Glucuronides**

The covalent immobilization of microsomal uridine diphospho-glucuronosyltransferase (UDPGT): Initial synthesis and characterization of an UDPGT immobilized enzyme reactor for the on-line study of glucuronidation 823(2005)158

**Glutaric acid**

Stable-isotope dilution gas chromatography-mass spectrometric measurement of 3-hydroxyglutaric acid, glutaric acid and related metabolites in body fluids of patients with glutaric aciduria type I found in newborn screening 823(2005)7

**Hair**

A systematic method for the sensitive and specific determination of hair lipids in combination with chromatography 823(2005)131

**Heparin binding proteins**

Further application of a two-step heparin affinity chromatography method using divalent cations as eluents: Purification and identification of membrane-bound heparin binding proteins from the mitochondrial fraction of HL-60 cells 823(2005)209

**High-performance liquid chromatography**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

**High-performance thin-layer chromatography**

High-performance thin-layer chromatographic determination of lamotrigine in serum 823(2005)152

**HPLC**

An accurate dihydrouracil/uracil determination using improved high performance liquid chromatography method for preventing fluoropyrimidines-related toxicity in clinical practice 823(2005)98

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172

High-performance liquid chromatography method for the quantification of entacapone in human plasma 823(2005)189

High-performance liquid chromatographic determination of lamivudine in human serum using liquid-liquid extraction; application to pharmacokinetic studies 823(2005)213

**Human plasma**

Analytical method development and validation of mianserin hydrochloride and its metabolite in human plasma by LC-MS 823(2005)69

Determination of puerarin in human plasma by high performance liquid chromatography 823(2005)108

High-performance liquid chromatography method for the quantification of entacapone in human plasma 823(2005)189

#### **Human serum**

The determination of 2 $\beta$ -(3-hydroxypropoxy)-1 $\alpha$ ,25-dihydroxy vitamin D<sub>3</sub> (ED-71) in human serum by high-performance liquid chromatography–electrospray tandem mass spectrometry 823(2005)61

#### **2 $\beta$ -(3-Hydroxypropoxy)-1 $\alpha$ ,25-dihydroxy vitamin D<sub>3</sub> (ED-71)**

The determination of 2 $\beta$ -(3-hydroxypropoxy)-1 $\alpha$ ,25-dihydroxy vitamin D<sub>3</sub> (ED-71) in human serum by high-performance liquid chromatography–electrospray tandem mass spectrometry 823(2005)61

#### **Hydrocarbons**

Skin analysis to determine causative agent in dermal exposure to petroleum products 823(2005)53

#### **Hydroxybupropion**

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

#### **3-Hydroxyglutaric acid**

Stable-isotope dilution gas chromatography–mass spectrometric measurement of 3-hydroxyglutaric acid, glutaric acid and related metabolites in body fluids of patients with glutaric aciduria type 1 found in newborn screening 823(2005)7

#### **Immobilized enzyme reactors**

The covalent immobilization of microsomal uridine diphospho-glucuronosyltransferase (UDPGT): Initial synthesis and characterization of an UDPGT immobilized enzyme reactor for the on-line study of glucuronidation 823(2005)158

#### **Influenza**

Downstream processing of MDCK cell-derived equine influenza virus 823(2005)75

#### **Iron bio-kinetics**

Validated HPLC assay for iron determination in biological matrices based on ferrioxamine formation 823(2005)177

#### **Iron**

Validated HPLC assay for iron determination in biological matrices based on ferrioxamine formation 823(2005)177

#### **Japanese**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

#### **Kudzu**

Determination of puerarin in human plasma by high performance liquid chromatography 823(2005)108

#### **Lamivudine**

High-performance liquid chromatographic determination of lamivudine in human serum using liquid–liquid extraction; application to pharmacokinetic studies 823(2005)213

#### **Lamotrigine**

High-performance thin-layer chromatographic determination of lamotrigine in serum 823(2005)152

#### **LC/ESI–MS/MS**

The determination of 2 $\beta$ -(3-hydroxypropoxy)-1 $\alpha$ ,25-dihydroxy vitamin D<sub>3</sub> (ED-71) in human serum by high-performance liquid chromatography–electrospray tandem mass spectrometry 823(2005)61

#### **LC/MS**

A systematic method for the sensitive and specific determination of hair lipids in combination with chromatography 823(2005)131

