

## Keyword Index Vol. 833

### Acidosis

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

### Affinity chromatography

Identification and characterization of digestive serine proteases from inhibitor-resistant *Helicoverpa zea* larval midgut 833(2006)26

### Agarose microspheres

Preparation and characterization of magnetic microspheres for the purification of interferon  $\alpha$ -2b 833(2006)236

### AKF-PD

Determination of AKF-PD in whole blood of rat by HPLC-UV 833(2006)257

### Altrenogest

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

### Alzheimer's disease

Redox proteomics identification of oxidatively modified proteins in Alzheimer's disease brain and in vivo and in vitro models of AD centered around A $\beta$ (1–42) 833(2006)3

### Aminoquinoline

Sensitive fluorescence HPLC assay for AQ-13, a candidate aminoquinoline antimalarial, that also detects chloroquine and *N*-dealkylated metabolites 833(2006)122

### Anion gap

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

### Anti-HIV drug determination

Determination of anti-HIV drug concentration in human plasma by MALDI-TOF/TOF 833(2006)109

### APE1/Ref-1

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

### *Aphanizomenon flos-aquae*

Purification and characterization of phycocyanin from the blue-green alga *Aphanizomenon flos-aquae* 833(2006)12

### AQ-13

Sensitive fluorescence HPLC assay for AQ-13, a candidate aminoquinoline antimalarial, that also detects chloroquine and *N*-dealkylated metabolites 833(2006)122

### Aqueous two-phase system

Aqueous two-phase systems extraction of  $\alpha$ -toxin from *Clostridium perfringens* type A 833(2006)135

### *Arabidopsis thaliana*

A 2-D liquid-phase chromatography for proteomic analysis in plant tissues 833(2006)91

### Automation

High throughput metabolic stability screen for lead optimization in drug discovery 833(2006)165

### Bacterial reduction

Identification of bilirubin reduction products formed by *Clostridium perfringens* isolated from human neonatal fecal flora 833(2006)149

### Berberine

Interaction study between double-stranded DNA and berberine using capillary zone electrophoresis 833(2006)158

### Bile pigments

Identification of bilirubin reduction products formed by *Clostridium perfringens* isolated from human neonatal fecal flora 833(2006)149

### Bilirubin

Identification of bilirubin reduction products formed by *Clostridium perfringens* isolated from human neonatal fecal flora 833(2006)149

### Bioinformatics

Decoding 2D-PAGE complex maps: Relevance to proteomics 833(2006)51

### Biological fluids

Determination of excitatory amino acids in biological fluids by capillary electrophoresis with optical fiber light-emitting diode induced fluorescence detection 833(2006)129

### Biopsy

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography–mass spectrometry 833(2006)210

### Biuret reaction

Observation of the complex formation between Cu(II) and protein by capillary electrophoretic system incorporating an UV/CL dual detector 833(2006)174

### Brain white matter

Proteomic studies on the white matter of human brain 833(2006)80

### Capillary electrophoresis

Determination of excitatory amino acids in biological fluids by capillary electrophoresis with optical fiber light-emitting diode induced fluorescence detection 833(2006)129

Observation of the complex formation between Cu(II) and protein by capillary electrophoretic system incorporating an UV/CL dual detector 833(2006)174

Capillary electrophoresis enantioselective separation of vigabatrin enantiomers by precolumn derivatization with dehydroabietylisothiocyanate and UV-vis detection 833(2006)186

#### Capillary zone electrophoresis

Interaction study between double-stranded DNA and berberine using capillary zone electrophoresis 833(2006)158

#### Cellulose microspheres

Preparation and characterization of magnetic microspheres for the purification of interferon  $\alpha$ -2b 833(2006)236

#### Cerebrospinal fluid

Quantification of Gluten Exorphin A5 in cerebrospinal fluid by liquid chromatography-mass spectrometry 833(2006)204

#### Chemiluminescence

Observation of the complex formation between Cu(II) and protein by capillary electrophoretic system incorporating an UV/CL dual detector 833(2006)174

#### Chemometric methods

Decoding 2D-PAGE complex maps: Relevance to proteomics 833(2006)51

#### Chinese medicine plant

Determination of four water-soluble compounds in *Salvia miltiorrhiza Bunge* by high-performance liquid chromatography with a coulometric electrode array system 833(2006)260

#### Chloroquine

Sensitive fluorescence HPLC assay for AQ-13, a candidate aminoquinoline anti-malarial, that also detects chloroquine and *N*-dealkylated metabolites 833(2006)122

#### Cocaine

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography-mass spectrometry 833(2006)210

#### Codeine

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography-mass spectrometry 833(2006)210

