

## Keyword Index Vol. 837

### Adrenocortical carcinoma

A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69

### Adsorption kinetics

Screening anion-exchange chromatographic matrices for isolation of onco-retroviral vectors 837(2006)59

### Alpha-1 antitrypsin

Features of the milk whey protein partitioning in polyethyleneglycol-sodium citrate aqueous two-phase systems with the goal of isolating human alpha-1 antitrypsin expressed in bovine milk 837(2006)18

### Anion-exchange chromatography

Screening anion-exchange chromatographic matrices for isolation of onco-retroviral vectors 837(2006)59

### Artificial *Calculus Bovis*

Determination of three bile acids in artificial *Calculus Bovis* and its medicinal preparations by micellar electrokinetic capillary electrophoresis 837(2006)11

### Atmospheric pressure photoionization

Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147

### Bile acids

Determination of three bile acids in artificial *Calculus Bovis* and its medicinal preparations by micellar electrokinetic capillary electrophoresis 837(2006)11

### Binding studies

Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138

### Bioactive lipids

Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147

### Bio-Gel

Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76

### Capillary electrophoresis

Determination of three bile acids in artificial *Calculus Bovis* and its medicinal preparations by micellar electrokinetic capillary electrophoresis 837(2006)11

### Carbamazepine

Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138

### Cisplatin

Specific determination of intact cisplatin and monohydrated cisplatin in human plasma and culture medium ultrafiltrates using HPLC on-line with inductively coupled plasma mass spectrometry 837(2006)29

### 4-Chloro-7-nitrobenzofurazan

Sensitive microanalysis of gabapentin by high-performance liquid chromatography in human serum using pre-column derivatization with 4-chloro-7-nitrobenzofurazan: Application to a bioequivalence study 837(2006)24

### Clioquinol

Determination of 5-chloro-7-iodo-8-quinolinol (clioquinol) in plasma and tissues of hamsters by high-performance liquid chromatography and electrochemical detection 837(2006)87

### Conjugated linoleic acids

Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147

### Cyclodextrin-based CSPs

HPLC resolution of thioridazine enantiomers from pharmaceutical dosage form using cyclodextrin-based chiral stationary phase 837(2006)133

### DCA

A GC-MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125

### DDA

A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69

### DDE

A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69

### DDT

A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69

### Deamidation

Characterization of the stability of a fully human monoclonal IgG after prolonged incubation at elevated temperature 837(2006)35

### D-threo-PPMP

Liquid chromatography method for quantifying D-threo-1-phenyl-2-palmitoyl-lamino-3-morpholino-1-propanol (D-threo-PPMP) in mouse plasma and liver 837(2006)44

### Electrochemical detection

Determination of 5-chloro-7-iodo-8-quinolinol (clioquinol) in plasma and tissues of hamsters by high-performance liquid chromatography and electrochemical detection 837(2006)87

**Electrospray ionization mass spectrometry**

Isolation of lipids from photosystem I complex and its characterization with high performance liquid chromatography/electrospray ionization mass spectrometry 837(2006)101

**Enantiomeric separation**

HPLC resolution of thioridazine enantiomers from pharmaceutical dosage form using cyclodextrin-based chiral stationary phase 837(2006)133

**Enfuvirtide**

Development and validation of a quantitative assay for the measurement of two HIV-fusion inhibitors, enfuvirtide and tifuvirtide, and one metabolite of enfuvirtide (M-20) in human plasma by liquid chromatography–tandem mass spectrometry 837(2006)49

**Fatty acid metabolism**

Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147

**1-Furan-2-yl-3-pyridin-2-yl-propenone (FPP-3)**

Determination of 1-furan-2-yl-3-pyridin-2-yl-propenone, an anti-inflammatory propenone compound, by high performance liquid chromatography with ultraviolet spectrometry 837(2006)108

**Gabapentin**

Sensitive microanalysis of gabapentin by high-performance liquid chromatography in human serum using pre-column derivatization with 4-chloro-7-nitrobenzofurazan: Application to a bioequivalence study 837(2006)24

**GC–ECNCI-MS**

A GC–MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125

**Gene therapy**

Screening anion-exchange chromatographic matrices for isolation of onco-retroviral vectors 837(2006)59

**Hamsters**

Determination of 5-chloro-7-iodo-8-quinolinol (clioquinol) in plasma and tissues of hamsters by high-performance liquid chromatography and electrochemical detection 837(2006)87

**Heparan sulfate proteoglycans**

Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76

**Heparin oligosaccharides**

Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76

**Heparinase**

Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76

**Heparin-binding proteins**

Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76

**High-performance affinity chromatography**

Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138

**High-performance liquid chromatography**

Determination of omeprazole in rat plasma by high-performance liquid chromatography without solvent extraction 837(2006)112

