Journal of Engineering Mathematics, Vol. 11, No. 2, April 1977 Noordhoff International Publishing–Leyden Printed in The Netherlands

Forthcoming papers

The following papers will appear in the forthcoming issues of the Journal of Engineering Mathematics:

- 1. Magnetofluiddynamic flow with a pressure gradient and fluid injection, by M. H. Cobble.
- 2. A comparison of boundary methods for the numerical solution of hyperbolic systems of equations, by J. S. Bramley and D. M. Sloan.
- 3. The pressure field of a spherical diffusion flame, by C. A. Cooper and J. F. Clarke.
- 4. On the influence of a bimaterial interface on dynamic stress intensity factors, by V.K. and V. Varatharajulu.
- 5. On an integral equation of viscous flow theory, by S. N. Brown.
- 6. Sur une formulation rigoureuse du problème de la convection libre atmosphérique, by R. Kh. Zeytounian.
- 7. A comparative study of elasticity, shell and boundary layer solutions applied to axially compressed cylinders, by S. Mirza and J. C. Rajput.
- 8. On the elastic-plastic torsion problem, by R. Rubinstein.
- 9. Slender-ship shallow-water flow past a slowly varying bottom, by A. Plotkin.
- 10. Shock propagation in variable area ducts with phase changes: an extension of Chisnell's method, by B. Wendroff.
- 11. A continuum theory of diatomic solids: viewed as directed media, by H. Demiray.
- 12. Two coplanar Griffith cracks in an infinite elastic layer under torsion, by R.S. Dhaliwal and B. M. Singh.
- 13. Hydrodynamics of deformable contiguous spherical shapes in an incompressible inviscid fluid, by T. Miloh.
