

*Continued from outside back cover*

- 7774 **Multiple-relaxation-time lattice Boltzmann model for the convection and anisotropic diffusion equation**  
H. Yoshida and M. Nagaoka
- 7796 **Spectral method for exploring patterns of diblock copolymers**  
K. Jiang, Y. Huang and P. Zhang
- 7806 **The momentum interpolation method based on the time-marching algorithm for All-Speed flows**  
X.-s. Li and C.-w. Gu
- 7819 **Distribution coefficient algorithm for small mass nodes in material point method**  
X. Ma, P.T. Giguere, B. Jayaraman and D.Z. Zhang
- 7834 **Molecular simulations of electroosmotic flows in rough nanochannels**  
J. Liu, M. Wang, S. Chen and M.O. Robbins
- 7848 **Fast Gaussian wavepacket transforms and Gaussian beams for the Schrödinger equation**  
J. Qian and L. Ying
- 7874 **Efficient numerical methods for computing ground states and dynamics of dipolar Bose–Einstein condensates**  
W. Bao, Y. Cai and H. Wang
- 7893 **A fourth-order divergence-free method for MHD flows**  
S. Li
- 7911 **A framework for developing a mimetic tensor artificial viscosity for Lagrangian hydrocodes on arbitrary polygonal meshes**  
K. Lipnikov and M. Shashkov
- 7942 **A Schur complement formulation for solving free-boundary, Stefan problems of phase change**  
L. Lun, A. Yeckel and J.J. Derby
- 7956 **A lattice Boltzmann model for coupled diffusion**  
C. Huber, B. Chopard and M. Manga
- 7977 **A ghost fluid, level set methodology for simulating multiphase electrohydrodynamic flows with application to liquid fuel injection**  
B.P. Van Poppel, O. Desjardins and J.W. Daily
- 7997 **A comparison of high-order time integrators for thermal convection in rotating spherical shells**  
F. Garcia, M. Net, B. García-Archilla and J. Sánchez
- 8011 **History matching of facies distribution with the EnKF and level set parameterization**  
H. Chang, D. Zhang and Z. Lu
- 8031 **Heuristic optimality criterion algorithm for shape design of fluid flow**  
L. Wang, Y. Fan and L. Luo
- 8045 **Lattice Boltzmann simulations of micron-scale drop impact on dry surfaces**  
T. Lee and L. Liu
