

Contents of Volume 49 (2004)

Vol. 49 No. 1 May 2004

| | |
|---|-------|
| Y.C. Shiah and Y.J. Lin: An infinitely large plate weakened by a circular-arc crack subjected to partially distributed loads | 1–18 |
| G. Riccardi and A. Iafrati: Water impact of an asymmetric floating wedge | 19–39 |
| A. Lazarovici, S. Kalliadasis, J.H. Merkin, S.K. Scott and P.L. Simon: The propagation and inhibition of an exothermic branched-chain flame with an endothermic reaction and radical scavenging | 41–56 |
| A. Ursescu, W. Eckart, H. Marschall and K. Hutter: Inhomogeneous electric field generated by two long electrodes placed along parallel infinite walls separating different dielectric media | 57–75 |
| V. Bykov, I. Goldfarb and V. Gol'dshtein: Inertia effect on a structure of pressure-driven flames in porous media | 77–97 |

Vol. 49 No. 2 June 2004

| | |
|---|---------|
| Hartono and A.H.P. van der Burgh: A linear differential equation with a time-periodic damping coefficient: stability diagram and an application | 99–112 |
| J.A.D. Wattis, D.G. McCartney and T. Gudmundsson: Coagulation equations with mass loss | 113–131 |
| A.J. Hermans: Interaction of free-surface waves with floating flexible strips | 133–147 |
| G. Sangalli: A discontinuous residual-free bubble method for advection-diffusion problems | 149–162 |
| C. Pozrikidis: A finite-element method for interfacial surfactant transport, with application to the flow-induced deformation of a viscous drop | 163–180 |
| D. Andrew, D.A.S. Rees and P.A. Tyvand: The Helmholtz equation for convection in two-dimensional porous cavities with conducting boundaries | 181–193 |

Modern Application of Green's Functions in Mechanics and Related Fields
Guest editor: Y.A. Melnikov

| | |
|--|---------|
| Preface | 195 |
| W.T. Ang and J.C.F. Telles: A numerical Green's function for multiple cracks in anisotropic bodies | 197–207 |
| D.L. Clements: A fundamental solution for linear second-order elliptic systems with variable coefficients | 209–216 |
| K.D. Cole: Fast-converging series for heat conduction in the circular cylinder | 217–232 |
| V.A. Kholodnyi: Valuation and hedging of European contingent claims on power with spikes: a non-Markovian approach | 233–252 |
| Y.A. Melnikov: Influence functions of a point source for perforated compound plates with facial convection | 253–270 |
| E. Pan and F. Han: Green's functions for transversely isotropic piezoelectric multilayered half-spaces | 271–288 |
| V.K. Tewary: Elastostatic Green's function for advanced materials subject to surface loading | 289–304 |
| D.H.Y. Yen and J.V. Beck: Green's functions and three-dimensional steady-state heat-conduction problems in a two-layered composite | 305–319 |

Vol. 49 No. 4 August 2004

| | |
|--|---------|
| N. Bessonov, J.A. Pojman and V. Volpert: Modelling of diffuse interfaces with temperature gradients | 321–338 |
| M. Burger, V. Capasso and A. Micheletti: Optimal control of polymer morphologies | 339–358 |
| M.F. Perry and V.A. Volpert: Self-propagating free-radical binary frontal polymerization | 359–372 |
| D.J. Bekers, S.J.L. van Eijndhoven and A.A.F. van de Ven: Modeling and analysis of a long thin conducting stripline | 373–390 |
| A. Halanay, C.A. Safta, I. Ursu and F. Ursu: Stability of equilibria in a four-dimensional nonlinear model of a hydraulic servomechanism | 391–406 |
| Author index | 407 |
| Contents of Volume 49 | 409–410 |
