## **CORRIGENDUM**

'On the general theory of contained rotating fluid motions,' by H. P. GREENSPAN, J. Fluid. Mech. 22, 1965, pp. 449-462.

A minus sign multiplies  $\mathbf{n}_B$  in (3.4).

The increment of arc length, ds, in (3.8), (3.22) and (3.24) should be replaced by  $|\mathbf{n}_T \times \mathbf{n}_B| ds$ .

In the development from (4.17) to (4.19),  $\mathbf{n}_T$ ,  $\mathbf{n}_B$  and ds should be replaced by  $\mathbf{n}_T'$ ,  $\mathbf{n}_B'$  (with  $\mathbf{n}_T' = \mathbf{k} - \nabla f$ ;  $\mathbf{n}_B' = -\mathbf{k} - \nabla g$ ) and  $ds/|\mathbf{n}_T' \times \mathbf{n}_B'|$ .