#### Comparative proteomics

A 2-D liquid-phase chromatography for proteomic analysis in plant tissues 833(2006)91

#### Conjugate

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry-increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

#### Cu(II)-human serum protein complex

Observation of the complex formation between Cu(II) and protein by capillary electrophoretic system incorporating an UV/CL dual detector 833(2006)174

#### Cyanobacteria

Purification and characterization of phycocyanin from the blue-green alga *Aphanizomenon flos-aquae* 833(2006)12

#### Dehydroabietylisothiocyanate

Capillary electrophoresis enantioselective separation of vigabatrin enantiomers by precolumn derivatization with dehydroabietylisothiocyanate and UV-vis detection 833(2006)186

#### Derivatisation

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry-increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

#### Differential proteomics

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

#### Differentiation

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

#### DNA

Interaction study between double-stranded DNA and berberine using capillary zone electrophoresis 833(2006)158

#### DNA annealing

Interaction study between double-stranded DNA and berberine using capillary zone electrophoresis 833(2006)158

#### Doping control

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry-increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

#### Drug discovery

Liquid chromatography-mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

#### Dual detector

Observation of the complex formation between Cu(II) and protein by capillary electrophoretic system incorporating an UV/CL dual detector 833(2006)174

#### Dynamic range

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

#### Electrochemical detector

Determination of four water-soluble compounds in *Salvia miltiorrhiza Bunge* by high-performance liquid chromatography with a coulometric electrode array system 833(2006)260

#### Electrophoresis

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

#### 2D electrophoresis

Proteomic studies on the white matter of human brain 833(2006)80

#### Electrospray mass spectrometry

Liquid chromatography-mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

#### Enantiomer separation

Capillary electrophoresis enantioselective separation of vigabatrin enantiomers by precolumn derivatization with dehydroabietylisothiocyanate and UV-vis detection 833(2006)186

#### Excitatory amino acids

Determination of excitatory amino acids in biological fluids by capillary electrophoresis with optical fiber light-emitting diode induced fluorescence detection 833(2006)129

#### Fluorescence HPLC

Sensitive fluorescence HPLC assay for AQ-13, a candidate aminoquinoline anti-malarial, that also detects chloroquine and *N*-dealkylated metabolites 833(2006)122

#### Fractional design

Aqueous two-phase systems extraction of  $\alpha$ -toxin from *Clostridium perfringens* type A 833(2006)135

**Fractionation**

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

**Fractionation techniques**

Quasi-isoelectric buffers for protein analysis in a fast alternative to conventional capillary zone electrophoresis 833(2006)19

**Glucuronide**

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

**Gluten Exorphin A5**

Quantification of Gluten Exorphin A5 in cerebrospinal fluid by liquid chromatography–mass spectrometry 833(2006)204

**Glycerophosphocholines**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Goat**

Assessment of population structure by single nucleotide polymorphisms (SNPs) in goat breeds 833(2006)117

**Gradient HPLC**

A simple and rapid HPLC method for quantitation of interferon- $\alpha$ 2b in dosage forms and delivery systems 833(2006)199

**Gut**

Identification and characterization of digestive serine proteases from inhibitor-resistant *Helicoverpa zea* larval midgut 833(2006)26

***Helicoverpa zea***

Identification and characterization of digestive serine proteases from inhibitor-resistant *Helicoverpa zea* larval midgut 833(2006)26

**High throughput**

High throughput metabolic stability screen for lead optimization in drug discovery 833(2006)165

**Horse urine**

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

**HPLC**

A simple and rapid HPLC method for quantitation of interferon- $\alpha$ 2b in dosage forms and delivery systems 833(2006)199

Determination of AKF-PD in whole blood of rat by HPLC-UV 833(2006)257

Determination of four water-soluble compounds in *Salvia miltiorrhiza Bunge* by high-performance liquid chromatography with a coulometric electrode array system 833(2006)260

**Human brain**

Proteomic studies on the white matter of human brain 833(2006)80

**Human plasma**

Determination of anti-HIV drug concentration in human plasma by MALDI-TOF/TOF 833(2006)109

**Immunomagnetic separation**

Preparation and characterization of magnetic microspheres for the purification of interferon  $\alpha$ -2b 833(2006)236

**Immunoproteomic**

Comparative proteomics and immunoproteomics of *Helicobacter pylori* related to different gastric pathologies 833(2006)63

**Interaction**

Interaction study between double-stranded DNA and berberine using capillary zone electrophoresis 833(2006)158

**Interferon  $\alpha$ -2b**

Preparation and characterization of magnetic microspheres for the purification of interferon  $\alpha$ -2b 833(2006)236