#### **LC–MS/MS**

Quantification of sugar phosphate intermediates of the pentose phosphate pathway by LC–MS/MS: application to two new inherited defects of metabolism 823(2005)18

#### **Lipidomics**

Focused lipidomics by tandem mass spectrometry 823(2005)26

#### **Lipids**

A systematic method for the sensitive and specific determination of hair lipids in combination with chromatography 823(2005)131

#### **MDCK cell and vaccine**

Downstream processing of MDCK cell-derived equine influenza virus 823(2005)75

#### **Medium-chain acyl-CoA dehydrogenase**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

#### **Membrane proteins**

Further application of a two-step heparin affinity chromatography method using divalent cations as eluents: Purification and identification of membrane-bound heparin binding proteins from the mitochondrial fraction of HL-60 cells 823(2005)209

#### **Metabolism**

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

#### **Metabolomics**

Focused lipidomics by tandem mass spectrometry 823(2005)26

#### **D-Methionine**

Determination of D- and L-enantiomers of methionine and [<sup>2</sup>H<sub>3</sub>]methionine in plasma by gas chromatography–mass spectrometry 823(2005)203

#### **5-Methoxy-N,N-diisopropyltryptamine**

Sensitive determination of alpha-methyltryptamine (AMT) and 5-methoxy-N,N-diisopropyltryptamine (5MeO-DIPT) in whole blood and urine using gas chromatography–mass spectrometry 823(2005)47

#### **Metoprolol**

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

#### **Mianserin**

Analytical method development and validation of mianserin hydrochloride and its metabolite in human plasma by LC–MS 823(2005)69

#### **Monolithic**

Simultaneous determination of clobazam and its major metabolite in human plasma by a rapid HPLC method 823(2005)167

**Newborn screening**

Stable-isotope dilution gas chromatography–mass spectrometric measurement of 3-hydroxyglutaric acid, glutaric acid and related metabolites in body fluids of patients with glutaric aciduria type 1 found in newborn screening 823(2005)7

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

**2-Octenoyl-CoA**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

**Organic acid disorders**

Prenatal diagnosis for organic acid disorders using two mass spectrometric methods, gas chromatography mass spectrometry and tandem mass spectrometry 823(2005)13

**Pentose phosphate pathway**

Quantification of sugar phosphate intermediates of the pentose phosphate pathway by LC–MS/MS: application to two new inherited defects of metabolism 823(2005)18

**Petroleum**

Skin analysis to determine causative agent in dermal exposure to petroleum products 823(2005)53

**Pharmacokinetic study**

High-performance liquid chromatography method for the quantification of entacapone in human plasma 823(2005)189

**Pharmacokinetics**

Simultaneous determination of clobazam and its major metabolite in human plasma by a rapid HPLC method 823(2005)167

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

**Phenolic acids**

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

**Phosphatidylcholine oxidation products**

Detection of phosphatidylcholine oxidation products in rat heart using quadrupole time-of-flight mass spectrometry 823(2005)37

**Phospholipids**

Focused lipidomics by tandem mass spectrometry 823(2005)26

**Plasma**

Simultaneous determination of clobazam and its major metabolite in human plasma by a rapid HPLC method 823(2005)167

**Polyphenols**

Validated application of a new high-performance liquid chromatographic method for the determination of selected flavonoids and phenolic acids in human plasma using electrochemical detection 823(2005)143

**preED-71**

The determination of 2 $\beta$ -(3-hydroxypropoxy)-1 $\alpha$ ,25-dihydroxy vitamin D<sub>3</sub> (ED-71) in human serum by high-performance liquid chromatography–electrospray tandem mass spectrometry 823(2005)61

**Prenatal diagnosis**

Prenatal diagnosis for organic acid disorders using two mass spectrometric methods, gas chromatography mass spectrometry and tandem mass spectrometry 823(2005)13

**Primary hyperoxaluria type II**

Differential chemical diagnosis of primary hyperoxaluria type II. Highly sensitive analysis of optical isomers of glyceric acid by GC/MS as diastereoisomeric derivatives 823(2005)2

**Protein precipitation**

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172

**Proteome**

Two-dimensional electrophoresis database of fluorescence-labeled proteins of colon cancer cells 823(2005)82

