

Erratum

Effect of the External Refractive Index on Fluorescence Kinetics of Perylene in Human Erythrocyte Ghosts. E. P. Petrov, J. V. Kruchenok, and A. N. Rubinov (1999) *J. Fluoresc.* **9**, 111–121.

Due to a technical error during manuscript preparation, an incorrect excitation wavelength appeared in the legends to Figs. 3, 4, and 5. The correct excitation wave-

length is $\lambda_{\text{ex}} = 390$ nm, as stated in Optical Measurements, under Materials and Methods (pp. 116–117).

A misprint occurred in the last sentence of the ninth paragraph under Results and Discussion (p. 117): “absorption dipole moment” should, of course, read “emission dipole moment.”

The misprints are of a technical character and by no means affect the results and conclusions of the article.
