

Acknowledgements

We express immense appreciation for the support of this conference from the following organisations:

The Chairmen would like to express immense thanks to *Tom Swean* (US-ONR) and *Jim Pitton* (ONR Global) of the Office of Naval Research for their involvement in this and previous BBVIV conferences. It is very much the impetus given to these fields of research by Tom Swean and the Ocean Engineering Division of ONR that has enabled this series of conferences to flourish.

The Chairmen would also like to express gratitude to *CNPq*, *PETROBRAS*, *SGI* and *ESSS*, for their enthusiasm to be involved, to support all the Invited Speakers, and to enable a contingent of their participants to take part in BBVIV-5.

The Chairmen would also like to thank very much the cheerful and extremely efficient help of *Tim Morse* (Cornell University) in setting up the conference academic web site. Many thanks both to Tim and to *Matt Horowitz* for their work in preparing (in conjunction with Charles and Thomas) the BBVIV-5 Book of Papers.

We also acknowledge the effort of “Julio’s helpers” at Poli, USP and FUSP: *Ivone Margarido*, *Regina Zemella*, *Silvia Bonassa*, *Cristina Borba* and *Kem Yoshida*. We thank too *Jacqueline Dallal Mikahil* of BeHappy and her team, who have thrown themselves into the organisation of the hotels and registrations, and excursions.

Finally, we have also been very grateful for the wonderful Scientific Committee, and it was marvelous to have welcomed many of you in Costa do Sauípe at the event.
