

VOLUME 18 2003

NUMBER 1, AUGUST 2003

Foreword for Volumes 18	i
Editorial	1
SCHEWE, G., MAI, H. AND DIETZ, G. Nonlinear effects in transonic flutter with emphasis on manifestations of limit cycle oscillations	3
POIREL, D. AND PRICE, S. J. Random binary (coalescence) flutter of a two-dimensional linear airfoil	23
QIN, Z. AND LIBRESCU, L. Aeroelastic instability of aircraft wings modelled as anisotropic composite thin-walled beams in incompressible flow	43
KÄMPCHEN, M., DAFNIS, A., REIMERDES, H.-G., BRITTEN, G. AND BALLMANN, J. Dynamic aero-structural response of an elastic wing model	63
ZIADA, S., NG, H. AND BLAKE, C. E. Flow excited resonance of a confined shallow cavity in low Mach number flow and its control	79
ZHENG, Z. C. Effects of flexible walls on radiated sound from a turbulent boundary layer	93
LUO, S. C., CHEW, Y. T. AND NG, Y. T. Hysteresis phenomenon in the galloping oscillation of a square cylinder	103
LIM, H.-C. AND LEE, S.-J. PIV measurements of near wake behind a U-grooved cylinder	119
HIRAMOTO, R. AND HIGUCHI, H. Vortex shedding behind a nonparallel pair of circular cylinders	131
Book Review	
GRAHAM, J. M. R. Flow Induced Vibrations in Engineering Practice	145
GRAHAM, J. M. R. Flow Around Circular Cylinders. Vol. 2: Applications	146

NUMBER 2, SEPTEMBER 2003

AMABILI, M. AND DE LANGRE, E. Preface	147
MOUSSOU, P. An excitation spectrum criterion for the vibration-induced fatigue of small bore pipes	149

CHEESEWRIGHT, R., CLARK, C., BELHADJ, A. AND HOU, Y.Y. The dynamic response of Coriolis mass flow meters	165
TIJSSELING, A.S. Exact solution of linear hyperbolic four-equation system in axial liquid-pipe vibration	179
FRANSEN, J.B. AND BORTHWICK, A.G.L. Simulation of sloshing motions in fixed and vertically excited containers using a 2-D inviscid σ -transformed finite difference solver	197
SCHOTTÉ, J.-S. AND OHAYON, R. Effect of gravity on a free-free elastic tank partially filled with incompressible liquid	215
AMABILI, M., SARKAR, A. AND PAÏDOUSSIS, M.P. Reduced-order models for nonlinear vibrations of cylindrical shells via the proper orthogonal decomposition method	227
LUCEY, A.D., SEN, P.K. AND CARPENTER, P.W. Excitation and evolution of waves on an inhomogeneous flexible wall in a mean flow	251

NUMBER 3–4, SEPTEMBER–OCTOBER 2003

DALTON, C. AND CHOW, Y.T. AND PAÏDOUSSIS, M. P. Preface	269
CHAPLIN, J. R. AND TEIGEN, P. Steady flow past a vertical surface-piercing circular cylinder	271
SO, R. M. C., LIU, Y. AND LAI, Y. G. Mesh shape preservation for flow-induced vibration problems	287
LAM, K., LI, J. Y. AND SO, R. M. C. Force coefficients and Strouhal numbers of four cylinders in cross flow	305
ALAM, MD. M., MORIYA, M. AND SAKAMOTO, H. Aerodynamic characteristics of two side-by-side circular cylinders and application of wavelet analysis on the switching phenomenon	325
ALAM, MD. M., SAKAMOTO, H. AND MORIYA, M. Reduction of fluid forces acting on a single circular cylinder and two circular cylinders by using tripping rods	347
KONSTANTINIDIS, E., BALABANI, S. AND YIANNESKIS, M. The effect of flow perturbations on the near wake characteristics of a circular cylinder	367
CHEN, L., TŪ, J. Y. AND YEOH, G. H. Numerical simulation of turbulent wake flows behind two side-by-side cylinders	387
BUNGE, U., GURR, A. AND THIELE, F. Numerical aspects of simulating the flow-induced oscillations of a rectangular bluff body	405

