

JOURNAL OF
FLUIDS AND
STRUCTURES

VOLUME 17
2003

VOLUME 17 2003

NUMBER 1, JANUARY 2003

Foreword for Volumes 17 and 18	i
LE MAÎTRE, O. P., SCANLAN, R. H. AND KNIO, O. M., Estimation of the flutter derivatives of an NACA airfoil by means of Navier–Stokes simulation	1
TANG, L., BARTELS, R. E., CHEN, P.-C. AND LIU, D. D., Numerical investigation of transonic limit cycle oscillations of a two-dimensional supercritical wing	29
GETE, Z. AND EVANS, R. L., An experimental investigation of unsteady turbulent-wake/boundary-layer interaction	43
NORBERG, C., Fluctuating lift on a circular cylinder: review and new measurements	57
FITZPATRICK, J. A., Flow/acoustic interactions of two cylinders in cross-flow	97
YADYKIN, Y., TENETOV, V. AND LEVIN, D., The added mass of a flexible plate oscillating in a fluid	115
CAI, Z. X. AND LUO, X. Y., A fluid–beam model for flow in a collapsible channel	125
LANGTHJEM, M. A. AND OLHOFF, N., Modal expansion of the perturbation velocity potential for a cantilevered fluid-conveying cylindrical shell	147
READ, D. A., HOVER, F. S. AND TRIANTAFYLLOU, M. S., Forces on oscillating foils for propulsion and maneuvering	163

NUMBER 2, FEBRUARY 2003

CHUCHEEPSAKUL, S., MONPRAPUSSORN, T. AND HUANG, T., Large strain formulations of extensible flexible marine pipes transporting fluid	185
TANG, D. M., YAMAMOTO, H. AND DOWELL, E. H., Flutter and limit cycle oscillations of two-dimensional panels in three-dimensional axial flow	225
ATTAR, P. J., DOWELL, E. H. AND TANG, D. M., A theoretical and experimental investigation of the effects of a steady angle of attack on the nonlinear flutter of a delta wing plate model	243
SUNG, J. AND YOO, J. Y., Near-wake vortex motions behind a circular cylinder at low Reynolds number	261
SCOLAN, Y.-M. AND KOROBKIN, A. A., Energy distribution from vertical impact of a three-dimensional solid body onto the flat free surface of an ideal fluid	275

PATITSAS, A. J., Booming and singing acoustic emissions from fluidized granular beds	287
MAKSIMOVIĆ, A., LUGOMER, S. AND MICIELI, I., Multisolitons on vortex filaments: the origin of axial tangling	317
GUILLAUME, D. W. AND LARUE, J. C., Investigation of peak frequencies in the flopping regime with a two-cylinder array	331
CARBERRY, J., SHERIDAN, J. AND ROCKWELL, D., Controlled oscillations of a cylinder: a new wake state	337

NUMBER 3, MARCH 2003

SUMNER, D. AND RICHARDS, M. D., Some vortex-shedding characteristics of the staggered configuration of circular cylinders	345
BAJ, F. AND DE LANGRE, E., Scaling of damping induced by bubbly flow across tubes	351
WANG, J., LAUCHLE, G. C. AND HOWE, M. S., Flow-induced force fluctuations on a sphere at high Strouhal number	365
ROCKWELL, D., LIN, J.-C., OSHKAI, P., REISS, M. AND POLLACK, M., Shallow cavity flow tone experiments: onset of locked-on states	381
SOROKIN, S. V. AND TEREENTIEV, A. V., Nonlinear statics and dynamics of a simply supported nonuniform tube conveying an incompressible inviscid fluid	415
INAYAT-HUSSAIN, J. I., KANKI, H. AND MUREITHI, N. W., On the bifurcations of a rigid rotor response in squeeze-film dampers	433
SHETA, E. F. AND HUTTSELL, L. J., Characteristics of F/A-18 vertical tail buffeting	461
ZHANG, H. J., ZHOU, Y., SO, R. M. C., MIGNOLET, M. P. AND WANG, Z. J., A note on the fluid damping of an elastic cylinder in a cross-flow	479
GUILLAUME, D. W. AND LARUE, J. C., The effect of multi-plate array spacing on grid-generated turbulence.	485

NUMBER 4, MARCH 2003

Publisher's announcement	i
BOCQUILLET, A., ICHCHOU, M. N. AND JEZEQUEL, L., Energetics of axisymmetric fluid-filled pipes up to high frequencies.	491

ERDEM, D., ROCKWELL, D., OSHKAI, P. AND POLLACK, M., Flow tones in a pipeline-cavity system: effect of pipe asymmetry	511
SARKAR, A. AND PAÏDOUSSIS, M. P., A compact limit-cycle oscillation model of a cantilever conveying fluid	525
BERTRAM, C. D. AND ELLIOTT, N. S. J., Flow-rate limitation in a uniform thin-walled collapsible tube, with comparison to a uniform thick-walled tube and a tube of tapering thickness	541
JESTER, W. AND KALLINDERIS, Y., Numerical study of incompressible flow about fixed cylinder pairs	561
WOLFE, D. AND ZIADA, S., Feedback control of vortex shedding from two tandem cylinders	579
HERMANS, A. J., The ray method for the deflection of a floating flexible platform in short waves	593
MATEESCU, D., Analysis of aerodynamic problems with geometrically unspecified boundaries using an enhanced Lagrangian method.	603
Conference Announcements	627

