

List of all conference presentations

Invited Lectures

- M. P. Païdoussis (Opening Lecture) p. 741
Real-life experiences with flow-induced vibration
- M. Braza, R. Perrin & Y. Hoarau p. 757
Turbulence properties in the cylinder wake at high Reynolds numbers
- A. Laneville p. 773
Experiments on vortex-induced vibrations of a long flexible cylinder vibrating freely in air flow: the critical curve and the existence of the 2P and 2S modes
- E. de Langre p. 783
Some basic ingredients of VIV and VIW using wake oscillator models
- P. A. Monkewitz & M. Provansal
Laminar vortex shedding from cones revisited
- H. Nagib
Active control of wakes—from the laboratory to flight tests
- M. C. Thompson p. 793
Wake transition of two-dimensional cylinders and axisymmetric bluff bodies
- M. S. Triantafyllou, J.M. Dahl & F. S. Hover p. 807
High Reynolds number experiments on vibrating cylinders in cross-flow

Vortex-Induced Vibrations

- S. Atluri, V. Rao & C. Dalton
A numerical investigation of the near wake structure in the variable frequency forced oscillation of a circular cylinder
- G.R. Assi, J.R. Meneghini, J.A.P. Aranha, P.W. Bearman, B.S. Carmo & E. Casaprima p. 819
Experimental investigation of flow-induced vibrations interference between two circular cylinders
- P.W. Bearman & M. Branković p. 829
Measurements of transverse forces on cylinders undergoing vortex-induced vibration
- P. Browne, J. Carberry, K. Hourigan & J. Sheridan
Study of a tethered cylinder in a free stream
- C. Eloy, C. Souilliez & L. Schouveiler
Flutter instability of filaments and flags
- A.L.C. Fajarra, A.N. Simos, C.P. Pesce & P.C.S. Vieira
Vortex-induced vibration of a seawater in-taker pipe used in semi-submersible platforms: experimental results
- R.N. Govardhan & C.H.K. Williamson
Revealing the effect of Reynolds number on vortex-induced vibrations using controlled negative and positive damping
- M. Horowitz & C.H.K. Williamson p. 837
Dynamics of a rising and falling cylinder
- J.T. Klamo, A. Leonard & A. Roshko p. 845
The effects of damping on the full amplitude and frequency response of a freely vibrating cylinder in cross-flow

- S. Kocabiyik & Q.M. Al-Mdallal
The wake flow generated by an oscillating cylinder with two degrees of freedom
- M. Lazarkov & J. Revstedt
Numerical study of flow-induced vibration of a confined circular cylinder
- J.S. Leontini, M.C. Thompson & K. Hourigan p. 857
The beginning of branching behaviour during vortex-induced vibration at 2-D Reynolds numbers
- T.K. Prasanth, S. Behara, S.P. Singh, R. Kumar & S. Mittal p. 865
Effect of blockage on vortex induced vibrations at low Re
- C.K. Morooka, H.Y. Kubota & H. Suzuki
A study on the influence of wave's kinematics in the dynamic behavior of a two-dimensional cylinder
- T.L. Morse & C.H.K. Williamson p. 877
Employing controlled vibrations to predict fluid forces on a freely vibrating cylinder
- T. Nishihara, S. Kaneko & T. Watanabe
Clarification of relations between wake behaviors and fluid excitation force of a circular cylinder oscillated in the streamwise direction at low cylinder amplitudes
- J. Sælevik, A. Sanchis, A. Jensen & J. Grue
An experimental investigation of VIV on freely vibrating smooth and straked cylinders
- F. Saltara & J.R. Meneghini
Simulation of the 2D and 3D flows around a free-oscillating cylinder with one degree of freedom
- A. Sanchis, G. Sælevik, A. Jensen & J. Grue
A study of vortex-induced vibrations in two degrees of freedom on a spring-mounted circular cylinder with PIV
- B.E. Stewart, J.S. Leontini, K. Hourigan & M.C. Thompson
A numerical survey of wake modes and energy transfers for an oscillating cylinder at $Re = 200$
- H. Verma, P. Hagedorn & T. David
Computing the power imparted by the fluid on an oscillating cylinder in cross-flow: some results and many questions
- R.H.J. Willden, T.E. Kendon & J.M.R. Graham p. 885
Aspects of the transverse Vortex-Induced Vibrations of low mass ratio elastically supported circular cylinders
- M.H. Yu & A.T. Hsin
Flow-induced vibration and hysteresis phenomenon of a high-mass-ratio circular cylinder in shear flow

VIV of a Flexible Cylinder

- X. Li, N. Bose, L. Zhu, E. Baddour & D. Spencer
An experiment on the modal parameters of a flexible model riser
- C. Brücker & M. Smith
Wake interaction of arrays of flexible cylinders in boundary layer flows
- G.K. Furnes
Computing vortex-induced vibrations of flexible cylindrical structures using inline-cross flow coupled van der Pol oscillators
- F.J. Huera Huarte, P.W. Bearman & J.R. Chaplin. p. 897
On the force distribution along the axis of a flexible circular cylinder undergoing multi-mode vortex-induced vibrations
- D. Lucor, H. Mukundan & M.S. Triantafyllou p. 905
DNS-based multi-modal decomposition of VIV
- C.P. Pesce & A.L.C. Fajarra
The 'super-upper branch' VIV response of flexible cylinders

