

## Keyword Index Vol. 835

### Alcohol metabolites

Direct and simultaneous analysis of loxoprofen and its diastereometric alcohol metabolites in human serum by on-line column switching liquid chromatography and its application to a pharmacokinetic study 835(2006)27

### Amperometric detection

Determination of monoamines in urine by capillary electrophoresis with field-amplified sample stacking and amperometric detection 835(2006)55

### Amphetamine

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

### Aqueous two-phase systems

Direct comparison between ion-exchange chromatography and aqueous two-phase processes for the partial purification of penicillin acylase produced by *E. coli* 835(2006)77

### Biomonitoring

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

### Capillary electrophoresis

Determination of monoamines in urine by capillary electrophoresis with field-amplified sample stacking and amperometric detection 835(2006)55

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

### Carboxyethylphosphoramidate mustard

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

### Celecoxib

Simple and rapid high-performance liquid chromatographic method for determination of celecoxib in plasma using UV detection: Application in pharmacokinetic studies 835(2006)100

### CEPM

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

### Chiral drug assay

Determination of the enantiomeric composition of a new insulin sensitizer in plasma samples from non-clinical and clinical investigations using chiral HPLC with electrospray tandem mass spectrometric detection 835(2006)40

### Chloride adduct

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

### β-Cyclodextrin

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

### dFdU

High-performance liquid chromatographic method for the determination of gemcitabine and 2',2'-difluorodeoxyuridine in plasma and tissue culture media 835(2006)136

### Dinitrate

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography–mass spectrometry with electrospray ionization 835(2006)21

### Drug targeting

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

### Ecstasy

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

### Efavirenz

Simple and rapid liquid chromatography method for determination of efavirenz in plasma 835(2006)131

### Electrochemiluminescence

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

### Electrospray

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

### ESI

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

### Evaporative light scattering detection

Rapid determination of solanesol in tobacco by high-performance liquid chromatography with evaporative light scattering detection following microwave-assisted extraction 835(2006)119

### Field-amplified sample injection

Determination of monoamines in urine by capillary electrophoresis with field-amplified sample stacking and amperometric detection 835(2006)55

### 9-Fluorenylmethyl chloroformate

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid–liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

**FMOC-Cl**

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid-liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

**Gabapentin**

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid-liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

**Gadocoletate trisodium**

High-performance liquid chromatographic determination of the magnetic resonance imaging contrast agent Gadocoletate ion in human plasma, urine and faeces 835(2006)1

**Gadolinium complex**

High-performance liquid chromatographic determination of the magnetic resonance imaging contrast agent Gadocoletate ion in human plasma, urine and faeces 835(2006)1

**Gas chromatography**

A validated gas chromatographic-electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

**Gemcitabine**

High-performance liquid chromatographic method for the determination of gemcitabine and 2',2'-difluorodeoxyuridine in plasma and tissue culture media 835(2006)136

**Glitazones**

Determination of the enantiomeric composition of a new insulin sensitizer in plasma samples from non-clinical and clinical investigations using chiral HPLC with electrospray tandem mass spectrometric detection 835(2006)40

**High performance liquid chromatography**

Quantitative determination of MCC-555, a novel insulin sensitizer in beagle dog plasma by high-performance liquid chromatography with fluorescence detection 835(2006)35

Rapid determination of solanesol in tobacco by high-performance liquid chromatography with evaporative light scattering detection following microwave-assisted extraction 835(2006)119

**HPLC**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)16

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

Simple and rapid high-performance liquid chromatographic method for determination of celecoxib in plasma using UV detection: Application in pharmacokinetic studies 835(2006)100

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid-liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

Validation of liquid/liquid extraction method coupled with HPLC-UV for measurement of ribavirin plasma levels in HCV-positive patients 835(2006)127

Simple and rapid liquid chromatography method for determination of efavirenz in plasma 835(2006)131

High-performance liquid chromatographic method for the determination of gemcitabine and 2',2'-difluorodeoxyuridine in plasma and tissue culture media 835(2006)136

**HPLC analysis**

High-performance liquid chromatographic determination of the magnetic resonance imaging contrast agent Gadocoletate ion in human plasma, urine and faeces 835(2006)1

**Human vascular smooth muscle cells**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography-mass spectrometry with electrospray ionization 835(2006)21

**Hydroxycyclophosphamide**

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography-mass spectrometry 835(2006)105

**Hydroxylated PAH**

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

**ICP-AES**

High-performance liquid chromatographic determination of the magnetic resonance imaging contrast agent Gadocoletate ion in human plasma, urine and faeces 835(2006)1

**In vitro bioreactor cell culture**

High-performance liquid chromatographic method for the determination of gemcitabine and 2',2'-difluorodeoxyuridine in plasma and tissue culture media 835(2006)136

**Interconversion**

Determination of the enantiomeric composition of a new insulin sensitizer in plasma samples from non-clinical and clinical investigations using chiral HPLC with electrospray tandem mass spectrometric detection 835(2006)40

**Ionspray**

Determination of the enantiomeric composition of a new insulin sensitizer in plasma samples from non-clinical and clinical investigations using chiral HPLC with electrospray tandem mass spectrometric detection 835(2006)40

**LCMS**

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography-mass spectrometry 835(2006)105

**LC-MS**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography-mass spectrometry with electrospray ionization 835(2006)21

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

**Liquid chromatography**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)16

**Liquid chromatography-tandem mass spectrometry**

Validated LC-MS-MS method for determination of *m*-nisoldipine polymorphs in rat plasma and its application to pharmacokinetic studies 835(2006)71

**Liquid/liquid**

Validation of liquid/liquid extraction method coupled with HPLC-UV for measurement of ribavirin plasma levels in HCV-positive patients 835(2006)127

