## Erratum

# Erratum to “A spectral/B-spline method for the Navier–Stokes equations in unbounded domains” [J. Comp. Phys. 185 (2003) 532–548] ☆

L. Dufresne <sup>1</sup>, G. Dumas <sup>\*</sup>

*Département de Génie Mécanique, Université Laval, Qué., Canada G1K7P4*

In the last stages of the production process, after the author’s proof had been returned, an unfortunate error occurred. The penultimate sentence of the first paragraph of Section 3.3 should read: “... , and the Reynolds number is  $Re \equiv \bar{\Gamma}/2\pi\bar{\nu}$ .”
