Journal of Coordination Chemistry

EDITORIAL BOARD

Co-Editors in Chief:

Peter A Williams, Department of Chemistry, University of Western Sydney, PO Box 10, Kingswood, NSW 2750, Australia

Jim D Atwood, Department of Chemistry, Natural Sciences and Mathematics Complex, University at Buffalo, SUNY, Buffalo, NY 14260-3000, USA

Associate Editors

R van Eldik, Institute for Inorganic Chemistry, University of Erlangen-Nürnberg, Egerlandstr. 1, 91058 Erlangen, Germany

J Lipkowski, Instytut Chemii Fizycznej, Akademii Nauk, Ul Kasprzaka 44/52, 01-224 Warsaw, Poland

Masanobu Hidai, Department of Chemistry and Biotechnology, Faculty of Engineering, University of Tokyo, Hongo 7-3-1, Bunkyo-ku, Tokyo 113, Japan

Consultant Editor

T Iwamoto, Department of Fundamental Science, College of Science & Engineering, Iwaki Meisei University, 5-5-1 Chuohdai Lino, Iwaki, Fukushima 970, Japan

Editorial Board

JL Atwood (USA), P Aymonino (Argentina), AT Baker (Australia), E Bayer (Germany), MT Beck (Hungary), RD Bereman (USA), I Bernal (USA), TL Brown (USA), DH Busch (USA), AW Coleman (France), R van Eldik (Germany), RD Gillard (UK), F Hanic (Slovak Republic), A Kálmán (Hungary), L Kane-Maguire (Australia), E Kimura (Japan), R Kuroda (Japan), W Levason (UK), J-M Lehn (France), A Ludi (Switzerland), AE Martell (USA), P O'Brien (UK), RJ Puddephatt (Canada), K Raymond (USA), GH Robinson (USA), WT Robinson (New Zealand), T Saito (Japan), AM Sargeson (Australia), H Schmidbaur (Germany), DF Shriver (USA), J Strähle (Germany), AG Sykes (UK), HE Toma (Brazil), RS Vagg (Australia), KB Yatsimirsky (Ukraine).

Aims and Scope

The *Journal of Coordination Chemistry* publishes the results of original investigations involving the physical and chemical properties, syntheses and structures of coordination compounds. Its scope may be defined as being concerned with the interactions of organic and inorganic ligands with metallic elements. Material on applications of coordination compounds may be included when relevant from time to time. In addition to full articles, preliminary communications or results (up to 1000 words) may be submitted. The journal intends to shorten considerably the time between receipt, acceptance and publication of such articles in order to provide a mechanism for speedy publication of preliminary accounts of original and significantly interesting findings in coordination chemistry. Short articles that lack urgency are also acceptable to the journal and will be published in due course, as long as the desire to avoid multiple publication is met.

The editors also welcome review articles in all areas of coordination chemistry, including inorganic solid state chemistry, organometallic chemistry and bioinorganic chemistry, as well as applications to analytical chemistry, catalysis, industrial chemistry and materials science. Articles may focus primarily on the metal, the ligand or the application. Given the limitation in length for the reviews, two extreme cases can be envisaged. Topics of emerging interest should be developed fully from basics. Careful attention must be paid to the way in which the new area relates to the field in general. Reviews of well-established subjects should collect developments from the literature and take a critical view of recent activities. Books for review should be sent to the Editors, at the addresses above, and not the Publisher.

Notes for Contributors can be found at the back of the journal.
