

ELSEVIER

Vol. 227, Issue 20, 20 October 2008

JOURNAL OF  
COMPUTATIONAL  
PHYSICS

## CONTENTS

[www.elsevier.com/locate/jcp](http://www.elsevier.com/locate/jcp)

Abstracted/indexed in ACM Guide to Computing Literature, Chemical Abstracts, CompuMath Citation Index, Current Contents/Physics / Chemistry & Earth Science, Excerpta Medica, Mathematical Reviews, Research Alert, Science Abstracts, Science Citation Index. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®

### SHORT NOTE

- 8769 **On 1D diffusion problems with a gradient-dependent diffusion coefficient**  
S.C. Jardin, G. Bateman, G.W. Hammett and L.P. Ku

### REGULAR ARTICLES

- 8776 **An explicit finite difference scheme with spectral boundary conditions for particulate flows**  
A. Perrin and H.H. Hu
- 8792 **An accurate time advancement algorithm for particle tracking**  
P.P. Popov, R. McDermott and S.B. Pope
- 8807 **A boundary-integral model for drop deformation between two parallel plates with non-unit viscosity ratio drops**  
P.J.A. Janssen and P.D. Anderson
- 8820 **Corner singularities for elliptic problems: Integral equations, graded meshes, quadrature, and compressed inverse preconditioning**  
J. Helsing and R. Ojala
- 8841 **High-order mimetic finite difference method for diffusion problems on polygonal meshes**  
V. Gyrya and K. Lipnikov
- 8855 **Implicit adaptive mesh refinement for 2D reduced resistive magnetohydrodynamics**  
B. Philip, L. Chacón and M. Pernice
- 8875 **A discontinuous Galerkin method based on a Taylor basis for the compressible flows on arbitrary grids**  
H. Luo, J.D. Baum and R. Löhner
- 8894 **A regularized Lagrangian finite point method for the simulation of incompressible viscous flows**  
J. Fang and A. Parriaux
- 8909 **Pseudo-wave decomposition high-order method for magnetogasdynamics**  
T. Gomez
- 8922 **Local radial basis function based gridfree scheme for unsteady incompressible viscous flows**  
Y.V.S.S. Sanyasiraju and G. Chandhini
