

BOOKREVIEW

R.Herschel, Anleitung zum praktischen Gebrauch von ALGOL.
R.Oldenbourg Verlag, München, Wien, 1966.
164 pages, price DM. 15,-.

This ALGOL programming course is especially meant for those who want to write programmes in the language accepted by the ALCOR group. The book is written in a didactically justified way and gives many examples both ALGOL programmes and flowcharts. Most examples are taken from numerical mathematics.

As a disadvantage could be felt that no attempt has been made to teach the student to read the original ALGOL-60 report by Backus et.al.

The text is written in german.

A. J. W. Duijvestijn.