**HIV-fusion inhibitor**

Development and validation of a quantitative assay for the measurement of two HIV-fusion inhibitors, enfuvirtide and tifuvirtide, and one metabolite of enfuvirtide (M-20) in human plasma by liquid chromatography–tandem mass spectrometry 837(2006)49

**HPLC**

Quantification of uric acid, xanthine and hypoxanthine in human serum by HPLC for pharmacodynamic studies 837(2006)1

Sensitive microanalysis of gabapentin by high-performance liquid chromatography in human serum using pre-column derivatization with 4-chloro-7-nitrobenzofurazan: Application to a bioequivalence study 837(2006)24

Liquid chromatography method for quantifying *D*-threo-1-phenyl-2-palmitoyl-lamino-3-morpholino-1-propanol (*D*-threo-PPMP) in mouse plasma and liver 837(2006)44

A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69

Determination of 5-chloro-7-iodo-8-quinolinol (clioquinol) in plasma and tissues of hamsters by high-performance liquid chromatography and electrochemical detection 837(2006)87

**Human plasma**

First LC–MS/MS electrospray ionization validated method for the quantification of perindopril and its metabolite perindoprilat in human plasma and its application to bioequivalence study 837(2006)92

**Human serum**

Quantification of uric acid, xanthine and hypoxanthine in human serum by HPLC for pharmacodynamic studies 837(2006)1

**Human serum albumin**

Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138

**Inductively coupled plasma mass spectrometry**

Specific determination of intact cisplatin and monohydrated cisplatin in human plasma and culture medium ultrafiltrates using HPLC on-line with inductively coupled plasma mass spectrometry 837(2006)29

**Kinetics**

Determination of 1-furan-2-yl-3-pyridin-2-yl-propenone, an anti-inflammatory propenone compound, by high performance liquid chromatography with ultraviolet spectrometry 837(2006)108

**LC–MS/MS**

Development and validation of a quantitative assay for the measurement of two HIV-fusion inhibitors, enfuvirtide and tifuvirtide, and one metabolite of enfuvirtide (M-20) in human plasma by liquid chromatography–tandem mass spectrometry 837(2006)49

First LC–MS/MS electrospray ionization validated method for the quantification of perindopril and its metabolite perindoprilat in human plasma and its application to bioequivalence study 837(2006)92

Determination of a prostaglandin  $D_2$  antagonist and its acyl glucuronide metabolite in human plasma by high performance liquid chromatography with tandem mass spectrometric detection—A lack of MS/MS selectivity between a glucuronide conjugate and a phase I metabolite 837(2006)116

**Lipids**

Isolation of lipids from photosystem I complex and its characterization with high performance liquid chromatography/electrospray ionization mass spectrometry 837(2006)101