NUMBER 5, APRIL 2003

HOWE, M. S., On the infrasound generated when a train enters a tunnel	629
BATTISTIN, D., AND IAFRATI, A., Hydrodynamic loads during water entry of two-dimensional and axisymmetric bodies	643
LAM, K., LI, J. Y., CHAN, K. T. AND SO, R. M. C., Flow pattern and velocity field distribution of cross-flow around four cylinders in a square configuration at a low Reynolds number	665
ROBERTSON, I., LI, L., SHERWIN, S. J. AND BEARMAN, P. W., A numerical study of rotational and transverse galloping rectangular bodies	681
MIAU, J. J., WANG, J. T., CHOU, J. H. AND WEI, C. Y., Low-frequency fluctuations in the near-wake region of a trapezoidal cylinder with low aspect ratio	701
MIGEON, C., PINEAU, G. AND TEXIER, A., Three-dimensionality development inside standard parallelepipedic lid-driven cavities at $Re = 1000$	717
GLÜCK, M., BREUER, M., DURST, F., HALFMANN, A. AND RANK, E., Computation of wind-induced vibrations of flexible shells and membranous structures	739

NUMBER 6, MAY 2002

ALLEN, D. W. AND HENNING, D. L., Vortex-induced vibration current tank tests of two equal-diameter cylinders in tandem	767
KESER, H. İ. AND ÜNAL, M. F., Flow around a circular cylinder downstream of a blunt-based flat plate in tandem and staggered arrangements	783
FEENSTRA, P. A., WEAVER, D. S. AND NAKAMURA, T., Vortex shedding and fluidelastic instability in a normal square tube array excited by two-phase cross-flow	793
MOREIRA, M., ANTUNES, J. AND PINA, H., An improved linear model for rotors subject to dissipative annular flows	813
HOWE, M. S., IIDA, M. AND FUKUDA, T., Influence of an unvented tunnel entrance hood on the compression wave generated by a high-speed train	833
AKBARI, M. H. AND PRICE, S. J., Simulation of dynamic stall for a NACA 0012 airfoil using a vortex method	855
KRAL, R., KREUZER, E. AND SCHLEGEL, V., Elasto-dynamics of multihulls in nonlinear beam seas—a multibody–BEM approach	875

NUMBER 7, JUNE 2003

CHENG, L., ZHOU, Y. AND ZHANG, M. M., Perturbed interaction between vortex shedding and induced vibration	887
FUJISAWA, N. AND TAKEDA, G., Flow control around a circular cylinder by internal acoustic excitation	903
MURRAY, M. M. AND HOWLE, L. E., Spring stiffness influence on an oscillating propulsor	915
ERGIN, A. AND UĞURLU, B., Linear vibration analysis of cantilever plates partially submerged in fluid	927
SENGUPTA, T. K., KASLIWAL, A., DE, S. AND NAIR, M., Temporal flow instability for Magnus–Robins effect at high rotation rates	941
OZALP, C., PINARBASI, A. AND ROCKWELL, D., Self-excited oscillations of turbulent inflow along a perforated plate	955
EPUREANU, B. I., A parametric analysis of reduced order models of viscous flows in turbomachinery	971
GENNARETTI, M. AND IEMMA, U., Aeroacoustoelasticity in state-space format using CHIEF regularization	983

GEFROH, D., LOTH, E., DUTTON, C. AND HAFENRICHTER, E., Aeroelastically deflecting flaps for shock/boundary-layer interaction control	1001
DOWNES, K. AND ROCKWELL, D., Oscillations of a vertical elastically mounted cylinder in a wave: imaging of vortex patterns	1017
Special Brief Note	
JAUVTIS, N. AND WILLIAMSON, C. H. K., Vortex-induced vibration of a cylinder with two degrees of freedom	1035

NUMBER 8, JULY 2003

PARK, C. W. AND LEE, S. J., Flow structure around two finite circular cylinders located in an atmospheric boundary layer: side-by-side arrangement	1043
LAM, K. M. AND TO, A. P., Interference effect of an upstream larger cylinder on the lock-in vibration of a flexibly mounted circular cylinder	1059
LYONS, G. J., VANDIVER, J. K., LARSEN, C. M. AND ASHCOMBE, G. T., Vortex induced vibrations measured in service in the Foinaven dynamic umbilical, and lessons from prediction	1079
BORISYUK, A. O., Model study of noise field in the human chest due to turbulent flow in a larger blood vessel	1095
HOWE, M. S., Design of a tunnel-entrance hood with multiple windows and variable cross-section	1111
HÉMON, P. AND SANTI, F., Applications of biorthogonal decompositions in fluid–structure interactions	1123
GETE, Z. AND EVANS, R. L., A computational investigation of unsteady turbulent wake–boundary-layer interaction	1145