**LLC-PK1 cells**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography–mass spectrometry with electrospray ionization 835(2006)21

**Loxoprofen**

Direct and simultaneous analysis of loxoprofen and its diastereometric alcohol metabolites in human serum by on-line column switching liquid chromatography and its application to a pharmacokinetic study 835(2006)27

**Mass spectrometry**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

**MCC-555**

Quantitative determination of MCC-555, a novel insulin sensitizer in beagle dog plasma by high-performance liquid chromatography with fluorescence detection 835(2006)35

**Metabolism**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography–mass spectrometry with electrospray ionization 835(2006)21

**Metabolites**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

**Methamphetamine**

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

**Method development**

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

**Methylenedioxymethamphetamine**

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

**Microwave-assisted extraction**

Rapid determination of solanesol in tobacco by high-performance liquid chromatography with evaporative light scattering detection following microwave-assisted extraction 835(2006)119

***m*-Nisoldipine**

Validated LC–MS–MS method for determination of *m*-nisoldipine polymorphs in rat plasma and its application to pharmacokinetic studies 835(2006)71

**Monoamines**

Determination of monoamines in urine by capillary electrophoresis with field-amplified sample stacking and amperometric detection 835(2006)55

**Monolithic column**

Simple and rapid high-performance liquid chromatographic method for determination of celecoxib in plasma using UV detection: Application in pharmacokinetic studies 835(2006)100

**MRI**

High-performance liquid chromatographic determination of the magnetic resonance imaging contrast agent Gadocolate ion in human plasma, urine and faeces 835(2006)1

**Nitroglycerin**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography–mass spectrometry with electrospray ionization 835(2006)21

**Oligonucleotides**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

**On-line column switching**

Direct and simultaneous analysis of loxoprofen and its diastereometric alcohol metabolites in human serum by on-line column switching liquid chromatography and its application to a pharmacokinetic study 835(2006)27

**Oral fluid**

A validated gas chromatographic–electron impact ionization mass spectrometric method for methylenedioxymethamphetamine (MDMA), methamphetamine and metabolites in oral fluid 835(2006)90

**PAH**

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

**Penicillin acylase recovery**

Direct comparison between ion-exchange chromatography and aqueous two-phase processes for the partial purification of penicillin acylase produced by *E. coli* 835(2006)77

**Pharmacokinetics**

Quantitative determination of MCC-555, a novel insulin sensitizer in beagle dog plasma by high-performance liquid chromatography with fluorescence detection 835(2006)35

**Phenylhydrazine**

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

**Plasma**

Simple and rapid high-performance liquid chromatographic method for determination of celecoxib in plasma using UV detection: Application in pharmacokinetic studies 835(2006)100

Simple and rapid liquid chromatography method for determination of efavirenz in plasma 835(2006)131

**Plasma analysis**

Rapid quantitation of cyclophosphamide metabolites in plasma by liquid chromatography–mass spectrometry 835(2006)105

**Polycyclic aromatic hydrocarbon**

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

**Polymorphs**

Validated LC–MS–MS method for determination of *m*-nisoldipine polymorphs in rat plasma and its application to pharmacokinetic studies 835(2006)71

**Process comparison**

Direct comparison between ion-exchange chromatography and aqueous two-phase processes for the partial purification of penicillin acylase produced by *E. coli* 835(2006)77

**R, S-enantiomers**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)16

**Racemic cefpodoxime proxetil**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)21

**Rat plasma**

Simultaneous determination of nitroglycerin and dinitrate metabolites in metabolism studies using liquid chromatography–mass spectrometry with electrospray ionization 835(2006)21

**Reverse phase chromatography**

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid–liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

**Reversed-phase**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)16

**Ribavirin**

Validation of liquid/liquid extraction method coupled with HPLC-UV for measurement of ribavirin plasma levels in HCV-positive patients 835(2006)127

**RNAi**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

**Scutellarin**

Determination of scutellarin in mouse plasma and different tissues by high-performance liquid chromatography 835(2006)114

**Separation of isomers**

Development and validation of isomer specific RP-HPLC method for quantification of cefpodoxime proxetil 835(2006)16

**Serum**

Sensitive high-performance liquid chromatographic quantitation of gabapentin in human serum using liquid–liquid extraction and pre-column derivatization with 9-fluorenylmethyl chloroformate 835(2006)123

**Simultaneous determination**

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

**siRNA**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62

**Solanesol**

Rapid determination of solanesol in tobacco by high-performance liquid chromatography with evaporative light scattering detection following microwave-assisted extraction 835(2006)119

**Sulpiride**

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

**Tiapride**

Simultaneous electrochemiluminescence determination of sulpiride and tiapride by capillary electrophoresis with cyclodextrin additives 835(2006)84

**Tobacco**

Rapid determination of solanesol in tobacco by high-performance liquid chromatography with evaporative light scattering detection following microwave-assisted extraction 835(2006)119

**Urinary metabolite**

Automated solid-phase extraction method for measuring urinary polycyclic aromatic hydrocarbon metabolites in human biomonitoring using isotope-dilution gas chromatography high-resolution mass spectrometry 835(2006)47

**Urine**

Determination of monoamines in urine by capillary electrophoresis with field-amplified sample stacking and amperometric detection 835(2006)55

**UV**

High-performance liquid chromatographic method for the determination of gemcitabine and 2',2'-difluorodeoxyuridine in plasma and tissue culture media 835(2006)136

**UV method**

Validation of liquid/liquid extraction method coupled with HPLC-UV for measurement of ribavirin plasma levels in HCV-positive patients 835(2006)127

**VEGF**

Liquid chromatography electrospray ionization mass spectrometry analysis of the ocular metabolites from a short interfering RNA duplex 835(2006)62