Flow Around Fixed or Vibrating Cylinders

- M.S. Adaramola, O.G. Akinlade, D. Sumner, D.J. Bergstrom & A.J. Schenstead p. 919
Turbulent wake of a finite circular cylinder
- J.A.P. Aranha, C.A. Martins, J.R. Meneghini, B.S. Carmo & L.M.Y. Silveira
Flow around a circular cylinder: steady solution, stability and Ginzburg–Landau equation

- L. Baranyi
Abrupt changes in the root-mean-square values of force coefficients for an orbiting cylinder in uniform stream
- S. Dong & G.E. Karniadakis
A DNS study of cylinder shear layer instability
- J.R. Elston, J. Sheridan & H.M. Blackburn
Three-dimensional Floquet stability analysis of the flow produced by an oscillating circular cylinder in quiescent fluid
- R.B. Flatschart, J.R. Meneghini, C.A. Martins, F. Saltara & E. Casaprima
Parallel simulations of flow about high-aspect ratio cylinders employing MPI
- E. Konstantinidis, S. Balabani & M. Yianneskis
On the timing of vortex shedding from a circular cylinder and its stability in an incident flow with velocity oscillations
- S. Peppas, L. Kaiktsis & G.S. Triantafyllou
Simulation of flow past a circular cylinder with inflow shear
- M. Provansal, C. Souilliez & L. Schouveiler
Instability of the wake of a short cylinder with free ends

Wakes of Bluff Bodies

- Y.D. Afanasyev & V.N. Korabel
Wakes and vortex streets generated by translating force and force doublet: laboratory experiments
- H. Aref, M.A. Stremmer & F.L. Ponta p. 929
Exotic vortex wakes—point vortex solutions
- S. Gallet, P. Meunier & G.R. Spedding p. 941
Stratified wakes of towed and propelled bluff bodies
- T. Goossens, J.F. Beaudoin, L. Doris & J. Hureau
Dynamic forces due to unsteady flow past a square cylinder
- H. Higuchi, P. van Langen, H. Sawada & C.E. Tinney p. 949
Axial flow over a blunt circular cylinder with or without shear layer reattachment
- K. Hourigan, T. Leweke, M.C. Thompson & A. Cheung
Flow around an impulsively arrested circular cylinder
- T. Leweke, M.C. Thompson & K. Hourigan p. 961
Dynamics of the flow around an impacting sphere
- F.L. Ponta & H. Aref
A rationale for the Strouhal–Reynolds number relationship for bluff body wakes
- G.J. Sheard, M.C. Thompson & K. Hourigan
Non-axisymmetric spheroids: wake transition and loss of planar symmetry
- T. Tamura, P.P.N.L. Dias & Y. Ono
Turbulence effects on aerodynamic unstable oscillations of a short rectangular cylinder

Wake Control, Manipulation, and Interference

- J.L. Aider, J.F. Beaudoin & J.E. Wesfreid
Drag reduction of a 3D bluff body using vortex generators
- J.F. Beaudoin, O. Cadot, J.L. Aider & J.E. Wesfreid p. 973
Bluff-body drag reduction by extremum seeking control
- B.S. Carmo & J.R. Meneghini p. 979
Numerical investigation of the flow around two circular cylinders in tandem
- J.M. Chen, C.H. Liu & C.F. Wu
Bistable flow around two diamond cylinders in a tandem arrangement
- B. Galletti, F. Gallizio, L. Zannetti & A. Iollo
Inviscid detached channel flows past wall-mounted plates
- Y. Hoarau, M. Braza, A.J. Revell, D. Laurence & A. Barthet
Physical analysis and modelling of turbulent unsteady flows around a wing

R. James & T. Farrant

Hydrodynamic behaviour of a multi-cylinder structure

C.H. Kuo & S.M. Chein

Flow characteristics behind two circular cylinders in tandem arrangement at Reynolds number 1000

J. Paik & F. Sotiropoulos

Coherent vortex shedding in turbulent flow past a long surface-piercing block at the side of a shallow open channel

T. Tsukiji & Y. Matsubara

Simulation of flow past a rotating circular cylinder using the vortex method

A.B. Wang, M.D. Chou, R.H. Yen, C.Y. Wen & P. Lin

Numerical and experimental investigations on the control cylinder application in the wake of circular cylinder at low Reynolds number

Vehicle Aerodynamics

E. Guilmineau & R. Duvigneau

Drag reduction by flow control for the Ahmed body

M. Okada, J. Sheridan & M.C. Thompson

Effect of width-to-height ratio on wake structures of simplified vehicle geometry

M. Rouméas, P. Gillieron & A. Kourta

Analysis and control of the near-wake flow around a simplified car geometry

E. Wassen & F. Thiele

Numerical investigation of the unsteady wake structure behind a generic vehicle