HASLINGER, K. H. Flow-induced vibration testing of replacement thermowell designs	425
SUMNER, D. AND AKOSILE, O. O. On uniform planar shear flow around a circular cylinder at subcritical Reynolds number	441
DALTON, C. AND ZHENG, W. Numerical solutions of a viscous uniform approach flow past square and diamond cylinders	455

NUMBER 5, NOVEMBER 2003

WEAVER, D. S. AND BRYAN, W. J., Preface	467
PETTIGREW, M. J. AND TAYLOR, C. E., Vibration analysis of shell-and-tube heat exchangers: an overview—Part 1: flow, damping, fluidelastic instability	469
PETTIGREW, M. J. AND TAYLOR, C. E., Vibration analysis of shell-and-tube heat exchangers: an overview—Part 2: vibration response, fretting-wear, guidelines	485
SWEENEY, C. AND MESKELL, C., Fast numerical simulation of vortex shedding in tube arrays using a discrete vortex method	501
LONGATTE, E., BENDJEDDOU, Z. AND SOULI, M., Methods for numerical study of tube bundle vibrations in cross-flows	513
HASSAN, M. A., WEAVER, D. S. AND DOKAINISH, M. A., The effects of support geometry on the turbulence response of loosely supported heat exchanger tubes	529
GOYDER, H. G. D., An assessment method for unstable vibration in multispan tube bundles	555
MESKELL, C. AND FITZPATRICK, J. A., Investigation of the nonlinear behaviour of damping controlled fluidelastic instability in a normal triangular tube array	573
ROTTMANN, M. AND POPP, K., Influence of upstream turbulence on the fluidelastic instability of a parallel triangular tube bundle	595
AKOSILE, O. O. AND SUMNER, D., Staggered circular cylinders immersed in a uniform planar shear flow	613
NISHIHARA, T., INADA, F., YASUO, A., MORITA, R., SAKASHITA, A. AND MIZUTANI, J., Turbulence-induced fluid dynamic forces acting on cross-shaped tube bundle in cross-flow	635
INADA, F., NISHIHARA, T., YASUO, A., MORITA, R., SAKASHITA, A. AND MIZUTANI, J., Self-excited vibration of cross-shaped tube bundle in cross-flow	651

NUMBER 6, DECEMBER 2003

ZIADA, S., Preface	663
GEVECI, M., OSHKAI, P., ROCKWELL, D., LIN, J.-C. AND POLLACK, M., Imaging of the self-excited oscillation of flow past a cavity during generation of a flow tone	665
LAFON, P., CAILLAUD, S., DEVOS, J. P. AND LAMBERT, C., Aeroacoustical coupling in a ducted shallow cavity and fluid/structure effects on a steam line	695
KUO, C.-H. AND JENG, W. I., Lock-on characteristics of a cavity shear layer	715
TAN, B. T., THOMPSON, M. C. AND HOURIGAN, K., Sources of acoustic resonance generated by flow around a long rectangular plate in a duct	729
HALL, J. W., ZIADA, S. AND WEAVER, D. S., Vortex-shedding from single and tandem cylinders in the presence of applied sound	741
MATSUMOTO, H., NISHIDA, K. AND SAITOH, K., Characteristics of aerodynamic sound sources generated by coiled wires in a uniform air-flow	759
STOLTENKAMP, P. W., ARAUJO, S. B., RIEZEBOS, H. J., MULDER, J. P. AND HIRSCHBERG, A., Spurious counts in gas volume flow measurements by means of turbine meters	771
MATVEEV, K. I., Energy consideration of the nonlinear effects in a Rijke tube	783