**Interferon- $\alpha$ 2b**

A simple and rapid HPLC method for quantitation of interferon- $\alpha$ 2b in dosage forms and delivery systems 833(2006)199

**Intermediary metabolism**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**Intestinal microflora**

Identification of bilirubin reduction products formed by *Clostridium perfringens* isolated from human neonatal fecal flora 833(2006)149

**Ion-pairing chromatography**

Determination of rutin deca(H-) sulfate sodium in rat plasma using ion-pairing liquid chromatography after ion-pairing solid-phase extraction 833(2006)231

**Ion-pairing solid-phase extraction**

Determination of rutin deca(H-) sulfate sodium in rat plasma using ion-pairing liquid chromatography after ion-pairing solid-phase extraction 833(2006)231

**Isoelectric buffer**

Quasi-isoelectric buffers for protein analysis in a fast alternative to conventional capillary zone electrophoresis 833(2006)19

**Krebs cycle**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**LC–MS/MS**

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Lecithin**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Ligand library**

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

**Light-emitting diode**

Determination of excitatory amino acids in biological fluids by capillary electrophoresis with optical fiber light-emitting diode induced fluorescence detection 833(2006)129

**Liquid chromatography**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**Liquid chromatography–mass spectrometry**

Quantification of Gluten Exorphin A5 in cerebrospinal fluid by liquid chromatography–mass spectrometry 833(2006)204

**Liquid chromatography–tandem mass spectrometry**

Simultaneous quantitation of 7-methyl- and O<sup>6</sup>-methylguanine adducts in DNA by liquid chromatography–positive electrospray tandem mass spectrometry 833(2006)141

**Malaria**

Sensitive fluorescence HPLC assay for AQ-13, a candidate aminoquinoline antimalarial, that also detects chloroquine and *N*-dealkylated metabolites 833(2006)122

**MALDI-ToF fingerprinting**

Proteomic study of muscle sarcoplasmic proteins using AUT-PAGE/SDS-PAGE as two-dimensional gel electrophoresis 833(2006)101

**MALDI-TOF/TOF**

Determination of anti-HIV drug concentration in human plasma by MALDI-TOF/TOF 833(2006)109

**Mass spectrometry**

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

Proteomic studies on the white matter of human brain 833(2006)80

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**Matrix effects**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Matrix suppression**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Metabolic stability**

High throughput metabolic stability screen for lead optimization in drug discovery 833(2006)165

**Metabolism**

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

**Methamphetamine**

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography–mass spectrometry 833(2006)210

**7-Methyl- and O<sup>6</sup>-methylguanine adducts**

Simultaneous quantitation of 7-methyl- and O<sup>6</sup>-methylguanine adducts in DNA by liquid chromatography–positive electrospray tandem mass spectrometry 833(2006)141

**Neomycin sulphate**

Analysis of neomycin using an improved liquid chromatographic method combined with pulsed electrochemical detection 833(2006)191

**Nucleus**

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

**Optical fiber**

Determination of excitatory amino acids in biological fluids by capillary electrophoresis with optical fiber light-emitting diode induced fluorescence detection 833(2006)129

**Oxidative stress**

Redox proteomics identification of oxidatively modified proteins in Alzheimer's disease brain and in vivo and in vitro models of AD centered around A $\beta$ (1–42) 833(2006)3

**Patients**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**PEG/phosphate**

Aqueous two-phase systems extraction of  $\alpha$ -toxin from *Clostridium perfringens* type A 833(2006)135

**Pharmaceutical analysis**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Pharmacokinetics**

Determination of AKF-PD in whole blood of rat by HPLC-UV 833(2006)257

**Phospholipids**

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Phycocyanin**

Purification and characterization of phycocyanin from the blue-green alga *Aphanizomenon flos-aquae* 833(2006)12

**Phycocyanobilin**

Purification and characterization of phycocyanin from the blue-green alga *Aphanizomenon flos-aquae* 833(2006)12

**Plasma**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

Determination of rutin deca(H-) sulfate sodium in rat plasma using ion-pairing liquid chromatography after ion-pairing solid-phase extraction 833(2006)231

Liquid chromatography–mass spectrometry/mass spectrometry method development for drug metabolism studies: Examining lipid matrix ionization effects in plasma 833(2006)219

**Population structure**

Assessment of population structure by single nucleotide polymorphisms (SNPs) in goat breeds 833(2006)117

**Protease inhibitor**

Identification and characterization of digestive serine proteases from inhibitor-resistant *Helicoverpa zea* larval midgut 833(2006)26

**protein assay**

A simple and rapid HPLC method for quantitation of interferon- $\alpha$ 2b in dosage forms and delivery systems 833(2006)199

