Aims and Scope

The *Journal of Coordination Chemistry* publishes the results of original investigations involving the physical and chemical properties, syntheses and structures of coordination compounds of metals. Its scope may be defined as being concerned with the interactions of organic and inorganic ligands with metallic elements. Material on applications of coordination compounds may be included when relevant from time to time. Short reviews of current research in coordination chemistry will also be considered for publication.

In addition to full articles, preliminary communications of results (up to 1000 words) may be submitted. The journal intends to shorten considerably the time between receipt, acceptance and publication of such articles in order to provide a mechanism for speedy publication of preliminary accounts of original and significantly interesting findings in coordination chemistry. Short articles that lack urgency are also acceptable to the journal and will be published in due course, as long as the desire to avoid multiple publication is met.

Books for review should be sent to the Editor, at the address above, and not the publisher.

Aims and Scope

Part B will publish review articles in all areas of coordination chemistry, including inorganic solid state chemistry, organometallic chemistry and bioinorganic chemistry, as well as applications to analytical chemistry, catalysis, industrial chemistry and materials science. Articles may focus primarily on the metal, the ligand or the application. Given the limitation in length for the reviews, two extreme cases can be envisaged. Topics of emerging interest should be developed fully from the basics forward. Careful attention must be paid to the way in which the new area relates to the field in general. Reviews of well-established subjects should collect the developments from the literature and take a critical view of recent activities.

Subscription rates.

Four issues per volume:

Subscription rates per volume: corporate \$424.00; university library, \$284.00; individual, \$142.00. Rates include air mail postage and handling charges. Individual subscription rates are available only to individuals who subscribe directly from the publisher and who pay through personal checks or credit card.

Prices apply in North America only. All other countries will be invoiced at our current conversion rate. The subscription rates include a distribution charge of \$17.00 for postage and handling. Send your order to your usual supplier or direct to Gordon and Breach Science Publishers Inc., c/o STBS Ltd, 1 Bedford Street, London WC2E 9PP, England. Journal subscriptions are sold on a volume basis only; single issues are not available separately. Claims for nonreceipt of issues should be made within three months of publication of the issue or they will not be honored without charge. Subscriptions are available for microfilm editions. Please write for details.

REPRINTS AND PHOTOCOPYING OF INDIVIDUAL ARTICLES Copies of individual articles may be obtained from the publisher's own document delivery service which provides on-demand publishing at appropriate fees, or by obtaining a license directly from the publisher at the address above. The license will not be extended to certain kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, nor will the license extend to any individual or company specifically advised by the publisher in writing that consent is being expressly withheld.