- MA**  
A GC-MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125
- Mass spectrometry**  
Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76
- Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147
- Metabolites**  
Determination of 1-furan-2-yl-3-pyridin-2-yl-propenone, an anti-inflammatory propenone compound, by high performance liquid chromatography with ultraviolet spectrometry 837(2006)108
- Milk whey proteins**  
Features of the milk whey protein partitioning in polyethyleneglycol-sodium citrate aqueous two-phase systems with the goal of isolating human alpha-1 antitrypsin expressed in bovine milk 837(2006)18
- Mitotane**  
A new simple HPLC method for measuring mitotane and its two principal metabolites. Tests in animals and mitotane-treated patients 837(2006)69
- Monohydrated cisplatin**  
Specific determination of intact cisplatin and monohydrated cisplatin in human plasma and culture medium ultrafiltrates using HPLC on-line with inductively coupled plasma mass spectrometry 837(2006)29
- NBD-Cl**  
Sensitive microanalysis of gabapentin by high-performance liquid chromatography in human serum using pre-column derivatization with 4-chloro-7-nitrobenzofurazan: Application to a bioequivalence study 837(2006)24
- N-Hydroxysuccinimide method**  
Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138
- Omeprazole**  
Determination of omeprazole in rat plasma by high-performance liquid chromatography without solvent extraction 837(2006)112
- Peptide**  
Development and validation of a quantitative assay for the measurement of two HIV-fusion inhibitors, enfuvirtide and tifuvirtide, and one metabolite of enfuvirtide (M-20) in human plasma by liquid chromatography-tandem mass spectrometry 837(2006)49
- Peptide mapping**  
Characterization of the stability of a fully human monoclonal IgG after prolonged incubation at elevated temperature 837(2006)35
- Perindopril**  
First LC-MS/MS electrospray ionization validated method for the quantification of perindopril and its metabolite perindoprilat in human plasma and its application to bioequivalence study 837(2006)92
- Perindoprilat**  
First LC-MS/MS electrospray ionization validated method for the quantification of perindopril and its metabolite perindoprilat in human plasma and its application to bioequivalence study 837(2006)92
- PFB-Br**  
A GC-MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125
- Pharmacodynamic biomarkers**  
Quantification of uric acid, xanthine and hypoxanthine in human serum by HPLC for pharmacodynamic studies 837(2006)1
- Photosystem I**  
Isolation of lipids from photosystem I complex and its characterization with high performance liquid chromatography/electrospray ionization mass spectrometry 837(2006)101
- Prostaglandin D2 antagonist**  
Determination of a prostaglandin D<sub>2</sub> antagonist and its acyl glucuronide metabolite in human plasma by high performance liquid chromatography with tandem mass spectrometric detection—A lack of MS/MS selectivity between a glucuronide conjugate and a phase I metabolite 837(2006)116
- Protein isolation**  
Features of the milk whey protein partitioning in polyethyleneglycol-sodium citrate aqueous two-phase systems with the goal of isolating human alpha-1 antitrypsin expressed in bovine milk 837(2006)18
- Purification**  
Screening anion-exchange chromatographic matrices for isolation of onco-retroviral vectors 837(2006)59
- Pyroglutamate**  
Characterization of the stability of a fully human monoclonal IgG after prolonged incubation at elevated temperature 837(2006)35
- Rat**  
Determination of 1-furan-2-yl-3-pyridin-2-yl-propenone, an anti-inflammatory propenone compound, by high performance liquid chromatography with ultraviolet spectrometry 837(2006)108
- Rat plasma**  
Determination of omeprazole in rat plasma by high-performance liquid chromatography without solvent extraction 837(2006)112
- Recombinant monoclonal antibody**  
Characterization of the stability of a fully human monoclonal IgG after prolonged incubation at elevated temperature 837(2006)35
- Retroviral vectors**  
Screening anion-exchange chromatographic matrices for isolation of onco-retroviral vectors 837(2006)59
- Reversed-phase high performance liquid chromatography**  
Isolation of lipids from photosystem I complex and its characterization with high performance liquid chromatography/electrospray ionization mass spectrometry 837(2006)101
- RP-HPLC**  
HPLC resolution of thioridazine enantiomers from pharmaceutical dosage form using cyclodextrin-based chiral stationary phase 837(2006)133
- SA**  
A GC-MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125
- Schiff base method**  
Chromatographic analysis of carbamazepine binding to human serum albumin. II. Comparison of the Schiff base and *N*-hydroxysuccinimide immobilization methods 837(2006)138

- Serum**  
Sensitive microanalysis of gabapentin by high-performance liquid chromatography in human serum using pre-column derivatization with 4-chloro-7-nitrobenzofurazan: Application to a bioequivalence study 837(2006)24
- Silver-ion HPLC**  
Identification of conjugated linoleic acid elongation and  $\beta$ -oxidation products by coupled silver-ion HPLC APPI-MS 837(2006)147
- Size-exclusion chromatography**  
Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76
- SRM**  
First LC-MS/MS electrospray ionization validated method for the quantification of perindopril and its metabolite perindoprilat in human plasma and its application to bioequivalence study 837(2006)92
- Superdex**  
Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76
- Thioridazine**  
HPLC resolution of thioridazine enantiomers from pharmaceutical dosage form using cyclodextrin-based chiral stationary phase 837(2006)133
- Tifuvirtide**  
Development and validation of a quantitative assay for the measurement of two HIV-fusion inhibitors, enfuvirtide and tifuvirtide, and one metabolite of enfuvirtide (M-20) in human plasma by liquid chromatography-tandem mass spectrometry 837(2006)49
- Transgenic milk**  
Features of the milk whey protein partitioning in polyethyleneglycol-sodium citrate aqueous two-phase systems with the goal of isolating human alpha-1 antitrypsin expressed in bovine milk 837(2006)18
- Tyrosine metabolites**  
A GC-MS/MS method for the quantitative analysis of low levels of the tyrosine metabolites maleylacetone, succinylacetone, and the tyrosine metabolism inhibitor dichloroacetate in biological fluids and tissues 837(2006)125
- Uric acid**  
Quantification of uric acid, xanthine and hypoxanthine in human serum by HPLC for pharmacodynamic studies 837(2006)1
- van Deemter plot**  
Size-exclusion chromatography of heparin oligosaccharides at high and low pressure 837(2006)76
- Xanthine oxidase inhibitor**  
Quantification of uric acid, xanthine and hypoxanthine in human serum by HPLC for pharmacodynamic studies 837(2006)1