**Protein crude extracts**

A 2-D liquid-phase chromatography for proteomic analysis in plant tissues 833(2006)91

**Protein oxidation**

Redox proteomics identification of oxidatively modified proteins in Alzheimer's disease brain and in vivo and in vitro models of AD centered around A $\beta$ (1–42) 833(2006)3

**Proteomics**

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

Proteomic studies on the white matter of human brain 833(2006)80

**Pulsed electrochemical detection**

Analysis of neomycin using an improved liquid chromatographic method combined with pulsed electrochemical detection 833(2006)191

**Purification**

Purification and characterization of phycocyanin from the blue-green alga *Aphanizomenon flos-aquae* 833(2006)12

Aqueous two-phase systems extraction of  $\alpha$ -toxin from *Clostridium perfringens* type A 833(2006)135

**Purity testing**

Analysis of neomycin using an improved liquid chromatographic method combined with pulsed electrochemical detection 833(2006)191

**PVA microspheres**

Preparation and characterization of magnetic microspheres for the purification of interferon  $\alpha$ -2b 833(2006)236

**Quantitation**

Simultaneous quantitation of 7-methyl- and O<sup>6</sup>-methylguanine adducts in DNA by liquid chromatography–positive electrospray tandem mass spectrometry 833(2006)141

**Redox proteomics**

Redox proteomics identification of oxidatively modified proteins in Alzheimer's disease brain and in vivo and in vitro models of AD centered around A $\beta$ (1–42) 833(2006)3

**Rutin deca(H-) sulfate sodium**

Determination of rutin deca(H-) sulfate sodium in rat plasma using ion-pairing liquid chromatography after ion-pairing solid-phase extraction 833(2006)231

**Salvia miltiorrhiza Bunge**

Determination of four water-soluble compounds in *Salvia miltiorrhiza Bunge* by high-performance liquid chromatography with a coulometric electrode array system 833(2006)260

**Sarcoplasmic proteins**

Proteomic study of muscle sarcoplasmic proteins using AUT-PAGE/SDS-PAGE as two-dimensional gel electrophoresis 833(2006)101

**Selective capture**

Reducing protein concentration range of biological samples using solid-phase ligand libraries 833(2006)33

**Skin**

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography–mass spectrometry 833(2006)210

**SNPs**

Assessment of population structure by single nucleotide polymorphisms (SNPs) in goat breeds 833(2006)117

**Spot overlapping**

Decoding 2D-PAGE complex maps: Relevance to proteomics 833(2006)51

**Sulfate**

Detection of altrenogest and its metabolites in post administration horse urine using liquid chromatography tandem mass spectrometry—increased sensitivity by chemical derivatisation of the glucuronic acid conjugate 833(2006)245

**Thyroid**

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

**Tissue**

Simultaneous quantification of methamphetamine, cocaine, codeine, and metabolites in skin by positive chemical ionization gas chromatography–mass spectrometry 833(2006)210

 **$\alpha$ -Toxin**

Aqueous two-phase systems extraction of  $\alpha$ -toxin from *Clostridium perfringens* type A 833(2006)135

**Transcriptional regulation**

Differential proteomic analysis of nuclear extracts from thyroid cell lines 833(2006)41

**Trypsin**

Identification and characterization of digestive serine proteases from inhibitor-resistant *Helicoverpa zea* larval midgut 833(2006)26

**Two-dimensional AUT-PAGE/SDS-PAGE**

Proteomic study of muscle sarcoplasmic proteins using AUT-PAGE/SDS-PAGE as two-dimensional gel electrophoresis 833(2006)101

**Two-dimensional liquid chromatography**

A 2-D liquid-phase chromatography for proteomic analysis in plant tissues 833(2006)91

**Two-dimensional maps**

Decoding 2D-PAGE complex maps: Relevance to proteomics 833(2006)51

**Ultrafiltrate**

A rapid LC–MS method for determination of plasma anion profiles of acidotic patients 833(2006)179

**Ultra-narrow-pH ampholytes cuts**

Quasi-isoelectric buffers for protein analysis in a fast alternative to conventional capillary zone electrophoresis 833(2006)19

**Uncoated-capillary CZE**

Quasi-isoelectric buffers for protein analysis in a fast alternative to conventional capillary zone electrophoresis 833(2006)19

**Urobilinoids**

Identification of bilirubin reduction products formed by *Clostridium perfringens* isolated from human neonatal fecal flora 833(2006)149

**Vigabatrin**

Capillary electrophoresis enantioselective separation of vigabatrin enantiomers by precolumn derivatization with dehydroabietylthiocyanate and UV–vis detection 833(2006)186
