Fifth International Symposium on Numerical Methods in Engineering

Ecole Polytechnique Fédérale de Lausanne, Switzerland, September 11–15, 1989

EPFL—GAMNI/SMAI—ISINA

The Fifth International Symposium on Numerical Methods in Engineering will be held at the Ecole Polytechnique Fédérale de Lausanne, Switzerland, September 11–15, 1989 with special emphasis on: Navier–Stokes equations, cellular automata, electromagnetics, aerospace engineering, spectral methods and turbulence, large deformation solid mechanics, software engineering tools, and combustion

For further information, write to:

Sauro NICLI, Secretary of the Symposium
GASOV/EPFL
Ecole Polytechnique Fédérale de Lausanne
CH-1015 Ecublens
Switzerland
Telephone: (41).21.47.22.11

Seventh Symposium on Turbulent Shear Flows

Stanford University, August 21–23, 1989

Paper selection for this symposium will be based on a review of extended abstracts of approximately 1000 words which should be double-spaced and state clearly the purpose, results, and conclusions of the work with supporting figures as appropriate. Special interest sessions will be on: combustion–turbulence interactions, new techniques in numerical simulation, oceanography, and turbulence control.

Deadlines are:

Final date, receipt of abstracts: October 31, 1988

Authors informed of acceptance: March 15, 1989

Final date, receipt of camera-ready manuscript: May 31, 1989.

Five copies of the abstract should be submitted to:

Professor F. W. Schmidt,
Secretary, Turbulent Shear Flows
Department of Mechanical Engineering
Pennsylvania State University
University Park, Pennsylvania 16802
