

Continued from inside back cover

- 1428 **A direct comparison between volume and surface tracking methods with a boundary-fitted coordinate transformation and third-order upwinding**
M. Zacharioudaki, C. Kouris, Y. Dimakopoulos and J. Tsamopoulos
- 1470 **A multiscale approach to the analysis of magnetic grid shields and its validation**
O. Bottauscio, M. Chiampi, A. Manzin, P.E. Roccatto and M. Zucca
- 1483 **Spectral splitting method for nonlinear Schrödinger equations with singular potential**
A. Sacchetti
- 1500 **Adaptive extremal optimization by detrended fluctuation analysis**
K. Hamacher
- 1510 **Numerical algorithm for the time fractional Fokker–Planck equation**
W. Deng
- 1523 **Poloidal–toroidal decomposition in a finite cylinder. I: Influence matrices for the magnetohydrodynamic equations**
P. Boronski and L.S. Tuckerman
- 1544 **Poloidal–toroidal decomposition in a finite cylinder. II. Discretization, regularization and validation**
P. Boronski and L.S. Tuckerman
- 1567 **A high order ENO conservative Lagrangian type scheme for the compressible Euler equations**
J. Cheng and C.-W. Shu
- 1597 **Modeling of supersonic plasma flow in the scrape-off layer**
O. Marchuk and M.Z. Tokar
