

ELSEVIER

Vol. 227, Issue 17, 1 September 2008

JOURNAL OF
COMPUTATIONAL
PHYSICS

CONTENTS

www.elsevier.com/locate/jcp

Abstracted/indexed in ACM Guide to Computing Literature, Chemical Abstracts, CompuMath Citation Index, Current Contents/Physics / Chemistry & Earth Science, Excerpta Medica, Mathematical Reviews, Research Alert, Science Abstracts, Science Citation Index. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

REGULAR ARTICLES

- 7999 **A new method for fast transforms in parity-mixed PDEs: Part I. Numerical techniques and analysis**
G.M. Vasil, N.H. Brummell and K. Julien
- 8017 **A new method for fast transforms in parity-mixed PDEs: Part II. Application to confined rotating convection**
G.M. Vasil, N.H. Brummell and K. Julien
- 8035 **Gridless DSMC**
S.E. Olson and A.J. Christlieb
- 8065 **An accurate and versatile lattice closure scheme for lattice Boltzmann equation fluids under external forces**
A.P. Hollis, I. Halliday and C.M. Care
- 8083 **Domain reconstruction using photothermal techniques**
A. Carpio and M.-L. Rapún
- 8107 **Why many theories of shock waves are necessary: Convergence error in formally path-consistent schemes**
M.J. Castro, P.G. LeFloch, M.L. Muñoz-Ruiz and C. Parés
- 8130 **The integral equation approach to kinematic dynamo theory and its application to dynamo experiments in cylindrical geometry**
M. Xu, F. Stefani and G. Gerbeth
- 8145 **Effective numerical viscosity in spectral multidomain penalty method-based simulations of localized turbulence**
P.J. Diamessis, Y.C. Lin and J.A. Domaradzki
- 8165 **Second-order splitting schemes for a class of reactive systems**
Z. Ren and S.B. Pope
- 8177 **A high order compact MAC finite difference scheme for the Stokes equations: Augmented variable approach**
K. Ito and Z. Qiao
- 8191 **A second order discontinuous Galerkin fast sweeping method for Eikonal equations**
F. Li, C.-W. Shu, Y.-T. Zhang and H. Zhao