**Puerarin**

Determination of puerarin in human plasma by high performance liquid chromatography 823(2005)108

**Pyridoxal phosphate**

Use of chlorite to improve HPLC detection of pyridoxal 5'-phosphate 823(2005)218

**Q-TOF**

Detection of phosphatidylcholine oxidation products in rat heart using quadrupole time-of-flight mass spectrometry 823(2005)37

**Rat liver microsomes**

The covalent immobilization of microsomal uridine diphospho-glucuronosyltransferase (UDPGT): Initial synthesis and characterization of an UDPGT immobilized enzyme reactor for the on-line study of glucuronidation 823(2005)158

**Rats**

Detection of phosphatidylcholine oxidation products in rat heart using quadrupole time-of-flight mass spectrometry 823(2005)37

Stereoselective analysis of metoprolol and its metabolites in rat plasma with application to oxidative metabolism 823(2005)195

**Reverse phase chromatography**

High-performance liquid chromatographic determination of lamivudine in human serum using liquid–liquid extraction; application to pharmacokinetic studies 823(2005)213

**Reversed-phase HPLC**

Determination of puerarin in human plasma by high performance liquid chromatography 823(2005)108

**RP–HPLC**

Validated HPLC assay for iron determination in biological matrices based on ferrioxamine formation 823(2005)177

**Separation of enantiomers**

Differential chemical diagnosis of primary hyperoxaluria type II. Highly sensitive analysis of optical isomers of glyceric acid by GC/MS as diastereoisomeric derivatives 823(2005)2

**Serum**

High-performance thin-layer chromatographic determination of lamotrigine in serum 823(2005)152

High-performance liquid chromatographic determination of lamivudine in human serum using liquid-liquid extraction; application to pharmacokinetic studies 823(2005)213

**Single ionization mode (SIM)**

Analytical method development and validation of mianserin hydrochloride and its metabolite in human plasma by LC-MS 823(2005)69

**Skin**

Skin analysis to determine causative agent in dermal exposure to petroleum products 823(2005)53

**Solvent extraction**

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172

**Stability of metabolites**

Prenatal diagnosis for organic acid disorders using two mass spectrometric methods, gas chromatography mass spectrometry and tandem mass spectrometry 823(2005)13

**Stable isotope**

Determination of D- and L-enantiomers of methionine and [<sup>2</sup>H<sub>3</sub>]methionine in plasma by gas chromatography-mass spectrometry 823(2005)203

**Sugar phosphate**

Quantification of sugar phosphate intermediates of the pentose phosphate pathway by LC-MS/MS: application to two new inherited defects of metabolism 823(2005)18

**Tandem mass spectrometry**

Enzymatic diagnosis of medium-chain acyl-CoA dehydrogenase deficiency by detecting 2-octenoyl-CoA production using high-performance liquid chromatography: A practical confirmatory test for tandem mass spectrometry newborn screening in Japan 823(2005)122

**Tandem mass**

Focused lipidomics by tandem mass spectrometry 823(2005)26

**Threohydrobupropion**

HPLC assay for bupropion and its major metabolites in human plasma 823(2005)115

**TLC/FID**

A systematic method for the sensitive and specific determination of hair lipids in combination with chromatography 823(2005)131

**Two-dimensional gel electrophoresis**

Two-dimensional electrophoresis database of fluorescence-labeled proteins of colon cancer cells 823(2005)82

**Tyrosinemia type I**

Stability of 5-aminolevulinic acid on dried urine filter paper for a diagnostic marker of tyrosinemia type I 823(2005)44

**Uracil**

An accurate dihydrouracil/uracil determination using improved high performance liquid chromatography method for preventing fluoropyrimidines-related toxicity in clinical practice 823(2005)98

**Urinary glyceric acid**

Differential chemical diagnosis of primary hyperoxaluria type II. Highly sensitive analysis of optical isomers of glyceric acid by GC/MS as diastereoisomeric derivatives 823(2005)2

**Virus**

Downstream processing of MDCK cell-derived equine influenza virus 823(2005)75

**Vitamin B-6**

Use of chlorite to improve HPLC detection of pyridoxal 5'-phosphate 823(2005)218

**Zedoary turmeric oil**

A HPLC method for the analysis of germacrone in rabbit plasma and its application to a pharmacokinetic study of germacrone after administration of zedoary turmeric oil 823(2005)172
